INTERNATIONAL TRADE COMMISSION

[Investigation No. TA-201-22]

FRESH CUT FLOWERS

Report to the President

AUGUST 1, 1977.

To the President: In accordance with section 201(d)(1) of the Trade Act of 1974 (88 Stat. 1978), the U.S. International Trade Commission herein reports the results of an investigation made under section 201(b)(1) of that act, relating to fresh cut flowers.

The investigation to which this report relates was undertaken to determine whether—cut flowers, fresh, provided for in item 192.20 of the Tariff Schedules of the United States, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported articles.

The investigation was instituted on February 12, 1977, upon receipt of a petition filed on January 31, 1977, by the Growers Division of the Society of American Florists and Ornamental Horticulturists.

Notice of the institution of the investigation and of the dates when and cities where public hearings would be held was issued on February 16, 1977. Notice of the starting times of the public hearings, of the buildings wherein they would be held, and of a change of date and city for the Florida hearing was issued on March 17, 1977. The notices were posted at the Commission's offices in Washington, D.C., and New York City, and were published in the FEDERAL REGISTER on February 22 and March 22, 1977, respectively (42 FR 10347 and 15474). The public hearings were duly held at the times and places announced. All interested parties were afforded an opportunity to be present, to produce evidence, and to be heard.

The information contained in this report was obtained from fieldwork, from questionnaires sent to domestic growers and importers, and from the Commission's files, other Government agencies, and evidence presented at the hearings

and in briefs filed by interested parties.

A transcript of the hearings and copies of briefs submitted by interested parties in connection with the investigation are attached.[1]

DETERMINATION OF THE COMMISSION

On the basis of its investigation, the Commission determines (Vice Chairman Parker not participating) that cut flowers, fresh, provided for in item 192.20 of the Tariff Schedules of the United States, are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

VIEWS OF CHAIRMAN DANIEL MINCHEW AND COMMISSIONERS GEORGE M. MOORE, CATHERINE BEDELL, AND ITALO H. ABLONDI

On January 31, 1977, the Growers Division of the Society of American Florists and Ornamental Horticulturists petitioned the United States International Trade Commission for import relief pursuant to section 201 of the Trade Act of 1974. Following receipt of the petition, the Commission instituted an investigation on February 12, 1977, to determine whether cut flowers, fresh, provided for in item 192.20 of the Tariff Schedules of the United States, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

Section 201(b)(1) of the Trade Act requires that each of the following conditions must be satisfied before the Commission can make an affirmative determination.

(1) Imports of an article into the United States are increasing (either actually or relative to domestic production);

(2) The domestic industry producing an article like or directly competitive with the imported article is being seriously injured or threatened with serious injury; and

(3) Increased imports are a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competive with the imported article.

DETERMINATION

On the basis of information obtained in the present investigation, we have determined that fresh cut flowers, provided for in item 192.20 of the Tariff Schedules of the United States, are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article. Because our negative determination is based on the lack of evidence supporting the "serious injury" criterion, it is unnecessary to discuss the other criteria of section 201 of the Trade Act of 1974.

DOMESTIC INDUSTRY

For the purpose of this investigation we have concluded that the relevant domestic industry consists of those facilities in the United States devoted to the production of fresh cut flowers.

SERIOUS INJURY OR THE THREAT THEREOF

Evidence developed during the investigation shows that the domestic producers of fresh cut flowers are being injured by imported fresh cut flowers. However, in order for the requirement of section 201 to be met, such injury must be "serious injury." When making a determination of serious injury, the Commission is directed by the Trade Act to take into account all economic factors which it considers relevant, including the significant idling of productive facilities in the industry, the inability of a significant number of firms to operate at a reasonable level of profit, and significant unemployment or underemployment within the industry. The act further directs that the threat of serious injury is to be considered in light of a decline in sales, a higher and growing inventory, and a downward trend in production, profits, wages, or employment. In our opinion, imports of fresh cut flowers are not causing injury to the domestic industry of the magnitude necessary for an affirmative determination in this case. The evidence supporting this conclusion is discussed below.

The facts do not support a finding that there is significant idling of productive facilities in the domestic industry. In the period 1972–76, the wholesale value of domestic fresh cut flower production increased by 12 percent—from $252 million to $283 million. During the same period, U.S. exports of fresh cut flowers more than tripled in value, rising from $4.3 million to nearly $14 million. The acreage devoted to fresh cut flower production was the same in 1976 as it was in 1972.

There is no significant unemployment (or underemployment) in the domestic industry. The average annual number of employees increased by 6 percent over the period 1972–76.

The evidence regarding profitability of the domestic fresh cut flower industry does not support a finding of serious injury. Responses to the Commission questionnaire show that sales have increased every year since 1972 and that despite a decline in average operating margins for the industry from 1972 to 1974, such margins rose from 4.9 percent in 1974 to 7.7 percent in 1976. Since 1974, profit margins have increased by 57 percent. In addition, prices of imported fresh cut flowers have generally been the same as or higher than prices received by U.S. growers for the same flower type, thereby negating any tendency toward price depression. The foregoing facts indicate that the average operating profit margin for the industry is healthy, and the trend for such margins is positive at this time.

The trends evidenced in the above-mentioned factors indicate that at this time there is no threat of serious injury. Moreover, we note that a recent Department of State telegram from the U.S. Embassy in Bogota, Colombia, reports that the Minister of Agriculture for Colombia is attempting to implement a program whereby carnation and pompon chrysanthemum exports to the United States would be limited to be consistent with the absorptive capacity of the U.S. market.

CONCLUSION

On the basis of the considerations discussed above, we conclude that imports of fresh cut flowers are not a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article. Our determination is, therefore, in the negative.

The petitioner in this proceeding has recommended that the United States negotiate an orderly marketing agreement with Colombia to restrict the volume of fresh cut flower imports entering the United States. We do not believe that the Commission has the authority to recommend the negotiation of orderly marketing agreements to the President as a remedy in section 201 cases. However, it seems that in light of the market conditions in the U.S. industry, some form of marketing agreement may be given consideration by the President under his authority to negotiate trade agreements.[2]

By order of the Commission.

Issued: August 2, 1977.

KENNETH R. MASON,
Secretary.

[FR Doc.77-22562 Filed 8-4-77;8:45 am]

[1] Attached to the original report sent to the President. These materials are available for inspection at the U.S. International Trade Commission, except for information submitted in confidence.

[2] Commissioner Ablondi states that in light of the unanimous negative determination made by the Commission in this investigation, he does not join in the recommendation that the President give consideration to "some form of marketing agreement."

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St., NW., Washington, D.C. 20213.

Signed at Washington, D.C. this First day of August, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training

Applications received during the week ending July 29, 1977

Name of applicant	Location of enterprise	Principal product or activity
Sterling Alloy Casting Corp	Rock Falls, Ill.	Manufacture of grey iron castings.
McClure Sawmill Co.	McClure, Ill.	Sawmill and stave mill.
Pentajay Co.	The Plains, Ohio	Retail sales—grocery store.
Brooks Inc.	Sun Prairie, Wis.	Retail sale and service of construction equipment
Viking Coca Cola Bottling Co.	St. Cloud, Minn.	Manufacture of soft drinks.
Bean Rouge Manor, Inc.	Bushnell, Ill.	Nursing facility.
A. J. Hochstettler	Wharton, Ohio	Grain elevator.
Krakauer Bros., Inc.	Breckville, Ohio	Manufacture of pianos.
Monon & Evans Co.	Monon, Ind.	Trailer manufacture facility.
Bedford County Press	Everett, Pa.	Newspaper printing and publishing
Jefferson Associates, Ltd.	Charles Town, W. Va.	Nursing home care.
Spring Hope Grocery Co., Inc.	Spring Hope, N.C.	Retail sale of fuel oil.
Gaby Hosiery Mill (tenant of the city of Dandridge).	Dandridge, Tenn.	Knitting and finishing of hosiery.
Wilson's Ice Cream Co., Inc.	Lumberton, N.C.	Manufacture of ice cream and frozen dessert products.
Tri-County Farmers Co-op.	Ipava, Ill.	Provides grain storage and marketing services and farm supplies to farmers.
Ross Seed Co.	Fisher, Minn.	Certified seed and custom cleaning.
Coca Cola Bottling Co.	Portland, Ind.	Manufacture of coke and allied products; wholesale candy and tobacco.
Latham Asphalt & Paving Co., Inc.	Ludington, Mich.	Manufacture of bituminous concrete and ready mixed concrete.
Industrial Metal Works, Inc.	Amelia, La.	Sheet metal fabrication and specialized metal design
Superior Concrete Accessories, Inc.	Parsons, Kans.	Manufacture of wire reinforcements for concrete.
Eddy County Equipment, Inc.	New Rockford, N.D.	Sales and service of agricultural equipment.
Superior Concrete Accessories, Inc.	Parker, Ariz.	Manufacture of wire reinforcements for concrete.
Brookstone Co., Inc.	Peterborough, N.H.	Retail sales of hardware homewares and miscellaneous gifts.

EXTENDED BENEFITS AND FEDERAL SUPPLEMENTAL BENEFITS

Ending of Extended Benefit Period and Federal Supplemental Benefit Period in Massachusetts

This notice announces the ending of the Extended Benefit Period and the Federal Supplemental Benefit Period in the State of Massachusetts, effective on August 6, 1977.

BACKGROUND

The Federal-State Extended Unemployment Compensation Act of 1970 (title II of Public Law 91–373; 84 Stat. 695, 708) created a program of extended unemployment benefits (referred to as Extended Benefits) as a permanent part of the Federal-State Unemployment Compensation Program, for unemployed individuals who have exhausted their rights to regular unemployment benefits under State and Federal unemployment compensation laws. Extended Benefits are payable during an Extended Benefit Period, which is triggered on in a State when unemployment in the State or in all States collectively reaches the high levels set in the Act. During an Extended Benefit Period the maximum amount of Extended Benefits which is payable to eligible individuals is up to 13 weeks. An extended Benefit Period commenced in the State of Massachusetts on September 22, 1974.

The Emergency Unemployment Compensation Act of 1974 (Public Law 93-572, enacted December 31, 1974) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular benefits and Extended Benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which is payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Massachusetts on January 5, 1975.

The statutes also provide that benefit periods in a State will trigger off when unemployment in the State is no longer at the high levels set in the Acts. A benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator. In Massachusetts both the Extended Benefit Period and the Federal Supplemental Benefit Period have triggered off.

DETERMINATION OF "OFF" INDICATORS

The employment security agency of the State of Massachusetts has determined in accordance with the applicable statutes and regulations that the average rate of insured unemployment in the State for the period consisting of the week ending on July 16, 1977, and the immediately preceding twelve weeks, was less than 5 percent.

Therefore, I have determined in accordance with the applicable statutes and regulations, and as authorized by the Secretary of Labor's Order 4–75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was an Extended Benefit "off" indicator and a Federal Supplemental Benefit "off" indicator in the State of Massachusetts for the week ending on July 16, 1977, and that both the Extended Benefit Period and the Federal Supplemental Benefit Period in that State terminates on August 6, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Extended Benefits or Federal Supplemental Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end

of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State. There will not be an additional eligibility period of Extended Benefits.

Individuals currently filing claims for Extended Benefits or Federal Supplemental Benefits will receive written notices from the Massachusetts Division of Employment Security of the end of the Extended Benefit Period and the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Extended Benefits and Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Persons who wish information about their rights to Extended Benefits and Federal Supplemental Benefits in the State of Massachusetts should contact the nearest State Employment Office of the Massachusetts Division of Employment Security in their locality.

Signed at Washington, D.C., on August 2, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

MIGRANT AND SEASONAL FARMWORKER PROGRAMS

Fiscal Year 1978 State Planning Estimates Programs and Areas To Be Renewed Without Competition and Areas Open for Competition

AGENCY: Employment and Training Administration, Labor.

ACTION: Correction.

SUMMARY: This notice is a correction of areas to be renewed without competition for Fiscal Year 1978 funds provided under section 303 of the Comprehensive Employment and Training Act (CETA) of 1973 as amended.

SUPPLEMENTARY INFORMATION: Pursuant to 29 CFR 97.211, the Employment and Training Administration announced areas to be renewed without competition by a notice of the Federal Register of July 8, 1977, Volume 42, No. 131, page 35330. Due to a computer error in failing to enter plan information from an approved modification, United Migrant Opportunity Services of Wisconsin was erroneously omitted from the list of areas to be renewed without competition. United Migrant Opportunity Services will not have to compete for Fiscal Year 1978 funds for the State of Wisconsin provided their performance continues during the grant negotiation period to be at an acceptable level.

Signed at Washington, D.C., this 25th day of July 1977.

PAUL A. MAYRAND,
Chief, Division of Farmworker Programs.

NATIONAL ENDOWMENT FOR THE ARTS AND THE HUMAITIES

ADVISORY COMMITTEE FELLOWSHIPS PANEL

Notice of Meeting

AUGUST 1, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended) notice is hereby given that a meeting of the Fellowships Panel will be held at 806 15th Street, NW., Washington, D.C. 20506, in room 1130 from 9:30 am. to 5:30 pm. on August 29.

The purpose of the meeting is to review 1978 Summer Seminar applications from prospective seminar directors in the field of Anthropology/Sociology submitted to the National Endowment for the Humanities for projects beginning in the summer of 1978.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Acting Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 28, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, N.W., Washington, D.C. 20506, or call area code 202-724-0256.

JOHN W. JORDAN,
Advisory Committee Management Officer.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

ADVISORY GROUP ON WHITE HOUSE INFORMATION SYSTEMS

Establishment

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), it is hereby determined that the establishment of the Adivsory Group on White House Information Systems is necessary, appropriate, and in the public interest in connection with the performance of the duties imposed upon the Director, Office of Sciece and Technology Policy (OSTP) by the National Science and Technology Policy, Organization, and Priorties Act of 1976. This determination follows consultation with the Office of Management and Budget (OMB), pursuant to Section 9(a)(2) of the Federal Advisory Committee Act and OMB Circular No. A–63, Revised.

1. NAME OF GROUP: Advisory Group on White House Information Systems.

2. PURPOSE AND FUNCTION: The Office of Science and Technology Policy, in accordance with the statutory mandate to advise the President and to analyze and interpret significant developments and trends in science and technology, will be identifying the information systems needs and the impact of technological advances in information and data handling as these might support the decision processes of the White House and the Executive Office of the President. The work of the Advisory Group will be based upon inputs from the relevant departments and earlier work carried out by other organizations in the Executive Branch including the Reorganization Team. The Advisory Group will consider the implications for policy initiatives that may be appropriate to exploit advances that may be identified, but it will not consider or propose specific computer and supporting systems or the procurement of same. The Group will submit a report and briefing for appropriate officials in the Executive Branch upon completion of its activities.

3. EFFECTIVE DATE OF ESTABLISHMENT AND DURATION: The Advisory Group is established to provide advice to the Director of the Office of Science and Technology Policy and to the Special Assistant to the President for Budget and Organization, and is established until December 1, 1977. Due to the need to provide a prompt followup to related efforts by the President's Reorganization Project, the Office of Management and Budget has agreed to waive the requirement for a 15-day delay between the publication of this notice and the filing of the charter for this Advisory Group.

4. MEMBERSHIP: Membership of the Advisory Group on White House Information Systems will consist of approximately six members who are particularly knowledgeable in the areas of information and automation.

5. ADVISORY GROUP OPERATION: The Advisory Group on White House Information Systems will operate in accordance with provisions of the Federal Advisory Committee Act (Pub. L. 92–463), OSTP policy and procedures, OMB Circular No. A–63, Revised, and other directives and instructions issued in implementation of the Act.

FRANK PRESS,
Director.

DEPARTMENT OF STATE

Agency for International Development

JOINT RESEARCH COMMITTEE OF THE BOARD FOR INTERNATIONAL FOOD AND AGRICULTURAL DEVELOPMENT

Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(a)(2), P.L. 92–463, Federal Advisory Committee Act, notice is hereby given of the second meeting of the Joint Research Committee of the Board for International Food and Agricultural Development on August 25 and 26, 1977.

The purpose of this two-day meeting is: To review research priorities; consider a proposal for a nutrition project; review other project proposals; review the status of Planning Grants; review and update the list of eligible universities under Title XII; and review the questionnaire to be sent to the university community to expand the information on university interests and capabilities for participating in the Title XII program.

The meeting will begin each day at 9 a.m., will adjourn at 5:30 p.m., and will be held at the Ramada Inn, Rosslyn, 1900 Fort Myer Drive, Arlington, Virginia. The meeting room designation will be posted in the lobby of the Inn on each day of the meeting. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. Erven J. Long, Associate Assistant Administrator of the Technical Assistance Bureau, is designated as A.I.D. Advisory Committee Representative at this meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at 701–235–9001.

Dated: July 30, 1977.

ERVEN J. LONG,
Aid for International Development, Advisory Committee Representative, Joint Research Committee, Board for International Food and Agricultural Development.

INTERSTATE COMMERCE COMMISSION

[Notice No. 452]

ASSIGNMENT OF HEARINGS

AUGUST 1, 1977.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. MC 116677 (Sub-No. 3), Sheridan Travel Bureau, Inc., now being assigned November 2, 1977 (3 days), at Buffalo, N.Y., in a hearing room to be later designated.

MC 116519 (Sub-No. 40), Frederick Transport Ltd., now being assigned November 7, 1977 (3 days), at Buffalo, N.Y., in a hearing room to be later designated.

MC 139579 (Sub-No. 4), George H. Golding, Inc., now being assigned November 10, 1977 (2 days), at Buffalo, N.Y., in a hearing room to be later designated.

MC-F-13140, Marty's Express, Inc.—Purchase—Kruse Trucking Co., MC 39249 (Sub-No. 19), Marty's Express, Inc., now being assigned October 3, 1977 (1 day), for hearing in Philadelphia, Pa., in a hearing room to be later designated.

MC 141776 (Sub-No. 4), Foodtrain, Inc., now being assigned October 4, 1977 (1 day), in Philadelphia, Pa., in a hearing room to be later designated.

MC 142785 (Sub-No. 1), Brotherly Love Express, Inc., now being assigned October 5, 1977 (1 day), in Philadelphia, Pa., in a hearing room to be later designated.

MC 143173, Dependable Delivery Service, Inc., now being assigned October 6, 1977 (2 days), in Philadelphia, Pa., in a hearing room to be later designated.

H. G. HOMME, Jr.,
Acting Secretary.

[No. 36589]

CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO. AND UNIT-TRAINSHIP, INC.

Joint Petition—Experimental Piggyback Train Service

Present: Dale W. Hardin, Commissioner, to whom this matter has been assigned for action thereon.

By petition filed May 12, 1977, the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (Milwaukee) and Unit-Trainship, Inc. (UTI) seek an order declaring the lawfulness of the proposed innovative service described in their petition or a finding of exemption under section 12(1)(b) of the Interstate Commerce Act. Replies were filed June 9, 1977, by the Burlington Northern, Inc., and June 13, 1977, by the Union Pacific Railroad Co.

The Milwaukee and UTI propose to establish dedicated nonstop piggyback train service on a round-trip basis with established mutually agreed upon schedules and subject to existing railroad rates applicable on Freight, All Kinds, between Chicago, Ill., on the one hand and Seattle/Tacoma, Wash., and Washington/Portland, Oreg., on the other. UTI, acting in the capacity of a broker, contractually undertakes to provide the Milwaukee with a minimum of 60 loaded or empty trailers or containers three times a week in each direction. In return for the guarantee of a minimum fixed amount of revenue for each 60 unit train, UTI receives a commission equal to 10 percent of the applicable tariff rate applying to the revenue traffic carried by the Milwaukee pursuant to the agreement. UTI receives 20 percent of the tariff rate for revenue traffic offered but not accommodated by the Milwaukee, excluding empty units tendered by UTI to satisfy minimum guarantees. In addition to promoting traffic UTI will prepare a comprehensive manifest for the Milwaukee and take over billing and collecting. Each Monday the Milwaukee will submit a statement of charges and UTI will undertake to remit payment within the specified period less its compensation and credit for each unit not accommodated and for failure to accommodate units.

The Milwaukee on its part agrees to provide and control all rail services necessary to accommodate traffic generated by UTI in accordance with the terms of the agreement. It will pay penalties for its failure to accommodate the agreed upon level of generated traffic, and it will retain sole liability for traffic tendered to it through the agreement that is lost, damaged, stolen or delayed.

Because of the novelty of the experimental proposal, interested persons are urged to participate in the development of a record in this proceeding. All statements should address the underlying lawfulness of the proposal with respect to the applicable provisions of the Interstate Commerce Act, 49 U.S.C. 1 et seq., the Elkins Act, 49 U.S.C. 41(1), and such issues as: (1) the status of UTI, (2) whether the proposal constitutes a special service such as would require tariff publication, and (3) the penalty aspect of the agreement.

It is ordered: Pursuant to section 5(e) of the Administrative Procedure Act, 5 U.S.C. 554(e), and in the exercise of the Commission's sound discretion thereunder, this petition for a declaratory order is granted to determine the lawfulness of the proposed arrangement between petitioners.

Petitioners, the Burlington Northern Inc., and the Union Pacific Railroad Co. are made parties to this proceeding. All other persons desiring to participate shall make such fact known by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before August 25, 1977. As soon as practicable the Commission will serve a list of the names and addresses of all persons whom service of statements under the Commission's modified procedure shall be made and the schedule to be followed.

A copy of this order shall be served upon petitioners, the Burlington Northern Inc., and the Union Pacific. Copies shall also be deposited in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and given to the public along with a copy of the petition and the attached draft agreement by delivery to the Director, Office of the Federal Register for publication.

Dated at Washington, D.C., this 27th day of July, 1977.

By the Commission, Commissioner Hardin.

H. G. HOMME, Jr.,
Acting Secretary.

[Section 5a Application No. 58 (Amendment No. 2)]

MACHINERY HAULERS ASSOCIATION

Agreement

JULY 27, 1977.

The Commission is in receipt of an application in the above-entitled proceeding for approval of amendments to the agreement therein approved.

Filed July 20, 1977 by:
Charles W. Singer, Singer & Sullivan, 2440 East Commercial Blvd., Ft. Lauderdale, Fla. 33308 (of Counsel).

The Amendments involve: (1) Proposed broadening of commodity scope jurisdiction to include general commodities, (2) expansion of rate committee's jurisdiction regarding consideration of matters jointly with foreign carriers, (3) increasing the size of the Rate Committee, (4) granting the Association power to meet and otherwise cooperate and confer with other organizations of common carriers, approved under section 5a by this Commission, with reference to specified matters, and (5) other incidental changes.

The complete application may be inspected at the Office of the Commission, in Washington, D.C.

Any interested person desiring to protest and participate in this proceeding shall notify the Commission in writing on or before September 6, 1977. As provided by the General Rules of Practice of the Commission, persons other than applicants should fully disclose their interest, and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application, without further or formal hearing.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 96]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 2, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protest to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 531 (Sub-No. 347TA), filed July 6, 1977. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs Rd., P.O. Box 14048, Houston, Tex. 77021. Applicant's representative: Wray E. Hughes (same address as applicant). Authority sought to operate as a *common carrier*,

by motor vehicle, over irregular routes, transporting: *Sodium salt solutions*, in bulk, in tank truck vehicles, from plant-site of Merichem Co. and/or storage facilities of Merichem Co. in Houston, Tex., to all points in Alabama, Florida, Georgia, Louisiana, Mississippi, and Oklahoma for 180 days. Supporting shipper(s): Merichem Co., 1914 Haden Road, Houston, Tex. 77015. Send protests to: Mensing District Supervisor, Interstate Commerce Commission, 515 Rusk, Room 8610, Federal Bldg., Houston, Tex. 77002.

No. MC 43038 (Sub-No. 463TA), filed July 19, 1977. Applicant: COMMERCIAL CARRIERS, INC., 10701 Middlebelt Rd., Romulus, Mich. 48174. Applicant's representative: Paul H. Jones, 29725 Shacket Ave., Madison Heights, Mich. 48071. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motor vehicles*, excluding trailers, in secondary movements, in truckaway service between Sharonville, Cementdale, and Cincinnati, Ohio, on the one hand, and on the other, points in the states of Virginia and West Virginia. Restriction: The operations authorized herein are restricted to the transportation of shipments manufactured, assembled, imported, or distributed by Ford Motor Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Ford Motor Co., K. R. Hammond, Manager, Vehicle Transportation Dept., Ford Division General Office, P.O. Box 1529B Dearborn, Mich. 48121. Send protests to: Interstate Commerce Commission, Bureau of Operations, Erma W. Gray, Secretary, 604 Federal Bldg. and U.S. Courthouse, 231 West Lafayette Blvd., Detroit, Mich. 48226.

No. MC 43038 (Sub-No. 464TA), filed July 19, 1977. Applicant: COMMERCIAL CARRIERS, INC., 10701 Middlebelt Rd., Romulus, Mich. 48174. Applicant's representative: Paul H. Jones, 29725 Shacket Ave., Madison Heights, Mich. 48071. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motor vehicles, excluding trailers*, in secondary movements in driveaway service, between Sharonville, Cementdale, and Cincinnati, Ohio, on the one hand, and on the other, points in the States of Virginia and West Virginia. Restriction: The operations authorized herein are restricted to the transportation of shipments manufactured, assembled, imported, or distributed by Ford Motor Co., for 180 days.

Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Ford Motor Co., K. R. Hammond, Manager, Vehicle Transportation, Ford Division General Office, P.O. Box 1529B, Dearborn, Mich. 48121. Send protest to: Erma W. Gary, Secretary, Interstate Commerce Commission, Bureau of Operations, 604 Federal Bldg. and U.S. Courthouse, 231 West Lafayette Blvd., Detroit, Mich. 48226.

No. MC 43268 (Sub-No. 65TA), filed July 11, 1977. Applicant: WELLS CARGO, INC., 1775 East 4th St., Reno, Nev. 89512. Applicant's representative: David N. Inwood, P.O. Box 1511, Reno, Nev. 89505. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except household goods as defined by the Commission in bulk and Classes A and B explosives), between Carson City, Nev., and Ridgecrest, Calif., via U.S. Highway 395, serving all intermediate points, restricted against traffic originating south of Ridgecrest, Calif., on the one hand, and points and places within 4 miles of the California-Nevada state line on the other, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): There are approximately 57 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: William J. Huetig, District Supervisor, Interstate Commerce Commission, 203 Federal Bldg., 705 North Plaza St., Carson City, Nev. 89701.

No. MC 47171 (Sub-No. 94TA), filed July 22, 1977. Applicant: COOPER MOTOR LINES, INC., P.O. Box 4255, Greenville, S.C. 29608. Applicant's representative: Harris G. Andrews, P.O. Box 4259, Greenville, S.C. 29608. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Floor coverings and materials, equipment*, and *supplies* used in the installation, manufacture, packaging, and sale of floor coverings, from Lyerly, Ga., to points in Connecticut, Delaware, Massachusetts, Maryland, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Virginia, and Washington, D.C., for 180 days. Supporting shipper(s): Bigelow-Sanford, Inc., P.O. Box 3089, Greenville, S.C. 29602. Send protests to: E. E. Strotheid, District Supervisor, Interstate Commerce Commission, Room 302, 1400 Building, 1400 Pickens St., Columbia, S.C. 29201.

No. MC 69492 (Sub-No. 55TA), filed July 22, 1977. Applicant: HENRY EDWARDS d.b.a. HENRY EDWARDS TRUCKING CO. P.O. Box 97, Clinton, Ky. 42031. Applicant's representative: Mr. Walter Harwood, Attorney, P.O. Box 15214, Nashville, Tenn. 37215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Rubber, rubber products, and such other commodities* as are manufactured and/or dealt in by rubber manufacturers from the plantsite and warehouse facilities of The General Tire & Rubber Co., at or near Mayfield, Ky., and the plantsite and warehouse facilities of The Goodyear Tire & Rubber Co. at or near Union City, Tenn., to points in Michigan on and east of U.S. Hwy. 27 from the Indiana-Michigan State Line to its junction with Michigan Hwy. 21, thence on and south of Michigan Hwy. 21 eastwards to Port Huron, Mich., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The General Tire & Rubber Co., One General St., Akron, Ohio 44329; The Goodyear Tire & Rubber Co., 1144 East Market St., Akron, Ohio 44316. Send protests to: Mr. Floyd A. Johnson, District Supervisor, Interstate Commerce Commission, 100 North Main Bldg., Suite 2006, 100 North Main St., Memphis, Tenn. 38103.

No. MC 106956 (Sub-No. 4TA), filed July 19, 1977. Applicant: SYLVESTER TRUCKING CO., 2930 Gradwohl Rd., Toledo, Ohio 43617. Applicant's representative: Wilhemina Boersma, 1600 First Federal Bldg., 1001 Woodward Ave., Detroit, Mich. 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scrap iron*, between Kripke Tuschman facilities in Toledo, Ohio, on one hand, and on the other, Wayne County, Branch County, Kalamazoo County, Genesee County, and Ingham County in Michigan, and DeKalb County and Allen County in Indiana, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Kripke-Tuschman Ind., Inc., 5000 North Detroit Ave., Toledo, Ohio 43612. Send protests to: Keigh D. Warner, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 313 Federal Office Bldg., 234 Summit St., Toledo, Ohio 43604.

No. MC 107496 (Sub-No. 1092TA), filed July 22, 1977. Applicant: RUAN TRANSPORT CORP., 3200 Ruan Center, 666 Grand Ave., Des Moines, Iowa 50309. Applicant's representative: E. Check (same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Water reducing admixtures*, in bulk, in metered tank vehicles from North Judson, Ind., to points in Indiana, Illinois, Michigan, Wisconsin, Iowa, Minnesota, Ohio, Kentucky, West Virginia, Missouri, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Penn-Dixie Chemical Co., 2 Porete Ave., North Arlington, N.J. 07032. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Bldg., Des Moines, Iowa 50309.

No. MC 111401 (Sub-No. 494TA), filed July 21, 1977. Applicant: GROENDYKE TRANSPORT, INC., 2510 Rock Island Blvd., P.O. Box 632, Enid, Oka. 73701. Applicant's representative: Victor R. Comstock, P.O. Box 632, Enid, Okla. 73701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Molasses, liquid feeds and liquid feed supplements*, in bulk, in tank vehicles from the facilities of Cargill, Inc. at Garden City, Kans. to points in Colorado, Kansas, Nebraska, New Mexico, Oklahoma, and Texas, for 180 days. Supporting shipper(s): Cargill, Inc., P.O. Box 9300, Minneapolis, Minn. 55440. Send protests to: Transportation Assistant Kathy

Henson, Rm. 240, Old Post Office Bldg., 215 Northwest Third St., Oklahoma City, Okla. 73102.

No. MC 114569 (Sub-No. 184TA), filed July 12, 1977. Applicant: SHAFFER TRUCKING, INC., P.O. Box 418, New Kingstown, Pa. 17072. Applicant's representative: Herbert R. Nurick, P.O. Box 1166, Harrisburg, Pa. 17108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Confectionery, cocoa, chocolate, and products related thereto* (except in bulk), and materials, supplies, equipment, and machinery, used in the manufacture, production, distribution or sale of confectionery, cocoa, chocolate, and products related thereto; From the facilities of Hershey Foods Corp., at or near Oakdale, Calif.; to Chicago, Ill.; Cincinnati, Ohio; Detroit, Mich.; East St. Louis, Ill.; Derry Township, Dauphin County, Pa.; Kansas City, Mo.; Milwaukee, Wis.; St. Paul, Minn.; and their commercial zones, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Hershey Foods Corp., Hershey, Pa. 17033. Send protests to: Charles F. Mayers, Dist. Supv. Bureau of Operations, Interstate Commerce Commission, 278 Federal Building, P.O. Box 869, Harrisburg, Pa. 17108.

No. MC 114632 (Sub-No. 118TA), filed July 21, 1977. Applicant: APPLE LINES, INC., 212 Southwest Second St., Madison, S. Dak. 57042. Applicant's representative: Robert Gisvold, 1000 First National Bank Bldg., Minneapolis, Minn. 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products and meat byproducts and articles distributed by meat packinghouses* as described in sections A and C of Appendix I to the report in descriptions in motor carrier certificates, 61 MCC 209 and 766 (except hides and commodities in bulk) from Dodge City, Kans., to points in Connecticut, Delaware, District of Columbia, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Vermont, West Virginia, and Wisconsin, for 180 days. Supporting shipper(s): Hyplains Dressed Beef, Inc., P.O. Box 539, Dodge City, Kans. 67801, Max Kline, Assistant Manager, Beef Department. Send protests to: J. L. Hammond, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 455, Federal Bldg., Pierre, S. Dak. 57501.

2

FEDERAL RESERVE SYSTEM.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Sent to FEDERAL REGISTER July 27, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., Wednesday, August 3, 1977.

CHANGES IN THE MEETING: Addition of the following open item to the meeting:

1. Board consideration of temporary suspension of Regulation Q (Interest on Deposits) penalty for early withdrawal of time deposits for Johnstown, Pennsylvania disaster area.

Previously announced open items:

1. (a) Proposed amendments to Regulation H (Membership of State Banking Institutions in the Federal Reserve System) and Y (Bank Holding Companies), to require certain municipal securities dealers to file with the Board information about persons associated with them as municipal securities principals or municipal securities representatives. (Proposed earlier for public comment; docket no. R-0090).

(b) In connection with the proposed amendments to Regulations H and Y, establishment of a system of records under the Privacy Act of 1974 dealing with persons who are or seek to be municipal securities principals or representatives and are associated with certain financial institutions. (Proposed earlier for public comment; docket no. R-0091).

2. Possible amendments to the Board's Rules Regarding Delegation of Authority to delegate to the Director of the Division of Banking Supervision and Regulation certain authority in connection with administration of Municipal Securities Rulemaking Board rules.

3. A possible Board interpretation of Regulation B (Equal Credit Opportunity) to clarify the meaning of § 202.8, Special Purpose Credit Programs, by defining the phrase "expressly authorized by law". (Proposed earlier for public comment; docket no. R-0100).

4. Proposal by the Federal Reserve Bank of Atlanta for approval of conceptual design for the Miami Branch building.

NOTE.—The initial notice for this meeting was received by the FEDERAL REGISTER on July 26, 1977, seven days in advance of the meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board: 202-452-3204.

Dated: August 2, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[S-1046-77 Filed 8-3-77;1:52 pm]

3

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., August 2, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 5. TXI Subpart M Application (Not. No. 7139-B) Doc. 30887.

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary. (202-673-5068).

SUPPLEMENTARY INFORMATION: On May 16, 1977, Texas International Airlines (TXI) filed an application requesting the removal of certain restrictions on its certificate of public convenience and necessity in order to permit certain additional service. Order 77-5-167, dated May 31, 1977, directed TXI to file additional material for the Board's consideration of this application. On July 15, 1977, TXI filed a supplement to its application with the required information and on July 25, 1977, supplemental statements requesting dismissal were filed by American and Delta. On July 26, 1977, the Bureau of Operating Rights submitted its recommendation to the Board.

TXI's application was filed under Subpart M of the Board's Rules of Practice (14 CFR § 302.1301-1315). Under the provisions of Subpart M the Board was required to stay or dismiss TXI's application by July 29, 1977, or the application would have automatically moved forward to the next procedural stage.

On July 29, 1977, the Board voted to dismiss the application and to so notify TXI and to issue the order after discussion of the language to be used in the order. So that the order can issue with minimum delay the following Board Members have voted that agency business requires the addition of this Docket 30887, Application of Texas International Airlines, Inc., for amendment of its certificate of public convenience and necessity under Subpart M procedures, to the agenda of its August 2, 1977, meeting and that no earlier announcement of the addition was possible:

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Lee R. West

6

SECURITIES AND EXCHANGE COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 38689, July 29, 1977.

PREVIOUS ANNOUNCED TIME AND DATE: August 5, 1977, 10 a.m.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

CHANGES IN THE MEETING: The following additional matter will be considered by the Commission at the open meeting:

Consideration of a proposed rule which would prohibit mutual funds from implementing arrangements involving the use of their assets to finance the distribution of shares as an interim measure.

The following additional matters will be considered by the Commission at the closed meeting, immediately following the open meeting: Institution of administrative proceedings; settlement of injunctive actions.

Chairman Williams and Commissioners Evans and Pollock determined that Commission business required consideration of these matters and that no earlier notice thereof was possible.

AUGUST 2, 1977.

[S-1050-77 Filed 8-3-77 9:04 am]

7

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of August 8, 1977, in Room 825, 500 North Capitol Street, Washington, D.C.

A closed meeting will be held on Tuesday, August 9, 1977, at 10 a.m. An open meeting will be held on Wednesday, August 10, 1977, at 10 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)A, and (10) and 17 CFR 200.402(a) (4), (8), (9)(i), and (10).

Chairman Williams and Commissioners Evans and Pollack voted to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, August 9, 1977 will be:

Formal order of investigation.
Institution of injunctive actions.
Settlement of injunctive actions.
Settlement of administrative proceedings.
Referral of investigative filed to Federal, State, or self-regulatory authorities.
Regulatory matters arising from or bearing enforcement implications.
Freedom of Information Act appeals.
Request for confidential treatment.
Personnel matter.
Application for reinstatement.

The subject matter of the open meeting scheduled for Wednesday, August 10, 1977, will be:

1. Consideration of proposals submitted by CBOE, Amex, PHLX, MSE, and PSE to amend their respective rules setting forth option exercise price intervals.

2. Consideration of a proposal permitting self-regulatory organizations to establish criteria on which to base recommendations for permanent extensions of time for the

[1] The ratification process provides an entry in the Board's minutes of items already adopted by the Board through the written notation process (memoranda circulated to the Members sequentially). A list of items ratified at this meeting will be available in the Board's Public Reference Room, Room 710, 1825 Connecticut Avenue NW., Washington, D.C. 20428, following the meeting.

filing of Part I of Form X–17A–5, which is the monthly report submitted by clearing firms.

3. Consideration of the adoption of Rule 2a–5 under the Investment Company Act of 1940. Rule 2a–5 would declare that certain persons would not be deemed interested persons under the statutes of the Act.

4. Consideration of a petition for Commission review filed by Mortgage Investors of Washington regarding an extension of time requested by the company to file their annual report for the year ended March 31, 1977.

5. Consideration of the publication of releases regarding: (1) Reporting provisions relating to the remuneration received by officers and directors and (2) the disclosure of criminal litigation involving taxation.

6. Consideration of an application filed by Air Pollution Industries, Inc., pursuant to section 12(h) of the Securities Exchange Act of 1934 for an order which would exempt the company from certain reporting requirements.

FOR FURTHER INFORMATION CONTACT:

Edward B. Horahan at 202–376–8072 or Howard B. Scherer at 202–755–1280.

AUGUST 2, 1977.

8

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

TIME AND DATE: 9:30 a.m. (eastern time), Wednesday, August 10, 1977.

PLACE: Chairman's Conference Room No. 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street N.W., Washington, D.C. 20506.

STATUS: Parts of the meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

(1) *Freedom of Information Act Appeal* 77–2–FOIA–40. Request, on behalf of an employer charged with discrimination, for documents in the Commission's investigative file.

(2) *Freedom of Information Act Appeal* 77–2–FOIA–134. Request by an attorney representing an employer charged with discrimination, against whom a lawsuit has been filed by the Commission, for the internal memorandum upon which the Commission based its vote to commence litigation.

(3) *Designation of 706 Agency.* Recommendation that the Sioux Falls, S. Dak., Human Relations Commission be designated as one to which the Commission may defer charges.

(4) *Washington State Human Rights Commission.* Recommendation that the Commission allocate additional fiscal year 1977 funds to this State agency for the processing of more charges.

(5) *Revisions of EEOC's procedural regulations.*

Portions closed to the public:

(1) *Litigation authorization; General Counsel recommendations.* Matters closed to the public under sec. 1612.13(a) of the Commission's regulations (42 FR 13830, March 14, 1977).

(2) *Proposed procurement; processing of EEO–4 survey.* This matter is continued from the meeting of August 2. Commission approval is requested to contract with an organization to process the State and local government information report, identified as the EEO–4 survey.

(3) *Proposed budget request for fiscal year 1979.*

NOTE.—Any matter not discussed or concluded may be carried over to a later meeting.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat, at 202–634–6748.

This notice issued August 3, 1977.

9

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the Government in the Sunshine Act (5 U.S.C. 552b), notice is hereby given that, in addition to the matters already on the agenda for consideration at the meeting of the Federal Deposit Insurance Corporation's Board of Directors scheduled for 10:45 a.m. on Monday, August 8, 1977 (public notice of which was given on August 1, 1977), the Board of Directors will also consider an application from the Anchor Savings Bank, New York (P.O. Brooklyn), New York, an insured mutual savings bank, for consent to merge under its charter and title with North New York Savings Bank, White Plains, N.Y., also an insured mutual savings bank, and to establish the five offices of North New York Savings Bank as branches of the resultant bank.

The time, date, place, and closed status of the meeting remain unchanged.

Dated: August 2, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

10

NATIONAL SCIENCE BOARD.

TIME AND DATE: August 19, 1977. Closed session: 8:30 a.m.; open session: 2:00 p.m.

PLACE: National Science Foundation. Room 540, 1800 G Street NW., Washington, D.C. 20550.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

1. Minutes—191st meeting.
2. Chairman's report.
3. Director's report.
4. Board committee reports.
5. NSF advisory groups.
6. Site visits.

Portions closed to the public:

1. Minutes—closed session, 191st meeting.
2. Report of ad hoc committee on NSF staff and NSB nominees.
3. Possible options for RANN organization and leadership.
4. Grant and contracts—proposed awards.
5. NSF budget for fiscal year 1979.

PART II

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

LAETRILE

Commissioner's Decision on Status

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 77N-0048]

LAETRILE

Commissioner's Decision

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs announces that he has compiled a comprehensive administrative record containing information about the drug Laetrile in general and, specifically, about two issues concerning Laetrile's "new drug" status: (1) Whether Laetrile is generally recognized by qualified experts as a safe and effective cancer drug, and (2) whether Laetrile is exempt from the premarket approval requirements for new drugs by virtue of the "grandfather" provisions of the Federal Food, Drug, and Cosmetic Act. The Commissioner concludes, after careful review of this administrative record, including oral argument presented at a public hearing, that: (1) Laetrile is not generally recognized by qualified experts as a safe and effective cancer drug, and (2) Laetrile is not exempt from the premarket approval requirements for new drugs by virtue of the "grandfather" provisions of the act. Distribution of Laetrile in interstate commerce is thus illegal and subject to regulatory activity by the Food and Drug Administration. Conclusions on other issues related to the controversy concerning Laetrile are also set out.

EFFECTIVE DATE: August 5, 1977.

ADDRESSES: The transcript of oral argument presented at the public hearing, affidavits, written testimony, and all other submissions compiled as the administrative record for this proceeding may be seen in the office of the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. In addition, one copy of the administrative record (except two videotapes of interviews with cancer patients who had been treated with Laetrile) is available for public examination at the following Food and Drug Administration offices during regular business hours: 850 Third Ave., Brooklyn, NY 11232; 880 W. Peachtree St., Altanta, GA 30309; 433 W. Van Buren St., Chicago, IL 60607; 1009 Cherry St., Kansas City, MO 64106; 1521 W. Pico Blvd., Los Angeles, CA 90015; 909 First Ave., Seattle, WA 98104.

FOR FURTHER INFORMATION CONTACT:

Tenny P. Neprud, Compliance Regulations Policy Staff (HFC-10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockille, MD 20857, 310-44-3480.

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of February 18, 1977 (42 FR 10066), the Commissioner announced that he was initiating a rulemaking proceeding to comply with the opinion of the Court of Appeals in *Rutherford* v. *United States*, 542 F.2d 1137 (10th Cir. 1976), and the order of the District Court in *Rutherford* v. *United States*, 424 F. Supp. 105 (W. D. Okla. 1977). In those proceedings, the Food and Drug Administration (FDA) was ordered to develop an administrative record concerning the following two issues:

1. Whether the product Laetrile (also known as vitamin B-17 and amygdalin) is a "new drug" within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(p)) in that it is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use in the cure, mitigation, treatment, or prevention of cancer in man ("the new drug issue").

2. Whether, if Laetrile is a "new drug" within the meaning of the act, it is exempt from the premarket approval requirements of section 505 of the act (21 U.S.C. 355) in that:

(a) At any time before June 25, 1938, it was subject to the Food and Drugs Act of 1906, as amended, and at such time its labeling contained the same representations concerning the conditions of its use as its present labeling ("the 1938 grandfather issue," 21 U.S.C. 321(p)(1)); or

(b) It meets each of the following conditions: (1) On October 9, 1962, it was commercially used or sold in the United States; (2) On October 9, 1962, it was generally recognized, among experts qualified by scientific training and experience to evaluate the safety of drugs, as safe for use in the cure, mitigation, treatment, or prevention of cancer in man; (3) On October 9, 1962, it was not covered by an effective new drug application (NDA) under section 505 of the act (21 U.S.C. 355); (4) It is currently intended solely for use under conditions prescribed, recommended, or suggested in its labeling on October 9, 1962 ("the 1962 grandfather issue," Pub. L. 87-781, section 107(c)(4)).

The February 18, 1977, notice included detailed information regarding the submission of testimony. In response to the notice, over 400 submissions totaling more than 5,500 pages were received. These submissions, representing the views of both proponents and opponents of Laetrile, came from cancer patients, consumers, experts in drug testing and cancer therapy, physicians, State governments, universities, hospitals, and interested organizations.

The District Court, in directing FDA to develop an administrative record, suggested that the agency invite the following individuals to participate in the administrative proceeding: Dr. Dean Burk, Ernst Krebs, Jr., Mike Culbert, Edward Griffin, and Mike Spencer, *Rutherford* v. *United States*, *supra*, 424 F. Supp. at 108. The three individuals whose addresses could be obtained were specifically invited to give their views (R 3, 4, 5).[1] (Kenneth Coe, attorney for plaintiff Glen Rutherford, who had proposed that FDA be required to invite the five named individuals, could not provide the addresses for Griffin and Spencer and agreed that invitations to the three individuals whose addresses he could supply would suffice.) Mr. Griffin did receive notice of the proceeding and he participated (see R 404). Written submissions were received from Dr. Burk (R 302) and Mr. Griffin (Tr. Ex. 1) and from plaintiff Glen Rutherford (R 258).

The Bureau of Drugs, FDA, presented evidence probative of the new drug and grandfather status of Laetrile. For the purposes of the administrative proceeding, separation of functions requirements were observed between the Commissioner and persons advising him and the Bureau of Drugs and persons advising it (see 21 CFR 10.55).

The February 18, 1977 notice stated that oral argument would be held in Kansas City on May 2. A subsequent notice published in the FEDERAL REGISTER of March 25, 1977 (42 FR 16191) set forth the exact time and place: beginning at 9 a.m. on May 2 at the Radisson Muehlebach Hotel, Kansas City, MO. Dr. John Jennings, Associate Commissioner for Medical Affairs, presided over the oral argument. Approximately 40 persons filed written requests to make oral presentations; others took advantage of the opportunity to speak without the filing of such a request as time allowed. Every person who wished to participate in, and who was present at, the oral argument was given a opportunity to express his or her views. In all, 47 persons made presentations. The transcript of the oral argument has been made a part of the record of the administrative proceeding.

Individuals named by the District Court were again notified of the exact time and place of the argument (R 253-55, see also R 247). Oral presentations were made by Edward Griffin (Tr. at 11), Michael L. Culbert (Tr. at 35), Ernst T. Krebs, Jr. (Tr. at 228) and Dr. Dean Burk (Tr. at 401). In addition, plaintiff Glen L. Rutherford and his attorney, Kenneth Coe, Esq., spoke at oral argument (Tr. at 297, 442).

Written submissions presented at the time of oral argument were made part of the record and considered despite the fact that they were received at a date later than the one set forth in the February 18, 1977, notice. The record of this proceeding was, however, closed at the conclusion of the oral argument. Submissions received thereafter have been docketed with the FDA Hearing Clerk but have not been considered as part of the record. The Commissioner's opinion is based entirely upon the administrative record and does not reflect information brought to FDA's attention subsequent to the closing of that record.

No legal memoranda were solicited by the Commissioner in this proceeding. One such memorandum was submitted by the American Cancer Society and has been made a part of this docket in the Hearing Clerk's office.

In the Commissioner's opinion, the use of Laetrile in the United States has become a genuine public health problem. Increasingly, doctors dealing with cancer patients are finding that the patients are coming to legitimate therapy too late, having delayed while trying Laetrile. It seems clear that another substantial group of persons afflicted with cancer is avoiding effective therapy altogether and using Laetrile instead. The question has become one of life and death for these patients and for others who may be convinced to use Laetrile in the future. For this reason the Commissioner has considered not only the evidence in the record addressed to the specific legal issues remanded to FDA by the courts, but also the great amount of evidence submitted by both proponents and opponents of Laetrile regarding other issues of importance to the controversy over the use of the drug. Since the Commissioner's discussion of these issues is necessarily detailed, he is setting forth, for the reader's convenience, an outline of that discussion as follows:

[1] Submissions to the record are referred to by the number assigned to them upon filing by the Hearing Clerk. When exhibits or attachments accompany a submission, they follow the record number of that submission, e.g., "R 12, Ex. A". References to the transcript of the oral argument are cited as "Tr. at" with the applicable page number supplied. Written submissions presented to the energy at the time of oral argument are referred to as transcript exhibits, e.g., Tr. Ex. 1.

2. Effects on Other Patients.

F. USE CONCURRENTLY WITH OTHER THERAPY

VI. CONCLUSIONS

I. LAETRILE

A. DEFINITION OF CANCER

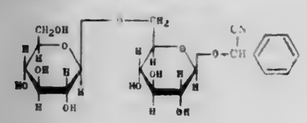
Laetrile has been, over the years, recommended for use in the treatment of cancer. An understanding of the issues concerning the drug requires that the term "cancer" be defined. Cancer has been stated to include "* * * all malignant neoplasms regardless of the tissue of origin including malignant lymphoma, Hodgkins disease, and leukemia" (R 173, Att., "Laws and Regulations Relating to the Diagnosis and Treatment of Cancer," State of California, Division 2, Chapter 7, Section 1705). For an almost identical definition by the American Cancer Society, Inc., see R 173, Att., "American Cancer Society, Inc., Medical Affairs Department, (State) Cancer Remedy Act." A neoplasm is a new and abnormal growth such as a tumor. Malignant neoplasms are "neoplasms that are characterized by unregulated, uncontrolled, and unrestrained growth and proliferation" (R 190 at ¶ 14; R 194 at 3; R 195 at ¶ 11). It has been said that the "distinguishing feature of cancer is its ability to invade, erode and to metastasize to more or less distant parts" (R 183, Att. 7 at 15). Metastasis, in relation to cancer, means the transfer or spread of the cancer from one site to another, usually through the blood stream or the lymphatic system. In this process, cells may travel throughout the body; when they finally lodge they begin to grow as a new cancer.

There are more than 100 different entities involved in the disease known as "cancer." These many forms of clinical cancer differ materially in terms of the factors which cause them as well as in terms of populations they affect, their prognosis, and the ease with which they may be treated (Tr. at 144; cf. R 190 at ¶ 14; R 186 at ¶ 7-9). The cause of cancer is not a question addressed in this proceeding. It should be noted, however, that the record includes indications that various cancers are associated with chronic irritation (e.g., a high frequency of cancer of the groin in textile workers whose jobs required straddling a metal shaft) (R 318 at 37), with cancer-causing chemical substances called carcinogens (e.g., a high frequency of lung cancer in chimney sweepers and coal miners probably caused by inhaling dust particles) (id.), with irradiation (id. at 38), with virus (Tr. at 223; R 318 at 38), and with hereditary effects (R 318 at 38).

Two novel theories, neither of which has gained acceptance by the scientific community, have been at various times espoused by Laetrile's proponents to explain how cancer is caused. The first of these theories is said to have been first developed by Professor John Beard of Scotland. In 1902, Professor Beard announced his "findings" that the cancer cell and the "trophoblast" cell were one and the same (R 318 at 60). Trophoblast cells are present during pregnancy and they prepare a niche in the uterine wall where the fertilized egg can nestle (R 318 at 56). According to Beard, they share several characteristics with cancer cells: Both are invasive, erosive, corrosive and can be carried through the blood stream to other parts of the body (R 318 at 57). Beard believed that trophoblast cells could be expected to develop at various places in the body from precursor cells distributed throughout the body during the embryonic stage. If the pancreas gland were functioning properly it

would, in his theory, produce enzymes which destroy these trophoblast cells. If such enzymes were not produced, cancer would occur (R 318 at 58–59).

The proponents of Laetrile have more recently taken the position that cancer is a metabolic deficiency or dietary disease (cf. R 302, Ex. H at 76–77). It is claimed that cancer is a "• • • systemic, chronic, metabolic deficiency disease" (Tr. at 348) or "• • • a chronic or metabolic disease that is not caused by some mysterious virus" (Tr. at 234). The "nutritional deficiency" theory is refuted by at least one expert (Tr. at 223).



B. COMPOSITION AND IDENTITY OF "LAETRILE"

Several terms, such as "Laetrile," "laetrile(s)," "amygdalin," "nitriloside(s)," "vitamin B–17," and "Sarcarcinase" have in many instances been used interchangeably by both proponents and opponents of Laetrile. There are, however, distinctions among these terms, which must be understood in order to deal with the issues in this proceeding. The Commissioner will discuss in detail what the record indicates about the meaning of the terms "amygdalin," "Laetrile," "laetrile" and "Sarcarcinase."

1. Glossary

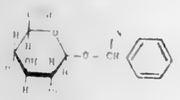
The following glossary provides a definition or description of the above terms and others that will be used in this opinion:

Amygdalin: A specific chemical entity having the chemical formula:

beta-Cyanogenic glucosides, beta-cyanophoric glucosides; beta-cyanogenetic glucosides: Terms used interchangeably in the record. In general, they are used in the record to include compounds which can break down to yield cyanide and glucose. The terms are used to refer to amygdalin, a glucoside present in kernals or seeds of practically all fruits (see, e.g., R 302, Ex H at 75; R 173, Att., California Administrative Code, Section 10400.1 at 16; Tr. at 272). *beta*-Cyanogenic glucosides belong to the large class of chemicals known as *beta*-cyanogenic glycosides. (See definition of glucosides and glycosides below.)

beta-Glucosidase: An enzyme present in plants that participates in the metabolism of glucosides. The enzyme has been identified in apricot and peach kernels and catalyzes the breakdown of amygdalin to free two molecules of glucose and a molecule of mandelonitrile. The enzyme is found only in trace amounts in animal tissues (R 173, Att., "The Vitamin Fraud in Cancer Quackery" (hereinafter "Vitamin Fraud") at 345).

beta-Glucuronidase: An enzyme present in animal tissues that participates in the metabolism of glucuronic acid derivatives (also called glucuronosides). The enzyme reportedly catalyzes the breakdown of "Laetrile" (1-mandelonitrile-*beta*-glucuronic acid) to free glucuronic acid and mandelonitrile.

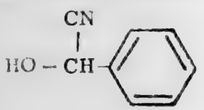


Enzymes: Chemical compounds (all of them proteins) produced by living organisms that serve as catalysts in metabolic reactions. The suffix "-ase" is given to most enzymes.

Glucoside: A term applied to any glycoside having glucose as its sugar constituent.

Glucuronide; glucuronoside: Terms used in the record to refer to chemical derivatives of glucuronic acid. As an example, Laetrile is identified as 1-mandelonitrile-*beta*-glucuronic acid" in the Merck Index 9th Ed., at 702 and as "laevo-mandelonitrile-*beta*-glucuronoside" in the book *Control for Cancer* (R 318 at 73).

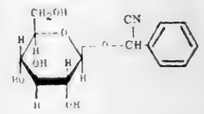
Glucosides: A broad term which encompasses glucosides. Not all glycosides are glucosides (cf. The Condensed Chemical Dictionary, 7th Ed. at 455).



Laetrile: A specific chemical entity having the chemical formula:

[illegible] acid (Merck Index, 9th Ed. at 702). The name "Laetrile" was purportedly coined by Ernest T. Krebs, Jr. (R 318 at 73).

laetrile: A term used interchangeably with "Laetrile," "amygdalin," "nitriloside," and "vitamin B–17" (R 302, Ex. A; R 183, Att. 10c). The term is also used to include a number of compounds, in which case it may appear as "laetriles."



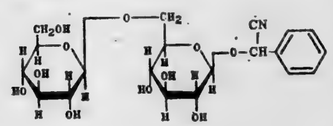
Mandelonitrile: A specific chemical entity having the chemical formula:

(Merck Index, 9th Ed. at 743).

Nitriloside: A term proposed by Ernst T. Krebs, Jr., for all cyanophorioglycosides of dietary significance (R 302, Ex. H. at 75).

Prunasin: A specific chemical entity having the chemical formula:

Mandelonitrile Glucoside (Merck Index, 9th Ed. at 743).

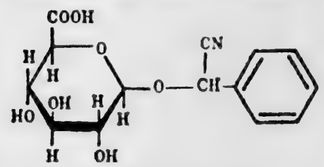


Sarcarcinase: The name given to an enzyme preparation developed by Dr. E. T. Krebs, Sr., and described by him in a 1933 patent application as a mixture of the following enzymes—amygdalase, prunase, oxynitrilase, catalase, peroxydase, and a proteolytic enzyme. He also suggested the presence of isomaltase and a lipase and perhaps other enzymes (R 424).

Vitamin B–17: Described as a group of compounds which include water-soluble, essentially nontoxic, sugary compounds found in over "800 plants" (R 302, Ex. H at 75) used interchangeably with "nitriloside," "Laetrile," "amygdalin," "beta-cyanogenic glucosides" and "cynophoric glucosides" (e.g., R 302, Ex. H at 75; R 302, Ex. A).

2. What is Amygdalin?

Amygdalin was reportedly first isolated from bitter almonds by the French chemists Robiquet and Burton-Charland in 1830 (R 173, Att., "Vitamin Fraud" at 345). The name "amygdalin" was derived from the word "amygdala", Greek for almond (R 302, Ex. L at ¶ 9). Amygdalin is a chemical compound composed of two glucose molecules and one molecule of mandelonitrile. Mandelonitrile is a chemical in which cyanide is combined with benzaldehyde (cf., R 173, Att., "Vitamin Fraud" at 345). The German chemists Liebig and Wohler observed that an enzyme preparation (later called emulsin) from bitter almonds was capable of hydrolyzing amygdalin, i.e., breaking it down into the two glucose molecules, the benzaldehyde molecule and a hydrogen cyanide molecule (id.). It was later shown that this hydrolysis occurs through the action of two enzymes (*beta*-D-glucosidase and *beta*-oxynitrilase) which are present in emulsin (id.). The *beta*-D-glucosidase hydrolyzes the *beta*-D-glucoside bond and thus frees the two glucose molecules from the mandelonitrile. *beta*-Oxynitrilase is the catalyst for the breakdown of mandelonitrile into benzaldehyde and hydrogen cyanide (id.).



Amygdalin may be extracted from apricot kernels (id.), and is present in seeds of other members of the rose family (R 416 at ¶ 31A). The Commissioner concludes that amygdalin, a cyanogenic glucoside, is a chemical having the chemical name D-mandelonitrile-*beta*-D-glucosido-6-*beta*-D-glucoside (Merck Index, 9th Ed. at 81, compounds 630; R 183, Att. 10b). The chemical structure of amygdalin is:

3. What is Laetril (With a Capital L)?

The term "Laetrile" has been used interchangeably with "amygdalin," "laetrile," "vitamin B–17," "nitrilosides," and "*beta*-cyanogenetic glucosides" (R 173, Att., Laws and Regulations Relating to the Diagnosis and Treatment of Cancer 10400.1 at 16; R 302, Ex. A; Tr. at 405, 272, 465). It appears, however, that the term "Laetrile" (with a capital L) has been used by the drug's proponents to refer to a particular substance. There are essentially two versions of what that substance is:

(a) The term has been used to refer to a specific chemical compound which was prepared in 1952 by Ernst T. Krebs, Jr., who is said to have derived the name "Laetrile" from the compound's chemical name: laevo-mandelonitrile-*beta*-glucuronoside (R 318 at 73; see also R 262; R 183, Att. 16 at 1 and 2). This chemical is related to, but is distinctly different from, amygdalin. It is claimed that the laveo-mandelonitrile-*beta*-glucuronoside was derived by Ernst T. Krebs, Jr., while working with the apricot extract his father had prepared and studied some 20 years earlier (R 318 at 70–73). The chemical structure of this material is depicted in several places (R 318 at 154, 157, 162) and is in agreement with the chemical name. The chemical structure of this version of Laetrile is:

(b) In a 1965 affidavit, however, Dr. Krebs, Sr., stated that the name "Laetrile" was devised in 1949 by his son, Ernst T. Krebs, Jr., for a form of amygdalin which Dr. Krebs, Sr., was producing at that time (R 183, Att. 13). As can be seen from the diagrams set out in this opinion, the chemical structure of amygdalin is different from that of Laetrile as described by Mr. Krebs, Jr.

In the second version of the identity of Laetrile, the source of the name is stated as follows: "Because this apricot preparation was 'Laevorotatory' (left-handed) to polarized light, and because Amygdalin was chemically a 'mandelonitrile,' Krebs, Jr., united the first and the last syllables to invent a name for the new cancericidal drug—LAETRILE" (R 183, Att. 7 at 24).

The confusion about the meaning of the term "Laetrile" is long-standing and may in part be the result of a desire on the part of promoters to continue to use drugs containing amygdalin while justifying the use of the drugs by theories associated with the Laetrile of Krebs, Jr. For example, in a February 17, 1953 letter to Dr. Ian Macdonald, the Chairman of the Cancer Commission of the California Medical Association, Ernst T. Krebs, Jr., advised that he was forwarding "• • • samples of the biosynthetically degraded amygdalin in which one dextrose was removed by prunasin and the resulting compound, in the presence of platinum black, was oxidized to the corresponding glucuronoside" (R 183, Att. 14). (Note: the compound thus obtained should have been 1-mandelonitrile-*beta*-glucuronoside or "Laetrile" as described by E. T. Krebs, Jr., R 318 at 73.) The Cancer Commission of the California Medical Association, in its 1953 report, stated: "Chemical analyses done independently for the Commission have identified in the product distributed as Laetrile only the presence of a natural laetrile termed amygdalin" (R 378, Att. 15 at 326).

The question of the identity of the material distributed as "Laetrile" arose again in the early 1960's when the Cancer Advisory Council of the State of California was gathering information on Laetrile in order to enforce the 1959 California law dealing with cancer quackery. In 1963 the Council reported that the California State Department of Public Health had examined different varieties of Laetrile and found that the products were markedly different in composition but did contain varying percentages of amygdalin (R 183, Att. 16, App. 7 and 8). A Canadian Medical Association report published in 1965 found that the United States and Canadian versions of the drug were different—a larger percentage of the Canadian version than of the United States version was found to be made up of amygdalin (R 189; see also R 378, Att., "Supplementary Report by the Cancer Advisory Council" at 1–2).

The record reveals a number of references by Laetrile proponents which use the terms "Laetrile" and "amygdalin" interchangeably (see, e.g., Tr. at 238 and 246, and the book Control for Cancer (R 318)). Even some labels for the drug use the terms synonymously: one identifies the product as "Laetrile (Amygdalin) 400 mg capsules" (R 183, Att. 10a; see also R 183, Att. 10d). The National Cancer Institute, in its October 1975 "Background Statement on Laetrile" notes the fact that supporters of the drug have used the names "Laetrile" and "amygdalin" interchangeably. The report then correctly identifies amygdalin as mandelonitrile - *beta* - gentiobioside (this chemical name for amygdalin is listed in the Merck Index, 9th Ed. at 81, compound No. 630) and states that the compound actually tested in 1957, 1960, 1969, 1973, and 1975 by the National Cancer Institute was amygdalin (R 173, Att., "NCI Testing of Laetrile (Amygdalin)").

Yet it is not possible simply to conclude that the many references to Laetrile as a specific substance are a hoax on the part of Mr. Krebs, Jr., and that Laetrile as used is simply amygdalin. A number of reports by Dr. Manuel Navarro of the Philippines stated that the Laetrile of Ernst T. Krebs, Jr., was in use (R 318 at 155, 161)), as did a report by Dr. John A. Morrone of New Jersey (R 318 at 205).

Additional confusion is added to the record by an article "Nitrilosides (Laetriles) Their Rationale and Clinical Utilization in Human Cancer (December 1962)," by Ernst T. Krebs, Jr., and Dr. N. R. Bouziane, in which the authors report on their use of "non-toxic nitrilosides (Laetrile), to which the trophoblast is susceptible, on terminal cancer cases for two years in Canada • • •" (R 318 at 187). While the article refers to "cyanophoric glucosides and cyanophoric glucuronosides" (id. at 189), the authors do not identify the "Laetrile" they had been using and about which they were reporting. The authors cite a chemical compound in their discussion (id. at 190) that is not amygdalin nor is it "Laetrile" as described and named by Ernst T. Krebs, Jr. (id. at 73).

While the prevailing confusion over the true identity of material called "Laetrile" would be a severe drawback to anyone seeking to show through testing that Laetrile was safe and effective, this lack of uniformity has been adopted by Laetrile proponents as a means of discounting data showing the drug to be ineffective and thus unsafe. An example is found in the statement by Ernst T. Krebs, Jr., that "The • • • single negative report on Laetrile, which is based upon the observations of unidentified investigators in unidentified institutions administering a purported Laetrile not obtained from the only source of the material, is to be found in California Medicine, 78:320 (1953)" (emphasis added) (R 318 at 251). It should be recalled that at least some of the material supplied to the California Cancer Commission was sent by Ernest T. Krebs, Jr., himself (R 183, Att. 14). In May of 1971, Mr. McNaughton of the pro-Laetrile McNaughton Foundation, in a meeting with FDA's Ad Hoc Committee of Oncology Experts, stated that data obtained prior to 1968 are frequently not valid because of the variability of Laetrile formulations (R 173, Att. "Report of the Ad Hoc Committee of Oncology Consultants" at 1). See also statement of Robert Bradford, President of the Committee for Freedom of Choice in Cancer Therapy, Inc.: "As an aside, an important aspect of animal tests, and indeed, of human tests has been from time to time the availability of amygdalin which did not meet the specified identification criteria, that is, for its use. Tests with defective materials, as Sloan-Kettering found out, will not be efficacious. Defective material likewise will not be effective in humans" (Bradford, Tr. at 350).

In its 1971 report to FDA, the Ad Hoc Committee of Oncology Consultants

agreed that uncertainty about the identity of the drug tested makes the test results obtained questionable. The Committee stated that because of the variability in composition of early preparations, doubt was cast on the bulk of the 1970 McNaughton Foundation Notice of Claimed Investigational Exemption for a New Drug (IND) for Laetrile, which was based almost exclusively on such early material (R 173, "Report of the Ad Hoc Committee of Oncology Consultants" at 1). The Committee further suggested that any protocol for study contain a full description of the drug (formulation, stability etc.) (id. at 4).

There is, quite simply, no one answer to the question "What is Laetrile?". In the glossary to this opinion, the chemical composition of Laetrile is considered to be that described by Ernest T. Krebs, Jr. Yet if some other substance is being used to treat cancer patients, testing of that "Laetrile" would be of no relevance.

Because different persons have used the terms "Laetrile" and "amygdalin" to mean different substances, uniformity of definition will not be possible in discussing the evidence in the record. For this reason, the Commissioner will not, in quoting or citing parts of the administrative record, attempt to define or to determine the identity of the material under discussion but will simply use the term as it appears in that portion of the record. Attempts to identify the material referred to will be made only when necessary for a rational resolution of an issue, e.g., a reference to Sarcarcinase as amygdalin or as Laetrile will not be accepted blindly.

4. What is laetrile (With a Small l)?

As noted in the glossary, the term "laetrile" (with a small l) has been used interchangeably with or synonymously for: nitriloside, Laetrile, vitamin B–17, and amygdalin (e.g., R 302, Ex. A; R. 183, Att. 10c; R 378, Att. 6). The term has, however, also been used to describe a class or group of compounds. For example, amygdalin and prunasin are described as "two common Laetriles" (R 173, Att., "Vitamin Fraud" at 345). It has been stated that: "The term LAETRILE is used to designate the laevorotatory containing glucosides in general and the corresponding glucuronoside in particular. The former are found in plants whereas the latter are synthetic" (italics in original) (R 318 at 155). (See also, R 318, at 240 ¶ 9 which defines natural laetriles as *beta*-cyanogenetic glucosides and glucuronosides.) The Commissioner concludes that the term "laetrile" is an imprecise term and that it does not imply a specific chemical compound. The term is, rather, a broad or generic term for a group of compounds of unknown number.

5. What is Sarcarcinase?

Dr. Ernst T. Krebs, Sr., claims to have developed a product called "Sarcarcinase" in 1926 (R. 183, Att. 13). "Sarcarcinase" is stated to be a registered trademark in the United States and 10 other countries (with registrations dating from March 1933 to January 1934) (see R. 260; R 259). The process for preparing the product is stated to be patented in 15 countries including the United States (see R. 260). It is also reported that Sarcarcinase was used in Japan in 1934 and in Czechoslovakia in 1935 (R. 259). Other references in the same timespan refer to an "enzyme preparation" or "enzyme injection" used within the United States as well as several foreign countries (id.).

Ernst T. Krebs, Jr., stated at oral argument that as early as 1932 his father "* * * observed the use of amygdalin, or laetrile; made it available across the country and abroad under the term 'Sarcarcinase' to physicians, to researchers" (Tr. at 238). He also stated, "* * * the first amygdalin was used—1932—it was labeled as 'Sarcarcinase' " (Tr. at 246). Sarcarcinase was not, however, amygdalin nor did it contain amygdalin in any quantity. Rather, in the words of Dr. Krebs, Sr.'s 1933 patent application, Sarcarcinase was "an enzyme for treatment of malignant growths." The patent application actually describes the product as "an enzyme complex" containing "amygdalase, prunase, oxynitrilase, catalase, peroxydase and proteolytic enzyme" plus a suggestion of "isomaltase and a lipase with possibly others" (Patent application attached to R 424 and to R 259).

Amygdalin is not an enzyme. As will be discussed in more detail below, enzymes are chemicals which catalyze the breakdown of other chemicals and which are often named by attaching the ending "-ase" to the chemical which they attack. Thus, "amygdalase," stated by Dr. Krebs, Sr., to be part of his enzyme complex, may have been meant to describe an enzyme which would break down amygdalin.

It has been argued that Sarcarcinase contained some quantity of amygdalin (R 183, Att. 13, and Att. 7 at 23). An expert chemist has stated, however, that much or all of the small amounts of amygdalin in the apricot kernels used in making Sarcarcinase would be destroyed by enzyme action when the kernels are ground up and that only a small fraction of any that remained would survive the rest of the process (R 424). It should be noted that, even if there were any amygdalin in Sarcarcinase, that would not make that drug equivalent to a drug made up of amygdalin either totally or in greater proportions either in a scientific sense or in a legal sense.

There is some indication that Dr. Krebs, Sr., had abandoned Sarcarcinase even at the time when the patent applications were being obtained. One submission by a Laetrile proponent states that Dr. Krebs, Sr., "* * * resigned himself to the fact that there was no sense continuing this particular research to identify the toxic element or elements in the apricot extract he prepared (sometime after 1926) until he acquired the additional knowledge necessary to understand the mysteries that were occurring in his test tubes. He put his extract aside and returned his books" (R 318 at 42). Krebs himself states that in 1936 he developed a new product, whose "active principle" was amygdalin of 66 percent purity (R 183, Att. 13). (The inactive ingredients of this preparation are not identified.) It is not clear whether it is Sarcarcinase or this new product about which Krebs, Sr., speaks when he states that his "apricot extract" was "so toxic that he and colleagues who were experimenting with him were reluctant to continue its use, except in dire circumstances" (R 183, Att. 7 at 23). It was apparently these toxicity problems that led Krebs, Jr., to seek to improve his father's work (id.). Since "Laetrile" was not developed until 1952 by Krebs, Jr., any statement that "Laetrile" was sold as Sarcarcinase in the 1930's is patently erroneous.

C. CLAIMS FOR LAETRILE

Laetrile (or amygdalin) has been recommended over the years primarily for use in the treatment and, more recently, "control" of cancer. The claims appear to vary in relation to the sophistication of the intended audience. Thus in the 1962 new drug application (NDA) for Laetrile submitted by Ernst T. Krebs, Jr., to FDA, the drug was claimed to be a palliative (i.e., a drug that mitigates the symptoms of a disease without curing it) to be used with other recognized therapies (R 201, Ex. B at 102). By contrast, in a pamphlet in use in 1965, apparently addressed in part to prospective patients, it is stated that "Laetrile does not palliate, it acts chemically to kill the cancer cell selectively * * *," and use of other cancer therapies concurrently is discouraged (R 201, Ex. C # III). The following claims have been made for Laetrile (amygdalin):

1. Treatment (Cure or Mitigation) of Cancer

The pamphlet discussed above and others obtained from Dr. Krebs, Sr., by FDA investigators at the same time recommended Laetrile for treatment of cancer (see, generally, R 201, Ex. C). Dr. Krebs, Sr., in a pamphlet entitled "The Treatment of Breast Cancer with Laetrile by Iontophoresis" promotes the drug for treatment of a number of cancers (R 183, Att. 7 at 26–27 and 30).

A label for 400 mg capsules of "Laetrile (Amygdalin)" claims that the "nontoxic cyanide glucoside is used for specific treatment of cancer by physicians or under directions of a physician" (R 173, Att. 102). Amygdalin has been promoted (as an ingredient of "Bitter Food Tablets") for the cure, mitigation, and treatment of cancer in man (R 173, Att., *United States* v. *Spectro Foods*, Civ. No. 76–101 (D.N.J., Jan. 28, 1976) Findings 16 through 23).

As noted above, some claims are limited to palliation. (See, e.g., R 216 at 348; R 318 at 175; Tr. at 238.) Recently, Laetrile has been touted as a "control" for cancer. Proponents of Laetrile making this claim assert that no "cure" for cancer exists (see Tr. at 303). Control for Cancer is also the title of a paperback book on Laetrile (R 318). It is not entirely clear

from the record whether "control" means palliation. Laetrile therapy is said to be responsible for increased appetite and weight gain and an increased "sense of well-being" among treated cancer patients (R 318 at 158 and 165).

2. Analgesic (Pain Killer)

An information booklet for physicians about amygdalin makes the claim that the product is a nontoxic analgesic that is highly effective in relieving the pain of terminal cancer (R 183, Att. 10b). The booklet claims that the oral route is the most convenient route of administration for both patient and physician.

NOTE.—The Commissioner points out that both proponents and opponents have warned against oral use of amygdalin or Laetrile.

See R 318 at 167; "* * * it (Laetrile) should never be given by mouth because the HCl (of the stomach) is capable of hydrolyzing the Laetrile"; see also R 318 at 158. Compare R 173, Att., Interview with Robert C. Eyerly, American Cancer Society: "Taken orally, it (Amygdalin) is decomposed in the intestinal tract by *beta*-glucosidase into highly lethal hydrogen cyanide." "Orally it (Laetrile) is extremely toxic due to the release of hydrogen cyanide on contact with the hydrochloric acid of the gastric juice (R 318 at 205).

A label for "The Original Laetrile" claims that the product "relieves pain due to malignancy" (R 183, Att. 9). For another claim that Laetrile reduces cancer-connected pain, see Tr. at 44. It has also been asserted that the hydrogen cyanide and benzaldehyde liberated by hydrolysis of Laetrile are potent analgesics (R 318 at 164).

3. Prevention of Cancer

With the advent of their theory that cancer is a deficiency disease and that that deficiency can be overcome by their product, either characterized as a provitamin for vitamin B–12 (R 201, Ex. C, No. IV), or as new vitamin B–17 (see R 183, Att. 10c), proponents of Laetrile have promoted it as a preventative for cancer (see the above references and R 198, Ex. 2 (transcript of the film World Without Cancer); cf. Tr. at 465). (See also R 173, Att., *United States* v. *Spectro Foods*, supra, Findings 16 through 23.) While proving that Laetrile (or amygdalin) did not prevent cancer would be extremely difficult, the record does contain evidence that at least one person taking it as a preventative did contract cancer (Tr. at 120).

4. Facilitation of Other Cancer Therapy

While, as noted above, some labeling recommends against use of other cancer therapies with Laetrile, it has been stated that "* * * if you combine toxic chemotherapy with Laetrile, you can give very high doses of toxic chemotherapy with no side effects, physical and no effects on the blood. That is, you don't get neucophenia (leukopenia?) and you don't get chromositophenia (chromocytompenia?)" (Tr. at 480).

5. Hemoglobin Index

One set of labeling for "Laetrile (Amygdalin)," which appears at two points in the record, recommends the product "for raising hemoglobin index and red count * * *" (R 183, Att. 9; R 201, Ex. C, No. I).

6. Reduction of Odor Associated with Malignancy

It is also claimed that topical application of Laetrile relieves fetor (odor) resulting from the secondary infection of ulcerated carcinoma and that parenteral administration takes care of fetor associated with internal cancers. This action is ascribed to the "antiseptic" properties of HCN and benzaldehyde, which is converted by the cells to benzoic acid (R 318 at 158 and 165).

7. Sickle Cell Anemia

It is theorized that nitriloside (Laetrile) might be of value in the treatment of sickle cell anemia because of the release of cyanide and the subsequent formation of thiocyanates (R 217, article by R. G. Houston). (See also Tr. at 465.) This claim is reportedly refuted by experts in sickle cell hemoglobin (R 416 at 23).

8. Parasitic Diseases

The Houston article also references a report by Navarro and others of the clinical control of schistosomiasis (a snail-borne infection) with nitriloside (Laetrile) (R 217, Houston article at 58). The possibility of using Laetrile to treat parasitic diseases such as schistosomiasis or malaria is discussed in the book Control for Cancer but there are no reports of actual use in the book (R 318 at 111–12).

9. Regulating Intestinal Flora

It has also been suggested that amygdalin has some utility in regulating intestinal flora (Tr. at 476).

10. Hypotensive Effect

It has also been claimed that use of Laetrile causes a hypotensive effect (i.e., it reduces blood pressure), at least in cancer patients (R 318 at 165; cf. Tr. at 465).

In addition to these claims by Laetrile proponents (developers, distributors, and promoters), numerous comments from interested citizens contained references to or claims for its therapeutic effects as a cancer cure or as a preventative. There are also references to relief, attributed to Laetrile, from other ailments unrelated to cancer, e.g., arthritis (R 391).

D. THEORIES OF LAETRILE'S ACTION

A thorough understanding of the manner in which a compound achieves its therapeutic or beneficial effects is highly desirable. A cancer drug which had been shown to be safe and effective would not, however, be denied marketing approval simply because its action could not be explained. Experience has shown that a good theory to explain or predict the action of a chemical in the body does not assure success; neither does a weak theory, or even what turns out to be a totally incorrect theory, mean certain failure.

Some cancer patients may be turning to Laetrile in the mistaken belief that its use is supported by a respectable —even if not widely accepted—scientific theory. (Unproven remedies throughout the years have benefited from the use of the type of "scientific" theories associated with Laetrile (see, generally, R 413).) The Commissioner finds from the record that the theories advanced for Laetrile's supposed action are based on false or questionable assumptions. An understanding of these theories, furthermore, points up important differences between the "Laetrile" whose use is "justified" by the theories of Krebs, Jr., and the amygdalin-containing products actually being used.

Since a large part of the Laetrile theory of action deals with enzymes, the Commissioner believes that a few brief introductory comments about enzymes would be useful. Enzymes are protein molecules manufactured in the cells of the body which help the cells perform chemical reactions involving other compounds. As an example, trypsin, a common enzyme, aids in the metabolism of proteins in food by breaking these large molecules into smaller, easier-to-handle pieces. Enzymes generally are very specific in the types of chemicals they will attack. Frequently, the name of an enzyme is derived from the compounds that enzyme will break down. The ending "-ase" is often used to indicate an enzyme.

The chemical "*beta*-glucosidase" appears frequently in the Laetrile record. The name of this chemical indicates that it is an enzyme (-ase) and, furthermore, the name indicates that it attacks glucose-containing compounds (glucosides) from which it will liberate glucose molecules. As an example, *beta*-glucosidase liberates two molecules of glucose from amygdalin. If the chemical compound does not contain glucose molecules, *beta*-glucosidase will not attack it. In a similar vein, *beta*-glucuronidase will attack chemical compounds that contain glucuronic acid. (These chemical compounds are called "glucuronides" or "glucuronosides" or "glucuronic acid derivatives.")

The original theory of Ernst T. Krebs, Jr., for Laetrile's action involved two enzymes, rhodanese and *beta*-glucosidase (R 318 at 72). Krebs claimed that normal cells produced these two enzymes, while cancer cells were deficient in rhodanese. In cancerous areas, the theory continues, the *beta*-glucosidase accumulates in great quantities (R 318 at 72).

According to the theory, when Laetrile comes into contact with the cancerous areas it is hydrolyzed by the enzyme *beta*-glucosidase to liberate cyanide and benzaldehyde. In normal cells, the enzyme rhodanese converts the liberated cyanide to the less toxic thiocyanate. Cancer cells, lacking rhodanese, are said to be killed by the liberated cyanide

when it reacts with cellular components. Rhodanese from normal cells cannot protect cancer cells because, it is claimed, cancer cells produce chorionic gonadotropic hormone that effectively blocks the action of rhodanese (R 318 at 153). In later versions of the theory, the benzaldehyde is also considered to be responsible for killing the cancer cells, either alone or in concert with the cyanide. According to this theory, benzaldehyde is normally converted by a cell to benzoic acid by oxidation. Cancer cells are said to oxidize the benezaldehyde at a slower rate than normal cells, making it toxic to cancer cells and nontoxic to normal cells. (See Krebs, Jr., "The Nitrilosides (Vitamin B–17)—Their Nature, Occurrence and Metabolic Significance (Antineoplastic Vitamin B–17)" (R 183, Att. 10c at 80).)[3]

In fact, it has been reported that only traces of *beta*-glucosidases have been found in animal tissues and even less in experimental tumors than in such organs as liver and spleen (R 173, Att., "Vitamin Fraud" at 345). Apparently for this reason, Krebs, Jr., at one time modified his theory. In the modified version it is *beta*-glucuronidase rather than *beta*-glucosidase which is abundant in cancerous areas. This change is reflected in a 1955 pamphlet co-authored by Dr. Krebs, Sr., and Dr. Arthur T. Harris, in which it is stated: "As soon as the Laetrile *beta*-glucuronidase, which bathed the cancer cell, because of its affinity for sugar split the glucoside (or sugar radical) from the Laetrile molecule" (R 183, Att. 7 at 24). (See also R 318 at 151–53.)

The change in theory is important. *beta*-Glucuronidase hydrodyzes (breaks down) *beta*-glucuronosides (or "*beta*-glucuronic acids" or "*beta*-glucuronides") but does not hydrolyze *beta*-glucosides (R 318, Att. 16 at 24). Thus, *beta*-glucuronidase will hydrolyze "Laetrile" of the formulation devised by Krebs, Jr. (i.e., laevo-mandelonitrile-*beta*-glucuronoside), but it will not hydrolyze amygdalin (D-mandelonitrile-*beta*- D-glucosido-6-*beta*-D- glucoside) or other "nitrolosides" found in nature. What this means is that amygdalin, which has been sold as "Laetrile," would not be hydrolyzed by the body to liberate cyanide (R 183, Att. 16 at 41).

Recognition of this fact apparently led Krebs, Jr., to formulate his version of Laetrile in the first place. He is reported to have stated in a manuscript that "the natural laetriles have been abandoned for the more specific synthetic laetrile tailored as specific glucuronsidic substrates for the tumor *beta*-glucuronidase" (R 183, Att. 16 at 14).

The specificity of *beta*-glucuronidase for glucuronides (or glucuronosides) and its lack of activity against glucsides (such as amygdalin) is rigorously addressed in the record:

> Numerous glucuronides are hydrolyzed by beta-glucuronidase. * * * Mentyl-alpha-D-glucuronide and alpha-and beta-methyl-D-glucosides are not split by the enzyme.
>
> Further checking of this important point is consistent with the idea that the enzyme in question (beta-glucuronidase) not hydrolyze the beta-glucosides, which are the only Laetriles actually utilized by the Krebs' for human treatment (R 183, Att. 16 at 24).

(It should be remembered that the Cancer Commission of the California Medical Association had determined that the material labeled "Laetrile" was in fact amygdalin—a glucoside and not a glucuronoside (R 183, Att. 15 at 326).)

The conclusion seems justified that the presence of the terminal carboxyl group on position 6 appears to be the important factor in determining a specificity which is markedly different from that of B. Glucosidase * * * (R 183, Att. 16 at 25).

(The Commissioner points out that amygdalin has two glucose molecules but does not have a carboxyl group. Laetrile, as reportedly prepared, described, and named by Ernst T. Krebs, Jr., in the late 1940's or early 1950's (R 318 at 73) does have a carboxyl group on position 6 (the glucuronic acid portion of the molecule).)

Dr. Krebs, Sr., in his 1955 pamphlet on Laetrile appears to recognize that "animal *beta*-glucuronidase" and *beta*-glucosidase are different substances. (He characterizes the latter as a "prepared enzyme.") He does claim that the two enzymes react with Laetrile in the same manner (R 183, Att. 7 at 24).

There is some indication that Ernst Krebs, Jr., in later years abandoned his attempt to develop a Laetrile that could be broken down by *beta*-glucuronidase and began treating *beta*-glucuronidase and *beta*-glucosidase as equivalent. In a 1962 letter, Krebs, Jr., seems to refer to the former as an example of the latter: "beta glucosidases (e.g., beta glucuronidase)" (R 183, Att. 16, App. 12 at 2) and seeks, in describing an experiment with water fleas he had designed, to extrapolate results obtained with *beta*-glucosidase to results with *beta*-glucuronidase he feels is found in malignant lesions (id. at 4). (See also Krebs' 1970 article "The Nitrilosides (Vitamin B–17)—Their Nature, Occurrence and Metabolic Significance (Antineoplastic Vitamin B–17)" in which he again equates *beta*-glucosidase with *beta*-glucuronidase (R 183, Att. 10c at 82).)

Three other problems with this theory are quickly identifiable: (1) there is evidence that *beta*-glucuronidase is not particularly abundant in malignant tissues. The record shows that "* * * *beta*-glucuronidase is found in all tissues of the animal body and in particularly high concentrations in spleen, liver, and endocrine organs, as well as in plasma and in tumors arising from estrogen-influenced tissues. Per gram of tissue, the spleen and liver have a higher concentration of *beta*-glucuronidase than do most tumors," (R 183, Att. 16 at 15 and App. 14). It is further stated, "Such a statement as '* * * the malignant cell * * * is virtually an island surrounded by a sea of *beta*-glucuronidase' is sheer nonsense" (R 183, Att. 16 at 15 and App. 14).

(2) There is no evidence that cancer cells are deficient in the enzyme rhodanese. In reviewing the record, the Commissioner has not found any support for the bald assertion by the Krebs and other Laetrile proponents that cancer cells are deficient in the production of a hydrogen cyanide-inactivating enzyme called rhodanese. If there is any scientific support for that assertion, it is indeed strange that it has never been cited by the Krebs' or otherwise brought to the attention of the scientific community. The record shows, in fact, that: "There is no evidence of pronounced differential between the rhodanese content of comparable normal and cancerous tissue" (R 378, Att. 9 at 346).

(3) The complete breakdown of Laetrile into cyanide may require an enzyme not found in animal tissues. Hydrolysis of Laetrile by *beta*-glucuronidase (and hydrolysis of amygdalin by *beta*-glucosidase) only represents the first step in breaking down the molecules to release hydrogen cyanide and benzaldehyde (which are supposed to kill the cancer cell). The first reaction in each case would yield mandelonitrile plus (for Laetrile) glucuronic acid or (for amygdalin) glucose. Mandelonitrile must then be hydrolyzed or broken down to yield hydrogen cyanide and benzaldehyde (R 416 at ¶ 8).

Enzymes present in apricot kernels (specifically oxynitrilase) will hydrolyze mandelonitrile to cyanide and benzaldehyde, but this enzyme is not reported to exist in animal tissues (R 399 at ¶ 7B). Nor does the record show that any other enzyme capable of breaking down the mandelonitrile exists in animal tissues (or in malignant lesions). Thus, if Laetrile were injected into the blood stream and did go to the malignant lesion, even if it were broken down into mandelonitrile and gulcuonic acid, it might never be further broken down to yield hydrogen cyanide and the supposed action of that substance in killing the cancer cell would never take place.

At one time, Ernst T. Krebs, Jr., apparently attempted to deal with some of these problems by separating out the elements of the apricot extract his father had prepared. The fact that both *beta*-glucosidase and oxynitrilase are present in apricot pits and thus in the extract provides the potential for the whole breakdown process to occur in the apricot extract itself at the time when it is prepared. Krebs, Jr., sought to prevent this from happening (and perhaps sought to reduce toxicity) by separating amygdalin from "emulsin" by purifying the apricot extract. Emulsin contains, among other things, *beta*-glucosidase and *beta*-oxynitrilase (R 173, Att., "Vitamin Fraud" at 345).

Ernst T. Krebs, Jr., reportedly separated amygdalin from emulsin in 1952 and "* * * advised their administration separately in order to avoid the premature trigger-off of HCN (hydrogen cyanide) from the chemical breakdown in the somatic (or normal) tissue * * *" (R 183, Att. 7 at 23). It is further stated that by injecting the cyanogenetic glucoside (amygdalin) followed 15 minutes later by the enzyme *beta*-glucosidase a "high degree of safety" as well as cancerolytic effect was obtained (id. at 23–24).

If the *beta*-glucosidase preparation preparation reached the same area of the body that the amygdalin had reached, its presence would lead to the breakdown of amygdalin to release mandelonitrile (see R 416 at ¶ 18; R 183, Att. 7 at 31). While Ernst T. Krebs, Jr., apparently recommended that the second injection be of emulsin (R 183, Att. 7 at 23), Dr. Krebs, Sr., states that his second injection would consist only of the enzyme *beta*-glucosidase (id. at 24). If the second injection did contain emulsin, the presence of the oxynitrilase in that complex might in fact lead, assuming the emulsin caught up with the amygdalin in the body, to breakdown of the mandelonitrile to release hydrogen cyanide (and benzaldehyde). However, there is little reason to believe that this release of cyanide would occur only in or near tumor cells. (In the same article in which Ernst T. Krebs, Sr., explained the process of injecting the *beta*-glucosidase, he stated his understanding that it was the *beta*-glucuronidase "which bathed the cancer cell" that acted to break down the amygdalin (id. at 25).) It should be noted that, since the time of the 1955 pamphlet, no evidence has appeared, at least in this record, that two injections, one containing *beta*-glucosidase, are being used in Laetrile therapy.

In light of the above, one must be concerned that products are being used that contain not only amygdalin but emulsin. As the Krebs themselves recognized, unless emulsin is separated from amygdalin (both of which exist in the apricot extract), there may occur the premature trigger-off of HCN (hydrogen cyanide) from the chemical breakdown in the somatic (or normal) tissue (R 183, Att. 7 at 23). It is this type of cyanide poisoning which has occurred from ingestion of Laetrile and from eating apricot kernels. (See R 378, California Morbidity, Nov. 14, 1975, No. 45.)

It is thus clear that the theory propounded by the promoters of Laetrile is based on faulty and unproven assumptions. The invention of Laetrile as described by Krebs, Jr., and his suggestion that an injection of amygdalin be followed by an injection of emulsin were two different ways to deal with the fact that enzyme *beta*-glucosidase does not exist in human tissues. What is perhaps most important about the proffered theoretical justification for Laetrile's action is that, even if they were accepted, they would not justify the administration of amygdalin alone.

II. The "New Drug" Issue

The Commissioner will now address the first of the two issues remanded to the agency: Whether Laetrile is a "new drug" within the meaning of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 301 et seq. (hereinafter the act). Based upon a careful review of the administrative record, as detailed below, the Commissioner finds that Laetrile is not generally recognized by qualified experts as a safe and effective cancer drug. Accordingly, the Commissioner concludes as a matter of law that Laetrile is a new drug and thus subject to the premarket approval requirements of the act.

The term "new drug" is defined by section 201(p)(1) of the act (21 U.S.C. 321(p)(1)) as follows:

> Any drug * * * the composition of which is such that such drug is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use under the conditions prescribed, recommended, or suggested in the labeling thereof * * *.

Although the act defines "new drug", it does not contain a definition of "generally recognized as safe and effective."

In 1973, the Supreme Court, in a series of four cases (*Weinberger* v. *Hynson, Westcott & Dunning, Inc.*, 412 U.S. 609 (1973); *Ciba Corp.* v. *Weinberger*, 412 U.S. 640 (1973); *Weinberger* v. *Bentex Pharmaceuticals, Inc.*, 412 U.S. 645 (1973); *USV Pharmaceutical Corp.* v. *Weinberger*, 412 U.S. 655 (1973)) involving the procedures adopted and utilized by FDA to regulate new drugs pursuant to the Drug Amendments of 1962 (76 Stat. 780), established the legal principles that are applicable and controlling here. In Hynson, the Court discussed "general recognition" as it pertains to the effectiveness of a drug as follows:

> The thrust of § 201(p) is both qualitative and quantitative. The Act, however, nowhere defines what constitutes "general recognition" among experts. * * * We agree with FDA, however, that the statutory scheme and overriding purpose of the 1962 amendments compel the conclusion that the hurdle of "general recognition" of effectiveness requires at least "substantial evidence" of effectiveness for approval of an NDA. In the absence of any evidence of adequate and well-controlled investigation supporting the efficacy of (a drug), a fortiori (that drug) would be a "new drug" subject to the provisions of the Act. 412 U.S. at 629–30.
>
> * * * * *
>
> We accordingly have concluded that a drug can be "generally recognized" by experts as effective for intended use within the meaning of the Act only when that expert consensus is founded upon "substantial evidence" as defined in § 505(d). 412 U.S. at 632.

The term "substantial evidence" is defined in the last sentence of section 505(d), 21 U.S.C. 355(d), as:

> evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of the drug involved, on the basis of which it could fairly and responsibly be concluded by such experts that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling or proposed labeling thereof.

In Bentex, based upon its discussion of the term "general recognition" in Hynson, the Court concluded:

> Whether a particular drug is a "new drug" depends in part on the expert knowledge and experience of scientists based on controlled clinical experimentation and backed by substantial support in scientific literature. 412 U.S. at 652.

It accordingly held that "the reach of scientific inquiry under both section 505(d) and under section 201(p) is precisely the same" (id.).[4]

The requirements that a drug have not only controlled clinical investigations but also publication of the studies concerning it in the scientific literature are designed to assure that the community of qualified experts in general is aware of the data concerning the drug. Thus, one could not obtain general recognition just by doing the required studies without publishing them in the scientific literature, making them available to other scientists. (Studies submitted to scientific publications must undergo peer review before they are published. A study published in a scientific journal is thus more likely to form a basis for expert recognition than is one published by the lay press.) A practical effect of the statutory system, as the Supreme Court acknowledged in Hynson, supra, is that drugs will have accumulated for themselves sufficient scientific evidence to justify approval of an NDA "long before they are in a position to drop out of active regulation by ceasing to be a 'new drug'" (412 U.S. at 631).

Under the Supreme Court's authoritative interpretation of the act, therefore, general recognition of the safety and effectiveness of Laetrile depends upon two criteria: (1) Controlled clinical investigations conducted by qualified experts establishing the safety and effectiveness of the drug and published in the scientific literature, and (2) expert consensus, based upon that evidence, that the drug is safe and effective. Both requirements must be met in order for Laetrile to escape the need for premarket approval under the act; however, a finding of a failure to meet either set of requirements is sufficient to classify the drug as a new drug.

With respect to the first criterion, the safety of Laetrile must be established by adequate tests by all methods reasonably

---

[3] In his 1933 patent application for Sarcarcinase, Dr. Ernst T. Krebs, Sr., discussed his own theory of cancer, apparently now abandoned by Laetrile proponents. He perceived a malignant protein ("* * * a so-called abnormal glucosido-protein * * *") in cancer cells and explained why his enzyme extract, prepared from apricot kernels, should be effective against those cells (R 424). He believed that the enzyme would break up the abnormal gluco-protein and thus be an effective treatment against cancer (R 318 at 40–41). While it is claimed that some positive effects were observed in cancers in mice, the extract proved to be toxic and Dr. Krebs, Sr., discontinued working on the extract (id. at 42).

[4] Section 505(d) of the act (21 U.S.C. 355(d)) sets forth the standards applicable to obtain marketing approval of a new drug. With respect to reports of investigations which are required to be submitted concerning the safety of a drug, the act provides that such reports must include "adequate tests by all methods reasonably applicable to show whether or not such drug is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling thereof".

applicable (see 21 U.S.C. 355(d); 21 CFR 314.111(a)(1)). In addition, the effectiveness of Laetrile must be established by "substantial evidence," which the statute (21 U.S.C. 355(d)) defines as evidence consisting of adequate and well-controlled clinical investigations. (Clinical investigations are studies involving human beings as test subjects.) The requirements for an adequate and well-controlled clinical investigation are set forth in 21 CFR 314.111(a)(5) (see discussion below). Both types of testing must be available to the community of experts in the evaluation of drug safety and effectiveness by means of publication in the scientific literature.

For satisfaction of the second criterion, a showing must be made of recognition among the qualified experts which is "general." It has been held that a genuine difference of opinion among experts on the question of general recognition is sufficient to show that such recognition of a drug's safety does not exist (see *United States* v. *An Article of Drug, Etc.*, 294 F. Supp. 1307, 1311 (N.D. Ga. 1968) aff'd 415 F. 2d 390 (5th Cir. 1969); *United States* v. *354 Bulk Cartons, Etc.*, 178 F. Supp. 847, 853 (D.N.J. 1959); *Merritt Corp.* v. *Folsom*, 165 F. Supp. 418, 421 (D.D.C. 1958)). This interpretation of "general recognition" has been criticized as requiring "unanimous" recognition (see *United States* v. *7 Cartons, More or Less, Etc.*, 293 F. Supp. 660, 662–63 (S.D. Ill. 1968) aff'd 424 F. 2d 1364 (7th Cir. 1970). For purposes of completeness, the Commissioner in his opinion will consider "general recognition" to require, as the 7 Cartons Court suggested, recognition "extensively, though not universally; most frequently, but not without exception" (id.).

A. GENERAL RECOGNITION OF EFFECTIVENESS

1. Objective Evidence of Effectiveness

The Courts thus have determined that, as a matter of law, no "general recognition" of a drug's effectiveness can exist absent adequate and well-controlled clinical investigations and substantial support in the scientific literature. There are no clinical investigations of Laetrile's effectiveness, published or otherwise, which are even arguably adequate and well-controlled. (See, e.g., R 185 at ¶ 19; R 186 at ¶12; R 390 at ¶ 19). For this reason, Laetrile cannot escape "new drug" status as "generally recognized" as safe and effective. It is thus a new drug without an approved new drug application whose sale or distribution, where interstate commerce is involved, is illegal.

There is, however, an apparent public lack of understanding of what the required studies consist of and why they are required. The Commissioner will thus include in this opinion a discussion of what adequate and well-controlled studies are and why they are needed. He will then discuss the deficient "evidence" of effectiveness submitted by Laetrile's proponents.

(*a*). *What Are the Required Studies.* "(A)dequate and well-controlled clinical investigations," as those terms are used in the act (21 U.S.C. 355(d)) are defined in detail by regulation (21 CFR 314.111(a)(5)(ii)). These regulations, discussed with approval by the Supreme Court in *Weinberger* v. *Hynson, Westcott & Dunning, Inc., supra*, 412 U.S. at 617–19, were upheld in *Upjohn* v. *Finch*, 422 F.2d 944 (6th Cir. 1970) and *Pharmaceutical Manufacturers Ass'n* v. *Richardson*, 318 F. Supp. 301 (D. Del. 1970). Simply stated, such investigations are designed to determine whether an improvement noted after administration of a drug is in response to the drug or whether it is caused by some other factor. To do this, patients as nearly identical in their disease state as possible are divided into groups and treated, insofar as possible, exactly the same in all respects except one: One group receives the test drug; the other receives a placebo (a substance that looks just like the test drug but is not a drug). Since a patient might feel better through knowledge of receiving the test drug, and since the investigator might subconsciously record better results because of the knowledge that he or she were administering the test drug, the experiment is "double-blind"; Neither the patient nor the investigator knows until after the experiment which patient is getting the test drug and which the placebo. If, at the end of the investigation, the patients receiving the drug did better than those not receiving it, one can be fairly certain that it was the drug and not some other factor that caused the improvement.

(b) *The Need for Controlled Studies.* In 1962, the Congress of the United States, after extensive hearings,[1] concluded that testimonial evidence of a drug's effectiveness—even including testimonials and illustrative "case histories" by physicians—was simply not reliable. It passed the law requiring that effectiveness be shown by "adequate and well-controlled clinical investigations" which is discussed elsewhere in this opinion.

The Supreme Court examined this issue closely in 1973 and determined that Congress' decision and FDA's enforcement of that decision were supported by the evidence elicited at the congressional hearings:

> (The FDA's) strict and demanding standards, *barring anecdotal evidence indicating that doctors "believe" in the efficacy of a drug*, are amply justified by the legislative history. The hearings underlying the 1962 Act show a marked concern that impressions or beliefs of physicians, no matter how fervently held, are treacherous. (Emphasis added.)

Weinberger v. *Hynson, Westcott & Dunning, Inc., supra*, 412 U.S. at 619. It noted:

> the conclusion of Congress, based upon hearings, that clinical impressions of practicing physicians and poorly controlled experiments do not constitute an adequate basis for establishing efficacy.

(id., 412 U.S. at 630).

Since both the Congress and the Supreme Court have spoken on this question, no further discussion by the Commissioner of the need for adequate and well-controlled studies,[2] rather than reliance on testimonial evidence, to show a drug's effectiveness is legally necessary. However, there is a continued public belief in testimonial or anecdotal evidence, fostered even by the lawyer of one of Laetrile's supporters. (See oral argument of Kenneth Coe, in which he contends that the safety and effectiveness of Laetrile has been shown by "anecdotes of people who have been diagnosd as terminal with cancer, anecdotes of people who have been cured of cancer, anecdotes of people who are walking around today, that are here today—well" (Tr. at 453). For this reason, the Commissioner will discuss the evidence in the record illustrating the need for scientific studies to show a drug's effectivness.

In his affidavit (R 175, Ex. A at ¶ 3), Dr. William Beaver, an expert in drug testing, notes that critics of well-controlled studies "often point out the undisputed fact that great strides have been made in therapy in the past without the benefit of this experimental device, but simply on the basis of the uncontrolled observations of astute clinicians * * *. (However), these critics often fail to mention the thousands of drugs which, on the basis of 'clinical experience,' were once accorded an 'indispensable place' in therapy, and which are now known to be useless." Dr. Beaver states (id. at ¶ 4): "The function of the controlled clinical trial is not the 'discovery' of a new drug or therapy. Discoveries are made in the animal laboratory, by chance observation, or at the bedside by an astute clinician. The function of the formal controlled clinical trial is to separate the relative handful of discoveries which prove to be true advances in therapy from a legion of false leads and unverifiable clinical impressions, and to delineate in a scientific way the extent of and the limitations which attend the effectiveness of drugs." See also affidavit of Bryant L. Jones (R 431 at ¶ 8): "Most medical mistakes of past centuries were a direct result of beliefs that were predicated on conviction rather than evidence. Most medical advances in modern times can be traced directly to the scientists insistence on valid scientific evidence to support use of today's drugs."

Because of the insidious nature of cancer, it is all the more important that the effectiveness of a drug purported to be useful in the treatment of cancer be demonstrated by well-controlled clinical studies and not solely by testimonials or anecdotes. Cancers in humans vary greatly in their behavior, i.e., their rate of growth, pattern of spread, effects on the normal organs of the person, and the types of clinical symptoms or signs they produce. There is wide variability in the pattern of spread and the outcome for an individual. The effects of cancer on an individual have an element of randomness, that is, an element of chance. Physicians are therefore simply unable to predict the outcome of any cancer at any stage of development with great accuracy. Patients with terrible and widely spread cancer will occasionally have miraculous or unexpected remissions of the disease. Untrained clinical investigators who administer any remedy to a large enough group of patients with cancer will ultimately observe a miraculous outcome. This apparently miraculous outcome may well mislead the untrained investigator into belief that the remedy was responsible for the result (R 390 at ¶ 14–15).

It has been noted above that, in an adequate and well-controlled study, neither the patient nor the investigator is told that the test drug is being administered because, if they knew, they might report results based merely on high expectations. This problem of assigning improvement to a drug when the improvement was simply a result of high expectations is known as the problem of the "placebo effect." The placebo effect is particularly common in cancer patients. A study of the placebo effect among 288 cancer patients undergoing controlled trials of oral analgesics showed that 112 patients received 50 percent or greater relief from placebo (i.e., non-drug formulations (R 186 at ¶ 13).

In his affidavit (R 185 at ¶ 20f) Dr. Daniel S. Martin states: "Humans are very susceptible, particularly when ill and desperate with hope, to the power of positive suggestion—namely, when given a 'drug' by an authority figure (e.g., a physician) with the firm statement and promise they will now begin to feel better, to have pain relief, to eat better, and to get well, these hopeful patients frequently do just what they have been told to expect." This, Dr. Martin states "is termed the placebo effect." Dr. Martin also explains that "Cancer is a chronic disease which some patients can live with for years before dying of the disease. During this slow death there are periods of 'ups' as well as 'downs,' and it is not surprising to have a Laetrile patient ascribe the 'up' to Laetrile, when it was merely coincidental timing" (id.). Similarly, Dr. Carl M. Leventhal states (R 184 at ¶ 7): "(P)sychogenic responses, popularly known as the placebo effect, are well documented and have been shown to occur from 30 to 70 percent of patients who are treated for pain."

The need for controlled testing as opposed to testimonial or ancedotal evidence of effectiveness is well-recognized by experts in the evluation and use of drugs. As Dr. Bayard H. Morrison states: "The problem is the anecdote doesn't permit you to know what happened yesterday. It doesn't permit you to know what is really going on today and certainly it doesn't give you any insight at all in what will happen to a given patient tomorrow, next week, or next year. To really know what a drug, any treatment, does to a patient you have to be able to evaluate him in the context of a large group whose disease you can follow carefully over a considerable period of time" (Tr. at 150).

(*c*) *The "Evidence" of Laetrile's Effectiveness.* (i) *Case Reports.*—The proponents of Laetrile (or amygdalin) have not submitted anything to the record that could be characterized as an adequate and well-controlled clinical study of Laetrile. In the regulation which defines adequate and well-controlled clinical investigations, it is clearly stated that: "Isolated case reports, random experience, and reports lacking the details which permit scientific evaluation will not be considered," even as corroborative evidence for adequate and well-controlled studies (21 CFR 314.111(a)(5)(ii)(c)). Yet that kind of report is the only "evidence" of Laetrile's effectiveness which has been submitted.

Because of the possible public belief in this kind of report, the Commissioner will discuss those submitted to this record. In addition, evaluations, submitted to the record, of earlier "case histories" or testimonials relating to use of Laetrile will be discussed.

(*a*) Reports Submitted to This Record

(*1*) Dr. Binzel

Phillip E. Binzel, Jr., M.D., Scientific Advisor to the Committee for Freedom of Choice, and in private practice as a family physician since 1955, appeared at the hearing to make an oral presentation (Tr. at 360–364) and to submit written testimony (Tr. Ex. 13). Dr. Binzel's submission at the hearing (id.) was a report of a study he conducted on more than 200 cancer patients to whom he administered a nutritional program, including Laetrile. Dr. Binzel stated that he had excluded from his report the following patients: "1: Those who were alive but who had been under treatment for less than 4 months. 2: Those who had died within the first 3 months of treatment. These are the patients whose disease was already too far advanced for any form of treatment to be beneficial * * *. 3: Those on whom there is not sufficiently adequate follow-up information to know for certain what their present condition is" (id.).

After the above exclusions, there remained 107 patients in Dr. Binzel's study who had been treated between 4 months and $2^1/_2$ years and who, according to Dr. Binzel, "are spread pretty equally throughout those time periods" (id.). He reported that 57 patients had primary carcinoma, and 50 patients had proven metastatic carcinoma at the time they started "nutritional therapy" (id.).

Dr. Binzel's exclusion from his study of patients for whom adequate followup information could not be obtained can be expected to exclude those patients who were dissatisfied with Laetrile treatment and left his care. That exclusion, together with the exclusion from consideration of patients who died within 3 months of the first treatment, would be expected to bias the study in favor of effectiveness.

Dr. Binzel states that he "did not attempt to differentiate between those patients who have had surgery and or cobalt and or chemotherapy and those who had none of these 'conventional' treatment" (Tr. Ex. 13, "Nutrition and the Cancer Patient" at 2). This, as Dr. Binzel notes, presents a "very valid question." Without knowing whether the patients in whom he saw improvement had had other, recognized effective, treatments, his conclusions cannot be evaluated (cf. 21 CFR 314.11(a)(5)(ii)(a)(2)(iii)).

Dr. Binzel's three-page "study," which was submitted without supporting documentation, simply lacks the details necessary to permit scientific evaluation and would not, for that reason, be considered by experts in drug evaluation even as corroborative of adequate and well-controlled studies if such studies existed (21 CFR 314.11(a)(5)(ii)(c)).

(*2*) Dr. Richardson

Edward Griffin, at the oral argument in this proceeding, submitted page proofs of a book entitled Laetrile Case Histories, The Richardson Cancer Clinic Experience by John A. Richardson and Patricia Griffin (Tr. Ex. 1.) Griffin stated: "Previously the opponents of Laetrile have said that there is no evidence that Laetrile works. There has been evidence of course, known to those of us who have been close to the subject. But admittedly, there has not been a great deal of medically documented evidence open to the public. And I believe that with the publication of this book at least we will be able to put an end once and for all to this claim of there not being any evidence" (Tr. at 15–16). Dr. Richardson does not claim to have conducted a research program and his case histories in no way even approximate an adequate and well-controlled clinical investigation.

Dr. Richardson's license for the practice of medicine has been revoked by the State of California (R 183 at 13) because he was found to have discouraged patients from seeking conventional therapy and to have practiced a type of treatment of cancer patients characterized as "an extreme departure from the standard practice of medicine" (R 179, Ex. B at 5). The California State Board of Medical Quality Assurance stated that these two findings established "gross negligence" on the part of Dr. Richardson (id. at 10). Dr. Richardson did not choose to appear in the administrative proceeding in which his license was ordered revoked (id. at 1–2).

A number of obvious questions are raised by Dr. Richardson's book: (1) There is no indication in this book—nor is there in the other reports in this section—of the chemical composition of the "Laetrile" which was used. Since there are variations in the composition of the drugs called by the name "Laetrile," this fact leaves the reader with no certainty

[1] See, e.g., Hearings on S. 1552 before the Subcommittee on Antitrust and Monopoly of the Senate Committee on the Judiciary, 87th Cong., 1st Sess., pt. 1, at 195, 282, 411–12. For a detailed discussion of the Congressional decision in 1962 to require adequate testing of drugs' effectiveness, see *Pharmaceutical Manufacturers Ass'n* v. *Richardson, supra*, 318 F. Supp. at 306 et seq.

[2] It should be noted that other types of testing are required to show a drug's safety, some of which must be completed before clinical investigations to show effectiveness can begin. (See 21 U.S.C. 355(d).)

as to what substance is claimed to be effective.

(2) The technique for selecting patients for reporting is hardly scientific. The book states: "Out of (a group of approximately 4,000 cancer patients), we selected a cross-section of about 500 for our study. We were able to establish contact and a working relationship with only about 250 of these. The cases with the weakest medical histories were discarded, as were those which were overly repetitious. The remainder (62) are contained in the study; but by no means do they represent our entire files" (Tr. Ex. 1 at 118–19).

It is absolutely incredible that anyone would expect to show the effectiveness of a drug by describing 62 out of over 4,000 patients with a selection process of the type Richardson describes. The Commissioner has no means of knowing what happened to the other 3,938 or more patients. No details are given to show how the 500 patients representing a "cross-section" of the 4,000 were chosen. The failure "to establish contact and a working relationship" with half of the patients that were chosen illustrates a serious lack of followup. Logic suggests that those patients who were not benefited by Laetrile would be less likely to be willing to develop a "working relationship" with Dr. Richardson's office. Clearly patients who had died would not be available for such a relationship. The discarding of weak medical histories has never been an accepted practice in the study of any drug. What constitutes the weakness of a medical history is not explained.

(3) There is some question whether what Richardson claimed to be positive effects were in fact positive. The authors admit that one of the weaknesses of the study is the shortage of cases involving 5-year survival or longer (Tr. Ex. 1 at 120).

Indeed, the case histories section of the book (Tr. Ex. 1 at 126–276) list for each of the 13 different groupings of cancer the expected death rate for those cancers in terms of percentage survival over a set number of years, usually 5 years. Many of the patients simply had not survived long enough at the time of the book's writing to constitute successes.

For example, six cases of female breast cancer are reported (Tr. Ex. 1 at 126–137). According to Dr. Richardson, these women have received metabolic therapy, including Laetrile, for periods varying from 13 to 32 months with an average of less than 21 months. Since Dr. Richardson states (Tr. Ex. 1 at 126): "Two out of every 3 patients with cancer of the breast who do not use Laetrile but choose instead to submit to orthodox therapies will be dead within five years," the fact that he has six patients who have survived 13 to 32 months with a mean of less than 21 months does not provide any evidence of the effectiveness of Dr. Richardson's treatment.

Dr. Richardson recognizes that some of the patients whom he has selected may not have had cancer. See, e.g., Tr. Ex. 1 at 148, patient B1381 where Dr. Richardson, in discussing the chest x-rays of a patient, states that the period of May 73 to January 77 represented: "A three-and-one-half-year remission of *probable* cancer of the lung." (Emphasis added). For several other patients, Dr. Richardson does not quote from the pathology report but merely reports that such a report was positive for cancer (see, e.g., patient P131B (Tr. Ex. 1 at 167)).

(4) Dr. Richardson relies in many instances upon what patients have told him about their medical histories, either orally or in writing. Some patient reports upon which he relies are hardly credible. (See, e.g., patient C106MA (Tr. Ex. 1 at 146): "The patient states the local doctors strongly recommended removal of both lungs and the permanent hospitalization of the patient, who then would be forever dependent on machines to do her breathing.")

(5) Some patient reports are so sketchy as to provide no basis for any conclusion. See, e.g., patient B144J (Tr. Ex. 1 at 202–203: There is no information regarding how the diagnosis of cancer was made. There is no indication that Dr. Richardson ever characterized the size of the tumor or whether he relied on the patient's description. There is no indication whether the patient had received any Laetrile since January 1970. There is no indication that there has been any contact with the patient since February 1976.

(6) As noted above, for each of the 13 groups of cancer which Dr. Richardson has used in his book he cites the anticipated fatality rates for patients receiving only orthodox treatment. As discussed elsewhere in this opinion, cancers are very different in their behavior, i.e., their rate of growth, their pattern of spread, their effects on the normal organs of the person and the types of clinical symptoms or signs that they produce (R 390 at ¶ 14). Experts in the testing of cancer drugs stress that the effects of cancer on a person have an element of randomness and that the ability to predict the outcome of any cancer at any stage of development varies (id.). In light of the regularity with which cancer patients' diseases vary from their expected courses, it would have been surprising if Dr. Richardson were unable to report that 62 out of 4,000 (c. 1½ percent) of patients he saw had remissions for periods of up to, but often much shorter than, 5 years.

Thus, the Richardson book is not only not the kind of adequate and well-controlled clinical investigation necessary to show the effectiveness of a drug, it is not even on its face a particularly credible recounting of medical case histories.

(3) Dr McDonald

Lawrence Patton McDonald, M.D., a urologist, and a member of the United States House of Representatives, submitted a statement in which he reported the following observations after treating almost 200 cancer patients (R 509 at 3):

"(1) Most patients had proven cancer and had had surgery and radiation and or chemotherapy. Most cases would have been hopeless by routine medical standards.

"(2) Perhaps 30–35% received minimal to no benefit from the program.

"(3) Approximately 40–45% received notable benefits from the program such as improved appetite, improved interest in life, weight gain, lessening or cessation of pain. This category ultimately died but were individually pleased with their improvements.

"(4) About 20% were in the category of marked improvement. In some cases this has been miraculous with these same patients doing very well today."

Dr. McDonald provided no details whatsoever other than those quoted above. Dr. McDonald's report was not, nor does it appear to have been submitted as, an adequate and well-controlled clinical investigation.

(4) Dr. Soto

Although Dr. Mario H. Soto appeared and testified (Tr. at 478–481) at the oral argument and was given an opportunity (Tr. at 481) to submit for the record data from his treatment of cancer patients with Laetrile, no data have been received from him.

(b) Case Reports Evaluated Previously

Much of the evaluation of case reports has been done in California, where Laetrile originated and was, along with a number of other "unproven" remedies, responsible for the 1959 passage of a State law aimed at cancer quackery. In 1952, the Cancer Commission of the California Medical Association collected information on 44 patients treated with Laetrile, all of whom either had active disease or were dead of their disease, with 1 exception. In some instances, the members of the Cancer Commission had the opportunity of seeing the patients thus treated. The conclusions of the Cancer Commission were that, of those alive with disease at the time of the study, no patient had been found with objective evidence of control of cancer under treatment with Laetrile. Nine patients who died from cancer after treatment with Laetrile were autopsied. Histological studies done for the Commission by five different pathologists showed no evidence of any chemotherapeutic effect (R 378, Att. 15 at 320–326; R 183, Att. 16 at 2–19 and App. 2–3).

In June 1962, the Cancer Advisory Council of the State of California Department of Public Health examined a total of 35 case histories of cancer patients treated with Laetrile. The Council unanimously judged these cases inadequate for any critical evaluation of Laetrile. "Many of the cases had received orthodox treatment; objective evidence of benefit was absent or insufficient, most of the documentation (dealt) with subjective improvement; some contained no pathological proof of malignancy; many were 1961 cases without followup; the duration of treatment was frequently unknown because the data reported the period of hospitalization only and often discharge dates were not shown" (R 183, Att. 16 at 30–31).

Thirty-six clinical records translated into English from the French were evaluated by the Cancer Advisory Council in December 1962. The Council reached the following conclusions:

1. The records failed to indicate that the patients treated with Laetrile secured either palliation or regression of their cancerous affliction as a result of the therapy.

2. In several instances, there was absolutely no evidence presented as to the response of the patient to the therapy.

3. In other instances, objective evidence documenting the statement of benefits, was not provided.

4. In one group of 17 of these cases, sufficient followup was absent. The longest period of followup was 14 months, 12 days and 23 days of hospitalization. The next longest was 381 days and the last was 127.

5. Results which were reported as "improved" were without meaning since no criteria, subjective or objective, were provided.

6. The evidence presented lends no credence to the alleged efficacy of Laetrile and Vitamin B_{15} in the treatment, durative or palliative, of advanced cancer (R 183), Att. 16 at 34–35).

In preparing its 1963 report, the Cancer Advisory Council also reviewed about 16 pounds of documentary material delivered by Laetrile proponents. The material contained a total of 63 case histories, 15 of which were submitted by two doctors in the United States (Dr. Ray Evers, Allusia, Ala., and Dr. John R. Morrone, Jersey City, N.J.).

The opinion [of the Cancer Advisory Council] on review of these cases is that they give no credence to the claimed curative effects of Laetrile in human cancer nor in those animal cancers where it had been investigated. The evidence of palliative response, both subjective and objective, is tenuous and poorly documented. Except in the cases in which death intervened and one or two others in which there was questionable diagnosis of cancer, no followup has been recorded, with the result that the final outcome of the cases is not recorded (R 183, Att. 16 at 35–36).

In January 1963, the McNaughton Foundation and the North End Medical Center, both in Montreal, Canada, submitted to the Cancer Advisory Council of the California State Department of Public Health a total of 14 clinical records on patients treated with Laetrile. These were not complete records but were abstracts furnished by various hospitals in Canada to the McNaughton Foundation. The Cancer Advisory Council appointed a committee of three physicians highly qualified and actively engaged in the treatment of cancer to review and evaluate these records. Each physician made an independent evaluation.

The committee reported: "These 14 records provided by the McNaughton Foundation were examined and fail to indicate that the patient treated with Laetrile secured either palliation or regression of their cancerous affliction as a consequence of the therapy. In several instances, there is absolutely no evidence presented as to the response of the patient to the therapy and in other instances objective evidence which documents claims of benefit is not provided. It is concluded from careful review of these records that they are inadequate as reports of therapeutic use of Laetrile, and they do not indicate that therapeutic benefit resulted from treatment with Laetrile, and do not indicate that this agent is of value in the treatment, cure, or palliation of cancer. In only one instance is there a statement by the examining physician indicating that a definite beneficial effect from Laetrile *might* have occurred" (emphasis in original) (R 378, Att. 14 at 26).

In 1971–72, the FDA, together with the National Cancer Institute, investigated and evaluated 12 clinical histories submitted by Dr. Ernesto Contreras of Mexico covering his experience with Laetrile in the treatment of cancer (see R 184, Ex. 3). FDA was able to obtain documentation covering the full course of the disease in 7 of the 12 case reports. All seven patients whose records were reviewed had received treatment other than Laetrile, including surgery, chemotherapy, or radiotherapy, or more than one of these approaches, either before, after, or concurrently with Laetrile therapy (R 184, Ex. 3; R 198 at 9–10).

Most of the alleged improvements stated, in the 7 case reports which could be evaluated, to be associated with Laetrile treatment have been found to be associated with one or more of the following events in the patient's disease (see R 183, Att. 16 at 10–11):

a. *Subjective improvement* was interpreted as being evidence of the agent's affecting the neoplasm, rather than being due to the general effect on the host, whether by metabolic or psychologic reasons.

b. Phases in the *natural history* of malignant neoplasm not infrequently observed in patients who are receiving no treatment whatever were interpreted as being due to the therapy employed (emphasis in original). * * * (For example.) occasional patients with widespread peritoneal carcinomatosis will exhibit regression of their disease following simple exploratory procedures.

c. Patients reported as showing regression of cancer with Laetrile were either receiving concurrent treatment by other methods, or had in their recent past been treated by some (orthodox therapy) and were exhibiting a degree of control of their disease *entirely attributable to the previous treatment* (Emphasis in original). * * *

d. A few of the patients treated did not have proof of the presence of cancer in the form of histological diagnoses, the evidence being more or less inferential, as radiographic observation of lesions in the lung, or a surgeon's diagnosis of a lesion as cancerous on observations of gross pathology at operation, without confirmation with biopsy.

e. Very few of the clinical records to which the Cancer Commission had access contained any sort of satisfactory evidence as to objective, accurate evaluation of the progress of the primary neoplasm or its metastases while under treatment.

(ii) *Animal Testing of Laetrile.*—As indicated elsewhere in this opinion, general recognition of Laetrile's effectiveness among experts in the evaluation of drug effectiveness could only be based upon adequate and well-controlled clinical (i.e., human) investigations. Thus, even if Laetrile had been shown to be effective in animal test systems, and the Commissioner concludes it has not, that fact would not remove Laetrile from the category of "new drug."

Nevertheless, in the interest of providing the public with all the information available in the record concerning this drug, the Commissioner will discuss the animal tests done with amygdalin about which there is controversy. Amygdalin has been extensively tested in animal systems. From the tests done, Dr. Dean Burk, president of the Dean Burk Foundation, Inc., has selected three tests done in the United States as showing a positive effect (R 302). In each case the laboratories which ran the tests found them to be negative. Dr. Burk also cites two foreign reports, one of which was not published (id.). His contentions, and the evidence relating to each in the record, will be discussed point by point and other animal testing done with the drug will be noted.

(a) Tests Claimed to Show a Positive Effect

(1) Sloan-Kettering

Dr. Burk includes the following in his list of animal studies showing a positive effect for amygdalin:

Sloan-Kettering Cancer Center (New York), with CD_2F_1 mice bearing spontaneous mammary carcinomas: Inhibition of formation of lung metastases, inhibition of growth of primary tumors, and greater health and appearance of animal hosts, upon treatment with 1–2 gm crystalline amygdalin kg body weight/day (Report of K. Sugiura, June 13, 1973) (R 302, Ex. A at 15).

Regarding the studies conducted at Sloan-Kettering, C. Chester Stock, Ph. D., Vice President and Associate Director for Administrative and Academic Affairs, Sloan-Kettering Institute for Cancer Research, stated in his affidavit (R 195) that:

We have tested amygdalin at high doses, 1000 mg/k/day, in over a dozen transplantable tumor systems and one induced tumor system without seeing any action against the tumors. The chemotherapeutic agents effective in clinical cancer have had or would have had their activities detected in one or more of those systems.

In spite of demonstrated utility of transplanted experimental animal tumor systems, some individuals believe that use of spontaneous animal tumors is more appropriate for seeking drugs for use in man. It was considered that this would be true of the advocates of the use of Laetrile who believe it needs to be used for relatively long periods of time.

Consequently, Dr. K. Sugiura in my laboratory looked for the effects of amygdalin on the growth of spontaneous mammary tumors in CD_2F_1 mice and also on metastatic spread to lungs of the hosts. Early observations of Sugiura featured an apparent inhibition of the appearance of metastases in the lungs of mice given daily (except Sunday) doses of 2000 mg/k of amygdalin in his 3 initial experiments. The treated mice showed lung metastases in 20% while 80% of the controls had metastases. The mice had been injected until death or until the primary tumors were over 2.5 cm in diameter. The data from these experiments were leaked to the press unfortunately before they could be checked adequately. Subsequent experiments, in some of which Dr. Sugiura participated, some conducted with Dr. Daniel Martin of the Catho-

lic Medical Center of Brooklyn and Queens and some which were independent by other investigators in our Institute, showed that the initial results were not consistently observable. In some experiments there were more metastatic mice in the treated than in the control mice. In the latest experiment in which Dr. Sugiura read the lungs of the mice without knowing what treatment they had received, there was essentially no difference found between the treated and control groups (R 195 at ¶ 10).

In his affidavit (R 185), Daniel S. Martin, M.D., states that: "My laboratory's tests with Laetrile demonstrated Laetrile to be without effect (on spontaneous tumors in experimental animals). Further, these negative tests on these animal tumors were confirmed by three other investigators at Memorial Sloan-Kettering Cancer Center in New York. One of the latter investigators (Dr. K. Sugiura) reported his initial experiments to demonstrate Laetrile to have anti-cancer activity, but his subsequent results were negative. A degree of variability in results is common in biological research, and the final opinion is based on whatever the majority of the findings are. In this instance, the totality of the data clearly and unequivocally reveals Laetrile to be without anti-cancer activity" (R 185 at ¶ 21 (c–d)).

(2) Southern Research Institute

Dr. Burk's citations continue:

Southern Research Institute (Birmingham, Alabama) for the National Cancer Institute, in a majority of 280 BDF, mice bearing Lewis lung cancers, treated with up to 400 mg crystalline amygdalin per kg body weight, with respect to increased life span (Report, December 3, 1974) (R 302, Ex. A at 15).

The results of two studies conducted by Southern Research Institute for the National Cancer Institute were published in the scientific literature in 1975. One of the studies involved an experiment "in which four transplantable rodent tumors (L1210 lymphoid leukemia, P388 lymphocytic leukemia, B16 melanoma, and Walker 256 carcinosarcoma) were used to investigate the antitumor activity of amygdalin MF * * * alone and in combination with *beta*-glucosidase" (R 184, Ex. 3b at 939). No antitumor activity was observed in any of the four tumor systems tested with amygdalin alone or in combination with *beta*-glucosidase (*id.*; see also R 173, Att., Memorandum, March 12, 1973).

The second study, in which amygdalin MF (i.e., amygdalin provided by the McNaughton Foundation) was evaluated alone or in combination with *beta*-glucosidase against three transplantable rodent tumors (Ridgeway osteogenic sarcoma, Lewis lung carcinoma, and P388 leukemia), showed that amygdalin alone or in combination with *beta*-glucosidase did not demonstrate antitumor activity against any of these three tumor systems (R 184, Ex. 3C at 952–53).

At the oral argument, Bayard H. Morrison, M.D., Assistant Director at the National Cancer Institute stated that the Institute:

has sponsored—other organizations have conducted—tests of Laetrile at various dosage levels in a variety of animal tumor systems, probably exceeding 15 or more, probably closer to 20.

This indeed really is about the most extensive that NCI and other laboratories in the aggregate have tested of essentially a nonactive substance. For in all of these tests which include tumors ranging from carcinomas, sarcomas, lymphomas, any kind of tumor which parallels to a large degree the human type of tumor, the results have been essentially negative. There have been occasional, marginal evidences of activity which have not been reproducible.

So, in balance, Laetrile has failed the test of demonstrating activity in the preclinical animal tumor systems that we know now predict for activity in human cancer.

And I should add that of the 30 or 40 drugs that are now regularly available and known to have effect in certain forms of human cancer, all of these drugs have demonstrated activity, significant activity, in one or more of these animal tumor systems (Tr. at 146A–47).

The proponents of Laetrile question the statistical controls and experimental design employed in the studies conducted by Southern Research Institute (see R 302, Ex. E). They suggest the utilization of methods of statistical analysis developed for use in judging results obtained with physical, rather than biological, systems. One of the research scientists at the National Cancer Institute responsible for the studies conducted by Southern Research Institute points out that "[t]he variation in all biological systems is far greater than that involving physical phenomena" (R 438 at 1). He suggests that it is, for that reason, not possible to use the internal statistical analyses suggested by the proponents of Laetrile (*id.*).

(3) Scind Laboratories

Dr. Burk's third reference is:

Scind Laboratories, University of San Francisco, 400 rats bearing Walker 256 carcinoma (200 treated with amygdalin, 200 controls), with 80 percent increase in life span at optimum dosages (500 mg amygdalin/kg body weight) (October 10, 1968). Cf. FDA–IND application No. 6734, pp. 247–8, 00080–00093 (R 302, Ex. A at 15).

The Scind Laboratory data were submitted to FDA in support of the McNaughton Foundation's IND for amygdalin in 1970. An ad hoc committee of cancer experts evaluated these data during its review of the IND. In its report, the Committee stated: "We are particularly cognizant of the lack of adequate evidence of *in vitro* antineoplastic characteristics. The Scind Laboratory data in the initial submission of IND 6734, April 6, 1970, concerning two experiments with a Walker 256 system are considered unacceptable because of inadequate documentation of status of animals, percentage of tumor take, rate of growth, and accounting for acute deaths[,] and the other substantial lack is a statistical analysis. Scind Laboratory, in a letter dated October 18, 1968, filed with [an] October 31, 1970, amendment, states 'Laetrile, when administered without Beta glucosidase has *little or no effect* upon transplanted rodent tumor systems tested.' (emphasis theirs [i.e., Scind Laboratory's])" (R 184, Ex. 2 at 1).

(4) Pasteur Institute

Dr. Burk's fourth reference is:

Pasteur Institute (Paris), with human cancer strain maintained in mice treated at optimal dosage of 500 mg Amygdalin Marsan/kg body weight/day; increased life span and delayed tumor growth up to 100 percent (Dec. 6, 1971 report by M. Metianu) (R 302, Ex. A at 15).

In a sworn affidavit (R 422), a medical officer in the Bureau of Drugs, who is trained in medicine and experienced in scientific research and who is fluent in both French and German, commented on the cited studies conducted at the Pasteur Institute in Paris and the Institute von Ardenne in Dresden (see discussion below).

The medical officer, through the American Embassy in Paris, learned that the report entitled, "Anti-Tumor Toxicity and Activity" was written on the letterhead of the Institute Pasteur and was an internal report of the Institute that has never been published in any scientific journal. In the affidavit, the medical officer states that the fact that the report "represents preliminary work only and has not been published in any scientific journal since it was prepared six years ago raises my suspicions that the preliminary results obtained could not be reproduced" (R 422 at ¶ 6).

(5) Institut von Ardenne

The fifth reference cited by Dr. Burk is:

Institut von Ardenne (Dresden, Germany), H strain mice bearing Ehrlich ascites carcinoma treated with bitter almond amygdalin ad libitum in addition to the regular chow diet; increased life span and decreased rate of cancer growth, treatment beginning 15 days before cancer inoculation (Arch Geschwulstforsch 42, 135–7, 1973) (R 302, Ex. A at 15).

After reviewing the article published in the Arch. Geschwulstforsch, the Bureau of Drugs medical officer made the following comments:

The author's terms (in the summary section): "feeding with bitter almonds," "prolongation of survival" (due to feeding with bitter almonds), and "inhibition of tumor growth" are not adequately defined in the subsequent text or by the content of the text and thus are uninterpretable.

The description of the methodology is deficient for a number of reasons. It fails to provide information whether the mice were kept singly or caged in groups. It fails to provide information on the techniques for demonstrating whether and how much of the bitter almonds had been eaten by each experimental mouse. It fails to inform on the origin, quality, and composition of the bitter almonds with respect to the latter alleged role of "amygdaline" and HCN. Due to these failings it is not possible to draw conclusions from any differences of events between experimental and control animals—if such differences could be demonstrated at all. The author also fails to give the age of the mice and the body weight of each individual mouse of each group and at each weighing date. The use of sole mean values in this paper is potentially misleading. (The scientific evaluation of data requires implementation of variabilities of the individual measurements.)

The author makes statements on "tumor growth" which are based on implications, indirect deductions, and on arbitrary assumptions.

The term "tumor growth" is potentially misleading for the Ehrlich ascites cancer which consists of a cancer cell suspension in the peritoneal fluid. The study fails to use precise methods of measuring the number of cancer cells present in each mouse.

* * * * *

In my opinion, this article fails to provide any evidence that bitter almonds are effective in inhibiting the growth of tumors (R 422 at ¶ 7).

(b) Other Tests

As noted above, the two tests done by the Southern Research Institute and the Sloan-Kettering studies now completed have demonstrated conclusively, in the view of most experts, that amygdalin, either alone or in conjunction with the enzyme *beta*-glucosidase, exhibits no antitumor effect. These results are in accord with the negative findings of three earlier animal studies commissioned by the National Cancer Institute. Those tests are summarized in the record as follows:

1957: Amygdalin was tested with three transplanted mouse tumor systems used at the time by the NCI Cancer Chemotherapy National Service Center (CCNSC) to screen compounds for anti-cancer activity. Amygdalin produced no significant inhibition or growth of the carcinoma 775 or sarcoma 180 tumors, and produced no significant increase in the lifespan of mice with leukemia L1210 tumors.

1960: Material from a different source was tested against the same three mouse tumors. The compound failed to show antitumor activity.

1969: Amygdalin was tested alone and in combination with beta-glucosidase against leukemia L1210 in mice. Amygdalin was inactive against the tumor, alone and in combination with the enzyme. Toxic side effects increased when the drug and enzyme were given together (R 173, Att., "NCI Testing of Laetrile (Amygdalin)"):

A study, entitled "Failure of Amygdalin to Arrest B16 Melanoma and BW5147 AKR Leukemia," Hill et al., Cancer Research, 36:2102–07, June 1976, appears as Exhibit 3 to R 170. The December 9, 1976 report of yet another animal test of amygdalin is Exhibit 3D to R 184. The drug was found not to be active against human breast and colon tumor xenografts in athymic mice.

The failure of Laetrile (or amygdalin) to show any effect in animal systems is important because those systems have shown an ability to predict effectiveness in humans. See the statement of Dr. James F. Holland (R 396): "No drug has been proved active in human cancer which does not show anti-cancer activity in experimental animals. Human cells are not so different from other mammalian cancer cells that an active drug does not act on at least one other mammalian system * * *. Laetrile is completely inactive against animal cancers. It has been repeatedly tested in reputable laboratories against a broad spectrum of rodent neoplasms. Inasmuch as no drug has been found active against cancer which isn't active in the screening tumors, there is no basis to consider Laetrile a candidate chemotherapeutic compound against human cancer * * *. No scientifically accepted data whatever have been presented indicating evidence of benefit from Laetrile."

See also the statement of Dr. Bayard H. Morrison, Assistant Director of the National Cancer Institute: [O]f the 30 or 40 drugs that are (now) regularly available and known to have effect in certain forms of human cancer all of these drugs have demonstrated activity, significant activity, in one or more of these animal tumor systems." (Tr. at 147).

One comment theorized that the reason why animal tests do not show Laetrile to have any anticancer activity is because the laboratory animals are bred to have defective immune rejection systems (R 235 at 7). This theory assumes that Laetrile is hydrolyzed by an enzyme that is in greater concentration at the cancer site than at other locations in the body. The comment explains that: "If, because of a defective immune system, laboratory animals produce no hydrolyzing enzyme at the cancer, (sic) site, that fact alone would explain why Laetrile doesn't work on laboratory animals. It can't work on any organism that has a defective immune system.'" (See R 235 at 7–8). No evidence has been submitted to support the comment's theory.

The Commissioner concludes that the animal studies conducted to date fail to show that Laetrile (or amygdalin) has anticancer activity in laboratory animals. As has been noted previously, even if these tests showed that the drug had anticancer activity in laboratory animals, such findings would not be relevant to the question whether it is generally recognized by qualified experts as a safe and effective anticancer drug, since general recognition must be based upon testing in human beings. The lack of positive effect in test animals is of some importance, since a clear showing of success in animals might suggest the propriety of clinical testing in humans. The failure of amygdalin to produce an anticancer effect in animals is added reason for skepticism concerning the claims that it is effective in humans.

2. Testimony of Experts

(a) Experts Opposed to Laetrile. The evidence that experts in the evaluation of drug safety and effectiveness do not "generally" recognize Laetrile as effective for any therapeutic use is overwhelming. (It should be remembered that for recognition to be general it must be shown that most qualified experts recognize the drug's safety and effectiveness. The fact that a few persons claiming expertise believe the drug safe and effective is thus not sufficient.) The record contains statements that Laetrile is not considered as an effective cancer therapy from several organizations with members who are experts in cancer drug evaluation—e.g., the American Cancer Society, the American Medical Association, the Committee on Neoplastic Diseases of the American Academy of Pediatrics—and from a large number of the Nation's most eminent and well-qualified experts in the area of cancer drug evaluation. It is difficult to conceive of a clearer showing of a lack of "general" recognition of a drug's effectiveness than the expression of the views of these many experts.

The Commissioner will describe the qualifications of some of these experts and either quote from or summarize the views which they have expressed. Each of the submissions referred to contains a great deal of information concerning Laetrile and the consensus of expert opinion about it, and the following excerpts are meant only to be illustrative of the views each expert expressed:

Arthur I. Holleb, M.D., Senior Vice President for Medical Affairs, American Cancer Society, Inc., submitted an affidavit (R173). His curriculum vitae lists his membership in and leadership of several professional societies, which include the James Ewing Society and the American Radium Society. He also serves on the Cancer Commissions of the American College of Surgeons and the American College of Radiology and is editor-in-chief of CA, a cancer journal published by the American Cancer Society.

Dr. Holleb stated (R 173 at ¶ 3) that he had reviewed three basic documents attached as exhibits to his affidavit and supporting documents for these basic documents and that the information contained therein was true and correct. Submitted as an attachment to Dr. Holleb's affidavit is a "Statement Concerning Laetrile" by Frank J. Rauscher, Jr., Ph. D., Former Director, National Cancer Program, National Cancer Institute. Dr. Rauscher states, "There is no evidence that Laetrile works. Over the last decade, or more, NCI has repeatedly conducted tests of Laetrile in a variety of animal tumor systems. Most have been completely negative. The others have shown only marginal levels of activity which could not be reproduced. The animal systems used are those which have detected the active properties of the scores of drugs which, unlike Laetrile, have proven to be of demonstrable value in patients with many forms of cancer. The therapeutic benefits as well as the attending side effects of these materials have been clearly and amply documented in clinical literature based on carefully conceived, meticulously conducted and monitored clinical trials. The same cannot be said for Laetrile where clinical reports are largely anecdotal and unsubstantiated. Thus, there is no laboratory or clinical evidence of the effectiveness of Laetrile" (*id.* at 2).

See also testimony of R. Lee Clark, M.D., President, American Cancer Society, in which he states: "The American Cancer Society views Laetrile as having no proven value in the treatment of human cancers. The Society has made a continuing review of all the literature and other information available and finds no evidence that treatment with Laetrile results in objective benefits to

patients with cancer. Since 1956, the National Cancer Institute, in conjunction with the cancer research centers of America, has reviewed over 300,000 drugs, chemicals, antibiotics, and other agents including Laetrile to evaluate them in regard to their usefulness in cancer treatment. From this research, more than forty specific agents have been found to have an effect against cancer in animal and in man. Although several trials have been made with Laetrile, it has never been proved effective in cancer in any way whatsoever" (R 307 at 1).

Frederick N. Silverman, M.D., Chairman, Committee on Neoplastic Diseases, American Academy of Pediatrics, submitted testimony (R 233 and 317) which included the following comments from his committee: "Laetrile has never been shown to exhibit any efficacy in the treatment of neoplastic disease in children. It cannot be regarded as safe if it is used in lieu of drugs currently employed either as accepted treatment or in carefully designed investigative treatment protocols."

William R. Barclay, M.D., testified (Tr. 269–281) for the American Medical Association (AMA). The AMA supports the "FDA's contention that laetrile is a new drug and is neither generally recognized by experts as safe and effective for its purported use nor should (it) be distributed in interstate commerce until such time as its safety and efficacy for the treatment of cancer have been established through controlled preclinical and clinical studies" (Tr. at 272).

Dr. Barclay discussed (Tr. at 274) a May 1965 report in the Canadian Medical Association Journal which "concluded that laetrile could not be considered as a palliative in cancer therapy on the basis of the biological rationale advanced by the manufacturer." He further states that: "the American Cancer Society has long pointed out through its continuous reviews of the scientific literature that laetrile is not a proven or generally recognized treatment for cancer. The American Medical Association likewise views laetrile as ineffective in the treatment of cancer" (Tr. at 275–276). At its 1976 Clinical Convention, the AMA adopted the following resolution pertaining to the profession's view of Laetrile: "*Resolved:* That the American Medical Association continue to inform the public of the danger of delay in the diagnosis and treatment of malignancies by methods not generally recognized by the medical profession as beneficial and effective; and be it *Further resolved*, That the American Medical Association inform the public that the safety and efficacy of amygdalin for the treatment or palliation of malignancies is unproven and that the use of amygdalin in such cases exploits the victims of malignancies and their families by preying upon the emotions of the hopelessly ill, in some cases for the profit of the unscrupulous." Dr. Barclay (Tr. at 276) states: "We believe that experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs are virtually unanimous in their recognition of the ineffectiveness of laetrile for the treatment of cancer." The AMA testimony concludes (Tr. 280): "It is clear that laetrile is not generally recognized by experts qualified to evaluate the safety and effectiveness of drugs as safe and effective."

W. Sherwood Lawrence, M.D., a Medical Officer of the State of California Department of Health, Public Health Division, Food and Drug Section, serves as the Executive Secretary of the State of California Cancer Advisory Council. He is the custodian of the records of the Council and is knowledgeable of the work of the Council and the study that the Council has conducted (R 183 at 1). Dr. Lawrence states (R 183 at 17): "The evaluation by the Council of all the clinical data available here and in Canada has failed to establish any evidence of clinical efficacy. The proponents have never published competent well-designed controlled clinical studies demonstrating the slightest efficacy of Laetrile in the cure, amelioration or control of cancer. Laetrile (amygdalin) is not generally recognized by qualified experts as either safe or effective in cancer therapy."

Jonathan E. Rhoads, M.D., is National Chairman of the National Cancer Advisory Board, a surgeon, former President of the American Cancer Society and a member of a number of organizations focusing on research, including the American Association for Cancer Research and the American Institute on Nutrition. He made a presentation at the oral argument (Tr. at 109–115), on behalf of himself, as a citizen, and the American Cancer Society. Dr. Rhoads stated (Tr. at 114): "The position of the American Cancer Society is that Laetrile can be toxic in some doses and some modes of administration. But that more importantly, it is unsafe because its effectiveness has not been demonstrated scientifically so that reliance on it may lead patients to forego better treatment. Laetrile certainly has not been proven effective as a cancer treatment or cure and is not generally recognized by qualified experts as safe and effective for cancer."

Jesse L. Steinfeld, M.D., is Dean of the School of Medicine, Medical College of Virginia, Richmond, Va.; he was formerly Deputy Director of the National Cancer Institute; United States Surgeon General; Deputy Assistant Secretary for Health and Scientific Affairs, Department of Health, Education, and Welfare; and Chairman of the Department of Oncology and Director of the Comprehensive Cancer Center at the Mayo Clinic. His professional experience includes over 20 years of involvement in cancer research, particularly with respect to the metabolic effects in cancer patients that occur as cancers grow and metastasize (R 194). Dr. Steinfeld was recognized as an expert in the evaluation of the safety and effectiveness of cancer drugs by the Court in *Durovic* v. *Richardson*, 479 F. 2d 242, 248 (7th Cir.), cert. denied 414 U.S. 944 (1973). He states that neither amygdalin nor any other cyanogenic glycoside is generally recognized by himself or by experts generally, to be safe and effective for any medical purpose (id. at 5). Dr. Steinfeld also states: "I have reviewed the clinical records of a number of patients who have received laetrile as treatment for cancer, while I was in California. In that review, there was no evidence to support the view that laetrile was of value to cancer patients. I have reviewed the volumes of material submitted to the FDA in 1970, requesting an Investigational New Drug Application (IND) for laetrile. The application was not approved because of serious flaws or deficiences in both the animal and human trials" (id. at 8).

Richard H. Lange, M.D., is Chief, Section of Nuclear Medicine, Ellis Hospital, Schenectady, N.Y. He submitted verified testimony (R 385) in which he cited his experience in the field of internal medicine, nuclear medicine, and his particular interests in the problem of cancer. Dr. Lange states: "When one reviews the extensive information presently available from leading experts on cancer, there is no evidence to suggest that Laetrile is in any way an effective cancer drug. * * * The theory that Laetrile is effective because it destroys cancer cells by producing a release of cyanide has never had any scientific support, nor has the newer claim in the prior approach that cancer is caused by a vitamin B–17 deficiency and that Laetrile is vitamin B–17. No scientific group has recognized Laetrile as a vitamin. * * * Evidence of an anti-tumor effect in animals must be suggested or proven before a drug can be used in human clinical trials. Without such proof of effectiveness, the concept of scientific investigation would be altered; the gates would be open to all sorts of quacks and utter confusion would result. Placebo effects and personal testimonials must be separated from competent objective scientific investigation which is free from bias, personal prejudice or emotional involvement" (R 385 at 1–2).

Michael B. Shimkin, M.D., is Professor of Community Medicine and Oncology, School of Medicine, University of California, San Diego, and has had 40 years of experience in cancer research, teaching, and clinical treatment of patients. He has authored or co-authored over 280 publications on clinical and laboratory cancer research (R 192). Dr. Shimkin states: "My knowledge about amygdalin ('Laetrile') spans some 30 years. At no time, nor now, has there been evidence that this material is useful in the prevention or treatment of cancer in man or in experimental animals. I know of no expert of cancer in chemotherapy who has evidence of usefulness of amygdalin in the treatment of cancer, nor of any recognized journals or textbooks in medicine that indicate such usefulness. I know of no laboratory or clinical studies of amygdalin that demonstrate scientifically any significant, repeatable benefit in animals or in man" (id. at ¶ 12).

Bernard C. Korbitz, M.D., is Chief of the Chemotherapy Section, Department of Oncology at the Radiologic Center, Inc., Nebraska Medical Hospital, Omaha, Nebr. He has been involved in various aspects of cancer research and cancer therapy since approximately 1954. His professional training and experience includes the authorship or co-authorship of approximately 40 articles relating to cancer hematology and internal medicine (R 181). Dr. Korbitz states: "To date, there has been no bona fide or substantiated evidence that Laetrile has any significant anti-tumor effect in any of the rodent animal systems evaluated. I have reviewed reports by Dr. Navarro in the Philippine Medical Journal who purported to have produced good results in cancer patients using larger doses. In reviewing his studies there is no objective evidence to support these claims that Laetrile is effective in any dose range against cancer" (id. at 3). Dr. Korbitz also states, "There is no objective evidence of any sort from pre-clinical or sketchy clinical reports to indicate that Laetrile has any benefit in the treatment of cancer patients" (id. at 4).

Susan J. Mellette, M.D., is Associate Professor of Medical Oncology, Medical College of Virginia and has had over 20 years experience in a private practice essentially limited to patients with metastatic malignant diseases. In 1975 she was President of the American Association for Cancer Education, an organization of medical and dental school faculty interested in cancer teaching in professional schools (R 420). Dr. Mellette states, "My views on the substance Laetrile are based on reports of the ineffectiveness of amygdalin which have been published in the standard scientific literature and also on two books and other printed materials put out by proponents of Laetrile which I have read. In the latter, I have found only unsubstantiated testimonials and hearsay in the patient reports and so-called scientific arguments which reach unwarranted conclusions without appropriate experimental methodology" (R 420 at 1).

Daniel S. Martin, M.D., has been involved in general cancer research since 1946. Since 1950, he has worked in cancer chemotherapy, and since 1958 in cancer immunology as well. His professional bibliography includes over 100 publications, the vast majority of which resulted from research in cancer immunology and chemotherapy (R 185). Dr. Martin states, "The proponents of Laetrile claim that their clinical studies in cancer patients demonstrated that Laetrile often reduced the size of a malignant tumor and caused some tumors to completely regress. *Evidence*—none; i.e., no *objective* evidence to support such a claim. No 'hard' patient data, no tumor measurements of the progress of the disease state, no biochemical data, no survival data, etc. The pro-Laetrilists do not present any competent scientific evidence that Laetrile is effective for the treatment of cancer. Only testimonials—'anecdotal' evidence—are presented that the Laetrile-cancer patients and their doctors 'believe' in its efficacy. Belief, however, is not adequate for reliance of drug efficacy. Only strict scientific standards should be employed; namely, adequately documented scientific, well-controlled, evidence of objective antineoplastic effects in humans. The fact that a great many cancer patients have received Laetrile and attest to its benefits is not evidence. Mere clinical experience *per se* is not a substitute for lack of appropriate objective documentation of clinical efficacy" (emphasis in original) (id. at ¶ 20e).

Harold James Wallace, Jr., M.D., is Director of Cancer Control and Rehabilitation at Roswell Park Memorial Institute, Buffalo, N.Y. He has had extensive training in the clinical pharmacology of cancer drugs and has participated directly in the clinical testing of a number of new anti-cancer drugs. He has, over the past 20 years, conducted and published the results of controlled clinical trials of drugs, radiation therapy, and other treatments of cancer (R 199). He is a cured cancer patient (Tr. at 170). Dr. Wallace states: "There is no evidence in either animal models or in the large numbers of patients who have received amygdalin that it is effective in any way in preventing cancer, causing a regression or remission of cancer, or improving the life expectancy of the cancer patient. Neither has there been any evidence that it decreases the symptoms of pain, weakness, or depression from cancer in any direct way. It is not analgesic or antiemetic in character. The anecdotal evidence claimed by amygdalin proponents has not been presented to me or to any scientific forum for critical review and these claims have not been substantiated by documentation in medical records available for review" (R 199 at ¶ 14).

John T. P. Cudmore, M.D., is a Board-certified surgeon whose professional experience includes the practice at oncology for the past 20 years. Dr. Cudmore stated that his work requires him to be acquainted with the literature related to drugs used in the treatment of cancer published in professional journals, and that he regularly attends meetings of experts at which drugs used in the treatment of cancer are discussed and evaluated (R 178). Dr. Cudmore states (id. at ¶ 10): "In my practice of oncology in San Diego since 1956, I have examined numerous patients after their treatments with amygdalin or Laetrile in nearby Tijuana, Mexico. I have never seen any evidence of cure or palliation with Laetrile. I can conclude from my personal experience that Laetrile or amygdalin is ineffective in the treatment and prevention of cancer." In support of these statements Dr. Cudmore discusses in his affidavit the case histories of nine patients who have received Laetrile, all of whom in his opinion received no benefits therefrom. Dr. Cudmore states (id. at ¶ 8): "The composition of amygdalin is such that I do not recognize it, nor is it generally recognized by experts qualified through scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for the use in treatment or prevention of cancer."

Sidney Weinhouse, Professor of Biochemistry at Temple University School of Medicine, is a researcher in the field of cancer for the past 30 years, editor of the journal, Cancer Research, and a member of the Board of Directors of the American Cancer Society (R 384). He made the following statement regarding Laetrile: "Although widely touted for its curative effects on cancer for many years, there is no shred of evidence from any reputable cancer researcher that this substance has any therapeutic value. I know of no reputable scientist who has published evidence for the effectiveness of Laetrile" (id. at 1).

Bryant L. Jones, M.D., is a Medical Director in the Commissioned Corps of the United States Public Health Service (R 431). Since 1960, first in the pharmaceutical research industry and then in government, he has worked with the design and evaluation of clinical investigations, the purpose of which were to determine the safety and effectiveness of drugs (id. at ¶ 2). Dr. Jones states, "I am presently responsible for the review and evaluation of protocols and reports concerning the use of drugs subject to New Drug Applications (NDA's) and Notices of Claimed Investigational Exemption for New Drugs (IND's). I review such protocols and reports for the purpose of determining whether or not they provide scientifically acceptable standards of safety and effectiveness. I would estimate that I have reviewed several thousands such reports, most of which were and are directly related to and involve drugs intended for use in the field of oncology, which is the management of cancer" (id. at ¶ 3). Dr. Jones states, "I have made a careful review of the statements which are part of the record in this proceeding identified as:

1. Comments: C0001 through C0247.
2. Testimony: TS 01 through 14.
3. Letters: Let No. 1 through 49.
4. Oral arguments: OR 01 through 11.

When submissions were received by the Hearing Clerk, they were assigned both a number-letter code (used here by Dr. Jones) and an R number, utilized for purposes of citation in this opinion.) I have evaluated each statement and report which purports to show that Laetrile, amygdalin, or any of the cyanogenetic glycosides are safe or effective in the treatment of cancer, as a palliative, as an analgesic, or for any medical purpose. None of the statements or reports are adequate, well-controlled scientific studies. The reports I have examined fail to measure up to the principles applicable to adequate, well-controlled scientific studies in every particular. The studies not only fail to measure up to minimum standards applicable to adequate, well-controlled scientific studies, but also fail to present any scientifically acceptable, objectively documented clinical evidence of safety and effectiveness for amygdalin, Laetrile, or any cyanogenic glycoside" (id. at ¶ 6).

George J. Hill, II., M.D., is Professor and Chairman of the Department of Surgery and Associate Dean for Clinical Affairs of the Marshall University School

of Medicine, Huntington, West Virginia (R 170). His professional duties involve the medical management of cancer and require that he be familiar with drugs that are generally recognized as safe and effective in treating cancer. He keeps abreast of the consensus of informed opinion by reading medical literature concerning cancer and its management, by attending meetings of experts where methods of treatment that are recognized as safe and effective are described and discussed, and through teaching, conducting research, and exchanging views with his colleagues who are experts in the field (id. at ¶ 12). He has himself conducted studies on amygdalin, the reports of which have been published and are attached as Exhibits 2 and 3 to his affidavit. He states, "In the course of my investigation of amygdalin's potential as an antitumor agent, an extensive review of both popular and scientific literature relating to it and Laetrile was conducted. Most reports in the scientific literature supporting Laetrile have appeared in foreign medical journals. Only one preliminary report purporting to support use of Laetrile was found in an American journal. The favorable reports concerning clinical use of Laetrile or amygdalin were testimonials based on individual case reports. There were no adequate, well-controlled clinical studies which demonstrated or purported to demonstrate that amygdalin or Laetrile were safe and effective for use in the medical management of cancer. Neither were there any favorable clinical reports in which an attempt was made to measure any objective parameters for adequate periods of followup to determine any possible drug-induced effect. The literature also contains reports concerning a limited number of carefully monitored clinical cases in which use of amygdalin failed to result in any objective benefit in the management of cancer" (id. at ¶ 9–10). Dr. Hill also states, "The composition of amygdalin is such that I do not recognize it, nor is it generally recognized among experts qualified through scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use in cancer management, or for any other known medical use. I know of no medical school where use of amygdalin for treatment or prevention of cancer is taught. I know of no medical expert qualified through scientific training and experience in the control of cancer who advocates use of amygdalin" (id. at ¶ 13).

Vincent T. DeVita, Jr., M.D., is Professor of Medicine at the George Washington University School of Medicine, Washington, DC, and is a diplomate of the American Board of Internal Medicine, with subspeciality certification in Hematology and Medical Oncology (R 169). Dr. DeVita has been Director of the Division of Cancer Treatment, National Cancer Institute, since 1974. His job requires that he regularly attend meetings of experts at which drugs used in the treatment of cancer are discussed and evaluated and that he be acquainted with the literature published in professional journals relating to drugs used in the treatment of cancer (R 169 at ¶ 1–10). Dr. DeVita states (id. at ¶ 18–19), "The composition of amygdalin is such that I do not recognize it, nor is it generally recognized by experts qualified through scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use in the treatment or prevention of cancer. I know of no adequate, well-controlled clinical study which shows it to be safe and effective for use in the treatment or prevention of cancer in humans. I know of no medical school where use of amygdalin is taught, and of no recognized medical text which prescribes, recommends, or suggests its use. Neither do I know of any expert in cancer chemotherapy who is of the opinion that it is useful in the treatment or prevention of cancer, or that there is evidence that it is useful in the medical management of cancer."

R. L. Meckelnburg, M.D., is Director, Department of Nuclear Medicine, Wilmington Medical Center, Wilmington, Delaware, and a physician concerned with the care and treatment of cancer patients by means of chemotherapy (R 154). He described his limited experience with treating patients with Laetrile in the years 1963–1967. Although Dr. Meckelnburg states (and the Commissioner agrees) that the study was not a clinically controlled series, he reports that "the results of these treatments were uniformly unsuccessful." Dr. Meckelnburg noted, "The individuals who were most interested in promoting the use of Laetrile failed to administer the drug in a manner consistent with good clinical investigative methodologies, particularly the use of the double blind control and crossover models of study." He concluded, "The promulgation of the drug as a preventive for cancer in the light of today's knowledge is totally absurd" (id.).

Robert C. Eyerly, M.D., is a physician and surgeon on the staff of the Geisinger Clinic in Danville, Pennsylvania, and a diplomate of the American Board of Surgery (R. 167). He currently serves as Chairman of th Committee on Unproven Methods of Cancer Management, American Cancer Society. This Committee's chief concern is, "With methods that are promoted as having established value in diagnosis, prevention, treatment, or control of cancer, despite a lack of competent scientific evidence to support claims made for them. The Committee reviews material assembled by its staff, mostly from published sources, to find out what kind of claims are made, and they evaluate scientific literature to see if it contains evidence to support such claims" (id. at ¶ 5–7). Dr. Eyerly states, "The composition of amygdalin is such that I do not recognize it, nor is it generally recognized by experts qualified through scientific training and experience to evaluate the safety and effectiveness of drugs as safe and effective for administration to humans for the treatment or prevention of cancer, or for any other purpose" (id. at ¶ 10).

Several experts qualified by scientific training and experience in the field of cancer research and cancer treatment submitted similar statements attesting that they knew of no cyanogenic glycoside that is generally recognized as safe and effective for the treatment, prevention, or cure of cancer, for the relief of pain associated with cancer, or for any medical purpose. They also stated that the composition of these cyanogenic glycosides, in general, and of amygdalin, in particular, is such that they do not recognize them, and the cyanogenic glycosides are not generally recognized among experts qualified through scientific training and experience to evaluate drugs, as safe and effective for the treatment of cancer, for prophylaxis against cancer, for relief of pain associated with cancer, or for any medical use. These experts further stated that the scientific literature contains no reports of adequate, well-controlled, scientific studies or other evidence upon which recognition of safety and effectiveness may be predicated. They did not know of any recognized medical text in which the use of amygdalin or any other cyanogenic glycoside is recommended for the treatment of cancer. They did not know of any medical school where use of these substances for such purpose is taught. They did not know of any expert in cancer chemotherapy who is of the view that there is evidence that these substances have any useful effect in treating cancer. They did not know of any report in the scientific literature describing an adequate, well-controlled study which demonstrates that amygdalin or any other cyanogenic glycoside is safe and effective (Dr. Daniel S. Martin, R 185; Dr. Joseph F. Ross, R 190; Dr. Charles G. Moertel, R 186; Dr. Jesse L. Steinfeld, R 194; Dr. C. Chester Stock, R 195; Dr. Harold James Wallace, R 199; Dr. Peter H. Wiernik, R 200; Dr. Emil J. Freireich, R 390; Dr. David T. Carr, R 176). The qualifications of the individuals not previously discussed are set forth in the following paragraphs:

Joseph F. Ross, M.D., is Professor of Medicine at the University of California School of Medicine at Los Angeles, California, and Director of the United States Public Health Service-funded Research Training Program in Hematology and Hematologic Oncology at UCLA. He submitted an affidavit (R 190) in which he described his educational background and experience in teaching medical students and physicians. He is actively involved in the medical care of cancer patients. Dr. Ross listed his membership in several societies and councils which deal with cancer treatment and his membership on the editorial boards of several scientific publications.

Charles G. Moertel, M.D., is Chairman of the Department of Oncology at the Mayo Clinic, Director of the Mayo Comprehensive Cancer Center, and Professor of Medicine at the Mayo Medical School, Rochester, Minnesota. He described his educational background and experience

which have included serving as Editor of Cancer Yearbook, Associate Editor of Cancer Medicine, serving on the editorial board of Cancer, serving on a number of cancer committees, being involved in clinical research in pharmacology concerning cancer chemotherapy and clinical oncology, and publishing as author or co-author over 200 articles, abstracts, and editorials in recognized medical and scientific journals (R 186).

C. Chester Stock, Ph.D., is Vice President and Associate Director for Administrative and Academic Affairs of the Sloan-Kettering Institute for Cancer Research, New York, New York, and Professor Emeritus in Biochemistry at Cornell University. He described his educational background and experience as including serving as a member of several boards and societies concerned with cancer research and serving as Chief of the Division of Experimental Chemotherapy at Sloan-Kettering, where for many years he has had a major responsibility in the development of new drugs for the treatment of cancer (R 195).

Peter H. Wiernik, M.D., is Professor of Medicine, University of Maryland School of Medicine and Chief, Clinical Oncology Branch, National Cancer Institute, Baltimore Cancer Research Center. His educational background and experiences include duties as a reviewer for 9 medical-scientific journals, co-editor of 2 journals and the author or co-author of over 140 articles, editorials, and abstracts which have appeared in medical-scientific literature most of which deal directly with cancer (R 200).

Emil J. Freireich, M.D., is Head of the Department of Developmental Therapeutics and Professor of Medicine, and Chief, Division of Oncology at the University of Texas Medical School at Houston, Texas. His educational background and experience includes membership in several societies and committees concerned directly with cancer treatment. In addition, Dr. Freireich serves as a member of editorial boards of medical and scientific journals concerned with cancer research and, as such, reviews and evaluates scientific papers relating to the causes, treatments and control of cancer. He has published in internationally recognized journals over 250 articles, the majority of which have been concerned with cancer (R 390).

David T. Carr, M.D., is Professor of Medicine at the Mayo Medical School, Associate Director for Cancer Control and Community Relations of the Mayo Comprehensive Cancer Center, and a member of several professional societies and committees concerned with the treatment of cancer. His professional education and experience include the responsibility for a program of public education about cancer. His special interests are internal medicine and medical oncology, and he is regularly engaged in the medical management of cancer (R 176 (see also Tr. at 180–89)).

Several other experts submitted testimony in which they stated that, in their experience, Laetrile was not effective in the treatment of cancer. Their qualifications are set out in the following paragraphs:

James F. Holland, M.D., Professor and Chairman, Department of Neoplastic Diseases; Chief, Division of Medical Oncology; and Director, the Cancer Center, Mount Sinai School of Medicine, is a physician who has worked exclusively in cancer medication for over 26 years, specializing in cancer chemotherapy. He states, in his verified testimony, that he is thoroughly familiar with the action of drugs on cancer (R 396).

Carl M. Leventhal, M.D., is Deputy Director of the Bureau of Drugs, Food and Drug Administration. He holds the rank of Medical Director in the Commissioned Corps of the Public Health Service and is Assistant Professor of Neurology and Pathology at Georgetown University. As Deputy Director of the Bureau of Drugs, he participates in meetings in which the status of Laetrile is discussed and evaluated (R 184).

William A. Nolen, M.D., is Chief of Surgery at the Meeker County Hospital, Litchfield, Minnesota. He has served on the board of editors of the Minnesota State Medical Journal and has written a number of articles, editorials, and books on subjects of public health interest, including a book entitled Healing: A Doctor in Search of a Miracle, in which he describes his personal experience with a patient who lost her life because she chose Laetrile for treatment of an early cancer, thereby delaying conventional medical treatment (R 188).

Thomas H. Jukes, Ph.D., is Professor of Medical Physics and Research Biochemist at the University of California, Berkeley, California. He is a member of several professional societies, serves on the editorial boards of several scientific publications, has written three books and over 250 articles in scientific journals and has conducted research in the vitamin and cancer fields (R 416 (see also R 41)).

Robert S. K. Young, M.D., Ph.D., is a physician and has a doctorate in pharmacology. He serves as adjunct Assistant Professor of Pharamacology at Georgetown University School of Medicine and Dentistry and is group leader for the Oncologic Drug Class, Bureau of Drugs, Food and Drug Administration (R 201 (see also R 430)).

(b) *Supporters of Laetrile.*—In contrast to the great amount of evidence that experts in drug evaluation do not generally recognize Laetrile (or amygdalin) as effective, the evidence in the record to the contrary is meager. The Commissioner will outline qualifications of those persons who claim any modicum of training or experience in the area of drug evaluation whose support for the use of Laetrile appears in the record. The submissions of the following three physicians are discussed under II.A.1.c. above, "The 'Evidence' of Laetrile's Effectiveness":

John A. Richardson, M.D., stated in testimony (Tr. at 462–463) that he had been in general practice for 25 years and since 1971 had been engaged in nutritional using Laetrile, amygdalin, or vitamin B–17 and that he had treated, over the past 6 years, between 4,000 and 5,000 cancer patients. Dr. Richardson made no claim to special training or board certification in the area of oncology or of training or experience in the evaluation of the safety and effectiveness of drugs. Dr. Richardson's license to practice medicine has been revoked (R 183 at 13).

Philip E. Binzel, Jr., M.D., stated that he has been a family physician since 1955 and currently serves as scientific advisor to the Committee for Freedom of Choice (Tr. Ex. 13). He stated that he has treated over 400 patients in the last 3 years with a "metabolic therapy" for cancer (Tr. at 360–361). No special training in oncology or in the evaluation of drug safety or effectivenes is claimed.

Lawrence (Larry) Patton McDonald, M.D., who stated that he has been a urologist since 1963, is a former member of the State of Georgia Medical Education Board, and is currently a member of the U.S. House of Representatives. He stated that he was a member of several societies and associations, including the American Society of Clinical Urologists, the Southeastern Section of the American Urological Association, and the American Association of Physicians and Surgeons (R 509). No showing has been made that Dr. McDonald has a specific expertise in cancer treatment or in the evaluation of the safety and effectiveness of drugs.

Dr. Edward M. Arana, who spoke at the oral argument in this proceeding, identified himself only as a practicing dentist in Carmel, California (Tr. 472–A).

Ernst T. Krebs, Jr., spoke at oral argument in this proceeding (Tr. at 228–248). While he is referred to as Doctor, he did not complete his medical training and is a doctor only by virtue of an honorary degree. No special training in the area of cancer therapy or in the evaluation of safety and effectiveness of drugs has been shown for Mr. Krebs, Jr.

Paul Hart, M.D., spoke at oral argument. He described himself as having been employed at a pathology laboratory that dealt with the effects of radiation from atomic bombing in Japan and that was associated with Deaconess Hospital in Boston (Tr. at 457–58), and as being a diplomate of the National Board of Medical Examiners (Tr. at 457). He stated that he has an interest in "the Carl O. Simonton, M.D., psychotherapeutic approach to cancer therapy * * *" (Tr. at 458). While he indicated a personal respect for various Laetrile proponents, he did not give an opinion as to whether or not Laetrile is generally recognized by experts qualified to evaluate the safety and effectiveness of drugs as safe and effective for use in cancer therapy.

Dr. Mario Soto spoke at oral argument. He described himself as being former head of the chemotherapy departments of two different Mexican hospitals. He stated that he is an independent investigator for the National Cancer Institute and a conventional oncologist and chemotherapist. He is medical direc-

tor of a Laetrile clinic in Tijuana, Mexico (Tr. at 478–479).

Dean Burk, Ph. D., who spoke at oral argument and provided a written submission (R 302), is a biochemist and is president of the Dean Burk Foundation, Inc. He stated at oral argument that he had spent 50 years in research on cancer and vitamins, 35 of which were with the National Cancer Institute (Tr. at 402). His position is that Laetrile is not a drug but a vitamin.

An affidavit of Chauncey D. Leake, Ph. D., prepared for another proceeding, was submitted to this record (R 302, Ex. K). The affidavit indicates that he is Senior Lecturer in Pharmacology at the University of California School of Medicine, San Francisco. His curriculum vitae showed that he has a history of teaching, participation in organizations dealing with medicine and pharmacology, editing of journals, and authorship of books and articles.

An affidavit of Charles Gurchot, also apparently prepared for another proceeding, was submitted as Exhibit L to R 302. His degree is in chemistry and physiology. Now semi-retired, he has taught pharmacology, biochemistry and chemistry at several schools of medicine and is a member of a number of scientific societies.

James Cason, Ph. D., submitted a statement in which he states that he has been a chemistry professor for some 35 years, has published over 100 research papers in scholarly journals and has served on the editorial boards of Organic Syntheses, and the Journal of Organic Chemistry (R 217). He is currently a professor of chemistry at the University of California, Berkely (id.). While he states his opinion that a diet high in nitrilosides leads to a low incidence of cancer, he gives no opinion as to whether or not Laetrile (or Amygdalin) is generally recognized by qualified experts to be a safe and effective cancer drug.

The statute requires that "general recognition" be among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs (21 U.S.C. 321 (p) (1)). Few of the proponents of Laetrile who have made submissions to this record possess the necessary training and experience to qualify them as such experts. The Commissioner has, however, for purposes of completeness, considered as coming within the category of "experts" for this purpose, persons, including those listed above, who have exhibited even a small modicum of scientific experience or experience in the area in which they have offered submissions. The weight to be given the testimony of such persons, of course, must correspond to their expertise, cf. *United States* v. *1,048,000 Capsules, More or Less, Etc.*, 347 F. Supp. 768, 771 (S.D. Tex. 1972), aff'd 494 F.2d 1158 (5th Cir. 1974).

The Commissioner concludes that, the lack of adequate and well-controlled clinical investigations published in the scientific literature aside, the record clearly demonstrates that the overwhelming majority of experts in the evaluation of the safety and effectiveness of drugs do not recognize Laetrile as effective. Even the proponents of Laetrile, while they may argue that the majority is wrong, could hardly be heard to argue this point. Laetrile is thus a new drug within the meaning of the act.

B. GENERAL RECOGNITION OF SAFETY

As noted above, for a drug to be exempt from new drug status under 21 U.S.C. 321(p)(1) it must be recognized by "experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs" to be both safe and effective under the conditions of its intended use. While lack of such recognition of Laetrile's effectiveness has already been shown, the Commissioner will discuss in addition the evidence on the question of general recognition of the drug's safety. He finds that such recognition does not exist.

1. Lack of Adequate Testing

As has been discussed above, for a drug to be generally recognized as safe it must have accumulated at least the amount of evidence of safety that would be required for approval of a new drug application and that evidence must be generally available to the community of experts through publication in the scientific literature. In order for a new drug application for a drug to be approved, there must exist as to that drug "adequate tests by all methods reasonably applicable" that show the drug's safety (21 U.S.C. 355(d); cf. 21 CFR 314.111 (a) (1)).

An attempt to show that Laetrile had been proven by adequate testing to be safe for use in man was made in 1970 when the McNaughton Foundation submitted to FDA a notice of claimed investigational exemption for a new drug (IND) for Laetrile. The FDA terminated that exemption because of a lack of evidence of safety. Subsequent to the termination, the IND was referred to an Ad Hoc Committee of Oncology Consultants. The report of this committee is submitted with R 184 as Exhibit 2. This report states, "The Committee concurs with the action of the Commissioner in termination of IND 6734." Addressing the toxicity question, the Committee concluded (id. at 2), "Although it is often stated in the IND that amygdalin is non-toxic, data to demonstrate this lack of toxicity are absent, particularly with respect to the oral route."

The animal studies done to show Laetrile's safety did not justify use of the dosage suggested in the IND. "[T]he sponsor wishes to begin oral studies in patients at 2.95 mg/kg (oral); this is to be compared with a documented safe oral dose in dogs of 7.5 mg/kg daily for 6 months * * *. On the basis of documented data, if substantiated, then a proper starting dose that might be considered in man, would be 1/10 of 7.5 mg/kg or 0.75 mg/kg (oral). The proposed starting dose of 2.95 mg/kg is 1/100 of the oral acute LD_{50} in mice. It is considered to be dangerous to base the starting dose for a chronic (6 + weeks) study in man on a single dose study in mice. It is also dangerous to initiate human studies while the nature of the toxicity has not been elucidated in large animal species. No documented data are presented in the IND to permit a higher starting dose" (id. at 3–4).

Dr. W. Sherwood Lawrence, Executive Secretary for the State of California Cancer Advisory Council states (R 183 at 17), "An extensive review of the world's scientific literature has been made by the Council. The evidence available for the determination of the recognition of safety of the compound is characterized by the lack of a body of scientifically sound information such that experts qualified by experience and training to make such determinations are unable to do so. In the absence of such a determination by qualified experts Laetrile (amygdalin) cannot be considered to be generally recognized as safe."

There is thus an absence of scientifically sound data upon which experts qualified by training and experience to evaluate the safety and effectiveness of drugs could base an opinion that Laetrile is safe for use in man. In the absence of such data the Commissioner must conclude that the safety of use of Laetrile in man has never been, and is not now, "generally recognized" by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs.

2. Testimony of Experts

The Commissioner's conclusion of lack of general recognition among experts of Laetrile's safety is supported by testimony of such experts in the administrative record. (The qualifications of the experts whose statements are quoted have been discussed above.)

As one expert notes, while the toxicity of injected Laetrile has not been studied, there is evidence that amygdalin when ingested (eaten) is harmful to humans, evidence that has led to cautions on the part of Laetrile promoters themselves: In discussing the use of Laetriles, Dr. W. Sherwood Lawrence states (R 183 at 16), "There has never been a formal evaluation of the safety of these compounds to determine their safety. Although the proponents claim Laetriles are non-toxic, there are bonafide reports of clinical toxicity on oral intake (California Morbidity Reports, Ankara), and even fatality (Bitter Almond Poisoning, Zmedizinfrul). Furthermore the proponents themselves are aware of this toxicity as evidence by the proposed labeling submitted in an application for an exemption for an Investigational New Drug which warned: 'CAUTION: Laetrile is not to be taken orally. It is extremely toxic by this route of administration * * *.' There are no studies adequately showing the distribution, activity and metabolic fate of the parenterally administered compound. Chronic effects are not studied and reported in depth. There is cause for the concern as other similar beta-cyanogenetic compounds cause serious toxic effects when ingested on a chronic basis, e.g., Tropical Ataxic Neuropathy in Nigeria (Attachment 20).

Effects of industrial poisoning from chronic low concentration exposure are well-known." (See also, for discussion of toxicity of Laetrile, section V.B.3. below, "Dangers of Ingestion of 'Vitamin B–17'".)

Dr. Robert C. Eyerly reports, "One of the unproven remedies for cancer management which the committee (on Unproven Methods of Cancer Management) investigated is the drug Laetrile. Other names for Laetrile include amygdalin and prunasin. These compounds are classified as cyanogenic glycosides. Cyanogenic glycosides, including amygdalin, are generally regarded as toxic substances, rather than as foods, because when they break down they liberate hydrogen cyanide, one of the most toxic substances known" (R 167 at ¶ 8).

Dr. Robert S. K. Young states (R 430 at ¶¶ 4, 5, and 7). "The FDA does not have authenticated or validated data on the toxicity of amygdalin in humans. It does not have scientific studies or the data upon which scientific studies might be constructed, in humans receiving amygdalin which would allow it to define the toxic effects of this drug. There are no such reports in the medical literature. Nevertheless, Dr. Nepier from Germany has reported that amygdalin causes hypotension and hemoglobinurea in humans. There have been reported cases of cyanide poisoning in humans who ate apricot kernels. The symptomatology includes dyspnea, cyanosis, vomiting, prostration, convulsions, stupor, and paralysis. Since these toxic effects are caused by the cyanide, which is a constituent part of amygdalin, amygdalin could cause the same toxic effects. Although it is possible that amygdalin can be given to humans in doses which are non-toxic in man, the drug is unsafe for use in humans. There is no scientific evidence that the drug can cure or is effective as a treatment for any human cancer." Dr. Young also states (id. at ¶¶ 2–3), "There is a difference between a drug's toxicity and a drug's safety. The toxic effects of a drug are those effects which are not beneficial to the person taking the drug, but are deleterious. The safety of a drug is defined by the context of its use and includes consideration of issues such as a disease for which the drug is intended, the alternative remedies which are available and their efficacy and safety, and the possible abuse of the drug by those who do not have the disease for which the drug is intended. Acute toxicity tests of amygdalin have been carried out in animals. It appears that relatively large quantities of amygdalin can be given parenterally. When given by the oral route, however, the toxicity of amygdalin is greatly increased (by a factor of approximately twenty-five times)."

James F. Holland, M.D., indicated that he does not accept the theory of proponents of Laetrile that patients should be allowed to take Laetrile since, even if it is ineffective, it cannot hurt. He states (R 396 at 1), "It can hurt by interfering with patients' acceptance of indicated therapy in the mistaken and false hope of potential benefit from Laetrile. Delayed operation, refused radiotherapy, skipped chemotherapy all risk an increasing cancer morbidity and mortality because of the premise that Laetrile is active. This is a very dangerous side effect, indeed."

In addressing whether or not Laetrile is safe, Dr. Carl M. Leventhal states (R 184 at ¶ 19), "The question of whether Laetrile is now, or ever was, generally recognized as safe goes beyond the absence of any evidence indicating the lack of toxicity of the drug. The safety of a drug for human use depends, in large measure, on the therapeutic effectiveness of the particular drug. When patients forego effective forms of therapy and turn instead to worthless potions and nostrums, their disease may progress while effective therapies are foresaken. In the case of cancer, treatment with an ineffective drug will inevitably and inexorably lead to the patient's death. Seen in this light, an ineffective cancer drug is inherently unsafe and even lethal, because of the patient deaths which will necessarily ensue."

Dr. Harold J. Wallace, Jr., states (Tr. at 174) that: "The safety of the various forms of amygdalin has not been tested by the usual scientific methods of clinical pharmacology. There is evidence that the crude oral form can and has caused toxicity in humans and may cause death. There has been no documentation of the usual parameters that we require of drugs when used in a clinical situation. We don't have blood levels achieved, activation, clearance, metabolism, distribution or excretion of amygdalin compounds in man, as is usualy required in the preclinical and clinical evaluation testing of chemotherapeutic compounds or other drugs."

Dr. Frank Rauscher, a former Director of the National Cancer Institute (NCI), and currently associated with the American Cancer Society, said in his statement concerning Laetrile, while he was Director, NCI: "Assertions of the non-toxic nature of Laetrile have not been demonstrated in vigorous clinical studies. Even if this claim is true, there is no basis whatsoever for recommending the clinical use of any non-toxic agent if it cannot be expected to produce objective clinical benefits" (R 173, Att. "Statement Concerning Laetrile" at 2–3).

Dr. Thomas H. Jukes states (R 41 at 1): "Laetrile is not generally recognized by experts as safe. In the presence of the enzyme beta-glucosidase, Laetrile is hydrolized to glucose and mandelonitrile. Mandelonitrile readily decomposes with the liberation of hydrocyanic acid, which is extremely poisonous at low levels. The enzyme beta-glucosidase is widely distributed in materials of plant origin. The potential danger that laetrile may be decomposed with liberation of hydrocyanic acid makes it unsafe."

Dr. George J. Hill, II, after noting that ineffective remedies for cancer can lead to delay in treatment and "needless and untimely death," states: "In the absence of scientific evidence of effectiveness, no drug intended for use in treating cancer can be regarded as safe" (R 170 at ¶ 11).

Dr. Joseph F. Ross noted that that delay in cancer therapy because of use of Laetrile "results in loss of life, tragic suffering, and shortened life span" (R 190 at 8) and that use of the drug is "hazardous to the health of cancer patients" (id. at 7). He states: "Additionally, the use of 'Laetrile,' Vitamin B–17, 'Aprikern' and other such amygdalin containing materials when ingested presents a definite health hazard. The action of gastrointestinal fluids and enzymes releases the C=N (cyanide) radical from the compound and this may produce acute cyanide poisoning" (id. at 8).

Several additional experts submitted affidavits in which they state that neither amygdalin nor any other cyanogenic glycoside has ever been generally recognized as safe (Dr. Charles G. Moertel, R 186 at ¶ 12; Dr. Jesse L. Steinfeld, R 194 at 5–6; Dr. Peter G. Wiernik, R 200 at ¶ 16; Dr. Emil J. Freireich, R 390 at ¶ 19; and others).

III. THE "GRANDFATHER" ISSUE

Because Laetrile is not generally recognized by qualified experts as safe and effective (see discussion above), it is subject to the Act as a "new drug" unless it is exempted from the statute's provisions under either of the two "grandfather clauses." These two exceptions, described in more detail below, limit the protection provided to the public with respect to certain drugs that fulfill a number of carefully defined conditions. Accordingly, the courts have recognized the narrowness of the exceptions. *United States* v. *Allan Drug Corp.*, 357 F. 2d 713, 718 (10th Cir. 1966) cert. denied 385 U.S. 899 (1966): "Since we are dealing with a Grandfather Clause exception, we must construe it strictly against one who invokes it."; *Durovic* v. *Richardson, supra*, 479 F. 2d at 250 n. 6; *United States* v. *An Article of Drug* * * * *"Bentex Ulcerine"* * * *, 469 F. 2d 875, 878 (5th Cir. 1972), cert. denied 412 U.S. 938 (1973); *United States* v. *1,048,000 Capsules, More or Less, Etc., supra*, 347 F. Supp. at 770.

The Court in Bentex Ulcerine held, 469 F. 2d at 878, that any party seeking to show that a drug comes within the grandfather exemptions "must prove every essential fact necessary for invocation of the exemption," Accordingly, the Commission concludes that Laetrile will not qualify for grandfather clause exemption unless each of the essential facts has been proved by evidence submitted in the record.

In the February 18, 1977 FEDERAL REGISTER notice initiating this proceeding, proponents of Laetrile were informed of their obligation to bring forth evidence that would support their claim that Laetrile qualifies for this exception. The notice set forth the provisions of a regulation (21 CFR 314.200(e)(2)) that detailed the format to which submissions directed to the grandfather clause exceptions should conform (42 FR 10069). Failure to submit formulas, labeling and

evidence of marketing in that format was stated to constitute a waiver of any contention that Laetrile was exempt from new drug provisions of the act. Failure to submit evidence in the format has resulted in such a waiver.

Despite the waiver, the Commissioner, in order to fully address the issue remanded by the courts, has culled the entire record for evidence that might arguably be relevant to the grandfather status of Laetrile. He has considered this evidence in determining whether the essential facts necessary to invoke the grandfather clause exemptions have been proved. Moreover, against the chance that it should later be held that those contending that Laetrile's use is illegal must prove the nonexistence of the essential facts necessary for the invocation of the grandfather clause exceptions, the Commissioner has considered the evidence in the record in light of this possibility.

The essential facts necessary to invoke the two exemptions are discussed, together with the evidence relevant to each, below. The Commissioner's conclusions on these issues may be summarized as follows:

(1) Contentions that Laetrile qualifies for either grandfather clause exception are waived.

(2) Evidence presented does not prove the existence of each essential fact necessary to the invocation of either grandfather clause.

(3) While it is of course not possible to prove a negative with regard to the existence of each of the essential facts involved, the record assembled contains substantial evidence, constituting a clear preponderance of the evidence submitted, that these essential facts do not exist.

A. THE 1938 GRANDFATHER CLAUSE

To qualify for exemption from the definition of a new drug under the 1938 grandfather clause, it must be shown that the drug "at any time prior to the enactment of this chapter [1938] * * * was subject to the Food and Drugs Act of June 30, 1906, as amended, and * * * at such time its labeling contained the same representations concerning the conditions of its use; * * *" 21 U.S.C. 321(p)(1).

Thus, to qualify for this exemption, it must be proved that (1) the identical drug (2) bearing labeling containing the identical representations concerning the conditions of its use (3) was introduced into interstate commerce in the United States (or was manufactured in a Federal territory or the District of Columbia) after June 30, 1906 and prior to the enactment of the act in 1938. The exemption applies only to drugs whose labeling with respect to representations as to conditions of use has undergone no changes whatsoever from the labeling utilized prior to the passage of the 1938 act, and whose composition is completely identical to its composition prior to this passage. If any change in representations for conditions of use in labeling or any change in composition has occurred since the enactment of the 1938 act, such change precludes the applicability of the 1938 exemption. The proof required would necessarily involve the production of quantitative formulas, labeling, and evidence of marketing both for the pre-1938 use and for the present use. While submissions to the administrative record contained a number of references to use of Laetrile or its predecessors before 1938, no proof was submitted to show that what was termed "Laetrile" or "amygdalin" as used before 1938 was the same drug which is now being marketed. Nor is there any indication whatever that the labeling of the various drugs claimed to have been marketed before 1938 contained representations concerning conditions of use which are identical to the representations associated with the presently marketed drug. It should be noted that the term "labeling" is defined in the act to include not only "all labels" but also, "other written, printed, or graphic matter (1) upon any article or any of its containers or wrappers, or (2) accompanying such article," 21 U.S.C. 321(m). This definition has been given a broad interpretation, see, e.g., *Kordel* v. *United States*, 335 U.S. 345, 347–50 (1948); *United States* v. *Urbuteit*, 335 U.S. 355, 357 (1948).

A number of submissions in the record referred to use of substances claimed to be related to Laetrile or amygdalin in ancient times. While each of these statements was hearsay unsupported by any sort of corroborating evidence and thus cannot be considered trustworthy, it is apparent that even if accepted at face value these claims would not justify invocation of the 1938 grandfather clause. Examples of such claims in the record include those found in a McNaughton Foundation article entitled "Information for Physicians: Amygdalin, The Non-Toxic Analgesic" which cites use by the Chinese 3,500 years ago as well as use by the Greeks and the Romans (R 183, Att. 106 at ¶ 1). See also *Hanson* v. *United States*, 417 F. Supp. 30, 36 (D. Minn.) aff'd 540 F.2d 947 (8th Cir. 1976) (copy of opinion attached to R 173), noting that plaintiffs in that court action had introduced hearsay concerning the use of amygdalin by ancient Egyptians, evidence upon which the court did not rely; affidavit of Chauncey Leake, Ph.D.—recommendation of almonds for various purposes (not to cure cancer) by a first century Greek surgeon (R 302, Ex. K); statement by John J. O'Conner, Jr., in support of a Maryland State bill on Laetrile—bitter almond used by Chinese for the treatment of tumors 3,500 years ago; use by Greeks and by Romans (Tr. Ex. 4, Att. at 22).

Other submissions mentioned that amygdalin was prepared by two Frenchmen in 1830 and analyzed by two Germans shortly thereafter. (See R 183, Att. 10b at ¶ 1; R 302, Ex. K; R 168, Att. at 345; R 80, Att.) No claims were made that these 19th century experimenters used amygdalin to treat cancer. There is a claim, however, that a Russian physician used amygdalin for that purpose in 1845. The reference is to a report in the Gazette Medicale De Paris, Tome XIII, Samedi, Le 13 Septembre 1845, by Dr. Inosemtzeff. This article is referred to in a number of submissions. (See, e.g., R 259, Att. at 1.) It was not, however, itself submitted and in thus not part of the record available for analysis by the Commissioner. According to the description in the "Listing of Documents Relative to * * * Laetrile" attached to R 259, a submission by Mr. Wynn Earl Westover, the author of the 1845 article was a professor of surgery at the Imperial University of Moscow, and his article described two cases of cancer apparently successfully controlled for 11 years and 3 years, respectively, by the use of amygdalin (for other references to this article, see R 260, Att. at 1; R 302, Ex. L at ¶ 5).

As is obvious, this "evidence" relating to ancient and 19th century use is irrelevant to the 1938 grandfather clause issue for the following reasons: (1) It does not indicate that the drug was used in the United States after June 30, 1906 and before 1938. (2) It gives no indication that the drug used was the same as Laetrile. Most of the references in fact indicate that the substances used were either some extract of almonds, or, as in the case of the alleged Russian physician, simple amygdalin. (3) no suggestion that any drug was to be used in accordance with the indications now associated with treatment with Laetrile may be found in these references. Again, where the submissions go into detail concerning the historical uses of almonds or amygdalin, it is apparent that different conditions of use are involved.

A number of claims purporting to be relevant to the 1938 grandfather issue dealt with the appearance of almond extract in various Pharmacopeia, (See, e.g., Tr. at 250; R 302, Ex. K and Ex. L, ¶ 9–12 Tr. Ex. 9.) The opinion in *Hanson* v. *United States*, *supra*, indicates that plaintiffs in that case relied upon a listing of amygdalin in the Merck Index of 1896. The references in the Pharmacopeia involve in each case some sort of almond extract. There is no indication that that extract was to be used as an injection to cure, control, or prevent cancer. The references to the Pharmacopeia, as is the case with other general, unsupported references indicating use in cancer patients in previous centuries (see, e.g., R 509 at 2) are for the reasons detailed simply not probative of grandfather status.

Of more direct relevance to possible grandfather status is the information in the record regarding the work done with what was apparently Laetrile's predecessor by Dr. Ernst Krebs, Sr. A great deal of conflicting information regarding the dates of Dr. Krebs' work was submitted to the record. There are numerous instances in the record of statements that Dr. Krebs developed a drug related in some way to modern day Laetrile either in 1920 or shortly thereafter, while a new and allegedly nontoxic form of Laetrile was developed by Ernst T. Kerbs, Jr., in 1952 or in the early 1950's. See e.g., the American Cancer Society Committee on

Unproven Methods of Cancer Management's article on Laetrile (R 167, Ex. 2); A Report on the Treatment of Cancer with Beta-Cyanogenetic Glucosides ("Laetriles") by the Cancer Advisory Council, State of California (1963) at 2 (R 183, Att. 16). The latter report may be the genesis of the 1920 date, though the former indicates that it is reporting the date "According to" Dr. Krebs. At any rate, the 1920 date appears in or is alluded to in a number of submissions (see R 173, Att., "Questions Most Frequently Asked," and Att., "Laetrile: The Making of a Myth," FDA Consumer (Dec. 1976–Jan. 1977) at 6; R 184 at ¶ 6; Tr. at 272; Tr. at 41; R 250 at 2–3; R 170, Ex. 3 at 2104; R 258, Ex. 16; R 386; Tr. Ex. 10; R 183, Ex. 3 at 33). There may have been some basis for the original statement that Dr. Krebs had begun to work or had achieved results on a substance containing amygdalin in 1920 or in the early 1920's, but nothing has been submitted to indicate what that basis is. The apparent manner in which one submission has relied upon another on this question illustrates the undersirability of relying on hearsay accounts to prove a fact of this kind. None of these statements indicate, in any case, that the materials with which Dr. Krebs was experimenting were identical to, and were used under conditions indicated in labeling which were identical to, the composition and indications for present day Laetrile.

Michael L. Culbert, representing the Committee for Freedom of Choice in Cancer Therapy at the oral hearing, stated: "Dr. Krebs, Sr., both publicly and privately and in numerous different ways, has published not only results but some labels of material that goes back to the 1920's when Dr. Stohl in Switzerland and a number of Japanese scientists and Dr. Krebs, Sr., and others were working with the original extract" (Tr. at 41). If Mr. Culbert or his group have in their possession such publications, they have not submitted them.

A document submitted which would seem, questions of credibility aside, to be the most reliable on the question of the dates of Dr. Krebs' work and that of his son is an affidavit signed and sworn to by Dr. Krebs on April 28, 1965. This affidavit, taken by an FDA employee, appears as Exhibit 6 to R 184 and as attachment 13 to R 183. Since this affidavit is under oath and is by the person most likely to know of the dates in question, the Commissioner concludes that where the dates in the affidavit are different from those appearing elsewhere, chief reliance should be placed on the affidavit. In the relevant paragraphs, Dr. Krebs says:

* * * * *

2. In 1926, I made an extract from apricot kernels which I called Sarcarcinase. This extract contained Amygdalin and 1-glucosidase. When I injected this product into rats it was toxic and killed some of them.

3. In 1936, I changed the composition of the preparation resulting from the extract of apricot kernels so that the only active principle which remained was Amygdalin.

4. During the period between 1936 and 1960, I perfected the purification process so that the purity of the Amygdalin rose from 66 percent in 1936 to 99.8 percent by 1960.

5. In 1955, I began to lyophilize the Amygdalin and I have been lyophilizing it in its final form ever since when I produce it in my laboratories.

6. In 1949, my son, Ernst T. Krebs, Jr., gave the name Laetrile to the Amygdalin I was producing and I have used the name of Laetrile ever since that time for the final form of the Amygdalin which I produce.

7. As early as 1926 and up through 1962, I first began to ship and have done so continuously thereafter the Sarcarcinase extract (cf 2), then the amygdalin (cf 3), then the purified amygdalin (cf 4), then the purified and lyophilized amygdalin (5), and then since 1949 (cf 6) the latter under the name of Laetrile to persons in other States outside of the State of California and in many other countries. Many of these persons have reported their studies in scientific and medical journals and in private communications over several decades. The above shipments were for investigational use only.

As the dates cited by Dr. Krebs illustrate, the substance with which he experimented in the 1920's and 1930's was not the same substance as that which he was using in 1962. The pre-1938 use is, for that reason alone, not sufficient to qualify Laetrile for exemption from coverage of the act under the 1938 grandfather clause.

In another document upon which the Commissioner would ordinarily place reliance, a December 15, 1962 report by FDA inspectors describing their conversations with Dr. Krebs, Sr. (R 184, Ex 5), Dr. Krebs is reported to have stated that "he began experimenting some 10 months ago with the extraction of Cyanogentic Glucoside from a mixture containing apricot pits. The purification of this glucoside was effected in the laboratories of Dr. Krebs and used in the treatment of his patients with, according to him, satisfactory results. This material assertedly liquefies malignant growths by the release of cyanide in the area. Injections are made around the area and the case of lung cancer injections are made in the apex of the trapezei." It may be that Dr. Krebs in his statement to the inspectors was speaking of his efforts to purify Amygdalin, referred to in paragraph 4 of his affidavit. On the second page of the inspectors' report, they indicate that "E. T. Krebs Jr., stated that Dr. Harry Pincus Jacobson, M.D., was the first to use 'Laetrile' on humans and that this was in June 1952. Up to the present time (December 1952) he has used the product on approximately 14 cases."

This last quotation from the inspection report comports with statements elsewhere indicating that in 1952 Mr. Krebs, Jr., developed a new product, related to the products with which his father had been working, which he called Laetrile. While the failure of the affidavit of Dr. Krebs, Sr., to mention this "improvement" by Mr. Krebs, Jr., might lead one to question whether such an improvement had taken place, an article by the senior Krebs and Dr. Arthur Harris, copyright 1955, entitled, "The Treatment of Breast Cancer with Laetrile by Iontophoresis" (R 183, Att. 7) at 23–24 states as follows:

> In 1952 the senior author's biochemist son, Ernst T. Krebs, Jr., became interested in the preparation his father had used on cancer for so many years. In his laboratory—the John Beard Memorial Foundation—he tore the drug apart and came to the conclusion that it was not only the glucoside but more particularly the cyanogenetic glucoside that had benefited cancer patients. He succeeded in separating the enzyme Emulsin from the cyanogenetic glucoside and advised their administration separately, in order to avoid the premature trigger-off of HCN from the chemical breakdown in the somatic (or normal) tissue, for this gas—HCN—was the active agent in destroying the cancer cell.
>
> Again the senior author tried each purified preparation—the cyanogenetic glucoside and the enzyme Beta-glucosidase—separately. He administered the cyanogenetic glucoside parenterally (by injection) and followed it in fifteen minutes or so with an injection of the enzyme Beta-glucosidase. The cancer victims so treated tolerated both the drug and the enzyme excellently—and were immeasurably improved. Using the chemical and the enzyme separately, therefore, gave a high degree of safety as well as enhancing its cancerolytic effect.
>
> * * * * *
>
> Because this apricot kernel preparation was "Laevorotatory" (left-handed) to polarized light, and because Amygdalin was chemically a "mandelonitrile," Krebs, Jr., united the first and last syllables to invent a name for the new cancericidal drug—LAETRILE.
>
> Krebs Jr. uncovered the vital link that united Laetrile with the Unitarian or Trophoblastic Thesis of Cancer. In the previous chapter we emphasized the known fact that most malignant lesions are focally characterized by high concentrations of the enzyme Beta-glucuronidase—one of the main attributes common to both the trophoblast cell and the cancer cell. The Beta-glucuronidase of the animal kingdom is the equivalent of Emulsin in the vegetable kingdom, and Emulsin is the very enzyme that Krebs, Jr. separated from Amygdalin to make the empirical apricot formula safe for parenteral (injection) administration to humans!
>
> This was an epochal milestone. Krebs, Jr. worked and experimented feverishly now he was on the brink of cataclysmic discoveries, discoveries which, if substantiated could mean victory over invincible Cancer!
>
> He found that when he added Emulsin to Laetrile and incubated the mixture, hydrocyanic acid gas (HCN), one of the deadliest of gaseous poisons, was given off. He found that when he added animal Beta-glucuronidase (or prepared enzyme Beta-glucosidase) to Laetrile and incubated the mixture, HCN was again given off. This, he knew then, was the reaction that took place within the body—IN THE CANCER CELL!

The need for Krebs, Jr.'s improvement was related to the lack of safety of his father's original preparation. As this article co-authored by the senior Krebs states, the original "preparation proved so toxic that he and his colleagues who were experimenting with him were reluctant to continue its use, except in dire circumstances" (id. at 23; cf R 167, Ex 2; R 170, Ex. 3 at 2014; R 386, Att. at 2–3). Again, it is apparent that the improvement in the substance used by the Krebs (father and son) after 1938 made the drug different in composition, and

also in indications for use, from the drug which was used before 1938. The 1952 date appears at several points in the record. (See e.g., R 167, Ex. 2; R 173, Att. "Laetrile: The Making of A Myth" supra; R 173, Att. 3; R 184 at ¶ 6; R 189; Tr. at 272; R 250 at 2–3; Tr. Ex. 10 at 3.)

In the submission of Mr. Wynn Earl Westover (R 259) (see also R 260), in a document entitled "Listing of Documents Relative to the Krebs Enzyme Extracts Later Known as Laetrile," at 13, there is a list of registrations of trademarks and issuances of letters patent allegedly granted for Sarcarcinase during the years 1930 through 1935. These documents have not all been submitted. Apparently submitted as representative of the patents is a patent specification from the Government of Ireland. As the above discussion indicates, the material covered in these patents is different from the material now known as Laetrile. A submission by Eric E. Conn, Professor of Biochemistry at the University of California, Davis (R 424) discusses this patent application and states that if the procedure set out in the patent is followed, "much or all of the amygdalin in the intact kernels may be destroyed by enzymes set in action by the grinding" of the kernels to produce the extract. Most of the amygdalin remaining would be lost in processing. The extract produced "would be a mixture of glycerides, esters, certain pigments and other fat-soluable compounds that might or might not also contain a small amount (less than 5 percent) of the amygdalin remaining in the finely ground kernels." Compare the claims by Robert W. Bradford, President of the Committee for Freedom of Choice in Cancer Therapy, Inc., at the oral argument, that "Laetrile was first offered for sale in a trademark assigned in 1934, that it was sold at that time in three different forms: tablets, capsules, and injectables, (and that it) pharmaceutically was the same substance used today in cancer therapy. There can be no disagreement on this point" (Tr. at 346). Mr. Bradford submitted nothing to support his claim, which is at odds with the factual information submitted in the record and discussed above.

The Westover submission (R 259) also includes copies of a number of letters by various doctors who indicate that they have used the senior Krebs' formulation in the treatment of tumors or cancer. The letters bear dates in the 1930's. Mr. Westover's submission claims that there are a large number of other letters, not submitted, which are of generally the same type. Ernst T. Krebs, Jr., appearing at the oral argument, testified that amygdalin had been used as early as 1932. He indicated that the product then in use was labeled Sarcarcinase. (See Tr. at 232, 238, 246.) Sarcarcinase is the name of the product which was, according to Mr. Westover, granted a United States trademark in 1934. (See also Tr. at 446–48.) Two affidavits, apparently prepared for some court action, by Charles Gurchot, Ph.D., and Chauncey Leake, Ph.D., indicate that the affiants were involved in the treatment of patients with Krebs, Sr.'s product in the 1930's (R 302, Ex. K and L).

The Commissioner has carefully surveyed the entire administrative record brought together for this proceeding. While it appears that Dr. Krebs, Sr., was utilizing some substance, which apparently had the trademark name of Sarcarcinase, before 1938, there is no evidence that that substance is identical in its formulation, or in its indications for use, to present day Laetrile (cf R 416 at ¶ 27(I)(7) (pg. 23)). In fact, as discussed above, the record is clear that the substance with which Dr. Krebs, Sr., experimented in the 1930's is different from the drug now being used by Laetrile proponents. The evidence suggests that the substance used by Dr. Krebs, Sr., in the 1930's was too toxic for general use. This toxicity appears to have been the reason for the work of Mr. Krebs, Jr., which, apparently, culminated in a substantial change in the formulation around 1952.

The Commissioner thus concludes that (1) no proof has been offered which shows that Laetrile was used and labeled before 1938 in a manner identical to its present use and labeling, and that (2) the evidence in the record demonstrates that present day Laetrile was not developed until after 1938. Thus, regardless of where the burden of proof lies in an administrative proceeding of this type, the Commissioner must conclude that Laetrile is not eligible for exemption from the protection to the public provided by the new drug provisions of the act because of use prior to 1938 involving identical labeling as to conditions of use.

D. THE 1962 GRANDFATHER CLAUSE

The provision that has been characterized as the "1962 grandfather clause" is set forth at section 107(c)(4) of Pub. L. 87–781 (note following 21 U.S.C. 321):

> (4) In the case of any drug which, on [October 9, 1962] the day immediately preceding the enactment date, (A) was commercially used or sold in the United States, (B) was not a new drug as defined by section 201(p) of the basic Act as then in force, and (C) was not covered by an effective application under section 505 of the Act, the amendments to section 201(p) made by this Act shall not apply to such drug when intended solely for use under conditions prescribed, recommended, or suggested in labeling with respect to such drug on that day.

The "basic Act as then in force" read in relevant part as follows:

> Sec. 201. For the purposes of this Act-
>
> * * * * *
>
> (p) The term "new drug" means—
>
> (1) Any drug the composition of which is such that such drug is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety of drugs, as safe for use under the conditions prescribed, recommended, or suggested in the labeling thereof, except that such a drug not so recognized shall not be deemed to be a "new drug" if at any time prior to the enactment of this Act it was subject to the Food and Drugs Act of June 30, 1906, as amended, and '' at such time its labeling contained the same representations concerning the conditions of its use; or
>
> (2) Any drug the composition of which is such that such drug, as a result of investigations to determine its safety for use under such conditions, has become so recognized, but which has not, otherwise than in such investigations, been used to a material extent or for a material time under such conditions.

The Commissioner has previously admitted that one of the conditions for 1962 grandfather status does exist— Laetrile (or amygdalin) was not covered by an effective NDA on October 9, 1962. (See 42 FR 10069). The Commissioner concludes on the basis of the information in the administrative record that Laetrile (or amygdalin) fails to meet all of the other requirements for qualifying for the 1962 grandfather clause exemption: (1) No showing has been made that a drug was used or sold on October 9, 1962 which has the same composition as a drug used or sold, or sought to be used or sold, today. (2) The record is clear that any use of drugs called "Laetrile" or "amygdalin" in cancer therapy in 1962 was for investigational use. Investigational use can not provide the basis for exemption from new drug status on October 9, 1962 (see section 201(p)(2) of the act as then in force, set forth above) and of course does not constitute commercial use or sale. (3) No showing has been made that conditions of use recommended in labeling of a drug used or sold on October 9, 1962 are the same as those now recommended in labeling for the same drug. In fact, neither present labeling nor labeling in use on October 9, 1962 has been submitted to the record. Review of labeling available for "Laetrile" before and after October 9, 1962 reveals substantial changes in the prescribed conditions of use. (4) Laetrile (or amygdalin) was not generally recognized, by experts qualified by scientific training and experience to evaluate drug safety, as safe for use in cancer therapy on October 9, 1962.

As has been noted above, the Commissioner has concluded that the proponents of the proposition that Laetrile is exempt from the act because of "grandfather" status must bear the burden of proving that it is exempt. As has also been previously noted, however, the Commissioner has made a determination based on the alternative theory that the Government must prove that at least one of the essential facts leading to exemption does not exist. Proof of a negative is obviously more feasible in some instances than in others. The record leaves no doubt that use of Laetrile (or amygdalin) on October 9, 1962 was for investigational purposes and that use of the drug in cancer therapy was not "generally recognized" by qualified experts to be safe on that date. Since neither the present composition nor the present labeling of the drug appears in the record, it may not be conclusively determined that that composition and the conditions of use suggested in that labeling are not the same as the composition and suggested conditions of use of some drug in 1962. Nonetheless, the Commissioner is able to conclude, based upon substantial evidence which constitutes the preponderance of the evidence in the record, that neither of those essential facts (i.e., identical formulation and identical conditions of use) do exist as to Laetrile (or amygdalin).

1. Composition

Clearly, for the 1962 grandfather clause to apply, the identical drug must have been used or sold in 1962 as is presently used or sold. The fact that a drug with the identical name (or names) was being used is irrelevant. Similarly, the fact that a drug in commercial use on October 9, 1962 has ingredients (such as amygdalin) in common with drugs in use today would not be sufficient under the grandfather clause if any of the ingredients of the drug, or the proportions in which those ingredients appeared in the drug, had changed (see generally 21 CFR 310.3(h)). Even a change in an inactive ingredient will make a drug a "new drug," (see 21 CFR 310.3(h)(1); *United States* v. *Article of Drug "Entrol-C Medicated,"* 513 F.2d 1127, 1130 n. 7 (9th Cir. 1975)).

The discussion earlier in this opinion of the identity of drugs characterized at different times as "amygdalin" or as "Laetrile" illustrates the wide variation in composition of these drugs. There is no evidence in the record of the present formulation of Laetrile or of amygdalin medication. Neither is there evidence of the composition of such a drug on October 9, 1962. The Commissioner thus concludes that there has been no showing that Laetrile or amygdalin as presently constituted was in use on October 9, 1962. The Commissioner also concludes, based upon the evidence of wide variation in the drugs' composition, both before and after 1962 (discussed below), that the 1962 versions and the versions of the drugs currently in use are not identical.

It should be noted that the Commissioner's decision on this point is in accord with a statement by Andrew McNaughton of the pro-Laetrile McNaughton Foundation, discussed earlier, that data on Laetrile obtained prior to 1968 are frequently not reliable because of the variability in composition of early preparations (R 173, Att., "Report of Ad Hoc Committee of Oncology Consultants"). Other evidence on the question of composition of the drugs consists of (1) analyses done of Laetrile products and (2) representations made as to the products' composition. (The discussion of the 1938 grandfather issue sufficiently catalogues and disposes of claims that drugs similar to Laetrile or amygdalin were marketed prior to 1938, and this section will thus discuss evidence postdating 1938.)

Analyses. As discussed previously, the results of analyses of drugs called "Laetrile" have often been at variance with their labeled composition. Analyses by Canadian investigators, reported in 1965, found that two versions of the drug, one manufactured in the United States and one manufactured in Canada, had different compositions. The American version contained 98±2 percent amygdalin plus .5 percent phenol. The Canadian version contained 87±2 percent amygdalin, 5 percent di-isopropylammonium iodide, and 8±2 percent sucrose (R 189, Att., "Laetrile: A Study of its Physiochemical and Biochemical Properties" at 1059).

Analyses done in 1961 and 1962 for the California Cancer Advisory Council of samples of Laetrile from various different sources—samples obtained in 1951 and 1953, samples obtained from Hale Laboratories, and samples obtained from Dr. Krebs, Sr.—also showed a variation in composition among the drugs (R 183, Att. 16 at 27). Similarities to commercial amygdalin were revealed in some tests. (See, e.g., R 183, Att. 16 at 28 and App. 8.) "The old Laetrile (1951 and 1953) was similar but not identical to amygdalin in the (infra-red examination), while the new Laetrile exhibited certain similarities and certain dissimilarities to both the old Laetrile and to amygdalin" (R 183, Att. 16, App. 8 at 1). Some samples were found to contain inorganic iodine; others did not contain that substance. (See, generally, R 183, Att. 16, App. 7 and 8.)

Claims. A new drug application submitted to FDA by Ernst T. Krebs, Jr., on October 3, 1962, lists the composition of Laetrile as:

> L-mandelonitrite-diglucoside [amygdalin] 1,000 mg.
>
> *N, N*-diisopropylammonium Iodide 50 mg.
>
> Inactive saccharides, principally sucrose 176–250 mg.

The drug was to be reconstituted with a sterile isotonic solution (R 201 Ex. B at 101–102).

Dr. Krebs, Sr., in his 1965 affidavit, stated that his preparation contained amygdalin as its only active principle and that that amygdalin, by 1960 at least, was lyophilized and 99.8 percent pure. (See R 183, Att. 13.) It is not clear whether other, inactive, ingredients were a part of the drug he prepared.

A 1953 letter from Ernst T. Krebs, Jr., to California medical authorities states that he was forwarding to Dr. Macdonald "samples of biosynthetically degraded amygdalin in which one dextrose was removed by prunasin and the resulting compound, in the presence of platinum black, was oxidized to the corresponding glucuronoside" (R 183, Att 14).

In 1965, FDA investigators obtained examples of labeling utilized by the senior Krebs' laboratory. The labeling indicates that Laetrile is "cyanide glucoside type amygdalin." Additional labeling, a pamphlet entitled "Laetrile: Directions for the Administration of Laetrile," states that the drug is to be reconstituted with water, a non-isotonic solution (see R 201 at ¶ 10a and Ex. C).

Mr. Krebs, Jr., in a 1970 article in the Journal of Applied Nutrition (R 183, Att. 10c) in which he explained his theory that Laetrile and similar substances make up Vitamin B–17, suggested the drug use of a substance clearly different from all other Laetrile drugs previously in use. While what had been used previously had apparently been a manufactured drug containing either the "Laetrile" of his own formulation or amygdalin in a more or less purified form, in this article he advised that "one gram of defatted apricot seed or kernel carries about 30 milligrams of nitriloside. Six or seven teaspoonsful will supply what our clinical investigators consider an adequate oral dose—one gram. It is best that the (beta)-glucosidase enzyme be completely heat inactivated in such material" (id. at 84). As discussed previously, this advocacy of the use of apricot kernels rather than a manufactured drug represents a change in the formulation of the product which is of particular importance because of the danger of toxicity associated with oral ingestion of apricot kernels.

The Commissioner concludes that drugs called variously Laetrile and amygdalin have no set composition, their makeup varies depending upon the manufacturer and the time of manufacture. It thus appears that any drug in use on October 9, 1962 was different in composition from Laetrile as used or proposed to be used today.

2. Investigational Use

The record is clear that use of Laetrile (amygdalin) on October 9, 1962 was for investigational, not commercial, purposes. This fact is borne out by legal documents concerned with each of the two major figures in its development—Dr. Ernst T. Krebs, Sr., and his son, Ernst T. Krebs, Jr.—and by other information in the record. Much of the evidence relating to the 1962 grandfather issue, like that relating to the 1938 grandfather issue, is not of the type which would be considered reliable evidence in a court of law. In many cases the "evidence" consists of hearsay which is not substantiated by any documentation. The record does contain, however, a sworn affidavit of Ernst T. Krebs, Sr. In this affidavit (R 183, Att. 13 at ¶ 7) Dr. Krebs describes his shipment in interstate commerce of various versions of his cancer cure, including amygdalin which he stated to have been sold after 1949 under the name of Laetrile, "up through 1962." Dr. Krebs states, "The above shipments were for investigational use only."

Ernst T. Krebs, Jr., and the John Beard Memorial Foundation were convicted in 1962, upon pleas of guilty, of charges of introducing and delivering for introduction in interstate commerce a new drug without an approved new drug application (R 183, Att. 16, App. 17). The drug involved there was another unproved remedy, called by Mr. Krebs "pangamic acid" or "Vitamin B–15." Sentence of imprisonment on those charges was suspended and the defendants placed on probation for 3 years on the condition that they not manufacture, sell, offer for sale, hold for sale, or deliver or give away any "new drug." Mr. Krebs, Jr., obtained a special order which allowed him to ship 400 vials of Laetrile to the McNaughton Foundation in Canada, "for investigational use" pro-

vided the Canadian Food and Drug Directorate acquiesced in that shipment. In a supplemental order of June 28, 1962, Ernst T. Krebs, Jr., was permitted, under certain detailed conditions, to deliver Laetrile to experts qualified by scientific training and experience to investigate the safety of drugs. The drug was not to be administered to any patient except one with extensive malignancy who was receiving Laetrile under Kreb's direction as of June 15, 1962. Thus, if Laetrile were in commercial use on October 9, 1962, and if the Laetrile involved were supplied by Mr. Krebs, Jr., he was in violation of this court order. Copies of the court papers involved in this criminal prosecution are found at appendix 17 to attachment 16 to R 183.

Use of a drug is investigational, as contrasted with commercial, when that use is for the purpose of determining whether, or demonstrating that, the drug in question is safe and effective. The record contains no evidence to suggest that, contrary to the affidavit of Dr. Krebs, Sr., or to the court order binding Ernst T. Krebs, Jr., Laetrile (or amygdalin) was being used on October 9, 1962 for other than investigational uses.

"In 1953 the Cancer Commission of the California Medical Association investigated the claims made for the use of Laetrile in cancer treatment and condemned its use" (R 168, Att. "Vitamin Fraud"). The activities that led to the Medical Association action were apparently based upon Dr. Krebs' use of Laetrile. As shown by labeling collected during a 1952 FDA inspection, the Laetrile then in use was labeled, "Caution: New Drug limited by Federal Law to investigational use." (See R 184, Ex. 5.)

A submission to the record which contains much information about the use of Laetrile at about the crucial date of October 9, 1962 is the 1963 report of the California State Cancer Advisory Council entitled "Treatment of Cancer with Beta-cyanogenetic Glucosides ('Laetriles')" (R 183, Att. 16). While the Council concluded that use of Laetrile was not warranted in any context, its report does not contradict Krebs' claims that use was investigational at that time.

Other references to the use of Laetrile prior to 1962 do not specify whether or not the use mentioned was investigational, see R 183, Atts. 5, 6; R 307 at 1; R 64; R 174, Ex. 2; Tr. at 81–82.

A pamphlet entitled Information for Physicians, Amygdalin The Non-Toxic Analgesic provides information about what it states to be the experience of various doctors around the world in administering amygdalin to patients. Some of the statements indicate use by doctors before 1962—that use appears to be investigational and was not, with the exception of 10 cases reported by a New Jersey doctor, in the United States (R 183, Att. 10 (b)).

The article by Levi et al., "Laetrile: A study of its Physiochemical and Biochemical Properties," discussed above, refers to Laetrile as "a drug manufactured and distributed until recently for clinical trial in Canada and the United States to determine its value as a palliative in cancer therapy" (R 189, Att. at 1057).

In 1970 the McNaughton Foundation submitted an IND for Laetrile, which was disapproved by FDA (R 184 at ¶ 9). An IND is a notice, filed by persons interested in the development of a drug product, which seeks permission to distribute an unapproved new drug for the purpose of conducting clinical investigations of it in humans. Such clinical investigations must be completed to form the basis for an NDA for the drug. The fact that Laetrile's proponents were still seeking to investigate its use in 1970 is additional evidence that any use of the drug on October 9, 1962 was investigational.

3. Conditions of Use in Labeling

In order to qualify for the 1962 grandfather clause, Laetrile (or amygdalin) would need to "be intended solely for use under conditions prescribed, recommended, or suggested in labeling with respect to such drug on" October 9, 1962 (section 107(c)(4) of Pub. L. 87–781). Conditions of use include, among other things, what the drug is recommended for, how it is to be administered, and in what quantities it is to be administered. Under the statute, any change in those conditions from October 9, 1962 to the present disqualifies the drug from exemption. (See *United States v. Allan Drug Corp. supra.*) Here, no submission contains either labeling now in use or proposed for use, or labeling used on October 9, 1962.

Since no labeling in use on October 9, 1962 has been submitted, the indications found in labeling in use in years prior to that time will be discussed as illustrative of the variation in proposed conditions of use apparent in the record. The Commissioner will then review labeling from dates after October 9, 1962. As the following discussion demonstrates, not only do the proposed conditions for use of Laetrile (amygdalin) vary from before October 9, 1962 to after that date, no two sets of labeling propose the same conditions.

Before October 9, 1962

A new drug application (NDA) submitted to FDA by the John Beard Memorial Foundation and Ernst T. Krebs, Jr., on October 3, 1962 indicates that Laetrile was a lyophilized water-soluble powder for use in the palliation of human cancer. Excerpts from the NDA, attached as Exhibit B to R 201, provide information concerning its intended uses: It was to be administered by injections of 1 gram each, which were to be either every day or every second day and either intravenously or intramuscularly. Intravenous administration was stated to be preferred. The average administration was stated to be every other day for a total of 10 injections. Apparently, a total of 20 grams of Laetrile were expected to be administered. Dosages, frequency, and route of administration are described as varying widely with each individual case. The application indicated that Laetrile often produces a temporary hypotensive reaction shortly after injection, especially in hypertensive patients. Laetrile is not indicated for use to the exclusion of surgery, radiation, or other chemotherapeutic substances where those find any indication.

The proposed labeling in the NDA is, of course, not an example of labeling in commercial use at the time of the NDA's submission. The NDA does, however, state the indications which Mr. Krebs, Jr., thought to be most appropriate for the use of Laetrile at that time. Thus, if Laetrile had been commercially used at that time, it is reasonable to believe that the indications proposed in the NDA would be the ones proposed in any labeling used for such a commercial product.

An article by Dr. Krebs, Sr., and Dr. Arthur T. Harris, entitled "The Treatment of Breast Cancer With Laetrile By Iontophoresis" (copyright 1955 by the John Beard Memorial Foundation) (R 183, Att. 7) proposes three different methods of utilizing Laetrile. At page 30, the three main methods of administering Laetrile and its auxiliary Beta-glucosidase" are described as: (1) Parenteral administration (injection into the muscle), (2) iontophoresis, discussed below, and (3) tamponade.

Perhaps the most bizarre of the proposed methods of administration for Laetrile is "Iontophoresis". This new procedure developed by the senior Krebs for treatment of cancers "especially in the breast" is described as "infinitely more effective and thorough." The procedure is described as follows:

> It is to force by galvanic current the Laetrile through the skin and into as well as between the individual cancer cells. The apparatus we use is a simple galvanic instrument (or, preferably, one of the modern instruments with resistors instead of tubes). The positive pole lead goes to the tumor site—the breast—the negative to the back. The solution of Laetrile is soaked in gauze and covered by a block tin electrode, then positioned firmly over the tumor. The negative pad, well moistened, is positioned on the back, and the current turned on. Slowly the amperage is raised to 10 milliamperes' then 15, never more than 20 except in a very thick chest wall. In fifteen to thirty minutes, depending on the size of the growth, the pad has become almost dry: the Laetrile has been driven into—not around—the cancer cells (id. at 26–27).

The action of iontophoresis is described in more detail on pages 30–31. Apparently it is expected that the iontophoresis therapy will liquify the tumor mass, and a physician will thus be able to draw out, with an aspirating needle, the "cancer-juice" before administering the next iontophoresis treatment (id. at 32). Iontophoresis therapy involves administration every 2 to 5 days (id. at 31).

This article, which has been quoted and referred to previously, explains some of the history and theories of Laetrile's use. The article promotes the "Howard Beard Anthrone Test" for the diagnosis of cancer (id. at 34). This test involves analysis of the urine of the patients (see id. at 16–19). The authors recommend against biopsies to determine whether tumors are malignant (id. at 27–28). The

authors state their opposition to surgery prior to "control" of the cancer by Laetrile (id. at 35).

Laetrile (amygdalin) is apparently currently in use as an oral medication. Nothing in the record, other than conclusory statements of the most general kind, indicates that any version of the drug was in use as an oral medication on October 9, 1962. The only statement that such a drug was ever used orally before that date which purports to be based on first-hand knowledge is the statement of Charles Gurchot, Ph.D. (R 302, Ex. L at ¶ 8), that between 1933 and 1934 a Dr. Lewis administered amygdalin orally as well as intramuscularly and intravenously. Dr. Gurchot states that use in California, in which he participated between 1934 and 1945, involved administration intramuscularly and intravenously (id. at ¶ 14). As discussed above in the section on the 1938 grandfather clause, the "amygdalin" Dr. Gurchot states he was involved in using is different from that used at later dates.

After October 9, 1962

Variations in the conditions for use of Laetrile (or amygdalin) proposed in its labeling continued after the critical October 9, 1962 date. In 1965, an FDA inspection of Krebs' Laboratories produced labeling for Laetrile which suggested a new set of conditions for its use (see, generally, R. 201, Ex. C:). The laebls on the packages of the drug stated "For raising hemoglobin index and red count[;] relieves pain due to malignancy." (Similar labels were obtained by California State health officials in 1971 (R 183, Att. 9).)

In a pamphlet published by Krebs' Laboratories, obtained in the 1965 inspection, injections at various sites were indicated for various types of cancer—brachial vein for cancer of lungs; brachial vein and innominate artery for breast cancer; external carotid or one of its branches for cancer of the neck, thyroid, face, and temple area; brachial vein for cancer of liver, gastro-intestinal tract and the spleen; the vault of the vagina, the abdominal aorta, or the internal iliac arteries for cancer of the uterus and ovaries; the scrotal sac for cancer of the prostate and testicle (R 201, Ex. C, II).

Two pamphlets obtained in the 1965 inspection are in fact inconsistent with each other in some instances, though the similarities in printing style indicate that they were printed at about the same time. One states the dose of Laetrile to be administered to be "(g)enerally speaking 10 mgs. per pound of patient's weight, with "occasionally" 15 mgs. per pound and "very rarely" 20 mgs. per pound (id.). The second states that: "The usual daily dose of Laetrile now is 20 mgs. of the glucoside Amygdalin for every pound of the patient's weight, or even twice this, particularly in bone cancer." Three gms. are recommended for a 150-pound person and 4 gms. for a 175-pound patient, i.e., over 20 mgs. per pound (id. at Ex. C, III). (While no labeling indicating such conditions was submitted, it should be noted that Dr. Binzel, at oral argument, talked of injections of from 9 to 15 grams of amygdalin at one time (Tr. at 363). The page proofs of Dr. Richardson's book indicate that he uses intravenous injections of "6–9 gms. or more" of Laetrile during the first month of treatment with intravenous or intramuscular injections of 3 grams thereafter (Tr. Ex. 1 at 124).)

More important, however, are the difference between the conditions recommended in the labeling collected in 1965 and those in that submitted with the 1962 NDA. In the 1962 NDA, Laetrile was to palliate, not to cure; in the 1965 labeling it is stated: "Laetrile does not palliate, it acts chemically to kill the cancer cells selectively without injury to the normal tissues of the body" (R 201, Ex. C). While the 1962 NDA stated that Laetrile was not indicated to the exclusion of other recognized cancer therapies, the labeling collected in 1965 states: "The less drugs and medicines given, during the Laetrile treatment the better. What should be especially avoided is sulphur and sulphur drugs and *other cancer therapies*, * * *" (emphasis added) (id.). Even more frightening to those who are concerned that utilization of therapies of proven effectiveness will be delayed until too late because of use of Laetrile is the statement in the pamphlet in use in 1965 that: "Being harmless * * * Laetrile should be used first instead of last as generally has been done when everything else has been tried and hope is gone" (id.). An affidavit submitted by Dr. Robert S. K. Young describes the medical importance of the numerous variations between the 1962 labeling and that of 1965 (see ¶ 11 of R 201).

The labeling discussed, which bears the name of Krebs Laboratories and of Dr. Krebs, Sr., appears as Ex. C to R 201. It should be noted that there is no copyright or other date on the labeling that was found in Dr. Krebs' establishment in 1965. One of the phamplets, that which contains some of the statements quoted above, is described as a "pre-1963 pamphlet" in the affidavit of Dr. Sherwood Lawrence (R 183 at 4). It appears as attachment 8 to that affidavit.

A pamphlet published by the McNaughton Foundation suggests intravenous dosages of amygdalin of from 3 to 6 grams a day administered over a 24-hour period (R 183, Ex. 10b at 5). That pamphlet, which cites references dated May 11, 1970 and thus must have been published thereafter, described the use of amygdalin as an analygesic, yet also indicates that the drug inhibits the growth of malignancies (id. at 1).

The record contains labeling for Laetrile (or amygdalin), which was in use after October 9, 1962, which clearly recommends oral administration of the drug. See R 183, Att. 10a—capsules, 400 mg.; R 183 Att. 4c—capsules, 400 and 500 mg.; R 183, Att. 10b—amygdalin tablets which may be broken up and added to drinking water or food (½ to 2 grams per day recommended); R 183, Att. 10d—"Magydalin" capsules with 500 mgs. of "pure crystalline LAETRILE (amygdalin)".

While in 1962 Laetrile was proposed in the NDA as a palliative, the labeling in the record makes clear that it has been touted since that time as a treatment for cancer (see R 183, Att. 10a.; see also R 201, Ex. C, discussed above). Mr. Krebs, Jr., claims Vitamin B–17, which may be or may contain Laetrile, to be "antineoplastic" and to be instrumental in "therapy" for cancer (Journal of Applied Nutrition, Vol. 22, "The Nitrilosides (Vitamin B–17)—Their Nature, Occurrence and Metabolic Significance (Antineoplastic Vitamin B–17)," at 75, 81 (R 183, Att. 10c).

In a transcript dated November 18, 1974, prepared by FDA, of a film entitled "World Without Cancer", produced by the proponents of the use of Laetrile, the claim is made that 15 percent of persons with advanced metastasized cancer will be saved by "vitamin therapy," which from the context includes vitamin B–17 (Laetrile). The film claims that, of those with cancer diagnosed early, at least 80 percent will be saved by vitamin therapy. Of those who are healthy with no clinical evidence of cancer, the film's narrator states that close to 100 percent can expect to be free from cancer as long as they utilize vitamin B–17. The use of the term "vitamin B–17" indicates that the film was made after 1962, since Laetrile was not claimed to be a "vitamin" until after that time (see, generally, exhibit 2 to R 198).

As discussed above, to qualify for exemption from the "new drug" definition of 21 U.S.C. 321 (p) pursuant to the "1962 grandfather clause," the proponents of Laetrile (or amygdalin) would need to show among other things that the drug in question is now "intended solely for use under conditions prescribed, recommended, or suggested in labeling with respect to such drug on" October 9, 1962. No evidence in the record shows either that the drug was used or that any conditions of use were recommended for it on that date. Evidence in the record indicates that conditions of use recommended prior to the critical date not only conflict with each other, but also conflict with recommendations after that date, which themselves conflict with each other. The Commissioner concludes, on the basis of the evidence in the record, that Laetrile as now known is not intended solely for use under conditions recommended in labeling on October 9, 1962.

4. Lack of General Recognition of Safety in 1962

As discussed above, a drug could not escape new drug status under the "1962 grandfather clause" if it were a "new drug" on October 9, 1962. To have been exempted from new drug status on that date, Laetrile (or amygdalin) would have to have been "generally recognized among experts qualified by scientific training and experience to evaluate the safety of drugs, as safe for use under the conditions prescribed, recommended, or suggested in the labeling thereof" (21 U.S.C. 321(p)(1) (1962)), and that general recognition would have to be based upon use other than investigational use

(21 U.S.C. 321 (p)(2) (1962)). The Commissioner has elsewhere discussed the evidence that demonstrates that Laetrile and amygdalin (to the extent that they are different) are not now generally recognized by qualified experts as safe for use under the conditions prescribed, recommended or suggested in their labeling. While the present lack of general recognition of the substances would not necessarily demonstrate that they were not so generally recognized in 1962, that fact does provide evidence of the earlier lack of recognition.

The evidence in the record provides a number of independent grounds upon which the Commissioner concludes that Laetrile (or amygdalin) was not generally recognized by experts in drug safety evaluation as safe on October 9, 1962. That conclusion is supported (1) by the proven lack of a number of prerequisites to such general recognition: lack of knowledge among such experts generally of Laetrile's use, of Laetrile's formulation, and of the proposed conditions of Laetrile's use; lack of data published in the scientific literature supporting Laetrile's safety as a cancer drug; and lack of scientific testing sufficient to show safety; (2) by statements in the record by experts in the evaluation of the drug safety that Laetrile was not generally recognized as safe as a cancer drug by themselves and their peers on October 9, 1962; and (3) by abundant evidence that Laetrile was not generally recognized by appropriately qualified experts to be effective in cancer therapy on October 9, 1962. The Commissioner concludes that the showing in the record on each of these points is itself sufficient to demonstrate that Laetrile (or amygdalin) was a new drug in 1962.

(a) *The Prerequisites.* (i) *Lack of General Knowledge of Use.*—A number of submissions to the administrative record indicated that the use, and the details of the use, of Laetrile or amygdalin were simply not generally known to the community of experts in the safety evaluation of drugs on October 9, 1962. Thus, there could not be any sort of "general" recognition of the substances' safety in 1962. (See, e.g., the oral testimony of Dr. Rhoads, the national chairman of the National Cancer Advisory Board (Tr. at 110–111; Tr. Ex. 5); oral testimony of Dr. Carr, professor in medicine at the Mayo Medical School (Tr. at 181).)

(ii) *Lack of General Knowledge of formulation.*—The variability in, and uncertainty about, the composition of the drug in use at that date (discussed in detail above) means that "general recognition" of the drug's safety by experts in drug safety evaluation would be impossible. The fact was recognized in *Durovic* v. *Richardson, supra*, 479 F. 2d at 251, in which another unproven cancer remedy was ruled not to be exempted from regulation by the 1962 grandfather clause.

(iii) *Lack of General Knowledge of Conditions of Use Suggested.*—Equally important, the variation in and uncertainty about the conditions of use suggested in the labeling of Laetrile (or amygdalin) on October 9, 1962, also discussed in detail above, means that such general recognition could not have existed. The law as of that date is clear that general recognition must be of safety "for use under the conditions prescribed, recommended, or suggested in the labeling" of the drug (21 U.S.C. 321(p)(1) (1962)). If experts throughout the country could not have known of those conditions of use, recognition of safety by them could not have existed.

(iv) *Lack of Safety Data in Scientific Literature.*—The existence of published data available in the scientific literature on the safety of a drug is a prerequisite to general recognition by experts of that drug's safety within the meaning of 21 U.S.C. 321(p). *Weinberger* v. *Bentex Pharmaceuticals, Inc., supra*, 412 U.S. at 652; see *United States* v. *41 Cases, More or Less*, 420 F. 2d 1126, 1130 (5th Cir. 1970); *United States* v. *1,048,000 Capsules, More or Less, supra*, 347 F. Supp. at 771. The record lacks any reference to any such published data available to experts on October 9, 1962.

In fact, the record demonstrates that, while data showing the lack of Laetrile's effectiveness have been published in the scientific literature, data upon which an expert in the evaluation of drug safety could make a judgment that Laetrile was safe for use in cancer therapy do not exist in the scientific literature available to experts generally even today.

(v) *Lack of Showing of Safety by Adequate Testing.*—As noted in the sections of this opinion dealing with the new drug issue, the Supreme Court has held in *Weinberger* v. *Bentex Pharmaceuticals, Inc., supra* that "general recognition," as those terms are used in 21 U.S.C. 321(p), requires the same type of showing of safety and efficacy necessary for approval of an NDA pursuant to 21 U.S.C. 355(d). For approval of an NDA prior to October 9, 1962, the application was required to contain "adequate tests by all methods reasonably applicable to show whether or not such drug is safe" for its intended uses, and those tests were required to in fact show that the drug was safe (21 U.S. 355(d) (1962)). It appears from the record that no such tests existed for Laetrile (or amygdalin) on October 9, 1962. Were there a question about the lack of such studies, that question could be resolved by the fact that, at approximately the time in question, NDA's for Laetrile and for a combination of Laetrile and iodomine were submitted to the FDA. Both applications were declared to be incomplete because of the lack of required data to show safety and effectiveness. (See, generally, the letter from John L. Harvey, FDA Deputy Commissioner, to K. F. Ernst, M.D., April 30, 1963 (R 183, Att. 16, App. 18).)

(b) *Statements by Experts.* Even setting aside the above important prerequisites to general recognition, the evidence in the record that Laetrile was not generally recognized as safe by experts in the evaluation of drug safety on October 9, 1962 is extremely strong.

The plethora of statements of experts in drug evaluation that Laetrile (or amygdalin) is not now generally recognized as safe is discussed elsewhere. Some of the experts focused upon the October 9, 1962 date. (See affidavit of Dr. Emil J. Freireich: "Neither amygdalin nor any other cyanogenic glycoside was generally recognized as safe for any (use in the treatment of cancer or prophylaxis against cancer or relief of pain associated with cancer, or for any medical use) on October 10, 1962" (R 390 at ¶ 19; accord affidavit of Dr. Daniel T. Carr, (R 176 at ¶ 15).) For a similar statement that Laetrile was not generally recognized as safe by appropriately qualified experts in 1962, see affidavit of Dr. Carl M. Leventhal (R 184 at ¶ 13).

Even more compelling evidence on this question can be gleaned from statements of experts in drug safety evaluation made near the October 9, 1962 date. Fortunately, at just about that date the State of California Cancer Advisory Counsel was polling just that type of expert concerning Laetrile (R 183, Att. 16 at 37–38). (Since the Krebs Laboratory was located in California, it would seem that experts in the California area would be most likely to be aware of recognition of Laetrile or amygdalin's safe us as cancer therapy.) The experts polled, representing each of the medical schools in the California university system, were asked about the drug's efficacy rather than their views on the question of the safety of Laetrile's use in cancer therapy. Clayton G. Loosli, M.D., Dean of the University of Southern California School of Medicine, speaking for the members of the school's faculty, indicated that Laetrile, while extensively investigated, was in the unanimous opinion of the faculty without value in the treatment of human cancer. He stated that "further, we consider its use not only not valuable even as a placebo but harmful in that use of Laetrile prevents patients from receiving what otherwise might be an effective modality of treatment" (id., App. 10). J. B. deC. M. Saunders, M.D., Dean of the University of California School of Medicine at San Francisco, speaking for the clinical staff of his medical school, gave their opinion that the use of Laetrile was of no value in the treatment of cancer. He said "(i)t may not only delay or interfere with conventional therapy (surery and radiation) but indeed could seriously jeopardize whatever chances the patient may have for cure. The unscrupulous use of unproven cancer 'remedies' such as Laetrile tragically increases the human suffering already associated with cancer (id.).

The only evidence submitted by proponents of Laetrile that experts qualified to evaluate the safety of drugs generally recognized the drug as safe when used in cancer therapy were two affidavits by Charles Gurchot, Ph.D., and Chauncey D. Leake, Ph.D., (R 302, Exs. K and L). The Gurchot affidavit states in paragraph 14 that amygdalin in liquid and solid form was used prior to 1962 (between 1934 and 1945) by Gurchot, under the supervision of five named medical doctors at the University of California Medical School at San Francisco (R 302, Ex. L). This amygdalin

was, according to his statement, administered "on patients intramuscularly and intravenously" (id.). At the same time, the amygdalin preparation he used, he states, was used by "about a dozen physicians throughout California through the University of California Medical Schools and as recommended by members of the Hospital Staff of the University of California Medical School at San Francisco" (id.). Gurchot states that these physicians were qualified by medical and scientific training and professional experience to evaluate the safety of substances such as amygdalin and that they recognized it as safe (id.). The Gurchot affidavit should be compared, in the first instance, to the 1962 statement, already discussed, of the Dean of the University of California Medical School at San Francisco, which states, "Laetrile is not, *nor has it been*, in clinical use or in experimental trials in this institution * * *" (emphasis added) (R 183, Att. 16, App. 10 at 8).

Even were the Commissioner to credit Dr. Gurchot's statement, he would have to conclude that, whatever had happened in the years 1934–1945, that experience did not form a basis for general recognition by qualified experts of safety in 1962, since even the faculty of the medical school in which Gurchot claimed the experiments had taken place had no knowledge of them. It should also be noted that, as discussed in the section on the 1938 grandfather clause, the "amygdalin" Gurchot could have been using would not have been the same substance in use today. His evidence, in addition, speaks only of investigational, as opposed to commercial, use of the drug—an improper basis for "general recognition" (see discussion above). In light of these facts, and of the other information in the record on this issue, Gurchot's statement in paragraph 16 of his affidavit indicating his belief that the general recognition of safety requirement for exemption from new drug status did exist for amygdalin on or prior to October 10, 1962 must be questioned.

The affidavit of Chauncey D. Leake, Ph.D., indicates that he is familiar with Dr. Gurchot's use of amygdalin in the mid-1930's and 1940's at the University of California Medical School Hospital in San Francisco. He states that at that time, i.e., in the 1930's, "it was generally held by physicians and other scientists familiar with it, that amygdalin was safe when used in the treatment of cancer as well as in its use as an expectorant or cough suppressant" (R 302, Ex. K at ¶ 6). This conclusion does not, however, indicate recognition by anybody in 1962; it does not, as demonstrated elsewhere, deal with the drug presently being used (see affidavit of Dr. Krebs, Sr., (R 183, Att. 13)); it refers only to physicians and scientists "familiar with it", thus not addressing the question of whether recognition was general.

(c) *Lack of General Recognition of Effectiveness in 1962.*—Experts in the evaluation of the safety of a drug do not conclude that a drug is safe, if that drug is intended for the treatment of a life-threatening disease, if it has not been shown to be effective. The record illustrates a broad consensus of cancer researchers and physicians that Laetrile presents a grave danger to patients who might be helped by orthodox therapy. The concern is that such patients may be induced to turn instead to this ineffective drug, their disease may progress while effective therapies are foresaken, and the use of the ineffective cancer drug will inevitably and inexorably lead to the patient's death. (See, e.g., R 396 at 1; R 384; R 170 at ¶ 11; R 183 at 18; R 266, Ex. 3 at 865; R 192 at ¶ 14; R 193 at 1; and R 195 at ¶ 13.) Thus, even if it were shown, as it has not been, that experts in 1962 generally were aware of the drug, its formulation, its conditions of use, and of toxicity data concerning it published in the scientific literature, the alleged nontoxicity of Laetrile (or amygdalin) would not form a sufficient basis for general recognition of safety in 1962.

At the time of the 1962 amendments to the act, it was made clear that, where drugs utilized for life-threatening diseases are involved, evidence of effectiveness is essential to proof of safety. The Senate report on the amendments stated:

> The Food and Drug Administration now requires, in determining whether a "new drug" is safe, a showing as to the drug's effectiveness where the drug is offered for use in the treatment of a life-threatening disease, or where it appears that the "new drug" will occasionally produce serious toxic or even lethal effects so that only its usefulness would justify the risks involved in its use.

(S. Rep. No. 1744, 87 Cong. 2d. Sess., 1962 U.S. Code Cong. Ad. News 2884, 2891.) The report made it clear that the amendments were "in no way intended to affect any *existing authority of the (FDA) to consider and evaluate the effectiveness of a new drug in the context of passing upon its safety*" (emphasis added) (id. at 2892).

As the Court held, when dealing with a similar unproven cancer remedy, in *Durovic* v. *Richardson, supra*, lack of general recognition of the effectiveness of a drug intended for treatment of a life-threatening disease on October 9, 1962 means that general recognition of its safety could not have existed:

> (A) drug offered for use in the treatment of cancer is now, and was before the amendments, a new drug unless it has achieved general recognition among the experts as safe and effective for such use (479 F. 2d at 250).

The evidence in the record overwhelmingly demonstrates that, among experts in the evaluation of the safety and effectiveness of drugs, Laetrile (or amygdalin) is not recognized as effective (see discussion above). It is a fair inference, absent any indication to the contrary, that a drug not recognized as effective now was not so recognized on October 9, 1962.

Again, however, the record supplies evidence of opinions of such experts given at almost exactly the time in question. As noted above, the medical schools in California were asked their opinions of Laetrile's effectiveness. Each of the medical schools contacted stated that Laetrile was never used in their institutions and that they concluded that it was not effective and had not been shown by testing to be effective. (See, in addition to the letters discussed above, letters from Dean David B. Hinshaw, M.D., Dean of Loma Linda University Medical School, Dr. M. H. Simmers, Coordinator, Cancer Training, California College of Medicine, Sherman M. Mellinkoff, Dean, University of California, Los Angeles Medical School.) These letters are printed as appendix 10 to R 183, Att. 16; see also R 183, Att. 16 at 38. The report states that Robert H. Alway, M.D., Dean of Stanford University School of Medicine, also indicated that Laetrile was of no value in cancer treatment and was not part of the treatment program at his medical school (R 183, Att. 16 at 38). The report also states that two other professors involved with cancer therapy and research concurred in this evaluation (id.). The report of the California Cancer Advisory Counsel itself constitutes convincing evidence that at about the time of the crucial date, October 9, 1962, experts did not generally recognize Laetrile as safe for the treatment of cancer, in particular because it was considered to be a worthless treatment for a life-threatening disease. As has been pointed out elsewhere, no adequate and well-controlled clinical investigations, the prerequisite for general recognition by experts of a drug's effectiveness (*Weinberger* v. *Hynson, Wescott and Dunning, Inc., supra*) exist as to Laetrile. Thus, even were the testimony in the record on this question less conclusive than it is, it would be necessary to find that there was no general recognition by experts that Laetrile was safe for use for any purpose on October 9, 1962.

The Commissioner thus concludes that Laetrile (or amygdalin) does not qualify for exemption from the new drug provision of the act by virtue of compliance with the 1962 grandfather clause.

IV. The Popularity of Laetrile

A. Laetrile and Other Unproven Remedies

Laetrile, as far as is known, has nothing in common scientifically with any of the other "unproven" cancer remedies of the past.[8] Yet the method of promotion of the drug and the arguments advanced for its use are markedly similar to those of past cancer frauds.

1. The History of Cancer Quackery in the United States

Through the ages there have been literally thousands of supposed remedies

[8] Dr. Ernst Krebs, Sr., though he thought people should be allowed to use his Laetrile, and a number of other remedies since forgotten by the public, is on record as stating that he could see no rationale for Krebiozen, the last of the highly publicized "unproven" cancer remedies (R 183, Att. 14 at 2).

for cancer, generally so outlandish that it seems incredible that people once believed in them. One historian of health quackery pointed out that the promotion of "unproven" cancer cures has a long history in this country:

> Cancer quackery appeared in America during colonial times, one example being the alleged "Chinese Stones" vended by a purported Frenchman, Francis Torres, who hawked his cures from town to town. During the nineteenth century, an alert physician, Caleb Tichnor, bemoaned the breed of cancer quack, (each of whom offers) his "secret specific" to the panicked citizenry who, "like a drowning person grasping at straws seize upon the frail hope that is offered by the hand of ignorant charlatanry!" "Dr. Johnson's Mild Combination Treatment for Cancer" offered the first serious legal challenge to the 1906 Pure Food and Drug Act, requiring the Congress to enact the Sherley Amendment of 1912. At this same time, Dr. Arthur J. Cramp of the American Medical Association devoted fifty pages in his first Nostrums and Quackery volume to a detailed account of ten major cancer 'cures' deceiving the American people. Compiling a third volume in 1936, Dr. Cramp pointed to twenty-nine purported cancer cures, stating that "hardly a week has passed when the Bureau of Investigation of the American Medical Association has not received one or more letters in which the writers stated that they had discovered, or had in their possession, a 'sure cure' for cancer."
>
> Nor has cancer quackery diminished as the twentieth century has progressed. Indeed, with the decline of contagious diseases, due mainly to the chemotherapeutic revolution, and the consequent rise of cancer into second place as a cause of death, cancer quackery has expanded. The 1971 edition of *Unproven Methods of Cancer Management*, published by the American Cancer Society, described fifty-four promotions offering hope to cancer sufferers but deemed devoid of value by ACS. The 1976 edition of *Unproven Methods of Cancer Management* cites in its appendix seventy-one such methods (R 400 at 1–2; see also R 400, Ex. 2).

Evaluation of approximately 60 of these methods may be found as attachments to R 400, Ex. 2.

Each decade seems to have an unproven cancer remedy that is promoted so effectively that it attracts a large following and becomes a cause celebre. In the 1940's and early 1950's, the Koch Antitoxins were heavily promoted as a specific cure for cancer. The Koch Antitoxins thesis, promoted by William F. Koch, M.D., advanced "the theory that cancer is caused by a microorganism resembling the spirochete of syphilis, which could be destroyed by a differential poison of his invention" (R 183, Att. 3 at 43). "The Koch medications, known collectively as Koch's Synthetic Antitoxins or oxidation catalysts, were individually packaged in 2 ml ampules. Malonide and glyoxylide (were) claimed to be present in a concentration of one part in a trillion parts of water, and parabenzoquinone one part in a million parts of water" (id.). "Glyoxylic acid, of which glyoxylide is the anhydride (the resulting element after water is removed), is a normal constituent of the human body. About two grams are formed daily—at any given time there are about five milligrams in the human body, whether healthy or diseased. It would take a trillion 2 ml ampules of Koch's glyoxylide to equal the amount produced daily by the body, and two and one half billion ampules to equal the amount present in the body at any one time" (id. at 44). Even so, cancer patients paid as much as $300 per injection for this worthless remedy (R 400, Ex. 2, ACS "Koch Antitoxins").

Another unproven cancer remedy whose promotion reached substantial proportions in the 1950's was the medications of Harry Hoxsey. Two liquid mixtures played the central role in the Hoxsey remedy. The "brownish black liquid" contained potassium iodide and "some of all of the following inorganic substances as the individual case may demand: Licorice, red clover, burdock root, stillingia root, berberis root, poke rot, cascara, Aromatic USP 14, prickly ash bark, (and) buckthorn bark (R 400, Ex. 2, ACS "Hoxsey Method"). The "pink liquid" was composed of lactate of pepsin and other ingredients (R 416, Ex. 6 at 368).

Hoxsey and his spokesmen were frank to confess that they did not completely know why his colored mixtures cured cancer. They asserted that they had been kept too busy treating cancer patients and fighting court battles to keep their clinic open "to spare the time, personnel, and facilities for objective study" (id. at 369). Hoxsey's hypothesis "held that a major chemical imbalance in the body caused normal cells to mutate into a cancerous form, and his medicines restored the original chemical environment, checking and killing the cancerous cells" (id. at 369). The proponents of the Hoxsey remedy, like the Laetrile proponents of today, condemned the only treatments then recognized as having value in cancer therapy. The Hoxsey proponents held that "X-ray and radium (had) no place in the treatment of cancer * * *. They further upset basic cell metabolism rather than do anything to correct it" (id. at 369).

Harry Hoxsey promoted his unproven cancer remedy for more than 30 years until 1960, when after years of numerous local, State, and federal court actions, the sale of the Hoxsey medicines was stopped in the United States. At the time of the 1960 permanent injunction banning the sale of Hoxsey remedy at the Taylor Clinic, more than 10,000 patients were receiving the remedy. (See, generally, R 400, Ex. 2, ACS "Hoxsey Method"; R 416, Ex. 6.)

In 1964 a California State government report stated that, at that time, "Possibly no other unproven treatment for cancer has received so much public attention or approbation as Krebiozen. This agent has been the subject of intense scrutiny by scientists and government officials, and loudly discussed by the press and by the general public. The events surrounding the introduction of Krebiozen as a potential cancer cure and the subsequent trials to test its capabilities produced an air of notoriety seldom seen in the medical world" (R 183, Att. 3 at 59).

Unlike Harry Hoxsey's backwoods herb remedy, Krebiozen, the most heavily promoted unproven cancer remedy of the 1960's, had an aura of high scientific prestige. The drug's principal proponent in the United States was Dr. Andrew C. Ivy, then Vice-President in charge of the Chicago Professional Colleges, Distinguished Professor of Physiology and Head of the Department of Clinical Science, University of Illinois (id.) Krebiozen was reportedly produced originally in Argentina by Stevan Durovic, M.D., a Yugoslavian physician, and brought to the United States in 1949 (R 400, Ex. 2, ACS "Krebiozen and Carcalon"). "According to Dr. Durovic, the original 2 grams of powder, from which he said 200,000 doses were prepared, was obtained as an extract of the blood of 2,000 Argentinian horses which had previously been injected with a sterile extract of *Actinomyces bovis*, a microorganism which causes a disease called 'lumpy jaw' in cattle" (id.). "Food and Drug Administration analyses of Krebiozen ampules (showed) that those sold before 1960 (were) different from those sold in 1963, and that neither contain(ed) any of the powder identified in July 1963 by Dr. Stevan Durovic as Krebiozen, and found to be creatine monohydrate, which will not dissolve in mineral oil. * * * analyses of Krebiozen ampules shipped before 1960 showed they contained nothing but mineral oil, while ampules shipped since then contained mineral oil plus minute amounts of amyl alcohol and 1-methylhydantoin, a derivative of creatine which will dissolve in mineral oil" (id.).

In 1963, a committee of 24 cancer experts was appointed by the Director of the National Cancer Institute to review clinical records on 504 patients treated with Krebiozen, and to recommend whether the Institute should sponsor clinical trials of Krebiozen. The committee unanimously concluded that Krebiozen was an ineffective cancer drug and strongly urged that no clinical trial be undertaken (id.).

In November 1964, Drs. Ivy and Durovic and other proponents of Krebiozen were indicted on 49 counts for violations of the Federal Food, Drug, and Cosmetic Act, mail fraud, mislabeling, making false statements to the government, and conspiracy. All of the defendants were acquitted in January 1966, after a 9-month jury trial (id.). Although the acquittal meant that the government did not prove its case beyond a reasonable doubt, it did not have any bearing on the question of whether Krebiozen was a safe and effective cancer drug. As an unapproved new drug, its distribution in interstate commerce remained illegal. In spite of the acquittal, the Krebiozen boom collapsed shortly thereafter.

2. *Similarities Between Laetrile Promotion and That of Other Recent "Unproven" Cancer Remedies*

The promotion of Laetrile in the 1970's is completely in character with the historical pattern of the promotion of other unproven cancer remedies such as the Koch Antitoxins, the Hoxsey method, and Krebiozen. These characteristics include the following:

(1) The proponents "don the mantle of science while at the same time traducing the reputable scientists of their day" (R 400 at 3).

(2) The proponents claim that "prejudice of organized medicine hinders their efforts" and they "challenge established theories and attack prominent scientists with bitter criticism" (R 400, Ex. 2 "Unproven Methods of Cancer Management—1976" at 3) (hereinafter cited as "Unproven Methods").

(3) The proponents "cite examples of physicians and scientists of the past who were forced to fight the rigid dogma of their day" (id.).

(4) The proponents rely mainly on testimonials and anecdotes as evidence that their remedy is a safe and effective cancer therapeutic agent (see R 400 at 4).

(5) The proponents "do not use regular channels of communication (current, reputable scientific journals) for reporting scientific information" (R 400, Ex. 2 "Unproven Methods" at 2–3). The main channels of communication are the mass media, popular journalism, and word of mouth (see R 400 at 4–5).

(6) The proponents' "chief supporters tend to be prominent statesmen, actors, writers, lawyers, even members of state or national legislatures—persons not trained or experienced in the natural history of cancer, the care of patients with cancer, or in scientific methodology." (See R 400, Ex. 2 "Unproven Methods" at 3.)

(7) The proponents often offer a simplistic theory for causation of the disease frequently involving claims that dietary management can counteract virulent pathologic processes (R 266, Ex. 3 at 865).

(8) The proponents' remedy is "easy and pleasant, compared with the frightening therapies wielded by orthodoxy, the surgical knife, harsh chemical drugs, poisonous radiation" (R 400 at 8).

(9) The proponents claim that the mode of administration of the drug and the method of treatment can only be learned from them (R 400, Ex. 2, "Unproven Methods" at 3).

The record illustrates the remarkable conformity of the Laetrile promotion to this pattern:

(*a*) *Mantle of Science.*—Throughout history, promoters of unproven cancer remedies have couched the explanation for the remedies in pseudoscientific terms. "Impressive and plausible to the layman, such arcane explanations, to true scientific specialists, came off as nonsensical balderdash" (R 400 at 3). The promoters of Laetrile have presented a series of shifting theories to explain the alleged anticancer activity of Laetrile. These theories have been examined in detail above. (See, generally, R 318.)

(*b*) *Attacks on the "Establishment."*—The proponents of Laetrile have often accused government agencies and organized medicine of making untruthful and irresponsible statements regarding the experimental evidence of Laetrile's anticancer activity. (See, e.g., R 302, Ex. A at 14–16; R 509 at 3–4.) In other instances, proponents of Laetrile have chastized the orthodox methods of cancer treatment and management, i.e., surgery, radiation, and chemotherapy. (See, e.g., Tr. at 16–27, 297–316, and 417–426).

The most vocal arguments challenging established orthodox treatments have been concerned with the issue of freedom of choice, discussed elsewhere in this opinion. These arguments, many of them from cancer patients or their relatives and friends, hold that the "bureaucracy" has no right to interfere with the physician-patient relationship by withholding from them a treatment in which they believe and which they want. (See, generally, Tr. at 55–56, 255–256, and 454–456.)

(*c*) *Claimed Parallel with Scientific Pioneers.*—To combat criticism from the established medical societies and government agencies that Laetrile had not been shown to be safe and effective, its proponents compare the originators of the drug and physicians who prescribe Laetrile with earlier scientists who were persecuted and ostracized for their scientific theories: Copernicus, Newton, Freud, Galileo, and Semmelweiss. (See, e.g., R 318 at 61–63; R 198, Ex. 2 at 3–5).

(*d*) *Reliance on Testimonials.*—As previously discussed, the proponents of Laetrile rely on testimonials and anecdotes as evidence that the drug is safe and effective in the treatment of cancer. In reviewing the administrative record, the Commissioner has not encountered even one study that meets the legal and scientific standards for making a determination that Laetrile is safe and effective. Proponents claim that physicians using Laetrile are too busy treating patients to be able to maintain the records needed to document adequately the case histories they present. (See, e.g., Tr. Ex. 1 at 117.)

(*e*) *Lack of Scientific Publication.*—Good science demands that evidence that a drug is safe and effective be presented in a manner whereby that evidence can be reviewed and evaluated by other scientists. Usually this evidence is published in scientific journals and presented for discussion at symposia and other meetings. Historically, "the main reliance of unorthodox promoters rests on the anecdotal evidence of testimonials from laymen, and the main channel for reaching an audience is through the mass media. In earlier days newspaper advertising trumpeted the promise of cancer cures, bolstered by the faces and words of grateful testifiers, not infrequently already dead of the disease" (R 400 at 4–5). The proponents of Laetrile have relied heavily on popular journalism, advertisements, radio and television, "health" organizations and word of mouth to spread their claims that Laetrile is a safe and effective anticancer drug. (See, e.g., R 318; R 302, Ex. A and H; R 198, Ex. 2.) A number of experts active in the management of cancer have submitted testimony stating that the scientific literature contains no reports of adequate, well-controlled studies upon which Laetrile can be regarded as generally recognized as safe and effective. (See, e.g., R 185 at 5; R 186 at 4; R 390 at 6.)

(*f*) *Nonexpert Supports.*—The proponents of Laetrile are well-organized and, through organizations such as the Committee for Freedom of Choice in Cancer Therapy, have conducted active campaigns to move the discussion of the safety and effectiveness of the drug from the scientific to the political arena. These organized efforts have encouraged cancer patients and others to write their local, state, and congressional representatives demanding that Laetrile be "legalized." These efforts are addressed not to discussions of the scientific merits of Laetrile as a cancer drug, but rather to the issue of "freedom of choice" discussed elsewhere in this opinion. Such action on the part of the Laetrile proponents is typical of other unproven cancer remedies. Failing to win acceptance in the established medical community, proponents seek sympathetic allies in places of political power. (See R 400 at 6–7.)

(*g*) *Simplistic Theories of Causation and Reliance on Diet.*—The latest claims being made for Laetrile are that it is a "vitamin," and that cancer is a vitamin deficiency disease. The basis for these claims is discussed elsewhere in this opinion. It is sufficient to note here only that this simplistic theory of cancer prevention and treatment is common to other unproven cancer remedies. Cancer patients are told that they can cure or control their cancer by strict adherence to a special diet that includes a special "vitamin" even though this "vitamin" is not recognized by nutritional experts. (See R 266, Ex. 3 at 865–66.)

(*h*) *A Painless Cure.*—Laetrile, like other unproven cancer remedies, is promoted as a harmless cancer remedy free of the side effects associated with orthodox methods of treatment such as radiation and chemotherapy. Many of the statements submitted by cancer patients and their relatives and friends reflect the proponents' claims that Laetrile is free of side effects. (See, e.g., R 17; R 48; R 137.)

(*i*) *Only Proponents Can Effectively Use the Drug.*—In common with the supporters of other unproven cancer remedies, the proponents of Laetrile stress, as did Robert W. Bradford of the Committee for Freedom of Choice in Cancer Therapy, that "you" do not and cannot expect to get results from Laetrile treatment unless you are a trained metabolic physician" (Tr. at 349). These arguments are used to explain why orthodox physicians (i.e., those not trained in the proper use of Laetrile) do not see any evidence of Laetrile's effectiveness as a cancer drug.

B. WHY DO PEOPLE USE LAETRILE?

Throughout history persons afflicted with cancer have turned away from the medical establishment to a series of what most euphemistically might be called "unproven remedies." Laetrile is the most recently publicized of these remedies, but, as the discussion above illustrates, it follows on the heels of other widely publicized therapies such as Krebiozen and the Hoxsey cure. Thoughtful persons have questioned the reasons for this troubling phenomenon. Why do people bet their lives, or the lives of their loved ones, on a therapy which is rejected by almost everyone trained and experienced in cancer research and treatment?

Much evidence in the record addresses this question. The answer lies in the fear that cancer engenders—and that proven therapies for cancer engender—and the need of patients and families for hope in a situation where the hope offered by

the legitimate therapies is often modest. The use of "unproven remedies' is, in the opinion of observers, in large part attributable to the loved ones of the cancer victim, in whom both fear and the need for hope are magnified by sympathy and by the guilt that one feels at being unable to relieve the suffering of a person one loves. This situation is, unfortunately, skillfully exploited by the purveyors of "unproven" cancer remedies, of which Laetrile is only the most publicized.

1. The Emotional Reaction to Discovery of Cancer

"[W]hen cancer afflicts an individual, he is frequently faced with a circumstance which is virtually without hope. First of all, the cancer patient must be terrified by the diagnosis * * *. It would be enough to terrify any lay person to simply be told that he has cancer. But more important than that is the fact that once he is told that he has cancer, he is told by he doctor that the treatments that we have available are very often disfiguring; they can be painful; they can be unpleasant; they can even be risky" (Tr. at 204).

The cancer patient must thus cope with two wounds simultaneously. The first is to the body itself (R 423 at 1). "The other wound is to the psyche, reflected in the loss of the feeling of being invulnerable, a feeling which is basic to ordinary day by day living" (id.). The cancer patient senses suddenly that the future is limited. Social and work mobility are seen as curtailed; so are the patient's functional role in the family and the community. In addition, the patient senses a new dependence on others and may fear that he or she will become a burden on the family (id. at 2). "The initial psychological status of the patient and family is characterized by disorientation, anxiety, guilt, fear of pain and suffering" (R 421 at 1).

Dr. Robert C. Eyerly, Chairman of the American Cancer Society's Committee on Unproven Methods of Cancer Management, states that, "Indeed, we've found that the major reason cancer patients use Laetrile is fear * * * fear that the disease is incurable, that surgery or other therapy is mutilating, and that the medical profession is not to be trusted" (R 173, Att. "Laetrile: Focus on the Facts").

In this climate of anxiety and fear, the medical establishment—which, unlike the proponents of "unproven" remedies, feels an obligation to be honest with the patient and his family—cannot always offer hope: "[P]robably the most important factor (explaining why cancer patients choose to use Laetrile) has been the failure of modern medicine and technological advances to cure or adequately control some cancers. These unfulfilled expectations lead patients to disappointments in standard medicine and to attempt a cure of their disease by pseudoscientific methods" (R 398 at ¶ 9).

Physicians, trained in the saving of life and the alleviation of suffering but unable, in some cases, to do either with cancer patients, may contribute to the frustration. "Many patients sense a feeling of frustration and hopelessness conveyed, perhaps unconsciously, by the physician who tells them the nature and probable outcome of their disease—a natural feeling on the part of the physician who is discouraged by his recognition that he cannot cure the patient. Patients sensing this hopelessness frequently are unwilling to 'abandon hope' and therefore seek (unorthodox therapies)" (R 190, Ex. 4, Editorial at 327). Glen W. Davidson, Ph.D., Chairman of the Department of Medical Humanities, Southern Illinois University School of Medicine, testified that, "* * * when primary emphasis for treatment is placed on 'cure' and the physician's abilities, rather than on 'coping' and the patient's abilities, the patient is placed in an inappropriate and ineffective dependency relationship. When the physician can no longer promise 'cure' and then attempts to refer the patient out of his practice, or leaves the patient to institutional care of others, the patient feels abandoned. The patient has already had his coping abilities undermined. And many patients react to unfulfilled expectations and violated trust with anger and panic" (R 387 at 2).

A patient facing cancer and the lack of positive assurance from the physician that the cancer can be cured may simply give up hope that what the physician can do for the patient can work. This lack of confidence in proven remedies is tragic in an era when, in the case of many cancers, a significant percentage of patients can be cured or have their lives extended. See, e.g., R 173, Att. ACS, 1977 Cancer Facts at 3. Laetrile's proponents expend great efforts to encourage this feeling. Much of the oral argument of Laetrile proponents in this proceeding was addressed not to the effectiveness of Laetrile but to the ineffectiveness of proven remedies (see., e.g., Tr. at 16 et seq.; Tr. at 228). With real hope extingished, the use of Laetrile or other unproven remedies is a way of avoiding an acceptance on a conscious level of the consequences of the disease: "The decision to use Laetrile indicates that, at the subconscious level, patients and their families have given up on conventional therapy and, in fact, have accepted the inevitability of death. On the more superficial level, patients choosing Laetrile are persons who believe that they do not require the use of sophisticated, anti-cancer treatments. This reflects an ambivalence which many patients feel at the time they are required to make decisions about cancer therapy. If patients can maintain denial about the seriousness of their cancer, then they can permit themselves to experiment with a bizarre apricot-extract, such as Laetrile" (R 433 at ¶ 13). "Human beings have become accustomed to using the psychological techniques of denial in dealing with real problems" (R 390, Ex. 3 at 386). "The decision to use Laetrile is, in essence, an attempt 'magically' to avoid the reality of cancer" (R 433 at ¶ 9).

2. The Role of Loved Ones

Patients with a diagnosed malignancy frequently encounter ostracism in their private, social, and vocational roles (R 387 at 1). At this point, the caring of loved ones and their sympathetic willingness to continue to associate with and to share the suffering of the cancer patient assume great importance to the patient. This caring relationship, quite understandably, leads to a dependence by the patient on the loved one and a corresponding feeling of responsibility in the nonpatient: "Many patients in their initial response to cancer diagnosis surrender control to those closest to them, further complicating the issue of informed choice. Highly anxious relatives with little or no medical understanding of cancer as a disease entity fall prey to the emotional appeal of the proponents of Laetrile" (R 421 at 2). "Cancer patients are most vulnerable to the manipulations of others when they feel they are (1) being abandoned, (2) unable to control pain, and (3) unable to maintain a 'sense of dignity' by being able to make decisions for themselves. Attempts at guarding oneself from all three fears are often incompatible. Many cancer patients feel they are in a 'double-bind.' If they don't follow their physician's treatment plan, the disease process won't be arrested. If they don't follow the competing, and often contradictory advice from relatives and friends, they will be abandoned. And if they assert their own feelings they will be ostracized by others at the very time they most need support from others" (R 387 at 1–2). Thus, some patients pay the price of what benefits are available from orthodox treatments in order not to be abandoned by family and friends—"a psychological analogue to the theological concept of being 'cast into Hell' * * *" (id. at 2). In many cases, it is family and friends who, amplifying the patient's feelings, try to get their anger and panic under control by manipulating the patient into use of medically unacceptable remedies. (See id. at 2.) The families of cancer patients, particularly parents of children with cancer, are understandably desperate for anything that will cure cancer. They often are beset by irrational feelings of guilt, and seek to assuage these feelings with the assurance that "* * * 'we did everything for our child' even to the point of foolishness in going after an unproven cure * * *" (R 394 at 2).

The shared responsibility of the loved ones of cancer patients for the patients' involvement with Laetrile (or other unproven remedies) helps to explain why these families have been among the most vociferous proponents of Laetrile. "This reaction can be understood because such persons, whether they are family members or friends, have to justify the deceased's use of Laetrile by suggesting that the patients were considerably helped by the drug, that their lives were prolonged to a significant extent, or, at the least, that they did not suffer a great deal of pain during treatment with the drug. To do otherwise would require them to acknowledge that they made a mistake

and misled the patients or that they went along with decisions which were clearly erroneous. Living with that kind of guilt is very difficult and the advocacy of Laetrile is a way of avoiding it" (R 433 at ¶ 15). It is only those family members who did not participate in, or dissented from, the decision to use Laetrile who, after the patient's death, raise their voices against the drug's use (see, e.g., R 47; R 429; R 300; R 348).

3. Methods of Promotion of Laetrile

As is obvious from the above discussion, the cancer victim and his or her family are extremely vulnerable to the kind of persuasion used so skillfully by Lactrile's promoters. This persuasion may take the form of highly polished and thus convincing films and books (see Tr. at 331) or of personal visits. The fact that many persons involved in Laetrile promotion believe strongly in the drug makes their presentations, because sincere, all the more compelling. In his affidavit, one cancer patient, speaking from his own experience, stated that "immediately after a diagnosis of cancer, most patients and family members are susceptible to something such as Laetrile, which offers a painless treatment with certain results" (R 388 at 2). The patient also stated that, somehow, the names of cancer patients in his area had been obtained by certain persons helping to spread the Laetrile theory. He indicated that Laetrile proponents exerted constant pressure on him and his wife to quit orthodox medical treatment and try Laetrile. Testimonials from patients who spoke in glowing terms of their recovery or successful treatment with Laetrile were offered to supported the proponents' claim (id.). Laetrile promoters are diligent in searching out persons with reported cancer to offer their product. One physician noted that he had a patient who, within 24 hours of his being diagnosed as having lung cancer, received information in the mail telling him he ought to take Laetrile and where and how to get it (Tr. at 184).

Laetrile proponents are keenly aware of the involvement of family members and friends in decisions to accept unproven remedies and actively seek to persuade them of the drug's benefits. One woman who had had surgery and chemotherapy for treatment of breast cancer commented: "My biggest problem has been coping with well-meaning relatives and friends who swallow this propaganda of unprofesisonals and then try to make me feel guilty because I don't take their advice * * *" (R 96).

Laetrile proponents play upon the victim's frustration with a medical establishment that cannot offer the certainty of a cure. Some patients reportedly turn to Laetrile precisely because it is "illegitimate," behavior that appears to be "an anger reaction toward legitimate medicine" (R 387 at 3). This antagonism toward the medical establishment is fanned by Laetrile proponents (as it has been by the purveyors of previous "unproven" remedies) to a pitch that most observers would consider absurd. When a speaker at the oral argument asked the audience, which consisted predominantly of Laetrile supporters, if "you really think that a quarter of a million physicians across the country can let people die because they want to make a profit off of them§", the audience response was a loud chorus: "Yes" (Tr. at 191).

Laetrile proponents also play upon and build the cancer patient's fear of legitimate cancer therapies. (See R 421 at 2: "The promise of a painless cure through Laetrile, as opposed to ordothox medical methods with their side effects capitalizes on the fear of pain and suffering".) "Slash (or cut), burn, and poison" are the code words of the Laetrile supporters for the proven remedies of surgery, radiation and chemotherapy (see, e.g., Tr. at 291, 357, 463). A videotape of an interview with a cancer patient (R 419, Ex. B; see also R 197 at ¶ 7) that is part of the record shows graphically the costs of this sort of propaganda. The victim is a woman who, at the time her breast cancer was discovered, was given a reasonably good prognosis of recovery after surgery. Out of fear of surgery she tried Laetrile therapy. Though the tumor grew to involve her whole breast she continued to avoid conventional therapy, even trying, after Laetrile did not help, an "asparagus" diet cure, garlic, and finally a fruit and vegetable diet with hot baths. When, nearly at death's door, she returned to the surgeon, it was too late for surgery to be effective. She then was convinced to try radiation therapy, which she testified she had avoided because the negative descriptions of it in Prevention magazine, to which she had long subscribed. The radiation therapy helped reduce the size of her tumor and make her more comfortable, but her expected survival was greatly diminished by her delay in obtaining effective treatment. This kind of disparagement of conventional thearpy, a bulwark of the campaigns of Laetrile proponents, is perhaps the most morally reprehensible aspect of the pattern of the drug's promotion.

4. The Sampson Survey

While the conclusions about the reasons for use of Laetrile expressed in the record are based upon a multitude of experiences by various witnesses with patients taking Laetrile, it is interesting to note the conclusions of the one attempt to survey Laetrile patients about their reasons for using the drug.

Based upon about 20 interviews with cancer patients who abandoned orthodox therapy in favor of Laetrile, Dr. Wallace I. Sampson, Clinical Associate Professor of Medicine, Stanford University School of Medicine, stated that about 75 percent of the patients reported that they had serious problems with their physicians. About 75 percent believed in Laetrile's therapeutic rationale and effectiveness. About 75 percent of the patients were involved in other methods of therapy that included high doses of Vitamin C, megavitamin therapy, and immunotherapy given by unqualified individuals. Dr. Sampson is of the opinion that the patients receiving Laetrile were involved in other types of unorthodox therapy because of their outlook on life (i.e., they seek nonrational, magical solutions to the problems of dread and often uncurable illness) or perhaps because of difficulties in relating to a standard physician. A large majority of the patients believed that there is a conspiracy to keep Laetrile off the market. Less than 10 percent of the patients tried to inform themselves about Laetrile from non-Laetrile sources. (See Tr. at 118–119; R 398 at 4.)

C. THE LAETRILE TESTIMONIALS

Unproven cancer remedies like Laetrile are invariably supported by numerous testimonials of persons who pronounce themselves satisfied with the results they, or their deceased friends and relatives, have achieved with the drug. The present widespread use of Laetrile as an alternative to remedies of proven effectiveness illustrates the problems to which such "evidence" of a drug's effectiveness leads, and it is a legitimate question to ask why there are so many such testimonials.

The Commissioner does not doubt the honesty or the sincerity of the many testimonials for Laetrile, but many of the positive experiences reported may be accounted for by explanations other than the claimed effectiveness of the drug. The placebo effect discussed above undoubtedly accounts for some of the reports, particularly those claiming decrease in pain and increased sense of well-being. Experts interested in the question have provided other explanations. Most of the patients reporting Laetrile "cures" appear actually to have had the benefit of other, proven effective therapies. Some of those who believe themselves cured may never have had cancer at all. Others may simply not be cured, despite their belief.

Many of the testimonials and anecdotes concerning the effectiveness of Laetrile replay the same scenario. The cancer patient is told he has cancer and agrees to surgery, radiation, and or chemotherapy. After some time, the patient, feeling nauseous, weak, and general malaise, in desperation turns to Laetrile. Within a few days or weeks after stopping orthodox treatment and starting to use Laetrile, the patient feels better, has an appetite, and is able to move about on his own. The patient in all sincerity attributes his recovery and feeling of well-being to his decision to reject orthodox medical treatment and to choose Laetrile. (See, e.g., R 9; R 35; R 223; R 267; R 315; R 391; R 483.) Many families of deceased cancer patients who had orthodox therapy and who then used Laetrile believe that the patient benefited from the Laetrile and might still be alive if they had turned to Laetrile earlier. (See, e.g., R 19; R 208; R 279.)

It is easy to understand how such a situation could develop. A doctor may prescribe 10 applications of a proven cancer drug, perhaps after surgery. The cancer may have been totally removed by the surgery or it may have been totally destroyed by, for instance, the 7th

of the 10 applications of the effective drug. Because the physician cannot know this, and because he cannot risk the chance that some cancer remains, he has prescribed the recognized treatment regimen. Use of cancer drugs (referred to as chemotherapy) or of radiation may involve unpleasant side effects. The patient, sickened by the side effects of the drug and importuned by Laetrile proponents, may stop the chemotherapy before the prescribed regimen is completed. As the side effects clear up, the patient feels better. If a full cure has been accomplished, it will be attributed to Laetrile. If it has not, the surviving family may well believe that, since the patient felt better after stopping chemotherapy and starting Laetrile, the therapy was only received "too late." See R 184 at ¶ 7:

> Testimonials attesting to a feeling of general improvement and cessation of pain in patients upon abandonment of radiation and chemotherapy in favor of Laetrile treatment do not indicate that Laetrile is effective in curing cancer or in relieving pain. The feeling of well being experienced by these patients derives from two phenomena, one physical and the other psychological. Chemotherapy and radiation treatments produce unpleasant side effects in most patients. When such therapies are stopped, the side effects they produce disappear. This natural physical effect in the case of these patients is reinforced when Laetrile is administered because of the patients' expectation that the treatment will have a beneficial effect.

Dr. John A. Richardson, himself a major proponent of Laetrile therapy, stated that 85 percent of the 4,000 to 5,000 patients treated with Laetrile at his clinic had previously received some type of orthodox medical treatment (Tr. at 463).

Sometimes conventional and Laetrile therapies are administered simultaneously, with any beneficial effects attributed by patients to the latter. Dr. Emil J. Freireich is involved in the development of cancer drugs. He stated that:

> (W)e have numerous patients who are receiving developmental therapy drugs which have at the time, real promise, and subsequently prove to be useful and are introduced into practice, who unbeknownst to us, were also taking therapy with laetrile and when their disease responds to therapy, (they) inadvertently ascribe it to the effectiveness of the unproven remedy, whose administration is revealed to us subsequently. When we compare the responses of patients on a given therapy who have received laetrile at the same time, with those who received none, there is no significant difference, which indicates clearly that those observed responses were due to the cancer chemotherapy drugs which were being administered by us and not by the additional use of laetrile (R 390 at ¶ 20.)

For other testimony on the propriety of attributing to Laetrile cures that may be caused by other, proven effective, drugs, see, generally, R 174 at ¶ 9 and R 185 at ¶ 20e.

"Some people who believe that Laetrile cured them never had cancer to begin with" (R 174 ¶ 9). In a number of the "case histories" submitted to show Laetrile's effectiveness, there is no acceptable showing that the patient ever had cancer. (See, e.g., R 183, Att. 16, App. 2; R 184, Ex. 2; R 378, Att. "Supplementary Report," cf. evaluation of case histories above.)

In one 1955 pamphlet, Dr. Krebs, Sr., discouraged biopsy, the procedure often used to determine whether a tumor is malignant (cancerous) (R 183, Att. 7 at 14). He urged instead that a special urine test, not generally accepted by the medical community as useful, be the means for diagnosing cancer (id. at 16). Even where the diagnosis has been done by someone other than a Laetrile proponent, a mistake is possible. Some cancers which are discussed in reference to Laetrile are very difficult to diagnose histologically. Thus, a diagnosis of cancer may often on later review be reversed. (See Tr. at 141.)

"Many cancer patients have given testimonials believing themselves cured, only to discover later that they still have the disease" (R 174 at ¶ 9). Since he is involved in the testing of cancer drugs, Dr. Emil J. Freireich is in a good position to follow up on patients who leave his program to use Laetrile. Dr. Freireich reports that "(I)n virtually every instance, (Laetrile patients treated in our department and subsequently followed by our tumor registry, have been) found to have evidence, not only of progressive disease, but to have expired after receiving such unsuccessful treatment, and a significant fraction eventually return to our clinic for more developmental therapy" (R 390 at ¶ 20).

An illustration of what, in all likelihood, explains most Laetrile testimonials appears in the record:

> Testimonials fail to provide objective evidence that there has been control or regression of a tumor which is attributable to the use of Laetrile * * *. To illustrate why such data are important, let us examine two typical versions of testimonials from women who state that their cancer of the breast was cured by Laetrile. The first testimonial is from Jane Doe. She discovered a lump in her breast and based upon the urging of friends has consumed on her own initiative a number of Laetrile tablets. It is also possible that she saw a doctor who administered injections and prescribed a special diet. In a month, the lump has disappeared, and Jane Doe sings the praises of Laetrile. "It cured my cancer; I am living proof." This is not credible evidence. The lump detected may have been caused by a variety of conditions. Without laboratory confirmation that a malignant condition existed, there is no basis to assume that it was cancer and that Laetrile contributed to its disappearance. The second testimonial is from Dorothy Doe. She had objectively diagnosed cancer, underwent a mastectomy, and postoperative chemotherapy or radiation treatments. The physician informs Dorothy that an additional surgical procedure may be necessary. Dorothy decides against further unpleasant treatment and takes Laetrile. Now, six months or three years later—time makes little difference—she, too, sings the praises of Laetrile. Dorothy's experience does not constitute evidence. It is possible that her orthodox treatment was successful; it is possible that she still has cancer, but that it will not manifest itself for another year or, indeed, as is sometimes the case, for another dozen years. The point is that there are no objective data upon which to assess Dorothy's condition at the time Laetrile was administered and the effects of Laetrile. In the absence of such data, there is no basis for a claim that Laetrile was effective (R 191 at ¶ 14).

As another affidavit states,

> * * * It is a certainty that any substance without significant toxic or harmful effect, including mystical activities, faith healing and all other types of non-toxic or non-harmful remedies will be effective in a small fraction of the very large population of patients with hopeless terminal cancer. Those individuals who fail to respond to such treatment, that is, who have the expected outcome, which is progression of their cancer and death, are no longer living and those rare individuals who have the exceptional or miraculous outcomes frequently live for long periods of time. It is obvious that a large number of individuals can be identified who have unusual outcomes. These individuals are of course easily convinced of the effectiveness of such treatments and are free to testify to their effectiveness for as long as their disease remains in control. Such testimonials contribute no significance toward our understanding of the effectiveness of any treatment for cancer. Evidence accumulated in the proven, objective, medical and scientific fashion is the only evidence that can be of use in evaluating the potential of any treatment for influencing the course of malignant disease (R 390 at ¶ 21).

Dr. Melvin Krant, Professor of Medicine and Psychiatry and Director of Cancer Programs at the University of Massachusetts Medical Center, reviewed a number of the testimonials submitted to the record from patients and relatives and friends of patients who have been treated with Laetrile. He stated that the testimonials "do not offer evidence for effectiveness because frequently the treatments with Laetrile were taken after other treatments such as surgery, radiation, or chemotherapy. At times, the Laetrile was taken in conjunction with other modes of therapy such as chemotherapy. In such instances, it is impossible to know whether the Laetrile added anything to the patient's response. There are no objective ways to measure the patient's response. In many instances, it seems like the main emphasis of the testimonials is on the patient's emotional reaction to being treated. Because the testimonials are not presented in a scientific manner, it is also impossible to determine if there were any side effects from Laetrile administration" (R 453 at 1-2).

V. Other Issues Regarding Laetrile

A. Use of Laetrile Outside the United States

Laetrile's proponents have sometimes sought to give the impression that Laetrile is in use around the world and that it is only the United States' overly restrictive drug laws or an evil conspiracy among drug companies, physicians, and bureaucrats that is preventing marketing of the drug in this country. (See, e.g., the claim, in a 1963 publication, Control for Cancer by Glenn D. Kittler, that Laetrile was being studied in several countries in addition to the United States: Canada, the Philippines, Japan, England, Belgium, Italy, Union of South Africa,

and Mexico (R 318 at 31).) The book also reported that the drug was registered in Iran in 1962 (id.). (See also the reference to the use of Laetrile (or Amygdalin) in West Germany in the late 1960's (R 302, Ex. G).) (Cf. R 198, Ex. 2 at 24, (transcript of film World Without Cancer); Tr. at 424.)

The record reflects no international recognition or use of the drug. The State Department and the United States Mission to the World Health Organization made an effort to determine whether Laetrile, Amygdalin, Vitamin B–17, or such drug under any other name was known and approved elsewhere in the world. The State Department sent inquiries to all American embassies instructing embassy officials to ascertain the status of the drug in their respective host countries, and the mission to the World Health Organization made telephone inquiries of member states throughout Western Europe. The following information was obtained:

The American Embassy in Mexico advised that in 1974 the Mexican government gave provisional approval, contingent upon the presentation of evidence of Laetrile's effectiveness in treating cancer, to two laboratories in that country to manufacture the drug. This approval was cancelled in late 1976 because no positive results were obtained in research carried out at the Medical Center General Hospital. The decision to ban Laetrile has been appealed by Laetrile proponents and is now in the Mexican courts (R 426; see also Tr. at 430).

The mission to the World Health Organization had been told by some European contacts that "Laetrile" can be "purchased across the counter in Geneva without prescription" (R 426). The American Embassy in Switzerland, upon inquiry, was told that Laetrile is not sold on the Swiss market and is not approved there. One company does sell "small quantities of Laetrile," "exclusively to cancer research scientists" primarily in Western Europe. The company told the American embassy in Bern that "Laetrile is not made available commercially, nor is it sold as a cancer 'cure'" (id.).

In Madagascar, Laetrile is known as Amygdalin and is considered a poison by health authorities. Its use is prohibited. In Chile, Laetrile is also known as azaribina and its use is prohibited under any circumstance. This prohibition followed receipt of Newsletter 172 from the World Health Organization which described the potential dangers of use of the drug. The importation or use of Laetrile (Amygdalin) is illegal in the Republic of Korea (id.).

Health officials in Guyana reported that Laetrile has been used there. The Minister of Health indicated that he was not aware of FDA's prohibition of the use of Laetrile, however, and that, since the United States standards are closely followed in that country, his country would also ban the drug (R 426).

The State Department inquiry drew 69 responses from around the world. Each of the countries not already mentioned responded by indicating that "Laetrile," "Amygdalin," and "Vitamin B–17" were unknown or were not approved for use for treating cancer or any other use. The responding countries included the Philippines, Japan, the United Kingdom, Belgium, Italy, South Africa, and the Republic of Germany, as well as France, Korea, Taiwan, Hong Kong, India, and others from every part of the globe (id.). The United States Mission at the World Health Organization confirmed that Laetrile "is not registered and by definition, unavailable," in any of WHO's member states throughout western Europe (id.).

B. Claims That Laetrile Is a Vitamin or Food

Proponents of Laetrile (or amygdalin) have in recent years contended that their product is a vitamin or that it is a natural food substance rather than a drug. These claims are properly irrelevant to the questions this administrative proceeding was intended to address. However, in light of the interest in the vitamin issue demonstrated by the submissions to the record, the Commissioner will take this opportunity to discuss it. The potential safety problems presented by this concept will also be discussed.

1. A Vitamin or Food May Be a Drug As Well

This question is irrelevant to the issues in this administrative proceeding because, even if Laetrile (or amygdalin or "laetrile") were a vitamin (or a food), it would still be a drug. Any substance, including a vitamin or food, is a drug and subject to regulation as such if it is intended for use in the "diagnosis, cure, mitigation, treatment, or prevention of disease in man or other animals * * *" (21 U.S.C. 321(g)(1)). (See *Rutherford* v. *United States*, *supra*, 542 F. 2d at 1140; *United States* v. *General Research Laboratories*, 397 F. Supp. 197, 200 (C.D. Cal. 1975).[7] As the previous discussion illustrates, there is no question that Laetrile or amygdalin has been recommended in the treatment of cancer. In fact, in the very article in which Ernst T. Krebs, Jr., explained his theory that his product was "Vitamin B–17", he promoted it for cancer treatment. (See R 183, Att. 10c.

[7] Section 411 of the act (21 U.S.C. 350) deals specifically with vitamins and minerals. Section 411(a)(1)(B) does limit the authority of the Secretary to classify a vitamin as a drug "solely because it exceeds the level of potency which the Secretary determines is nutritionally rational or useful." The vitamin provisions do not, however, affect FDA's authority to classify and regulate vitamins as drugs if they are represented to be for use in the diagnosis, cure, mitigation, treatment, or prevention of disease. The conference committee report states, "Except as specifically provided, the conference substitute does not alter the drug or food provisions of the Federal Food, Drug, and Cosmetic Act. If a product containing vitamins, minerals or other ingredients is a drug within the meaning of Section 201(g) of the Act, the Secretary may, with regard to such product, exercise his authority under Chapter V of the Act" H. R. Rep. No. 1005, 94th Cong. 2d. Sess. (April 2, 1976); (see also, 122 Cong. Rec. H3244-H3248, April 12, 1976).

It has been suggested that the claims that Laetrile (or amygdalin) is a vitamin or a food are simply an effort to establish that the substance is covered by the food requirements of the Federal Food, Drug, and Cosmetic Act and its regulations rather than those requirements applied to drugs. (See, generally, Tr. at 216, 225, 405; R 173, Att. "Questions most frequently asked about 'Laetrile,'" at 1; R 416 at ¶ 16.) One court has called the attempts by Laetrile proponents to represent Laetrile as something other than a drug, "a patently absurd and transparent attempt to avoid the drug labeling provisions of the Federal Food, Drug, and Cosmetic Act." *United States* v. *Spectro Foods Corp.*, Civil No. 76–101 (D.N.J., Jan. 29, 1976) (R 173, Att.). The Commissioner does not agree that Laetrile is a vitamin. (See discussion below.) It is clear, however, that even if Laetrile were a vitamin (or a food) it would be subject to the drug provisions of the act.

2. Is Laetrile a Vitamin?

This administrative proceeding was not intended to address the issue of whether Laetrile is a vitamin, and testimony on that issue was not solicited. Nevertheless, a considerable amount of evidence in the record addresses this issue. It appears that (a) Laetrile proponents classify amygdalin and certain related substances as a vitamin under their own definition of that term and (b) experts in the vitamin area, utilizing the criteria against which each of the legitimate vitamins have been assessed, conclude that amygdalin and other nitrilosides are not a vitamin.

(a) Proponents' Claims.—The idea that Laetrile could be considered a vitamin first appears in a pamphlet,[8] in use in 1965, published by Krebs Laboratories and entitled "Cancer Is A Deficiency Disease: The Deficiency of Cyanide Sugars" (R 201, Ex. C, No. IV). In that pamphlet, amygdalin and other "cyanogenetic glucosides" are characterized as pro-vitamins for vitamin B–12. This means that they participate in the formation of vitamin B–12. It is stated that "during the process of formation the liver is thoroughly fumigated and rendered sterile (id.). The real anticancer effect of amygdalin is said to be not this formation but the release of cyanide in the cancer cells by the mechanism discussed above under "Theories of Action." It is interesting to note that another Laetrile proponent, Dr. Navarro of the Philippines, states that vitamin B–12 should never be administered to cancer patients (R 318 at 165).

The pro-vitamin theory had apparently been set aside by 1970 when an article by Ernst T. Krebs, Jr., referred to previously, "The Nitrilosides (Vitamin B–17—Their Nature, Occurrence and

[8] The Krebs were no strangers to the "vitamin" area. Ernst T. Krebs, Jr.'s, marketing of another of his inventions, "Vitamin B–15" ("pangamic acid"), led to his plea of guilty to a charge of causing the introduction into interstate commerce of an unapproved new drug in 1962 (R 185, Att. 16, App. 17 at 7).

Metabolic Significance (Antineoplastic Vitamin B–17)," was published (R 183, Att. 10c). In this article, Krebs, Jr., uses the term "vitamin B–17 (nitriloside)" as "a designation proposed to include a large group of water-soluble, essentially non-toxic, sugary compounds found in over 800 plants, many of which are edible" (id. at 75). He indicates that the compounds "are collectively known chemically as beta-cyanophoric glycosides. They comprise molecules made of sugar, hydrogen cyanide, a benzene ring or an acetone" (id.). These compounds could be hydrolyzed by beta-glucosides to a sugar, free hydrogen cyanide, and benzaldehyde or acetone (id.). He states that amygdalin is one of the most common of the nitrilosides and that it "occurs in the kernels or seeds of practically all fruits" (id.).

Mr. Krebs, Jr., in this article, attempts to build a theory that vitamin B–17 is a specific dietary factor that could be used to prevent and to cure cancer. He explains that prevention and cure occur through the cytotoxic (toxic to cells) compounds of vitamin B–17—hydrogen cyanide and benzaldehyde—through mechanisms discussed elsewhere in this opinion (id. at 80). He concludes that: "In nitriloside or vitamin B–17 we have a new vitamin in which all of us are severely deficient" (id. at 84). The theory that Laetrile (or laetriles) constitutes a vitamin has found another proponent in the person of Dr. Dean Burk, a biochemist and president of the Dean Burk Foundation, Inc. (see, generally, R 302; Tr. at 401 et seq.).

Clearly, whether or not a given substance comes within the definition of vitamin depends upon the definition chosen. In his affidavit, Burk defines a vitamin as a substance which is "virtually non-toxic, water-soluble, an exogenous nutrient or food factor, and active in relatively small, essentially catalytic, non-calorific amounts, and is essential or beneficial in normal metabolism and/or physiologic functioning to *overcome deficiency lesions and symptoms of nutritional disease*" (emphasis in original) (R 302 at 4). Dr. Burk continues that in animal experimentation "* * * the deficiency lesions and symptoms of nutritional disease are best illustrated by the action of amygdalin in lengthening of animal lifetime or decreasing development of metastases, or both, and increase in health and well-being * * *" (id.). (See also Tr. at 408 and 465.)

Thus, even by the Burk definition, the claim that Laetrile is a vitamin depends in large part on the substance's ability to combat cancer, an ability not shown by testing convicing to drug experts in general. Proponents of the vitamin theory claim that the higher the everyday diet is in nitrilosides, the lower the incidence of cancer (R 73 at 36). Others claim that it may not be only high nitriloside levels that account for this observation but that other dietary elements (e.g., vitamin C) may play a role. (See, generally, R 318). These claims are based upon assertions that in some geographical areas, where the normal diet contains nitrilosides in abundance, cancer does not exist. Evaluation of the prevalence of cancers requires careful studies by competent epidemiologists and suitable cancer registries, which contain reports by professional pathologists (R 399 at ¶ 9). What evidence does exist in this area indicates a complete lack of the correlation between high nitriloside diet and low cancer incidence that the Vitamin B–17 proponents claim. The record contains citations to numerous reports showing that a variety of cancers do occur in populations consuming nitriloside-containing diets. These include findings that cases of most of the recognized cancers appear in the Kampala Cancer Registry, Uganda (id.). There are also references to published papers from the Ibadon Cancer Registry, Nigeria on Burkitt's lymphosarcoma, Kaposis sarcoma and breast cancer, cancer of the bladder in Kenya, and the cancer incidence in Bantu (id.). Some cancers that are rare or absent in North America and Western Europe occur in the populations which consume high levels of nitrilosides (id.).

In the film "World Without Cancer," the people of the Kingdom of Hunza in the Himalayan mountains are said to eat a diet containing over two hundred times more nitrilosides than the average American diet and to prize above all other foods the apricot seed. It is stated that "[v]isiting medical teams from the outside world report that there never has been a case of cancer in Hunza" (R 198, Ex. 2 at 8). However, in 1955, a Japanese medical expedition studied the Hunza people and reported that they have many diseases, including cancer (R 173, Att. "Questions Most Frequently Asked" No. 6; Tr. at 338).

Similarly, the film claims that the Eskimos eat a high nitriloside diet and are "found to be totally free of cancer" (R 198. Ex. 2 at 8). The Eskimos have also been found to have cancer (R 173, Att. "Questions Most Frequently Asked" No. 6; Tr. at 339). In commenting on another reference to "the diets of the cancer-free population" (R 217 at 2), Thomas H. Jukes, Ph.D., states correctly: "There are no cancer-free populations" (R 416 at ¶ 28(C)).

(b) *Vitamin Experts' Position.*—Numerous nutrition experts and organizations concerned with nutritional science provide support in the record for the Commissioner's conclusions that "Laetrile," or "amygdalin," or "nitriloside," is not a nutrient or vitamin. (See, e.g., R 173, Att. "Questions Most Frequently Asked" (American Cancer Society); R 168, Att. "The Vitamin Fraud" and R 399 at ¶ 12(C) (David M. Greenberg, Ph.D.); R 416 (Thomas H. Jukes, Ph.D.); R 378, Att. Editorial; Att. American Institute of Nutrition letter; R 169 at ¶ 17 (Vincent T. DeVita, Jr., M.D.); R 191 at ¶ 11 (Philip S. Schein, M.D.); R 227 at 3 (National Council on Drugs).) The steps which are necessary to establish that a substance is a vitamin are described in the record. These steps include the publication in reputable journals of a complete description of the research procedures, and confirmation, by other scientists, of the results obtained. If the work cannot be repeated, the existence of the vitamin is not recognized (see R 416 at ¶ 15). Additional steps include demonstrating the presence of the purported vitamin in foods, determination of its exact chemical molecular structure, the demonstration of its effectiveness, and its chemical synthesis. After these steps are completed, the Food and Nutrition Board of the National Academy of Sciences sets up Recommended Daily Allowances for the vitamin which then must be adopted by the Food and Drug Administration (id.).

The lack of scientific evidence of any effect, which has prevented Laetrile from being recognized by experts as a safe and effective drug, also prevents recognition of its claimed status as a vitamin. (See e.g., R 416 at ¶ 16: "(T)here are no data available to show that a disease state is produced or alleviated by the exclusion from (or) addition to the diet of amygdalin".) Other experts emphasize that there is no evidence that (1) laetriles (*beta*-cyanogenic glucosides, vitamin B–17) are essential nutritional components nor that (2) they promote any physiological process vital to the existence of any living organism. (See R 168 Att. at 347; R 395.)

A compelling point made by experts in this area is that if there were a vitamin B–17, and if cancer were a vitamin B–17 deficiency disease, then every animal deprived of the vitamin would get cancer while no animal given the vitamin in sufficient amounts would get cancer. It is noted, that "No person given adequate vitamin C, for example, ever gets scurvy" (R 198 at 5). Stated another way: "The key to the term 'vitamin' is that the absence of vitamins from the diet in an experimental animal or a human being must lead to the appearance of a nutritional deficiency disease, which is prevented or cured by adding the vitamin to the diet. Laetrile has no such property" (R 416 at ¶ 14).

It is further stated that "(no vitamin has) the property of destroying tissue, such as cancer tissue, that is claimed of Laetrile. Such a property would be incompatible with the action of vitamins" (Tr. at 223). Other experts in this area rejected the claimed vitamin status in part on the grounds, discussed below, that amygdalin is, or can be, harmful to the body. It is pointed out that, amygdalin properly belongs to the class of compounds termed "toxicants occurring naturally in foods". (R 416 at ¶ 27(A)(1)).

3. Dangers of Ingestion of "Vitamin B–17"

As has been demonstrated above, the presence of *beta*-glucosidase, oxynitralase, and amygdalin together in apricot pits presents the potential for a combination that would release cyanide and cause poisoning of the individual consuming an extract of the pits. Additionally, though *beta*-glucosidase is not present in animal tissues, it, and other substances capable of breaking down amygdalin, may be present in the digestive track and thus may break down orally consumed amygdalin to release cyanide in the body. It is therefore with great concern that the Commissioner views the emergence of the theory that human beings should step up their consumption of "naturally occurring" nitrilosides such as amygdalin.

In his vitamin B–17 article, Ernst T. Krebs, Jr., notes that while the "stupidity" of "political power" may keep prepared vitamin B–17 off the market, six or seven teaspoonsful of defatted apricot seed or kernel would supply what is considered to be an adequate oral dose of nitrilosides (R 183, Att. 10c at 84). He suggested, "It is best that the *beta*-glucosidase enzyme be completely heat inactivated in such material" (id.). He does not indicate how much heat inactivation should be accomplished, nor does he cite any support for the idea that it can be.

There are documented cases of poisoning, some fatal, due to the consumption of apricot pits or kernels. The toxic element in these cases is the hydrogen cyanide which is released from the cyanogenetic glucosides by the action of the enzymes (including *beta*-glucosidase) present in apricot kernels (R 378, Att. "California Morbidity Reports," Att. "Hazards to Health"). The suggestion by Mr. Krebs, Jr., that the *beta*-glucosidase be "inactivated" can be taken as tacit—too tacit—acknowledgement that the kernels and/or pits present a hazard when consumed unless the enzymes are first destroyed. The Commissioner notes that other proponents of Laetrile clearly state that amygdalin products should never be given by mouth because the hydrochloric acid in the stomach is capable of hydrolyzing the drug (R 318 at 158). A 1954 document, "The Rationale and Clinical Evaluation of Laetrile-*Beta*-Glucosidase Palliative Therapy" states, "CAUTION: Laetrile (1-mandelonitrile-*beta*-glucuronidase) is NOT TO BE TAKEN ORALLY. It is extremely toxic by this route of administration, since the gastric hydrochloric acid acts to hydrolize the glucoside with the release of hydrogen cyanide" (R 388, Ex. 5).

Dr. Burk seeks to support the idea that Laetrile or amygdalin is a food and, among other things, may be safely consumed by an allegation that "* * * laetrile is listed in the HEW–FDA GRAS list (foods 'Generaly Regarded (sic) as Safe') under the heading of natural extractive from bitter almond, apricot or peach kernels" (R 302 at 3; see also Ex. B). The material to which Dr. Burk refers is "Bitter almond (free from prussic acid)" which does appear on the generally recognized as safe (GRAS) list, 21 CFR 182.20. (Prussic acid is another name for hydrogen cyanide.) The material on the GRAS list, however, is an oil extracted from peach, almond, or apricot kernels. After cold pressing the oil from its source, it is processed to effect enzymatic hydrolysis of amigdalin. There is no amygdalin present after the hydrolysis step. The final product is essentially benzaldehyde. "Thus the material listed for flavor use * * * is not amygdalin and thus neither is it Laetrile" (R 415 at 2). Dr. Burk's contention is thus incorrect and has no basis in fact.

The idea that foods containing nitrilosides may be safely consumed is also supported by stories of "non-toxic" nature of nitrilosides which are found in the diets of various peoples. This claimed nontoxicity is not borne out by reality. In some parts of Africa two important human diseases—human ataxic neuropathy and endemc goitre—appear to be associated with high cassava intake (R 183, Att. 20 at 161; R 378, Att. 6). (Cassava contains linamarin, a commonly consumed nitriloside (R 217, Att. "Sickle Cell Anemia" at 51).) It is also reported that cows have been killed by eating large amounts of young millet, which is particularly high in nitrilosides, and intoxication of other animals has been reported. (See R 416, Ex. 5 at 302.) There have been reports in this country of toxicity and, in some cases fatalities, in humans from consumption of amygdalin-containing substances (See, e.g., R 378, Att. "California Morbidity"; see also R 378, Att. "Hazards to Health; Cyanide Poisoning from Apricot Seeds Among Children in Central Turkey," Sayer et al.). Thus there is ample and clear indication that the consumption of "nitrilosides" is not without hazard. To urge the public to consume "apricot pit milkshakes" or similar foods in order to be sure to get an ample supply of amygdalin or "vitamin B–17" or "nitrilosides" is irresponsible and foolhardy.

C. FREEDOM OF CHOICE

The administrative record contains many comments not directed to the legal issues of Laetrile's "new drug" or "grandfather" status or even to the question of whether the drug is safe or effective for use in cancer therapy. Rather these comments support the proposition that a person should be free to choose his or her own cancer therapy, at least if the drugs involved are not overtly toxic (see, e.g., Tr. at 33; R 231; R 238; R 242; R 209; R 211; R 283; R 500; R 155; R 272). The issue of "freedom of choice" is irrelevant to the issues remanded to the agency by the Rutherford courts. Nevertheless, because of the demonstrated public interest in this issue, the Commissioner has given it, and submissions addressing it, careful consideration.

The very act of forming a government, of course, necessarily involves the yielding of some freedoms in order to obtain others. In passing the 1962 Amendments to the act—the amendments that require that a drug be proved effective before it may be marketed—Congress indicated its conclusions that the absolute freedom to choose an ineffective drug was properly surrendered in exchange for the freedom from the danger to each person's health and well-being from the sale and use of worthless drugs. This is in fact the same decision made by those in government who have decided over the years that only those persons may practice medicine who have been certified by experts to be qualified to actually help the patients who would choose to seek their assistance.

Some would argue that the lawmakers' well-considered decision to prohibit the use of drugs not shown to be effective was the wrong one. One alternative suggested is that a drug such as Laetrile should be marketed with labeling which indicates that experts do not consider it to be effective. The present use of Laetrile vividly illustrates the impracticability of such a solution. There can be few patients taking Laetrile in this country today who do not know that the government and most experts consider it worthless. Yet the drug continues to be used, to the detriment of cancer patients who might otherwise be helped by conventional treatment.

The choice to use Laetrile is seldom, in any case, a free one. As the discussion above (Why Do People Use Laetrile?) illustrates, a cancer patient is a person beset by immense stresses, physical, psychological, emotional and societal; and the persuasion that the patient and his family are subjected to by Laetrile proponents is seldom limited to a rational laying out of competing arguments. The information that the proponents of Laetrile provide is false—that the drug cures, palliates, relieves pain, "controls" cancer. As Dr. Sampson's survey, discussed above, indicates, few Laetrile patients make an effort to hear the argument against Laetrile therapy. The idea that a reasoned free choice is involved in the selection of Laetrile rather than legitimate therapy is thus ultimately an illusion. (See R 421 at 1.)

The record contains the views of many persons who have considered the issue of "freedom of choice" in cancer therapy. Each represents a thoughtful attempt to deal with this question, which, while irrelevant to the legal issues which are the subject of this opinion, is troubling to those concerned with the Laetrile problem. These comments may be grouped roughly as supporting the two responses to the "freedom of choice" argument set forth above: (1) The surrender of an absolute freedom to choose among cancer remedies in order to obtain the greater freedom from the suffering associated with use of ineffective remedies is a rational decision; and (2) the "choice" of unproven cancer remedies cannot fairly be characterized as "free."

1. Balancing Freedoms

Reverend Allan W. Reed, Director, Department of Pastoral Services and School for Pastoral Care, Massachusetts General Hospital, considered the ethical side of the "freedom of choice" question. He states "The ethical issues of a group of legislating for an individual, thereby threatening the principal (of) freedom of choice, contrasts with the ethical principal of a government protecting its citizens from fraud and abuse. In the case of a drug for which there is no proven efficacy, the ethical weight is on the side of protection of the citizens" (R 148).

Leroy G. Kerney, Chief of the Department of Spiritual Ministry at the Clinical Center, National Institutes of Health, pointed out that, "Freedom of the indi-

vidual is important. But when the freedom to accept any drug for treatment and the freedom to injure oneself collide, a judgement must be made: Stop signs or restrictions on turning at certain corners restrict my freedom in driving, but, at the same time, they protect my freedom from hurting myself and others in traffic" (R 414 at 3).

J. Philip Wogaman is Dean and Professor of Christian Social Ethics at the Wesley Theological Seminary and past president of the American Society of Christian Ethics. He noted an "initial presumption" in favor of freedom from governmental prohibition bu concluded that Laetrile should be banned for three reasons: (1) The ban prevents fraud in the medical marketplace; (2) "[M]isrepresentation in the field of medicine is particularly serious because it undermines public confidence in medicines that are of real value"; (3) "(T)here is a real danger that persons may be led by false hopes in a worthless drug to neglect treatment at a time when it could be most effective" (R 417 at 2–3).

Dr. James F. Holland of the Mount Sinai School of Medicine points out that the freedom achieved by regulation of drug products is often the freedom to live: "For the patient ignorant of the inerness of Laetrile as an anticancer drug, there is an overriding concern that he not be denied his individual freedom by untimely death from cancer from having relied on Laetrile to help. This is a cruel deprivation of individual freedom, since the patient does not get a second chance" (R 396 at 2).

James Harvey Young, Ph.D., a historian of health quackery, discussed the past use of the freedom of choice concept and phrased his conclusions concerning the validity of application of that concept to health care in colorful terms. He states that acceptance of the primacy of the freedom to choose medical therapies "leads only toward the license of those ancient days, when 'the toadstool millionaires,' preaching religion and spouting patriotism, operating without restraint, fleeced and often killed their gullible victims. That is a fate from which seven decades of constructive legislation, beginning with the Pure Food and Drugs Act of 1906, has somewhat rescued the nation. Complex, modern, industrial, urbanized society, with standards of medical judgment far more precise than those existing in the nineteenth century, cannot afford to let the nation's health concerns be governed by a distored definition of that great symbol, 'freedom', which would return piratical anarchy to the realm of health" (R 400 at 11–12).

2. The Choice Is Not Free

The discussion above of "Why People Use Laetrile?" describes the many pressures that induce cancer patients and their families to make the decision to use Laetrile. Orville Eugene Kelly is a cancer patient who has founded an organization called "Make Today Count," which now has 103 chapters in 30 states, to help other cancer patients and their families deal with the problems that discovery of cancer entails. He addressed the question of "freedom of choice" in an affidavit submitted to the record (R 389). He notes from personal experience that patients and their families are often susceptible to arguments that a painless drug like Laetrile can cure them (id. at 2) and describes the persistence with which those arguments are made. He himself has tried to present the counter-arguments to other cancer patients. "But it is difficult to convince some of these people that the substance Laetrile is ineffective as a therapy for cancer when they have watched a film, listened to tapes, and heard testimonials from other patients, quite sincere in their beliefs that Laetrile has helped them" (id. at 3). He asks: "(I)s it a fair choice if (the cancer patients) are being pressured by Laetrile proponents?" (id.).

The constant efforts of Laetrile proponents are emphasized by those dealing with cancer patients. See, e.g., statement of Helene Brown, Executive Director of Community Cancer Control, Los Angeles, "that far from exercising a free and informed choice patients are confronted with enormous pressures to use Laetrile instead of conventional forms of therapy and that representatives attesting to the worth of Laetrile make untrue, misleading and unsubstantiated claims" (R 393 at 5).

The presentations of the Laetrile proponents are made, as discussed in more detail elsewhere, to patients and families deprived of their normal decisionmaking abilities. See statement of John J. Dawson, M. Div., Director, Patient and Family Support, Mountain States Tumor Institute: "Research conducted at the Mountain States Tumor Institute and elsewhere indicates that the emotional trauma of a cancer diagnosis severely impairs the patient's and families' ability to engage in rational decisionmaking processes" (R 421 at 1).

Other submissions reflect a similar conclusion, see the statement of Rev. Reed: "The ability of (cancer patients and their families) to protect themselves is often severely limited by the emotional situation in which they find themselves" (R 418). (See also R 414 at 4; R 433 at ¶ 14.)

The Commissioner thus concludes as follows:

(1) To the extent that any freedom has been surrendered by the passage of the legislation which bans from the marketplace drugs that have not been proven to be effective, that surrender was a rational decision which has resulted in the achievement of a greater freedom from the dangers to health and welfare represented by such drugs.

(2) The choice of Laetrile therapy, by persons under the severe stresses associated with discovery of cancer and in response to misinformation presented persuasively by Laetrile's proponents, cannot be regarded as a choice which is free.

D. ALLEGATIONS OF BIAS

Several submissions charged that FDA is too biased against Laetrile to conduct a fair hearing. Aside from general allegations of bias (R 313; R 248; R 353; R 507, R 302; R 73, Att. at 43; Tr. at 444–45), these submissions fall into two general categories: (1) the administrative rulemaking proceeding should have been conducted by someone other than FDA (R 144; R 505; R 222; Tr. at 12, 29, 75, 444–45); and, (2) the drug approval process administered by FDA is wrong (R 235; R 258; R 144; R 509; Tr. Ex. 1).

It is difficult for an agency charged with bias to rebut such charges persuasively. Nonetheless, the Commissioner feels that a complete decision requires some rebuttal of charges that he regards as erroneous and misdirected. Insofar as comments suggesting that the proceedings should have been conducted by someone other than FDA, it should be noted that FDA was required by court order to assemble an administrative record and make appropriate determinations therefrom. The task could not have been delegated to anyone else, and, even had the agency been able to do so, it is not likely that any tribunal chosen by FDA would have satisfied those persons who are convinced that the agency is biased. The FDA is, of course, the agency designated by Congress to evaluate the safety and effectiveness of drugs and, as such, it is the agency with expertise in this area.

The comments charging that the requirements for drug approval administered by FDA are wrong contained statements to the effect that testimonial evidence should be accepted as adequate proof of safety and effectiveness or that the cost of a clinical trial is too great a burden for the proponents of Laetrile to bear. Laetrile proponents place particular emphasis on the cost factors, stating that because clinical trials are expensive, FDA somehow favors only large drug companies.

As has been discussed above, FDA is bound by the requirements of law regarding drug safety and effectiveness. Those requirements have been challenged in court before, by the very drug companies toward whom Laetrile proponents allege FDA has a positive, favorable bias. These "favored" groups did not prevail, and the safety and effectiveness provisions were upheld.

In Pharmaceutical Manufacturers Ass'n v. *Richardson, supra*, a trade association whose membership includes major drug firms sought to enjoin the FDA regulations establishing the standards of evidence necessary to demonstrate the effectiveness of drug products (21 CFR 314.111). Pointing out that Congress could not have had testimonial evidence, clinical impressions, practical experience, or the unsubstantiated subjective views of medical practitioners in mind when it defined "substantial evidence," the court upheld the regulations. As one witness in the case pointed out, the approach which assumed that a collection of impressions would furnish the truth, "did not prevent doctors from having unbounded faith in the curative powers of leeches for hundreds of years before scientific evaluation became the preferred means of judging efficacy of therapy" (318 F. Supp. at 307).

In *Upjohn Company* v. *Finch*, 422 F.2d 944 (6th Cir. 1970), a drug manufacturer sought review of an FDA order revoking marketing approval for seven combination antibiotic drugs. Stating that testimonial evidence was not enough to meet the standard of substantial evidence, the court held that "the record of commercial success of the drugs in question and their widespread acceptance by the medical profession, do not, standing alone, meet the standards of substantial evidence, prescribed by 21 U.S.C. 355(d)" (422 F. 2d at 954). Although the cost of developing the proper scientific evidence of safety and effectiveness is high, placing this burden upon those who wish to sell drugs is more than justified by the need to protect the consumer from harmful, useless, and fraudulent drugs.

The Commissioner acknowledges that the FDA is biased in one sense; the agency is committed to requiring that drugs meet the standards of safety and effectiveness required by law. The standards are designed to protect the public from drugs which are not both safe and effective. While the standards are rigorous, they are not mysterious. They are accepted by the scientific community and can be applied by any scientists who seriously wants to prove the value of a drug. The proponents of Laetrile choose to attack the standards. They have not attempted to meet them.

E. LIMITING USE TO TERMINAL PATIENTS

There has been concern expressed in the submissions to the record that Laetrile might be approved for use by "terminal" cancer patients. Such an approval would be theoretically justified only on the grounds that since such patients might be considered beyond the help of other therapies, Laetrile cannot hurt them. Approval of a drug for use by terminal patients is not possible under the act; however, in light of the interest in this issue the Commissioner will discuss the evidence relating to it.

One submission objected to the possible use of Laetrile by terminal patients on the grounds that approval of such use constitutes sanction of an inhumane fraud upon the patients involved, one which wastes the financial resources of the patients and their families uselessly (R 190 at ¶ 17). Two other arguments were expressed by a number of submitters: (1) there is no such thing as a "terminal" patient and (2) allowing use by a subgroup of cancer patients would lead to increased use by patients who could be helped by legitimate therapy.

1. Who is Terminal?

Dr. Peter H. Wiernik, Chief of the Clinical Oncology Branch of the National Cancer Institute's Baltimore Cancer Research Center, states, "One major difficulty in making a particular chemical available for terminal patients only, is that no one can prospectively define the term 'terminal' with any accuracy. A patient can be said to be terminal only after he dies. Many patients who are critically ill respond to modern day management of cancer" (R 200 at ¶ 18).

D. Joseph F. Ross, Professor of Medicine at the University of California School of Medicine at Los Angeles, is actively involved in the medical care of cancer patients. He states, "[T]he distinction of 'terminal' patients from 'non-terminal' patients may not be reliably determined and an assumption that Laetrile may be given to such patients with impunity may deprive such patients of therapeutic measures which could help them" (R 190 at ¶ 17). Cf. R 393, Ex. 1 at 2: "Medical history is full of miracles." "No one knows if and when any patient is going to die." (Helene Brown, Executive Director of Cancer Control Los Angeles); see also R 173, Att. "Questions Most Frequently Asked * * *" at 2).

2. Effects on Other Patients

Approval for use of Laetrile by "terminal" patients, assuming some way could be found to define that class of individuals so as to exclude all those who might be helped by legitimate therapy, would still pose a risk to other patients who could be helped. This effect would, the evidence in the record shows, occur in two ways. First, approval for even this limited use would encourage illegitimate use of the type now occurring in this country.

Historian James Harvey Young, based upon his study of past "unproven" medical cures, states, "Permitting Laetrile's use in terminal cases gives it a credence among the public at large that will expand its use in early cases, for people will prefer taking a 'vitamin' to confronting the surgeon's knife" (R 400 at 11).

Dr. Samuel C. Klagsbrun, a psychiatrist who works with cancer patients at St. Luke's Hospital in New York, states, "Permitting Laetrile to be used by any population of cancer victims would have the correlative effect of creating the misimpression in the minds of other cancer victims that the drugs is, in fact, safe and effective for a broader population" (R 433 at ¶ 12).

A second danger from such a limited approval of Laetrile is that the limitation would be extremely difficult to enforce. Kenneth A. Durrin, Acting Director, Office of Compliance and Regulatory Affairs, Drug Enforcement Administration, submitted an affidavit describing the detailed and costly regulation of "controlled substances" under the Controlled Substances Act (CSA) and then considered the possibility of approval of Laetrile "for terminal patients only" (R 435). He stated his conclusion as to the practicality of preventing the diversion of Laetrile from "terminal" patients, if approved for such patients, to others who might be helped by legitimate therapy: "Absent the kinds of controls available under the CSA—and indeed even with such controls—it is my opinion that a drug such as Laetrile could not effectively be restricted to a class of terminally ill cancer patients. For example, absent a quota on production, manufacturers would not be limited to producing an amount of Laetrile sufficient only to provide a source of supply for terminally ill cancer patients. Manufacturers would not be restricted in the channels in which they could permissibly distribute thn drug. They would not be required to report transactions in Laetrile. The amount of Laetrile which could be imported into this country would be unlimited.

"Given such unrestricted and unfettered availability of Laetrile, it is my opinion that there would be no practical way of limiting access to the drug to terminally ill cancer patients only. It is completely unrealistic to suggest that any other result would occur" (id. at ¶ 18–19).

The Commissioner concludes that approval of Laetrile restricted to "terminal" patients would lead to needless deaths and suffering among (1) patients characterized as "terminal" who could actually be helped by legitimate therapy and (2) patients clearly susceptible to the benefits of legitimate therapy who would bn misled as to Laetriles' utility by the limited approval program or who would be able to obtain the drug through the inevitable leakage in any system set up to administer such a program.

F. USE CONCURRENTLY WITH OTHER THERAPY

Some persons not familiar with the problem of drug interactions have suggested that Laetrile might be approved for use concurrently with legitimate cancer therapy. This theory would logically extend to allow any worthless drug to be used as long as effective therapy was also utilized. Such a limited use program would, of course, involve the problems of administration discussed in the previous section. Particularly in light of the Laetrile proponents' practice of dissuading patients from what they characterize as the "cut, burn, and poison" techniques of legitimate therapy, any seeming government sanction of Laetrile would inevitably involve encouragement of use of "painless" Laetrile therapy alone and thus would result in needless suffering and loss of life (cf. R 191 at ¶ 17).

More important, it simply has not been shown by any sound scientific evidence that the administration of Laetrile along with other therapy may not either make such therapy more dangerous or interfere with its effects. Dr. James F. Holland states (R 396 at 2), "That Laetrile is inert as an anticancer drug does not mean it may not interfere with the metabolism of and compromise the effects from known anticancer treatments. This would require years of study to elucidate, and it is not a worthwhile undertaking since Laetrile itself has no anticancer activity. One does not seek further information on why not to use Laetrile. If there is no good reason to do something, the best reason exists not to do it" (emphasis in original). Thus, the same reasons that justify the law's ban on use of drugs not shown to be effective form an equally strong basis for

the ban on that use where the use will be concurrent with other therapy.

VI. Conclusions

The Commissioner, after careful review of the administrative record amassed in this rule making proceeding, makes the following conclusions:

(1) Although the terms "Laetrile," "laetrile," "amygdalin," "Sarcarcinase," "vitamin B–17," and "nitriloside" have been used interchangebly, the chemical identity of the substances to which these terms refer has varied over the years. The identity of material referred to or called by any of those names is often not known. All too frequently terms have been used haphazardly or imprecisely by proponents, as well as opponents, of Laetrile:

"Laetrile," as described by Ernst T. Krebs, Jr., is: 1-mandelonitrile-*beta*-glucuronic acid.

"Amygdalin" is: D-mandelonitrile-*beta*-D-glucosido-6-*beta*-D-glucoside.

"Sarcarcinase" is the name given by Dr. E. T. Krebs, Sr., to a mixture of 6, possibly more, enzymes extracted from apricot pits.

(2) Neither Laetrile nor any other drug called by the various terms mentioned above nor any other product which might be characterized as a "nitriloside" is generally recognized by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs to be safe and effective for any therapeutic use.

(3) Animal studies conducted to date show that Laetrile has no anticancer activity in laboratory animals. Even if such activity were shown, the data would not be relevant to the issue of whether Laetrile is generally recognized by qualified experts as a safe and effective anticancer drug in humans.

(4) Neither Laetrile, amygdalin, nor any other drug called by the various terms set out in conclusion (1) is exempted from the "new drug" definitions of the act (21 U.S.C. 321(p)) by virtue of compliance with either the "1938 grandfather clause" (21 U.S.C. 321(p)(1)) or the "1962 grandfather clause" (section 107(c)(4) of Pub. L. 87–781).

(5) The history and promotion of Laetrile are characteristic of other unproven cancer remedies. Laetrile's popular acceptance by laymen lies not in credible proof of its effectiveness, but rather in the fears of orthodox medical treatment and the false hope, fostered by Laetrile's proponents, that suffering and eventual death can be avoided through Laetrile.

(6) Laetrile is not in general use as cancer therapy anywhere in the world.

(7) There is no evidence that "Vitamin B–17" is generally recognized among experts in the field of nutrition or nutrition research as a vitamin. Even if there were such recognition, "Vitamin B–17" would still be subject to regulation as a drug under the Federal Food, Drug, and Cosmetic Act because of the claims made for its use in cancer therapy.

(8) The safety of ingesting amygdalin, Laetrile and/or apricot or peach kernels or pits has not been established. There is, in fact, evidence of frank toxicity from ingestion of the kernels or pits.

(9) There is no basis in law or in fact for the use of Laetrile or related substances in the treatment of cancer.

The foregoing opinion in its entirety constitutes the Commissioner's findings of facts and conclusion of law. Distribution of Laetrile, amygdalin, or any other substance called by the various terms set out in conclusion (1) in interstate commerce is in violation of the Federal Food, Drug, and Cosmetic Act and subject to regulatory action.

Dated: July 29, 1977.

Donald Kennedy,
Commissioner of Food and Drugs.

PART III

DEPARTMENT OF JUSTICE

PAROLE, RELEASE, SUPERVISION AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS, AND JUVENILE DELINQUENTS

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

PART 2—PAROLE, RELEASE, SUPERVISION AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS, AND JUVENILE DELINQUENTS

Paroling, Recommitting and Supervising Federal Prisoners

AGENCY: The United States Parole Commission, Justice.

ACTION: Final rules.

SUMMARY: The Parole Commission has adopted a procedure whereby federal prisoners will be notified of their ultimate release dates at the outset of their terms of imprisonment. This procedure is necessary to reduce the degree of uncertainty with which federal prisoners presently serve their sentences of imprisonment. The purpose of the procedure is to achieve a significant degree of certainty while not foregoing the advantageous features of the parole system.

EFFECTIVE DATE: September 6, 1977, for all prisoners sentenced on that date or thereafter. For prisoners sentenced prior to September 6, 1977, the substantive provisions of the amended rules (setting presumptive release dates) will apply at the next scheduled in-person hearing (initial, review, rescission, or revocation).

FOR FURTHER INFORMATION CONTACT:

Michael A. Stover, Office of the General Counsel, United States Parole Commission, 320 First Street, NW., Washington, D.C. 20537, telephone 202-724-3092.

SUPPLEMENTARY INFORMATION:

(A) The Proposal and Its Purpose

On June 10, 1977, the United States Parole Commission published a proposal whereby Federal prisoners would be notified of their ultimate release dates at the outset of their terms of imprisonment (42 FR 29934). The purpose of this proposal, which is now adopted as a final rule, was to achieve a substantial reduction of indeterminacy in Federal prison sentences (i.e. increasing certainty on the part of the prisoner as to what his total incarceration will be), without foregoing the significant advantages of the present federal parole system. Among the advantages offered by the federal parole system are: (1) Release decision-making by a small, independent, collegial body of correctional experts adhering to a national parole policy (promoting reduction of unwarranted disparity in punishments); and (2) the ability to account for intervening factors not foreseeable at the time of sentencing, through systematic review of each prisoner's case (promoting fairness to the individual and avoiding excessive use of confinement).

(B) Public Comment

The proposal prompted numerous letters from the public, among which were letters from prisoners, families of prisoners, corrections officials, probation officers, one legislator, and one prison ministry organization. The majority of these letters endorsed the proposal because of the certainty it would bring to prisoners and to those awaiting a prisoner's return to society, thus increasing the stability of the prisoner's community support.

Corrections officials also favored the proposal. Chairman Ira Blalock of the Oregon State Parole Board wrote that a similar system adopted in Oregon has been administratively successful and generally beneficial. Chairman Blalock also pointed out that the proposal was consistent with the recommendations of criminologists and of the American Bar Association's Draft Standards Relating to the Legal Status of Prisoners (American Criminal Law Review, January 1977). Assistant Director Roy Gerard of the Federal Bureau of Prisons wrote that the new system will make prison management easier and more efficient, inmates will be better informed and less anxious, and the processing of parole procedures will be improved.

Finally, Representative Robert W. Kastenmeier, Chairman of the House Subcommittee on the Courts, Civil Liberties, and the Administration of Justice, and a key architect of the Parole Commission and Reorganization Act of 1976, wrote:

> I whole-heartedly endorse such a new rule. I believe it is entirely consistent with the intent of Congress that federal prisoners be provided with clear, consistent parole policies which will permit them to know at an early date when they can expect release.

This comment shared the position taken by the 1977 Report of the Senate Subcommittee on National Penitentiaries:

> First, the subcommittee must see that the Parole Commission continues to administer the guidelines system in a way that is consistent with the intention that indeterminancy be reduced to the extent consistent with the law.
>
> The legislation attempted to provide inmates with knowledge of their parole status, so that the typical inmate would know the prospective time of his release, plan for this, and not make release plans when he has no hope of early release. The legislation attempts to achieve this without creating procedural requirements that would be the basis for extensive and continuous litigation. At present, prospective parole information is not being given to all the prison population, and this would be of future concern to the Subcommittee. [at page 2 of the Report]

The most common criticism of the proposal from prisoners was its distinction between sentences of less than seven years and sentences of seven years or more. The effects of this demarcation are that: (1) A prisoner with a sentence of seven years or more and a minimum term of imprisonment must await the completion of his minimum term before receiving his initial hearing, whereas all prisoners with sentences of less than seven years receive an initial hearing at the outset of incarceration; and (2) in all of the longer sentences, a presumptive release date cannot be set if it would result in a date more than four years from the date of the initial hearing.

The seven-year mark as a divider between short and long sentences for the purpose of setting a prisoner's entitlement to hearings is a figure already selected by Congress at 18 U.S.C. 4208(h). That section uses the seven-year mark to distinguish between those sentences in which interim hearings are required every eighteen months and those sentences (of seven years or more) in which interim hearings are required every twenty-four months. Moreover, the Commission decided that, for its present administrative purposes, a four-year effective limit on the setting of presumptive release dates is a practical restriction, as well as one which coincides with the statutory scheme. Whether the limit may be expanded in the future is a question which the Commission reserves for further deliberation.

Other comments urged that the Commission adopt a similar policy with regard to federal parolees serving new federal sentences for crimes committed while on parole, by informing such prisoners at the outset of the total combined length of the new confinement and the consecutive parole violator term (the remaining time on the original sentence). This proposal raises substantial questions beyond the scope of the present rule-making (for example, the problem of federal parolees serving new state sentences, in whose situations the Commission could not set a combined release date). However, the proposal will be taken under study.

One comment suggested that the Commission's plan contained an inherent paradox, stating that "* * * if the purpose of parole is to determine the extent of rehabilitation and fitness for return to society, how can the [Commission] make such determinations without a longer period of incarceration?" The point this writer missed is that, in the federal system, seriousness of the offense and likelihood of favorable parole outcome are the principal standards by which parole decisions are made. (See 18 U.S.C. 4206). A prisoner's release date is not tied to the outward indicia of his rehabilitative efforts.

(C) Changes From the Proposal

The proposal was adopted substantially as set forth in the Federal Register of June 10, 1977, with one exception. The five-year limit on presumptive release dates in the case of sentences of seven years or more was reduced to four years, in order to coincide with the occurrence of the second interim (statutory) review hearing at forty-eight months from the initial hearing. Thus, in a case in which no presumptive release date was set at the initial hearing, the second interim review hearing would be conducted as a four-year reconsideration hearing pursuant to §§ 2.12(c)(2) and 2.14(c).

The amended rules also make clear that the formal rescission procedures of § 2.34 apply to presumptive parole dates, a point not covered in the proposal. This is consistent with the Commission's statement that the intent of the proposal is that release will normally be granted at the presumptive date (42 FR 29934). By the same token, the amended rules also contain a clear statement that once set, a presumptive release date shall not be advanced except under clearly exceptional circumstances.

(D) Summary of the Principal Amendments

Adoption of this proposal required numerous conforming amendments, in addition to the substantive changes. For the convenience of the reader, the Commission's rules (together with changes effected by accompanying documents) are republished in their entirety. A summary of the principal amendments covered by this document follows.

In § 2.1, the term effective date of parole is defined to distinguish that term from the term presumptive parole date. An effective date of parole is a parole date that has been approved following an in-person hearing held within six months of such date, or following a pre-release record review. Thus, a presumptive parole date become an effective date of parole when approved following a pre-release record review, or when approved following an interim hearing which is held within six months of the presumptive parole date. However, the term effective date of parole also includes the familiar grant of parole with a few months delay for the development of a release plan. The term presumptive release date encompasses both presumptive release by parole (a presumptive parole date), as well as presumptive release through the accumulation of good time (mandatory release pursuant to 18 U.S.C. 4163 and 4164).

In § 2.12, the principal features of the proposal (the holding of early initial hearings and the setting of presumptive release dates) are codified. The reader should not fail to note that the setting of presumptive release dates (either by parole or by mandatory release) will be pursuant to the Commission's guidelines at § 2.20 (including decisions above or below the guideline ranges).

In § 2.13, a number of provisions relating to the conduct of the initial hearing as restructured. The only substantive change is the requirement that if a release date is set in excess of six months from the date of the hearing, reasons must be given as in the case of a parole denial.

In § 2.14, the three types of proceedings subsequent to the initial hearing are fully described: Interim hearings pursuant to 18 U.S.C. 4208(h); pre-release reviews; and four-year reconsideration hearings. It is important to note that under no circumstances will a prisoner go without the periodic reviews to which he is entitled by section 4208(h).

In § 2.29, the terms of an effective date of parole are set forth. (The good conduct condition is omitted since it is already contained in § 2.34.)

In § 2.34, the amendment at paragraph (a)(3) permits the Commission to defer consideration of disciplinary infractions until the commencement of the next interim hearing or the pre-release review required by § 21.4(b). Since, as a practical policy, the Commission considers only those disciplinary infractions that have been the subject of formal findings following an Institutional Disciplinary Committee hearing, a delay until the next scheduled review will not operate to the prisoner's disadvantage (through loss of evidence, etc.).

(E) Effective Date

These amended rules will become effective as follows: (1) In the case of prisoners sentenced on September 6, 1977, or thereafter (including prisoners with one or more multiple sentences imposed on September 6, 1977, or thereafter), all provisions of the amended rules shall apply from the initial hearing onward;

(1) In the case of prisoners sentenced prior to September 6, 1977, the amended rules will apply, excepting the provisions of § 2.12(a), at the first regularly scheduled in-person hearing that is held on September 6, 1977, or thereafter. Thus, following the first hearing (initial, review, rescission, or revocation hearing) that is held on September 6, 1977, or thereafter, each prisoner sentenced prior to September 6, 1977, will be notified of a presumptive release date according to the procedures of § 2.12 (c), (d), and (e), and related provisions.

(F) Further Consideration of These Amended Rules

The Commission intends to evaluate the first four months of the operation of these rules at its meeting in January, 1978. Therefore, public comment by interested persons will continue to be welcome and will be considered at that time.

(G) Conclusion

Accordingly, pursuant to the provisions of 18 U.S.C. 4203(a)(1) and 4204(a)(6), 28 CFR Chapter I, Part 2, is amended as set forth below to become effective in the manner described above.

Dated: August 2, 1977.

CURTIS C. CRAWFORD,
Acting Chairman,
Parole Commission.

2.34 Rescission of parole.
2.35 Mandatory release in the absence of parole.
2.36 Same: youth offenders.
2.37 Reports to police departments of names of parolees; statement of policy.
2.38 Community supervision by United States Probation Officers.
2.39 Jurisdiction of the Commission.
2.40 Conditions of release.
2.41 Travel by parolees and mandatory releases.
2.42 Probation Officer's Reports to Commissions.
2.43 Early termination of parole.
2.44 Summons to appear or warrant for retaking of parolee.
2.45 Same; youth offenders.
2.46 Execution of warrant and service of summons.
2.47 Warrant placed as a detainer and dispositional review.
2.48 Revocation by the Commission: preliminary interview.
2.49 Place of revocation hearing.
2.50 Revocation hearing procedure.
2.51 Issuance of subpoena for the appearance of witnesses or production of documents.
2.52 Revocation of parole or mandatory release.
2.53 Mandatory parole.
2.54 Reviews pursuant to 18 U.S.C. §§ 4203 4215.
2.55 Disclosure of records.
2.56 Special parole terms.
2.57 Prior orders.
2.58 Absence of hearing examiner.
2.59 Appointment of Committees.

AUTHORITY: 28 CFR Chapter 1, Part O Subpart I, and (18 U.S.C. 3655, 4164, 4201-4218, 4254-5, and 5005-5041).

§ 2.1 Definitions.

As used in this part:

(a) The term "Commission" refers to the United States Parole Commission.

(b) The term "Commissioner" refers to members of the United States Parole Commission.

(c) The term "National Appeals Board" refers to the Vice Chairman of the Commission and two other National Commissioners who are assigned in the headquarters office of the Commission in Washington, D.C. The Vice Chairman shall be the Chairman of the National Appeals Board. In the absence or vacancy of the Vice Chairman the Chairman of the Commission functions as the Chairman of the National Appeals Board. In the absence or vacancy of a member the Chairman of the Commission functions as a member of the National Appeals Board.

(d) The term "National Commissioners" refers to the Chairman of the Commission and the three members of the National Appeals Board. The Vice Chairman of the Commission shall be the Chairman of the National Commissioners. In the absence or vacancy of the Vice Chairman, the Chairman of the Commission shall be Chairman of the National Commissioners.

(e) The term "Regional Commissioner" refers to Commissioners assigned to the Commission's regional offices.

(f) The term "eligible prisoner" refers to any Federal prisoner eligible for parole pursuant to this Part and includes any Federal prisoner whose parole has been revoked and who is not otherwise ineligible for parole.

(g) The term "parolee" refers to any Federal prisoner released on parole or as if on parole pursuant to 18 U.S.C. 4164 or 4205(f). The term "mandatory release" refers to release pursuant to 18 U.S.C. 4163 and 4164.

(h) The term "effective date of parole" refers to a parole date that has been approved following an in-person hearing held within six months of such date, or following a pre-release record review.

(i) All other terms used in this part shall be deemed to have the same meaning as identical or comparable terms as used in Chapter 311 of Part IV of Title 18 of the United States Code or Chapter I, Part O, Subpart V of Title 28 of the Code of Federal Regulations.

§ 2.2 Eligibility for parole: adult sentences.

(a) Unless otherwise provided by statute, a Federal prisoner confined and serving a maximum term or terms of more than one year may not be released on parole prior to completion of one-third of such term or terms, or prior to completion of ten years of a life sentence or of a sentence of over thirty years (18 U.S.C. 4205(a)).

(b) If the court has designated a minimum term (which may be less than but not more than one-third of the maximum sentence imposed), a Federal prisoner serving a maximum term of more than one year may not be released on parole prior to completion of the court-designated minimum term (18 U.S.C. 4205(b)(1)).

(c) In cases in which the court designates only a maximum term and specifies that the Commission may release on parole at any time, the prisoner may be released on parole in the discretion of the Commission (18 U.S.C. 4205(b)(2)).

(d) A Federal prisoner sentenced to a maximum term or terms of at least six months but not more than one year prior to May 14, 1976 is eligible for parole consideration after service of one-third of such term or terms.

(e) A Federal prisoner sentenced under 18 U.S.C. 924(a) or 26 U.S.C. 5871 for violation of Federal gun control laws is eligible for parole consideration as if sentenced under 18 U.S.C. 4205(b)(2).

(f) A Federal prisoner committed under 18 U.S.C. 3651 for a period of six months or less with a period of probation to follow is not eligible for parole.

§ 2.3 Same: Narcotic Addict Rehabilitation Act.

A Federal prisoner committed under the Narcotic Addict Rehabilitation Act may not be released on parole prior to completion of at least six months in treatment, not including any period of time for "study" prior to final judgment of the court. Before parole is ordered by the Commission, the Surgeon General or his designated representative must certify that the prisoner has made sufficient progress to warrant his release and the Attorney General or his designated representative must also report to the Commission whether the prisoner should be released. Recertification by the Surgeon General prior to reparole consideration is required (18 U.S.C. 4254).

§ 2.4 Same: juvenile delinquents.

A committed juvenile delinquent may be released on parole at any time in the discretion of the Commission (18 U.S.C. 5041).

§ 2.5 Same: youth offenders.

A committeed youth offender may be released on parole at any time in the discretion of the Commission (18 U.S.C. 5017(a)).

§ 2.6 Withheld and forfeited good time.

(a) While neither a forfeiture of good time nor a withholding of good time shall bar a prisoner from receiving a parole hearing, § 4206 of Title 18 of the United States Code permits the Commission to parole only those prisoners who have substantially observed the rules of the institution.

(b) Forfeiture of statutory good time not restored shall be deemed, in itself to indicate that the prisoner has violated the rules of the institution to a serious degree.

§ 2.7 Committed fines.

In any case in which a prisoner shall have had a fine imposed upon him by the committing court for which he is to stand committed until it is paid or until he is otherwise discharged according to law, such prisoner shall not be released on parole or mandatory release until payment of the fine, or until the fine commitment order is discharged according to law as follows:

(a) An indigent prisoner may make application to a U.S. Magistrate in the District wherein he is incarcerated or to the chief executive officer of the institution setting forth, under the institutional regulations, his inability to pay such fine; if the magistrate or chief executive officer shall find that the prisoner, having no assets exceeding $20 in value except such as are by law exempt from being taken on execution for debt, is unable to pay the fine, and if the prisoner takes a prescribed oath of indigency, he shall be discharged from the commitment obligation of the committed fine sentence.

(b) If the prisoner is found to possess assets in excess of the exemption in paragraph (a) of this section, nevertheless if the chief executive officer of the institution or U.S. Magistrate shall find that retention of all such assets is reasonably necessary for his support or that of his family, upon taking of the prescribed oath concerning his assets the prisoner shall be discharged from the commitment obligation of the committed fine sentence. If the chief executive officer of the institution or U.S. Magistrate shall find that retention by the prisoner of any part of his assets is reasonably necessary for his support or that of his family, the prisoner upon taking of the prescribed oath concerning his assets, shall be discharged from the commitment obligation of the committed fine sentence upon payment on account of his fine or that portion of his assets in excess of the amount found to be reasonably necessary for his support or that of his family.

(c) Discharge from the commitment obligation of any committed fine does not discharge the prisoner's obligation to pay the fine as a debt due the United States.

§ 2.8 Mental competency proceedings.

(a) Whenever a prisoner or parolee is scheduled for a hearing in accordance with the provisions of this part and reasonable doubt exists as to his mental competency, i.e., his ability to understand the nature of and participate in scheduled proceedings, a preliminary hearing to determine his mental competency shall be conducted by a panel of hearing examiners or other official(s) (including a U.S. Probation Officer) designated by the Commission.

(b) At the competency hearing, the hearing examiners or designated official(s) shall receive oral or written psychiatric or psychological testimony and other evidence that may be available. A preliminary determination of the prisoner's mental competency shall be made upon the testimony, evidence, and personal observation of the prisoner. If the examiner panel or designated official(s) determines that the prisoner is mentally competent, the previously scheduled hearing shall be held. If they determine that the prisoner is not mentally competent, the previously scheduled hearing shall be temporarily postponed.

(c) Whenever the hearing examiners or designated official(s) determine that a person is incompetent and postpone the previously scheduled hearing, they shall forward the record of the preliminary hearing with their findings to the Regional Commissioner for review. If the Regional Commissioner concurs with their findings, he shall order the temporarily postponed hearing to be postponed indefinitely until such time as it is determined that the prisoner or parolee has recovered sufficiently to understand the nature of and participate in the proceedings and, in the case of a parolee, may order such parolee transferred to a Bureau of Prison's facility for further examination. In any such case, the Regional Commissioner shall require a progress report on the mental health of the prisoner at least every six months. When the Regional Commissioner determines that the prisoner has recovered sufficiently, he shall reschedule the hearing for the earliest feasible date.

(d) If the Regional Commissioner disagrees with the findings of the hearing examiners or designated official(s) as to the mental competency of the prisoner, he shall take such action as he deems appropriate.

§ 2.9 Study prior to sentencing.

(a) When an adult Federal offender has been committed to an institution by the sentencing court for observation and study prior to sentencing, under the provisions of 18 U.S.C. 4205(c), the report to the sentencing court is prepared and submitted directly by the United States Bureau of Prisons.

(b) The court may order a youth to be committed to the custody of the Attorney General for observation and study at an appropriate classification center or agency. Within sixty days from the date of the order, or such additional period as the court may grant, the Commission shall report its findings to the court (18 U.S.C. 5010(e)).

§ 2.10 Date service of sentence commences.

(a) Service of a sentence of imprisonment commences to run on the date on which the person is received at the penitentiary, reformatory, or jail for service of the sentence: *Provided, however,* That any such person shall be allowed credit toward the service of his sentence for any days spent in custody in connection with the offense or acts for which sentence was imposed.

(b) The imposition of a sentence of imprisonment for civil contempt shall interrupt the running of any sentence of imprisonment being served at the time the sentence of civil contempt is imposed, and the sentence or sentences so interrupted shall not commence to run again until the sentence of civil contempt is lifted.

(c) Service of the sentence of a committed youth offender or a person committed under the Narcotic Addict Rehabilitation Act commences to run from the date of conviction and is interrupted only when such prisoner or parolee (1) is on bail pending appeal; (2) is in escape status; (3) has absconded from his or her district of supervision; or (4) comes within the provisions of subsection (b) of this section.

§ 2.11 Application for parole; notice of hearing.

(a) A federal prisoner (including a committed youth offender or prisoner sentenced under the Narcotic Addict Rehabilitation Act) desiring to apply for parole shall execute an application form as prescribed by the Commission. Such forms shall be available at each federal institution and shall be provided to each prisoner who is eligible for an initial parole hearing pursuant to § 2.12. Prisoners committed under the Federal Juvenile Delinquency Act shall be considered for parole without application and may not waive parole consideration. A prisoner who receives an initial hearing need not apply for subsequent hearings.

(b) A prisoner may knowingly and intelligently waive any parole consideration on a form provided for that purpose. If a prisoner waives parole consideration, he may later apply for parole and may be heard during the next visit of the Commission to the institution at which he is confined, provided that he has applied at least 45 days prior to the first day of the month in which such visit of the Commission occurs.

(c) A prisoner who fails to submit either an application for parole or a waiver form shall be referred to the Commission's representatives by the chief executive officer of the institution. The prisoner shall then receive an explanation of his right to apply for parole at a later date.

(d) In addition to the above procedures relating to parole application, all prisoners prior to initial hearing shall be provided with an inmate background statement by the Bureau of Prisons for completion by the prisoner.

(e) At least thirty days prior to the initial hearing (and prior to any hearing conducted pursuant to § 2.14), the prisoner shall be provided with written notice of the time and place of the hearing and of his right to review the documents to be considered by the Commission, as provided by § 2.55. A prisoner may waive such notice, except that if such notice is not waived, the case shall be continued to the time of the next regularly scheduled proceeding of the Commission at the institution in which the prisoner is confined.

§ 2.12 Initial hearings: Setting presumptive release dates.

(a) An initial hearing shall be conducted within 120 days of a prisoner's arrival at a federal institution, or as soon thereafter as practicable, in the following cases:

(1) A prisoner with no minimum term of imprisonment; and

(2) A prisoner with a minimum term of imprisonment and a maximum term or terms of less than seven years.

(b) In the case of a prisoner with a minimum term of imprisonment and a maximum term or terms of seven years or more, an initial hearing shall be conducted at least thirty days prior to the completion of the minimum term of imprisonment, or as soon thereafter as practicable.

(c) Following initial hearing: (1) The Commission shall set a presumptive release date (either by parole or by mandatory release), or set an effective date of parole, in the case of every prisoner with a maximum term or terms of less than seven years.

(2) In the case of a prisoner with a maximum term or terms of seven years or more, the Commission shall either set a presumptive release date, if such date falls within four years of the initial hearing, or continue the prisoner to a four-year reconsideration hearing pursuant to § 2.14(c), or set an effective date of parole.

(d) Notwithstanding the above paragraph, a prisoner may not be paroled earlier than the completion of any judicially set minimum term of imprisonment or other period of parole ineligibility fixed by law.

(e) A presumptive parole date shall be contingent upon a continued record of good conduct and the establishment of a suitable release plan, and shall be subject to the provisions of §§ 2.14 and 2.34. In the case of a prisoner sentenced under the Narcotic Addict Rehabilitation Act, 18 U.S.C. 4254, a presumptive parole date shall also be contingent upon certification by the Surgeon General pursuant to § 2.3 of these rules.

§ 2.13 Initial hearing: procedure.

(a) An initial hearing shall be conducted by a panel of two hearing examiners. The examiners shall discuss with the prisoner his offense severity rating and salient factor score as described in § 2.20, his institutional conduct and, in addition, any other matter the panel may deem relevant.

(b) A prisoner may be represented at a hearing by a person of his choice. The function of the prisoner's representative shall be to offer a statement at the conclusions of the interview of the prisoner by the examiner panel, and to provide such additional information as the examiner panel shall request. Interested parties who oppose parole may select a representative to appear and offer a statement. The presiding hearing examiner shall limit or exclude any irrelevant or repetitious statement.

(c) At the conclusion of the hearing, the panel shall orally inform the prisoner of its recommendation and, if such recommendation is for denial, of the reasons therefor. Written notice of the official decision, or the decision to refer under § 2.17 or § 2.24, shall be mailed or transmitted to the prisoner within 21 days of the date of the hearing, except in emergencies. If parole is denied, or a release date is set in excess of six

months from the date of the hearing, the prisoner shall also receive in writing the reasons therefor.

(d) In accordance with 18 U.S.C. 4206, reasons for parole denial may include the following, with further specification as appropriate:

(1) The prisoner has not substantially observed the rules of the institution or institutions in which confined;

(2) Release, in the opinion of the Commission, would depreciate the seriousness of the offense or promote disrespect for the law; or

(3) Release, in the opinion of the Commission, would jeopardize the public welfare.

In lieu of, or in combination with, the above reasons the prisoner shall be furnished with a guidelines evaluation statement containing his offense severity rating and salient factor score (including the points credited on each item of such score) as described in § 2.20, as well as the specific factors and information relied upon for any decision to continue such prisoner for a period outside the range indicated by the guidelines.

(e) No interviews with the Commission or any representative thereof, shall be granted to a prisoner unless his name is docketed for a hearing in accordance with Commission procedures. Hearings shall not be open to the public.

(f) A full and complete record of every hearing shall be retained by the Commission. Upon a request, pursuant to § 2.55, the Commission shall make available to any eligible prisoner such record as the Commission has retained of the hearing.

§ 2.14 Subsequent proceedings.

(a) *Interim proceedings.* The purpose of an interim proceeding required by 18 U.S.C. 4208(h) shall be to consider any significant developments or changes in the prisoner's status that may have occurred subsequent to the initial hearing.

(1) Notwithstanding a previously ordered presumptive release date or four-year reconsideration hearing, interim hearings shall be conducted by an examiner panel pursuant to the procedures of § 2.13 (b), (c), (e), and (f) at the following intervals from the date of the last hearing:

(i) In the case of a prisoner with a maximum term or terms of less than seven years, every eighteen months (until released).

(ii) In the case of a prisoner with a maximum term or terms of seven years or more, every twenty-four months (until released).

(2) However, in the case of a prisoner with an unsatisfied minimum term, the first interim hearing shall be deferred until the docket of hearings immediately preceding completion of the minimum term.

(3) Following an interim hearing, the Commission may:

(i) Order no change in the previous decision;

(ii) Advance a presumptive release date, or the date of a four-year reconsideration hearing. However, it shall be the policy of the Commission that once set, a presumptive release date or the date of a four-year reconsideration hearing shall not be advanced except under clearly exceptional circumstances;

(iii) Retard or rescind a presumptive parole date for reason of disciplinary infractions. In a case in which disciplinary infractions have occurred, the interim hearing shall be conducted in accordance with the procedures of § 2.34(a).

(b) *Pre-release reviews.* The purpose of a pre-release review shall be to determine whether the conditions of a presumptive release date by parole have been satisfied.

(1) At least sixty days prior to a presumptive parole dates, an examiner panel shall review the case on the record, including a current institutional progress report.

(2) Following review and recommendation, the Regional Commissioner may:

(i) Approve the parole date;

(ii) Advance or retard the parole date as provided by § 2.29(c);

(iii) Retard the parole date or commerce rescission proceedings as provided by § 2.34.

(3) A pre-release review pursuant to this section shall not be required if an in-person hearing has been held within six months of the parole date.

(c) *Four-year reconsideration hearings.* A four-year reconsideration hearing shall be a full reassessment of the case pursuant to the procedures of § 2.13 to determine whether the setting of a presumptive release date would be appropriate at that time.

(1) A four-year reconsideration hearing shall be ordered following initial hearing in any case in which a release date is not set.

(2) Following a four-year reconsideration hearing, the Commission may:

(i) Set a presumptive release date, if such date falls within four years of the hearing; or

(ii) Continue the prisoner to a further four-year reconsideration hearing if no presumptive release date is set.

§ 2.15 Petition for consideration of parole prior to date set at hearing.

When a prisoner has served the minimum term of imprisonment required by law, the Bureau of Prisons may petition the responsible Regional Commissioner for reopening the case under § 2.28 and consideration for parole prior to the date set by the Commission at the initial or review hearing. The petition must show cause why it should be granted, i.e., an emergency, hardship, or the existence of other extraordinary circumstances that would warrant consideration of early parole.

§ 2.16 Parole of prisoner in state, local, or territorial institution.

(a) Any person who is serving a sentence of imprisonment for any offense against the United States, but who is confined therefor in a state reformatory or other state or territorial institution, shall be eligible for parole by the Commission on the same terms and conditions, by the same authority, and subject to recommittal for the violation of such parole, as though he were confined in a Federal penitentiary, reformatory, or other correctional institution.

(b) Federal prisoners serving concurrent state and Federal sentences in state, local, or territorial institutions shall be furnished upon request parole application forms. Upon receipt of the application and any supplementary classification material submitted by the institution, parole consideration shall be made by an examiner panel of the appropriate region on the record only. If such prisoner is released from his state sentence prior to a Federal grant of parole, he shall be given a personal hearing as soon as feasible after receipt at a Federal institution.

(c) Prisoners who are serving Federal sentences exclusively but who are being boarded in state, local or territorial institutions may be provided hearings at such facilities or may be transferred by the Bureau of Prisons to Federal Institutions for hearings by examiner panels of the Commission.

§ 2.17 Original jurisdiction cases.

(a) A Regional Commissioner may designate certain cases for decision by a quorum of Commissioners as described below, as original jurisdiction cases. In such instances, he shall forward the case with his vote, and any additional comments he may deem germane, to the National Commissioners for decision. Decisions shall be based upon the concurrence of three votes with the appropriate Regional Commissioner and each National Commissioner having one vote. Additional votes, if required, shall be cast by the other Regional Commissioners on a rotating basis as established by the Chairman of the Commission.

(b) The following criteria will be used in designating cases as original jurisdiction cases:

(1) Prisoners who have committed serious crimes against the security of the Nation, e.g., espionage or aggravated subversive activity.

(2) Prisoners whose offense behavior: (i) Involved an unusual degree of sophistication or planning or (ii) Was part of a large scale criminal conspiracy of a continuing criminal enterprise.

(3) Prisoners who have received national or unusual attention because of the nature of the crime, arrest, trial, or prisoner status, or because of the community status of the offender or his victim.

(4) *Long-term sentences.* Prisoners sentenced to a maximum term of forty-five years (or more) or prisoners serving life sentences.

(c) (1) Any case designated for the original jurisdiction of the Commission shall remain an original jurisdiction case unless designation is removed pursuant to this subsection.

(2) A case found to be inappropriately designated for the Commission's original jurisdiction, or to no longer warrant such designation, may be removed from original jurisdiction under the procedures specified in paragraph (a) of this section following a regularly scheduled hearing or the reopening of the case pursuant to § 2.28. Removal from original jurisdiction may also occur by majority vote of the Commission considering an appeal pursuant to § 2.27. Where the circumstances warrant, a case may be redesignated as original jurisdiction pursuant to the provisions of paragraphs (a) and (b) of this section.

§ 2.18 Granting of parole.

The granting of parole to an eligible prisoner rests in the discretion of the United States Parole Commission. As prerequisites to a grant of parole, the Commission must determine that the prisoner has substantially observed the rules of the institution or institutions in which he has been confined; and upon consideration of the nature and circumstances of the offense and the history and characteristics of the prisoner, must determine that release would not depreciate the seriousness of his offense or promote disrespect for the law, and that release would not jeopardize the public welfare (i.e., that there is a reasonable probability that, if released, the prisoner would live and remain at liberty without violating the law or the conditions of his parole).

§ 2.19 Information considered.

(a) In making a determination under this chapter (relating to release on parole) the Commission shall consider, if available and relevant:

(1) Reports and recommendations which the staff of the facility in which such prisoner is confined may make;

(2) Official reports of the prisoner's prior criminal record, including a report or record of earlier probation and parole experiences;

(3) Presentence investigation reports;

(4) Recommendations regarding the prisoner's parole made at the time of sentencing by the sentencing judge and prosecuting attorney; and

(5) Reports of physical, mental, or psychiatric examination of the offender.

(b) There shall also be taken into consideration such additional relevant information concerning the prisoner (including information submitted by the prisoner) as may be reasonably available (18 U.S.C. 4207). The Commission encourages the submission of relevant information concerning an eligible prisoner by interested persons.

§ 2.20 Paroling policy guidelines; statement of general policy.

(a) To establish a national paroling policy, promote a more consistent exercise of discretion, and enable fairer and more equitable decision-making without removing individual case consideration, the United States Parole Commission has adopted guidelines for parole release consideration.

(b) These guidelines indicate the customary range of time to be served before release for various combinations of offense (severity) and offender (parole prognosis) characteristics. The time ranges specified by the guidelines are established specifically for cases with good institutional adjustment and program progress.

(c) These time ranges are merely guidelines. Where the circumstances warrant, decisions outside of the guidelines (either above or below) may be rendered.

(d) The guidelines contain examples of offense behaviors for each severity level. However, especially mitigating or aggravating circumstances in a particular case may justify a decision or a severity rating different from that listed.

(e) An evaluation sheet containing a "salient factor score" serves as an aid in determining the parole prognosis (potential risk of parole violation). However, where circumstances warrant, clinical evaluation of risk may override this predictive aid.

(f) Guidelines for reparole consideration are set forth at § 2.21.

(g) The Commission shall review the guidelines, including the salient factor score, periodically and may revise or modify them at any time as deemed appropriate.

Guidelines for decision-making

[Customary total time to be served before release (including jail time)]

Offense characteristics—severity	Offender characteristics—parole prognosis (salient factor score) (months)			
	Very good (11 to 9)	Good (8 to 6)	Fair (5 to 4)	Poor (3 to 0)
Low				
Escape (unarmed); institution or penalty area (if voluntary return or apprehension within 6 hours, or if no force or threat of force was used, and no new criminal conviction for escape); release (absent) less than 7 d.				
Marijuana or soft drugs, simple possession (small quantity for own use)			1–14	
Property offenses (theft or possession of stolen property) less than $1,000				
Low moderate				
Alcohol law violations				
Counterfeit currency (passing, possession) less than $1,000				
Immigration Law violations				
Income tax evasion less than $10,000				
Property offenses (forgery, fraud, theft, embezzlement, interstate transportation of stolen or forged securities, receiving stolen property with intent to resell) less than $1,000			12–16	16–20
Selective Service Act violations				
Moderate				
Bribery of a public official or a witness				
Counterfeit currency (passing, possession) $1,000 to $14,999				
Drugs:				
Marijuana, possession with intent to distribute, sale (small scale, e.g., less than 50 lb)				
"Soft drugs", possession with intent to distribute/sale (less than $200)				
Escape (secure program or institution; or absent 7 d or more—no fear or threat used)	12–16	16–20	20–26	24–30
Firearms Act, possession/purchase/sale (single weapon not sawed-off shotgun or machine gun)				
Income tax evasion ($10,000 to $20,000)				
Making threatening communications				
Misprision of felony				
Property offenses (theft/forgery/fraud/embezzlement, interstate transportation of stolen or forged securities, receiving stolen property $1,000 to $14,999)				
Smuggling/transporting of aliens				
Theft of motor vehicle (not multiple theft or for resale)				
High				
Counterfeit currency (passing/possession $20,000 to $100,000)				
Counterfeiting (manufacturing)				
Drugs:				
Marijuana, possession with intent to distribute/sale (medium scale, e.g., 50 to 1,000 lb)				
"Soft drugs", possession with intent to distribute/sale ($500 to $5,000)	16–20	20–26	26–36	36–48
Explosives, possession/transportation				
Firearms Act, possession/purchase/sale (sawed-off shotgun(s), machine guns(s), or multiple weapons)				
Mann Act (no force—commercial purpose)				
Theft of motor vehicle for resale				
Property offenses (theft/forgery/fraud/embezzlement, interstate transportation of stolen or forged securities, receiving stolen property $5,000 to $20,000)				

Offense characteristics—severity of offense behavior (examples)	Offender characteristics—parole prognosis (salient factor score) (in months)			
	Very good (11 to 9)	Good (8 to 6)	Fair (5 to 4)	Poor (3 to 0)
Very high: Robbery (weapon or threat) Breaking and entering (bank or post office entry or attempted entry to vault). Drugs: Marihuana, possession with intent to distribute/sale (large scale (e.g., 2,000 lb or more)). "Soft drugs", possession with intent to distribute/sale (over $5,000). "Hard drugs", possession with intent to distribute/sale (not exceeding $100,000). Extortion Mann Act (force) Property offenses (theft/forgery/fraud/embezzlement/interstate transportation of stolen or forged securities/receiving stolen property) over $100,000 but not exceeding $500,000. Sexual act (force)	26-36	36-48	48-60	60-72
Greatest: Aggravated felony (e.g., robbery, sexual act, aggravated assault)—weapon fired or personal injury. Aircraft hijacking Drugs: "Hard drugs", possession with intent to distribute/sale (in excess of $100,000). Espionage Explosives (detonation) Kidnaping Willful homicide	Greater than above—however, specific ranges are not given due to the limited number of cases and the extreme variation in severity possible within the category.			
YOUTH/NARA				
Low: Escape (open institution or program (e.g., CTC, work release)—absent less than 7 d). Marihuana or soft drugs, simple possession (small quantity for own use). Property offenses (theft or simple possession of stolen property) less than $1,000.	6-10	8-12	10-14	12-18
Low moderate: Alcohol law violations Counterfeit currency (passing/possession less than $1,000). Immigration law violations Income tax evasion (less than $10,000). Property offenses (forgery/fraud/theft from mail/embezzlement/interstate transportation of stolen or forged securities/receiving stolen property with intent to resell) less than $1,000. Selective Service Act violations	8-12	12-16	16-20	20-26
Moderate: Bribery of a public official (offering or accepting) Counterfeit currency (passing possession $1,000 to $19,999). Drugs: Marihuana, possession with intent to distribute sale (small scale (e.g., less than 50 lb)). "Soft drugs," possession with intent to distribute sale (less than $500). Escape (secure program or institution, or absent 7 d or more—no fear or threat used). Firearms Act, possession/purchase/sale (single weapon: not sawed-off shotgun or machine gun). Income tax evasion ($10,000 to $50,000) Mailing threatening communication(s) Misprison of felony Property offenses (theft/forgery/fraud/embezzlement/interstate transportation of stolen or forged securities/receiving stolen property) $1,000 to $19,999. Smuggling/transporting of alien(s) Theft of motor vehicle (not multiple theft or for resale)	9-13	13-17	17-21	21-28
High: Counterfeit currency (passing/possession $20,000 to 100,000). Counterfeiting (manufacturing) Drugs: Marihuana, possession with intent to distribute/sale (medium scale (e.g., 50 to 1,999 lbs)). "Soft drugs", possession with intent to distribute/sale ($500 to $5,000). Explosives, possession/transportation Firearms Acts, possession/purchase/sale (sawed-off shotgun(s), machine gun(s), or multiple weapons). Mann Act (no force—commercial purposes) Theft of motor vehicle for resale Property offenses (theft/forgery/fraud/embezzlement/interstate transportation of stolen or forged securities/receiving stolen property) $20,000 to $100,000.	12-16	16-20	20-26	26-32
Very high: Robbery (weapon or threat) Breaking and entering (bank or post office entry or attempted entry to vault). Drugs: Marihuana, possession with intent to distribute/sale (large scale (e.g., 2,000 lbs or more)). "Soft drugs", possession with intent to distribute/sale (over $5,000). "Hard drugs", possession with intent to distribute/sale (not exceeding $100,000). Extortion Mann Act (force) Property offenses (theft/forgery/fraud/embezzlement/interstate transportation of stolen or forged securities/receiving stolen property) over $100,000 but not exceeding $500,000. Sexual act (force)	20-27	27-34	34-41	41-48

Offense characteristics—severity of offense behavior (examples)	Offender characteristics—parole prognosis (salient factor score) (in months)			
	Very good (11 to 9)	Good (8 to 6)	Fair (5 to 4)	Poor (3 to 0)
Greatest: Aggravated felony (e.g., robbery, sexual act, aggravated assault)—weapon fired or personal injury. Aircraft hijacking Drugs: "Hard drugs", possession with intent to distribute/sale (in excess of $100,000). Espionage Explosives (detonation) Kidnapping Willful homicide	Greater than above—however, specific ranges are not given due to the limited number of cases and the extreme variation in severity possible within the category.			

NOTES.—1. These guidelines are predicated upon good institutional conduct and program performance.

2. If an offense behavior is not listed above, the proper category may be obtained by comparing the severity of the offense behavior with those of similar offense behaviors listed.

3. If an offense behavior can be classified under more than 1 category, the most serious applicable category is to be used.

4. If an offense behavior involved multiple separate offenses, the severity level may be increased.

5. If a continuance is to be given, allow 30 d (1 mo) for release program provision.

6. "Hard drugs" include heroin, cocaine, morphine, or opiate derivatives, and synthetic opiate substitutes. "Soft drugs" include, but are not limited to, barbiturates, amphetamines, LSD, and hashish.

7. Conspiracy shall be rated for guideline purposes according to the underlying offense behavior if such behavior was consummated. If the offense is unconsummated, the conspiracy will be rated one step below the consummated offense.

SALIENT FACTOR SCORE

Case name ..... Register No. .....

Item A ..... ☐

No prior convictions (adult or juvenile)=3.
1 prior conviction=2.
2 or 3 prior convictions=1.
4 or more prior convictions=0.

Item B ..... ☐

No prior incarcerations (adult or juvenile)=2.
1 or 2 prior incarcerations=1.
3 or more prior incarcerations=0.

Item C ..... ☐

Age at first commitment (adult or juvenile):
26 or older=2.
18 to 25=1.
17 or younger=0.

Item D ..... ☐

Commitment offense did not involve auto theft or check(s) (forgery/larceny)=1.
Commitment offense involved auto theft or check(s)=0.

Item E ..... ☐

Never had parole revoked or been committed for a new offense while on parole, and not a probation violator this time=1.
Has had parole revoked or been committed for a new offense while on parole, or is a probation violator this time=0.

Item F ..... ☐

No history of heroin or opiate dependence=1.
Otherwise=0.

Item G ..... ☐

Verified employment (or full-time school attendance) for a total of at least 6 mo during the last 2 yr in the community=1.
Otherwise=0.

Total score ..... ☐

§ 2.21 Reparole consideration guidelines.

(a) If revocation is based upon administrative violation(s) only [i.e., violations other than new criminal conduct] the following guidelines shall apply.

	Customary time to be served before rerelease (months)
Positive supervision history (examples): a. No serious alcohol drug abuse and no possession of weapon(s) [and] b. At least 8 months from date of release to date of violation behavior [and] c. Positive employment/school record during supervision [and] d. Present violation represents first instance of failure to comply with parole regulations of this term	0 8
Negative supervision history (examples): a. Serious alcohol/drug abuse (e.g. readdiction to hard drugs) or possession of weapon(s) [or] b. Less than 8 months from date of release to date of violation behavior [or] c. Negative employment/school record during supervision [or] d. Negative attitude toward supervision demonstrated by lack of positive efforts to cooperate with parole (aftercare) plan or by repetitious or persistent violations	8 16

(b) (1) If a finding is made that the prisoner has engaged in behavior constituting new criminal conduct, the appropriate severity rating for the new criminal behavior shall be calculated. New criminal conduct may be determined either by a new federal, state, or a local conviction or by an independent finding by the Commission at revocation hearing. As violations may be for state or local offenses, the appropriate severity level may be determined by analogy with listed federal offense behaviors.

(2) The guidelines for parole consideration specified at 28 CFR 2.20 for the poor parole risk category shall then be applied. The original sentence type (i.e. adult, youth), shall determine the applicable guidelines for the parole violator term. Time served on a new state or federal sentence shall be counted as time in custody. This does not affect the computation of the total violator term as provided by §§ 2.47 (b) and (c) and 2.52 (c) and (d).

(c) The above are merely guidelines. A decision outside these guidelines (either above or below) may be made when circumstances warrant. For example, violations of an assaultive nature, or violations by a person with a history of assaultive conduct or by a person with a history of repeated parole failure may warrant a decision above the guidelines. Minor offense(s) (e.g., traffic infractions, disorderly conduct) shall normally be treated under administrative violations.

§ 2.22 Communication with the Commission.

Attorneys, relatives, or interested parties wishing a personal interview to discuss a specific case with a representative of the Commission must submit a written request to the appropriate regional office setting forth the nature of the information to be discussed. Such personal interview may be conducted by Staff Personnel in the regional offices. Personal interviews, however, shall not be held by an examiner or member of the Commission except under the Commission's appeals procedures.

§ 2.23 Delegation to hearing examiners.

(a) There is hereby delegated to hearing examiners the authority necessary to conduct hearings and make recommendations relative to the grant or denial of parole or reparole, revocation or reinstatement of parole or mandatory release, and conditions of parole.

(b) Hearing examiners shall function as two-man panels except as provided by §§ 2.43 and 2.47 and the concurrence of two examiners shall be requested for their recommendation. In the event of a divided recommendation by the panel, the appropriate regional Administrative hearing Examiner shall cast the deciding vote.

(c) In the event the Administrative Hearing Examiner is serving as a member of a hearing examiner panel or is otherwise unavailable, cases requiring his action under paragraph (b) of this section will be referred to another hearing examiner.

(d) A recommendation of a hearing examiner panel shall become an effective Commission decision upon review at the Regional Office and docketing, unless action is initiated by the regional Commissioner pursuant to § 2.24.

§ 2.24 Review of panel recommendation by the Regional Commissioners.

(a) A Regional Commissioner may review the recommendation of any examiner panel and refer this recommendation, prior to written notification to the prisoner, with his recommendation and vote to the National Commissioners for consideration and any action deemed appropriate. Written notice of this referral action shall be mailed or transmitted to the prisoner within twenty-one days of the date of the hearing. The Regional Commissioner and each National Commissioner shall have one vote and decisions shall be based upon the concurrence of two votes. Action shall be taken by the National Commissioners within thirty days of the date of referral action by the Regional Commissioner, except in emegencies.

(b) Notwithstanding the provisions of paragraph (a) of this section, a Regional Commissioner may:

(1) On the motion of the Administrative Hearing Examiner, modify or reverse the recommendation of a hearing examiner panel that is outside the guidelines to bring the decision closer to (or to) the nearer limit of the appropriate guideline range; or

(2) On his own motion, modify the recommendation of a hearing examiner panel to bring the decision to a date not to exceed six months from the date recommended by the examiner panel.

§ 2.25 Regional appeal.

(a) A prisoner or parolee may submit to the responsible Regional Commissioner a written appeal of a decision to grant, rescind, deny, or revoke, parole, except that an appeal of a Commission decision pursuant to § 2.17 shall be pursuant to § 2.27. This appeal must be filed on a form provided for that purpose within thirty days from the date of entry of such decision.

(b) The Regional Commissioner may affirm the decision, order a new institutional hearing on the next docket, order a regional appellate hearing, reverse the decision, or modify a continuance or the effective date of parole. Reversal of a decision or the modification of a decision by more than one hundred eighty days whether based upon the record or following a regional appellate hearing shall require the concurrence of two out of three Regional Commissioners. Decisions requiring a second or additional vote shall be referred to other Regional Commissioners on a rotating basis as established by the Chairman.

(c) Regional appellate hearings may be held at the regional office before the Regional Commissioner. If a regional appellate hearing is ordered, attorneys, relatives and other interested parties who wish to appear must submit a written request to the Regional Commissioner stating their relationship to the prisoner and the general nature of the information they wish to present. The Regional Commissioner shall determine if the requested appearances will be permitted. The prisoner shall not appear personally.

(d) Within 30 days of receipt of the appeal, except in emergencies, the Regional Commissioner shall inform the applicant in writing of the decision and the reasons therefor.

(e) If no appeal is filed within thirty days of the date of the entry of the original decision, such decision shall stand as the final decision of the Commission.

(f) Appeals under this section may be based on the following grounds:

(1) That the guidelines were incorrectly applied as to any or all of the following:

(i) Severity rating;

(ii) Salient factor score:

(iii) Time in custody;

(2) That a decision outside the guidelines was not supported by the reasons or facts as stated;

(3) That especially mitigating circumstances (for example, facts relating to the severity of the offense or the prisoner's probability of success on parole) justify a different decision;

(4) That a decision was based on erroneous information, and the actual facts justify a different decision;

(5) That the Commission did not follow correct procedure in deciding the case, and a different decision would have resulted if the error had not occurred;

(6) There was significant information in existence but not known at the time of the hearing;

(7) There are compelling reasons why a more lenient decision should be rendered on grounds of compassion.

§ 2.26 Appeal to National Appeals Board.

(a) Within 30 days of entry of a Regional Commissioner's decision under § 2.25, a prisoner or parolee may appeal to the National Appeals Board on a form provided for that purpose. However, any matter not raised on a regional level appeal may not be raised on appeal to the National Appeals Board. The National Appeals Board may, upon the concurrence of two members, affirm, modify, or reverse the decision, or order a rehearing at the institutional or regional level.

(b) The National Appeals Board shall act within 60 days of receipt of the appellant's papers, to affirm, modify, or reverse the decision.

(c) Decisions of the National Appeals Board shall be final.

§ 2.27 Appeal of original jurisdiction cases.

(a) Cases decided under the procedure specified in § 2.17 may be appealed within thirty days of the entry of the decision on a form provided for this purpose. Attorneys, relatives and other interested parties who wish to submit written information in support of a prisoner's appeal should send such information to the National Appeals Board Analyst, United States Parole Commission, 320 First Street, N.W., Washington, D.C. 20537. Appeals of original jurisdiction cases shall be reviewed by the Commission at its next quarterly meeting. A quorum of five Commissioners shall be required and all decisions shall be by majority vote. This appellate decision shall be final.

(b) Attorneys, relatives, or other interested parties who wish to speak for or against parole at such consideration must submit a written request to the Chairman of the Commission stating their relationship to the prisoner and the general nature of the material they wish to present. The Chairman shall determine if the requested appearances will be permitted.

(c) If no appeal is filed within thirty days of the entry of the decision under § 2.17, that decision shall stand as the final decision of the Commission.

§ 2.28 Reopening of cases.

Notwithstanding the appeal procedure of §§ 2.25 and 2.26, the appropriate Regional Commissioner may, on his own motion, reopen a case at any time upon the receipt of new information of substantial significance and may then take any action authorized under the provisions and procedures of § 2.25. Original jurisdiction cases may be reopened upon the motion of the appropriate Regional Commissioner under the procedures of § 2.17.

§ 2.29 Release on parole.

(a) A grant of parole shall not be deemed to be operative until a certificate of parole has been delivered to the prisoner.

(b) An effective date of parole shall not be set for a date more than six months from the date of the hearing. Residence in a Community Treatment Center as part of a parole release plan generally shall not exceed one hundred and twenty days.

(c) When an effective date of parole has been set by the Commission, release on that date shall be conditioned upon the completion of a satisfactory plan for parole supervision. The appropriate Regional Commissioner may, on his own motion, reconsider any case prior to release and may reopen and advance or retard an effective parole date. An effective parole grant may be retarded for up to one hundred and twenty days without a hearing for development and approval of release plans.

(d) When an effective date of parole falls on a Saturday, Sunday, or legal holiday, the Warden of the appropriate institution shall be authorized to release the prisoner on the first working day preceding such date.

§ 2.30 False or withheld information.

All paroles are ordered on the assumption that information from the prisoner has not been fraudulently given to or withheld from the Commission. If evidence comes to the attention of the Regional Commissioner that a prisoner willfully concealed or misrepresented information deemed significant, the Regional Commissioner may initiate action pursuant to § 2.34(b) to determine whether such parole should be revoked or rescinded.

§ 2.31 Parole to detainers; statement of policy.

(a) Where a detainer is lodged against a prisoner, the Commission may grant parole if the prisoner in other respects

meets the criteria set forth in § 2.18. The presence of a detainer is not in itself a valid reason for the denial of parole.

(b) The Commission will cooperate in working out arrangements for concurrent supervision with other jurisdictions where it is feasible and where release on parole appears to be justified.

§ 2.32 Parole to local or immigration detainers.

(a) When a state or local detainer is outstanding against a prisoner whom the Commission wishes to parole, the Commission may order either of the following:

(1) "Parole to the actual physical custody of the detaining authorities only." In this event, release is not to be effected except to the detainer. When such a detainer is withdrawn, the prisoner is not to be released unless and until the Commission makes a new order of parole.

(2) "Parole to the actual physical custody of the detaining authorities or an approved plan." In this event, release is to be effected even though the detainer might be withdrawn, providing there is an acceptable plan for community supervision.

(b) When the Commission wishes to parole a prisoner subject to a detainer filed by Federal immigration officials, the Commission may order one of the following:

(1) "Parole for deportation only." In this event, release is not to be effected unless immigration officials make full arrangements for deportation immediately upon release.

(2) "Parole to the actual physical custody of the immigration authorities only." In this event, release is not to be effected unless immigration officials take the prisoner into custory—regardless of whether or not deportation follows:

(3) "Parole to the actual physical custody of the immigration authorities or an approved plan." In this event, release is to be effected regardless of whether or not immigration officials take the prisoner into custody, providing there is an acceptable plan for community supervision.

(c) As used in this section "parole to a detainer" means release to the "physical custody" of the authorities who have lodged the detainer. Temporary detention in a jail in the county where the institution of confinement is located does not constitute release on parole to such detainer. If the authorities who lodged the detainer do not take the prisoner into custody for any reason, he shall be returned to the institution to await further order of the Commission.

§ 2.33 Release of plans.

(a) A grant of parole is conditioned upon the approval of release plans by the Regional Commissioner. In general, the following factors are considered as elements in the prisoner's release plan.

(1) Availability of legitimate employment and an approved residence for the prospective parolee; and

(2) Availability of necessary aftercare for a parolee who is ill or who requires special care.

(b) Generally, parolees will be released only to the place of their legal residence unless the Commission is satisfied that another place of residence will serve the public interest more effectively or will improve the probability of the applicant's readjustment.

(c) Where the circumstances warrant, the Commission on its own motion, or upon recommendation of the probation officer, may require that an adviser who is a responsible, reputable, and law-abiding citizen living in or near the community in which the releasee will reside be available to the releasee. Such advisor shall serve under the direction of and in cooperation with the probation officer to whom the parolee is assigned.

§ 2.34 Rescission of parole.

(a) When an effective date of parole or mandatory parole has been set by the Commission, release on that date shall be conditioned upon continued good conduct by the prisoner. If a prisoner has been granted parole and has subsequently been charged with institutional misconduct sufficient to become a matter of record, the Regional Commissioner shall be advised promptly of such misconduct. The prisoner shall not be released until the institution has been notified that no change has been made in the Commissioner's order to parole.

(1) Upon receipt of information that a prisoner has violated the rules of the institution, the Regional Commissioner may retard the parole grant for up to sixty days without a hearing or may retard the parole grant and schedule the case for a rescission hearing. If the prisoner was confined in a Federal prison at the time of the order retarding parole, the rescission hearing shall be scheduled for the next docket of parole hearings at the institution. If the prisoner was residing in a Federal community treatment center or a state or local halfway house, the rescission hearing shall be scheduled for the first docket of parole hearings after return to a Federal institution. When the prisoner is given written notice of the Commission action retarding parole, he shall be given notice of the charges of misconduct to be considered at the rescission hearing. The purpose of the rescission hearing shall be to determine whether rescission of the parole grant is warranted. At the rescission hearing the prisoner may be represented by a person of his choice and may present documentary evidence.

(2) An institution discipline committee hearing conducted by the institution resulting in a finding that the prisoner has violated the rules of his confinement, may be relied upon by Commission as conclusive evidence of institutional misconduct.

(3) Consideration of disciplinary infractions in cases with presumptive parole dates may be deferred until the commencement of the next in-person hearing or the prerelease record review required by § 2.14(b). While prisoners are encouraged to earn the restoration of forfeited or withheld good time, the Commission will consider the prisoner's overall institutional record in determining whether the conditions of a presumptive parole date have been satisfied.

(4) If the parole grant is rescinded, the prisoner shall be furnished a written statement of the findings of misconduct and the evidence relied upon.

(b) (1) Upon receipt of new information, adverse to the prisoner regarding matters other than institutional misconduct, the Regional Commissioner may refer the case to the National Commissioners under the procedures of § 2.17(a) with his recommendation and vote, to retard a previously granted parole. If parole is retarded the case shall be scheduled for a hearing on the next docket of parole hearings or at the first docket of parole hearings following return to a federal institution.

(2) The prisoner shall be given notice of the nature of the new adverse information upon which the rescission consideration is to be based. The hearing shall be conducted in accordance with the procedures set out in §§ 2.12 and 2.13. The purpose of the hearing shall be to determine if the parole grant should be rescinded or if a new parole date should be established.

§ 2.35 Mandatory release in the absence of parole.

A prisoner shall be mandatorily released by operation of law at the end of the sentence imposed by the court less such good time deductions as he may have earned through his behavior and efforts at the institution of confinement. If released pursuant to 18 U.S.C. 4164, such prisoner shall be released, as if on parole, under supervision until the expiration of the maximum term or terms for which he was sentenced less 180 days. If released pursuant to 18 U.S.C. 4205(f), such prisoner shall remain under supervision until the expiration of the maximum term or terms for which he was sentenced. Insofar as possible, release plans shall be completed before the release of any such prisoner.

§ 2.36 Same; youth offenders.

A prisoner committed under the Youth Corrections Act must be initially released conditionally under supervision not later than two years before the expiration of the term imposed by the court.

§ 2.37 Reports to police departments of names of parolees; statement of policy.

Names of parolees under supervision will not be furnished to a police department of a community, except as required by law. All such notifications are to be regarded as confidential.

§ 2.38 Community supervision by United States Probation Officers.

(a) Pursuant to sections 3655 and 4203 (b) (4) of Title 18 of the United States Code, United States Probation Officers shall provide such parole services as the Commission may request. In conformity with the foregoing, probation officers function as parole officers and provide supervision to parolees and mandatory releasees under the Commission's jurisdiction.

(b) A parolee or mandatory releasee may be transferred to a new district of supervision with the permission of the probation officers of both the transferring and receiving district, provided such transfer is not contrary to instructions from the Commission.

§ 2.39 Jurisdiction of the Commission.

(a) Jurisdiction of the Commission over a parolee shall terminate no later than the date of expiration of the maximum term or terms for which he was sentenced, except as provided by § 2.35, § 2.43, or § 2.52.

(b) The parole of any parolee shall run concurrently with the period of parole or probation under any other Federal, State, or local sentence.

(c) The parole of any prisoner sentenced before June 29, 1932, shall be for the remainder of the term or terms specified in his sentence, less good time allowances provided by law.

(d) Upon the termination of jurisdiction, the Commission shall issue a certificate of discharge to such parolee and to such other agencies as it may determine.

§ 2.40 Conditions of release.

(a) The conditions of release are printed on the release certificate and are binding regardless of whether the parolee signs the certificate. The following conditions are deemed necessary to provide adequate supervision and to protect the public welfare:

(1) The parolee shall go directly to the district named in the certificate (unless released to the custody of other authorities). Within three days after his arrival, he shall report to his parole adviser, if he has one, and to the United States Probation Officer whose name appears on the certificate. If in any emergency the parolee is unable to get in touch with his parole adviser or his probation officer or his office, he shall communicate with the United States Parole Commission, Washington, D.C. 20537.

(2) If the parolee is released to the custody of other authorities, and after release from the physical custody of such authorities, he is unable to report to the United States Probation Officer to whom he is assigned within three days, he shall report instead to the nearest United States Probation Officer.

(3) The parolee shall not leave the limits fixed by his certificate of parole without written permission from the probation officer.

(4) The parolee shall notify his probation officer within two days of any change in his place of residence.

(5) The parolee shall make a complete and truthful written report (on a form provided for that purpose) to his probation officer between the first and third day of each month, and on the final day of parole. He shall also report to his probation officer at other times as the probation officer directs.

(6) The parolee shall not violate any law, nor shall he associate with persons engaged in criminal activity. The parolee shall get in touch within two days with his probation officer or office if he is arrested or questioned by a law-enforcement officer.

(7) The parolee shall not enter into any agreement to act as an informer or special agent for any law-enforcement agency.

(8) The parolee shall work regularly unless excused by his probation officer, and support his legal dependents, if any, to the best of his ability. He shall report within two days to his probation officer any changes in employment.

(9) The parolee shall not drink alcoholic beverages to excess. He shall not purchase, possess, use, or administer marihuana or narcotic or other habit-forming drugs, unless prescribed or advised by a physician. The parolee shall not frequent places where such drugs are illegally sold, dispensed, used, or given away.

(10) The parolee shall not associate with persons who have a criminal record unless he has permission of his probation officer.

(11) The parolee shall not have firearms (or other dangerous weapons) in his possession without the written permission of his probation officer, following prior approval of the United States Parole Commission.

(b) The Commission or a member thereof may at any time modify or add to the conditions of release pursuant to this section, on its own motion or on the request of the U.S. Probation Officer supervising the parolee. The parolee shall receive notice of the proposed modification and unless waived shall have ten days following receipt of such notice to express his views thereon. Following such ten day period, the Commission shall have 21 days, exclusive of holidays, to order such modification of or addition to the conditions of release.

(c) The Commission may require a parolee to reside in or participate in the program of a residential treatment center, or both, for all or part of the period of parole.

(d) The Commission may require a parolee, who is an addict, within the meaning of section 4251(a), or a drug dependent person within the meaning of section 2(8) of the Public Health Service Act, as amended, to participate in the community supervision program authorized by § 4255 for all or part of the period of parole.

(e) A parolee may petition the Commission on his own behalf for a modification of conditions pursuant to this section.

(f) The notice provisions of paragraph (b) of this section shall not apply to modification of parole or mandatory release conditions pursuant to a revocation proceeding or pursuant to paragraph (e) of this section.

(g) A parolee may appeal an order to impose or modify parole conditions under the procedures of §§ 2.25 and 2.26 as applicable not later than thirty days after the effective date of such conditions.

§ 2.41 Travel by parolees and mandatory releasees.

(a) The probation officer may approve travel outside the district without approval of the Regional Commissioner in the following situations:

(1) Vacation trips not to exceed thirty days.

(2) Trips, not to exceed thirty days, to investigate reasonably certain employment possibilities.

(3) Recurring travel across a district boundary, not to exceed fifty miles outside the district, for purpose of employment, shopping, or recreation.

(b) Specific advance approval by the Regional Commissioner is required for other travel (including travel outside the contiguous forty-eight states, employment more than fifty miles outside the district, and vacations exceeding thirty days). A request for such permission shall be in writing and must demonstrate a substantial need for such travel. In cases falling under the criteria of § 2.17, the concurrence of two out of three Commissioners shall be required to grant such permission.

(c) A special condition imposed by the Regional Commissioner prohibiting certain travel shall supersede any general rules relating to travel as set forth above.

§ 2.42 Probation Officer's Reports to Commission.

A supervision report shall be submitted by the responsible probation officer to the Commission for each parolee or mandatory release after the completion of 12 months of continuous supervision and annually thereafter. The probation officer shall submit such additional reports as the Commission may direct.

§ 2.43 Early termination of parole.

(a) (1) Upon its own motion or upon request of the parolee, the Commission may terminate supervision, and thus jurisdiction, over a parolee prior to the expiration of his maximum sentence. A committed youth offender may be granted an early termination of jurisdiction (unconditional discharge) at any time after one year of continuous supervision on parole.

(2) Two years after each parolee's release on parole, and at least annually thereafter, the Commission shall review the status of the parole to determine the need for continued supervision. In calculating such two-year prior there shall not be included any period of release on parole prior to the most recent such release, nor any period served in confinement on any other sentence.

(3) Five years after each parolee's release on parole, the Commission shall terminate supervision over such parolee unless it is determined, after a hearing conducted in accordance with the procedures prescribed in 18 U.S.C. 4214(a)(2), that such supervision should not be terminated because there is a likelihood that the parolee will engage in conduct violating any criminal law. Such hearing may be conducted by a hearing examiner or other official designated by the Regional Commissioner.

(4) If supervision is not terminated under paragraph (a)(3) of this section the parolee may request a hearing annually thereafter, and a hearing shall be conducted with respect to such termination of supervision not less frequently than biennially.

(5) In calculating the five-year period referred to in paragraph (a)(3) of this section, there shall not be included any period of release on parole prior to the most recent such release or any period served in confinement on any other sentence.

(6) When termination of jurisdiction prior to the expiration of sentence is granted in the case of a youth offender, his conviction shall be automatically set aside. A certificate setting aside his conviction shall be issued in lieu of a certificate of termination.

(b) The Regional Commissioner in the region of supervision may release a parolee from supervision pursuant to this section if warranted by the circumstances of the case and reports of the supervising probation officer. Except that, in the case of a parolee previously considered pursuant to § 2.17, the decision to grant termination of supervision must also be pursuant to the provisions of § 2.17.

(c) A parolee may appeal an adverse decision under paragraphs (a) (3) or (4) of this section pursuant to §§ 2.25, 2.26 or § 2.27 as applicable.

§ 2.44 Summons to appear or warrant for retaking of parolee.

(a) If a parolee is alleged to have violated the conditions of his release, and satisfactory evidence thereof is presented, the Commission or a member thereof may:

(1) Issue a summons requiring the offender to appear for a preliminary interview or local revocation hearing.

(2) Issue a warrant for the apprehension and return of the offender to custody.

A summons or warrant may be issued or withdrawn only by the Commission, or a member thereof.

(b) Any summons or warrant under this section shall be issued as soon as practicable after the alleged violation is reported to the Commission, except when delay is deemed necessary. Issuance of a summons or warrant may be withheld until the frequency or seriousness of violations, in the opinion of the Commission, requires such issuance. In the case of any parolee charged with a criminal offense, issuance of a summons or warrant may be withheld, or a warrant may be issued and held in abeyance pending disposition of the charge.

(c) A summons or warrant may be issued only within the prisoner's maximum term or terms except that in the case of a prisoner released as if on parole pursuant to 18 U.S.C. 4164, such summons or warrant may be issued only within the maximum term or terms, less one-hundred eighty days. A summons or warrant shall be considered issued when signed and placed in the mail at the Commission Headquarters or appropriate regional office.

(d) The issuance of a warrant under this section suspends the running of a sentence until such time as the parolee may be retaken into custody and a final determination of the charges may be made by the Commission.

(e) A summons or warrant issued pursuant to this section shall be accompanied by a statement of the charges against the parolee, the applicable procedural rights under the Commission's regulations and the possible actions which may be taken by the Commission. A summons shall specify the time and place the parolee shall appear for a revocation hearing. Failure to appear in response to a summons shall be grounds for issuance of a warrant.

§ 2.45 Same, youth offenders.

(a) In addition to the issuance of a summons or warrant pursuant to § 2.44 above, the Commission or a member thereof, when of the opinion that a youth offender will be benefitted by further treatment in an institution or other facility, may direct his return to custody or issue a warrant for his apprehension and return to custody.

(b) Upon his return to custody, such youth offender shall be scheduled for a revocation hearing.

§ 2.46 Execution of warrant and service of summons.

(a) Any officer of any Federal correctional institutional or any Federal officer authorized to serve criminal process within the United States, to whom a warrant is delivered shall execute such warrant by taking the prisoner and returning him to the custody of the Attorney General.

(b) On arrest of the parolee the officer executing the warrant shall deliver to him a copy of the Warrant Application listing the charges against the parolee, the applicable procedural rights under the Commission's regulations and the possible actions which may be taken by the Commission.

(c) If execution of the warrant is delayed pending disposition of local charges, for further investigation, or for some other purpose, the parolee is to be continued under supervision by the probation officer until the normal expiration of the sentence, or until the warrant is executed, whichever first occurs. Monthly supervision reports are to be submitted, and the parolee must continue to abide by all the conditions of release.

(d) A summons to appear at a preliminary interview or revocation hearing shall be served upon the parolee in person by delivering to the parolee a copy of the summons. Service shall be made by any federal officer authorized to serve criminal process within the United States, and certification of such service shall be returned to the appropriate regional office of the Commission.

§ 2.47 Warrant placed as a detainer and dispositional Review.

(a) In those instances where a parolee is serving a new sentence in an institution, a parole violation warrant may be placed against him as a detainer. Such warrant shall be reviewed by the regional Commissioner not later than 180 days following notification to the Commission of such placement. The parolee shall receive notice of the pending review, and shall be permitted to submit a written application containing information relative to the disposition of the warrant. He shall also be notified of his right to request counsel under the provisions of § 2.48(b) to assist him in completing his written application.

(b) Following a dispositional review under this section, the Regional Commissioner may:

(1) Let the detainer stand and order further review at an appropriate time;

(2) Withdraw the detainer and: (i) Order reinstatement of the parolee to supervision upon release from custody, or (ii) Close the case if the expiration date has passed;

(3) Order a revocation hearing to be conducted by a hearing examiner or an official designated by the regional Commissioner at the institution in which the parolee is confined.

Following a revocation hearing conducted pursuant to this section, the Commission may take any action specified at § 2.52 including the ordering of concurrent or consecutive service of all or part of any violator term imposed. Such revocation hearing shall be conducted under the applicable procedures at § 2.50, and the parolee may be represented by his own or appointed counsel as provided in § 2.48(b).

(c) It shall be the general policy of the Commission that, in the absence of substantial mitigating circumstances the violator term of a parolee convicted of a new offense subsequent to release on parole shall run consecutively to any term imposed for the new offense.

§ 2.48 Revocation by the Commission, preliminary interview.

(a) *Interviewing Officer.* A parolee who is retaken on a warrant issued by a Commissioner shall be given a preliminary interview by an official designated by the Regional Commissioner to enable the Commission to determine if there is probable cause to believe that the parolee has violated his parole as charged, and if so, whether a revocation hearing should be conducted. The official designated to conduct the preliminary interview may be a United States Probation Officer in the district where the prisoner is confined, provided he is not the officer who recommended that the warrant be issued.

(b) *Notice and Opportunity to Postpone Interview.* At the beginning of the preliminary interview, the interviewing officer shall ascertain that the Warrant Application has been given to the prisoner as required by § 2.46(b), and shall advise the prisoner that he may have the preliminary interview postponed in order to obtain representation by an attorney or arrange for the attendance of witnesses. The prisoner shall also be advised that if he cannot afford to retain an attorney he may apply to a United

States District Court for appointment of counsel to represent him at the preliminary interview and the revocation hearing pursuant to 18 U.S.C. 3006A. In addition, the prisoner may request the Commission to obtain the presence of persons who have given information upon which revocation may be based. Such adverse witnesses shall be requested to attend the preliminary interview unless the prisoner admits a violation or has been convicted of a new offense while on supervision or unless the interviewing officer finds good cause for their non-attendance. Pursuant to § 2.49(a) a subpoena may issue for the appearance of adverse witnesses or the production of documents.

(c) *Review of the charges.* At the preliminary interview, the interviewing officer shall review the violation charges with the prisoner, apprise the prisoner of the evidence which has been presented to the Commission, receive the statements of witnesses and documentary evidence on behalf of the prisoner, and allow cross-examination of those witnesses in attendance. Disclosure of the evidence presented to the Commission shall be made pursuant to § 2.50(e).

(d) At the conclusion of the preliminary interview, the interviewing officer shall inform the parolee of his recommended decision as to whether there is probable cause to believe that the parolee has violated the conditions of his release, and shall submit to the Commission a digest of the interview together with his recommended decision.

(1) If the interviewing officer's recommended decision is that no probable cause may be found to believe that the parolee has violated the conditions of his release, the responsible regional Commissioner shall review such recommended decision and notify the parolee of his final decision concerning probable cause as expeditiously as possible following receipt of the interviewing officer's digest. A decision to release the parolee shall be implemented without delay.

(2) If the interviewing officer's recommended decision is that probable cause may be found to believe that the parolee has violated a condition (or conditions) of his release, the responsible regional Commissioner shall notify the parolee of his final decision concerning probable cause within 21 days of the date of the preliminary interview.

(3) Notice to the parolee of any final decision of a regional Commissioner finding probable cause and ordering a revocation hearing shall state the charges upon which probable cause has been found and the evidence relied upon.

(e) Release notwithstanding probable cause: If the Commission finds probable cause to believe that the parolee has violated the conditions of his release, reinstatement to supervision or release pending further proceeding may nonetheless be ordered if it is determined that:

(1) Continuation of revocation proceedings is not warranted despite the violations found; or

(2) Incarceration pending further revocation proceedings is not warranted by the alleged frequency or seriousness of such violation or violations, and that the parolee is not likely to fail to appear for further proceedings, and that the parolee does not constitute a danger to himself or others.

(f) Conviction as probable cause: Conviction of a Federal, State, or Local crime committed subsequent to release on parole or mandatory release shall constitute probable cause for the purposes of this section and no preliminary interview shall be conducted unless otherwise ordered by the regional Commissioner.

(g) Local revocation hearing: A postponed preliminary interview may be conducted as a local revocation hearing by an examiner panel or other interviewing officer designated by the regional Commissioner provided that the prisoner has been advised that the postponed preliminary interview will constitute his final revocation hearing.

§ 2.49 Place of revocation hearing.

(a) If the prisoner requests a local revocation hearing, he shall be given a revocation hearing reasonably near the place of the alleged violation(s) or arrest, if the following conditions are met:

(1) The prisoner has not been convicted of a crime committed while under supervision; and

(2) The prisoner denies that he has violated any condition of his release.

(b) If there are two or more alleged violations, the hearing may be conducted near the place of the violation chiefly relied upon as a basis for the issuance of the warrant or summons as determined by the regional Commissioner.

(c) A prisoner who voluntarily waives his right to a local revocation hearing, or who admits any violation of his release, or who is retaken following conviction of a new crime, shall be given a revocation hearing upon his return to a Federal institution. However, the Regional Commissioner may, on his own motion, designate a case for a local revocation hearing.

(d) A prisoner retaken on a warrant issued by the Commission shall be retained in custody until final action relative to revocation of his release, unless otherwise ordered by the regional Commissioner under § 2.48(d)(2). A parolee who has been given a revocation hearing pursuant to the issuance of a summons under § 2.44 shall remain on supervision pending the decision of the Commission.

(e) Local revocation hearings shall be scheduled to be held within sixty days of the probable cause determination. Institutional revocation hearings shall be scheduled to be held within ninety days of the date of the execution of the violator warrant upon which the prisoner was retaken. However, if a prisoner requests and receives any postponement of his preliminary interview or revocation hearing, or consents to a postponed revocation proceeding initiated by the Commission; or if a prisoner by his actions otherwise precludes the prompt conduct of such proceedings, the above stated time limits may be extended.

§ 2.50 Revocation hearing procedure.

(a) A revocation hearing shall be conducted by a hearing examiner panel or, in a local revocation hearing only, may be conducted by another official designated by the Regional Commissioner. In the case of a revocation hearing conducted by such other official or in the case of a revocation hearing conducted by a single examiner pursuant to § 2.47, a recommendation relative to revocation shall be made by the concurrence of two examiners on the basis of a review of the record. A revocation decision may be appealed under the provisions of § 2.25 and § 2.26, or § 2.27 as applicable.

(b) The purpose of the revocation hearing shall be to determine whether the prisoner has violated the conditions of his release and, if so, whether his parole or mandatory release should be revoked or reinstated.

(c) The alleged violator may present witnesses and documentary evidence in his behalf. However, the presiding hearing officer or examiner panel may limit or exclude any irrelevant or repetitious statement or documentary evidence.

(d) At a local revocation hearing, the Commission may on the request of the alleged violator or on its own motion, request the attendance of persons who have given statements upon which revocation may be based. Those witnesses who are present shall be made available for questioning and cross-examination in the presence of the alleged violator unless the presiding hearing officer or examiner panel finds good cause for their non-attendance. Adverse witnesses will not be requested to appear at institutional revocation hearings.

(e) All evidence upon which the finding of violation may be based shall be disclosed to the alleged violator at the revocation hearing. The hearing officer or examiner panel may disclose documentary evidence by permitting the alleged violator to examine the document during the hearing, or where appropriate, by reading or summarizing the document in the presence of the alleged violator.

(f) In lieu of an attorney, an alleged violator may be represented at a revocation hearing by a person of his choice. However, the role of such non-attorney representative shall be limited to offering a statement on the alleged violator's behalf with regard to reparole or reinstatement to supervision.

§ 2.51 Issuance of a subpoena for the appearance of witnesses or production of documents.

(a)(1) Preliminary Interview or Local Revocation Hearing: If any person who has given information upon which revocation may be based refuses, upon request by the Commission to appear, the regional Commissioner may issue a subpoena for the appearance of such witness. Such subpoena may also be issued at the discretion of the regional Commissioner in the event such adverse witness is judged unlikely to appear as requested.

(2) In addition, the regional Commissioner may, upon his own motion or upon a showing by the parolee that a witness whose testimony is necessary to the proper disposition of his case will not appear voluntarily at a local revocation hearing or provide an adequate written statement of his testimony, issue a subpoena for the appearance of such witness at the revocation hearing.

(3) Both such subpoenas may also be issued at the discretion of the regional Commissioner if it is deemed necessary for orderly processing of the case.

(b) A subpoena issued pursuant to paragraph (a) of this section above may require the production of documents as well as, or in lieu of, a personal appearance. The subpoena shall specify the time and the place at which the person named therein is commanded to appear, and shall specify any documents required to be produced.

(c) A subpoena may be served by any Federal officer authorized to serve criminal process. The subpoena may be served at any place within the judicial district in which the place specified in the subpoena is located, or any place where the witness may be found. Service of a subpoena upon a person named therein shall be made by delivering a copy thereof to such person.

(d) If a person refuses to obey such subpoena, the Commission may petition a court of the United States for the judicial district in which the parole proceeding is being conducted, or in which such person may be found, to require such person to appear, testify, or produce evidence. The court may issue an order requiring such person to appear before the Commission, and failure to obey such an order is punishable by contempt.

§ 2.52 Revocation of parole or mandatory release.

(a) Whenever a parolee is summoned or retaken by the Commission, and the Commission finds by a preponderance of the evidence, that the parolee has violated a condition of the parole, the Commission may take any of the following actions:

(1) Restore the parolee to supervision including where appropriate: (i) Reprimand (ii) Modification of the parolee's conditions of release (iii) Referral to a residential community treatment center for all or part of the remainder of his original sentence; or

(2) Revoke parole.

(b) If parole is revoked pursuant to this section, the Commission shall also determine, on the basis of the revocation hearing, whether reparole is warranted or whether the prisoner should be continued for further review.

(c) A parolee whose release is revoked by the Commission will receive credit on service of his sentence for time spent under supervision, except as provided below:

(1) If the Commission finds that such parolee intentionally refused or failed to respond to any reasonable request, order, summons or warrant of the Commission or any agent thereof, the Commission may order the forfeiture of the time during which the parolee so refused or failed to respond, and such time shall not be credited to service of the sentence.

(2) If the parolee has been convicted of a new offense committed subsequent to his release on parole, which is punishable by a term of imprisonment, forfeiture of the time from the date of such release to the date of execution of the warrant shall be ordered, and such time shall not be credited to service of the sentence. An actual term of confinement or imprisonment need not have been imposed for such conviction; it suffices that the statute under which the parolee was convicted permits that trial court to impose any term of confinement or imprisonment in any penal facility. If such conviction occurs subsequent to a revocation hearing (i) which the Commission makes an independent finding of violation of conditions of parole), the Commission may reopen the case and schedule a further hearing relative to time forfeiture and such further disposition as may be appropriate. However, in no event shall the violator term imposed under this subsection, taken together with the time served before release, exceed the total length of the original sentence.

(d)(1) Notwithstanding the above, prisoners committed under the Narcotic Addict Rehabilitation Act or the Youth Corrections Act shall not be subject to any forfeiture provision, but shall serve uninterrupted sentences from the date of conviction, except as provided in § 2.10 (b) and (c).

(2) The commitment of a juvenile offender under the Federal Juvenile Delinquency Act may not be extended past the offender's twenty-first birthday unless the juvenile has attained his nineteenth birthday at the time of his commitment, in which case his commitment shall not exceed the lesser of two years or the maximum term which could have been imposed on an adult convicted of the same offense.

§ 2.53 Mandatory parole.

(a) A prisoner (including a prisoner sentenced under the Narcotic Addiction Rehabilitation Act, Federal Juvenile Delinquency Act, or the provisions of 5010 (c) of the Youth Corrections Act) serving a term or terms of five years or longer shall be released on parole after completion of two-thirds of each consecutive term or terms or after completion of thirty years of each term or terms of more than 45 years (including life terms), whichever comes earlier, unless pursuant to a hearing under this section, the Commission determines that there is a reasonable probability that the prisoner will commit any Federal, State, or local crime or that the prisoner has frequently or seriously violated the rules of the institution in which he is confined. If parole is denied pursuant to this section such prisoner shall serve until the expiration of his sentence less good time. The forfeiture of statutory good time shall be deemed in itself to indicate that the prisoner has frequently or seriously violated the rules of the institution or institutions in which he has been confined.

(b) When feasible, at least sixty days prior to the scheduled two-thirds date, a review of the record shall be conducted by an examiner panel. If a mandatory parole is ordered following this review no hearing shall be conducted.

(c) A prisoner released on mandatory parole pursuant to this section shall remain under supervision until the expiration of the full term of his sentence unless the Commission terminates parole supervision pursuant to § 2.43 prior to the full term date of the sentence.

(d) A prisoner whose parole has been revoked and whose parole violator term is five years or more shall be eligible for mandatory parole under the provisions of this section upon completion of two-thirds of the violator term and shall be considered for mandatory parole under the same terms as any other eligible prisoners.

§ 2.54 Reviews pursuant to 18 U.S.C. 4203/4215.

(a) The Attorney General, within thirty days after entry of a Regional Commissioner's decision, may request in writing that the National Appeals Board review such decision. Within sixty days of the receipt of the request the National Appeals Board shall, upon the concurrence of two members, affirm, modify or reverse the decision, or order a rehearing at the institution or regional level. The Attorney General and the prisoner affected shall be informed in writing of the decision, and the reasons therefor.

(b) Notwithstanding the above provision, the Commission, by majority vote, may, upon its own motion, review any decision of a Regional Commissioner relative to grant or denial of parole, imposition of parole conditions or revocation of parole, upon the receipt of new and significant information. Referrals for this purpose may be made by not less than three Commissioners. Such review by the Commission must be made within thirty days following the entry of the decision by the Regional Commissioner. Following the review the Commission shall inform the affected prisoner in writing of its action and, if parole is denied, the reasons therefor.

(c) Notwithstanding the provisions of §§ 2.23–2.26 and § 2.28, any decision made by a Regional Commissioner or the National Appeals Board shall, upon the petition of not less than three Commissioners, be referred to the full Commission for review and, by majority vote, affirmed, modified, or reversed. Such petition must be submitted to the Chairman of the Commission and be acted upon by the Commission not later than 30 days from the date of entry of the decision to be reviewed. The prisoner shall receive a written, notice of this referral, which shall stay the decision in his case until such review has been completed. Following review by the full Commission, the prisoner shall be informed in writing of the Commission's decision and, if parole is denied, of the reasons therefor.

§ 2.55 Disclosure of Records.

(a) Prior to an initial parole hearing conducted pursuant to § 2.13 or any review hearing thereafter, a prisoner may review reports and other documents in the institution file which will be considered by the Commission at his parole hearing. These documents are generally limited to official reports bearing on the prisoner's offense behavior, personal history, and institutional progress. Review of such reports shall be permitted by the Bureau of Prisons pursuant to its regulations within seven days of a request by the prisoner, except that in the case of reports which must be sent to the originating agency for clearance pursuant to paragraph (c) of this section, a reasonable amount of time shall be permitted to obtain such clearance. Copies of reports and documents may be furnished under applicable Bureau of Prisons regulations.

(b) A report shall not be disclosed to the extent it contains:

(1) Diagnostic opinions which, if known to the prisoner, could lead to a serious disruption of his institutional program;

(2) Material which would reveal sources of information obtained upon a promise of confidentiality; or

(3) Any other information which, if disclosed, might result in harm, physical or otherwise, to any person. The term "otherwise" shall be deemed to include the legitimate privacy interests of such person under the Privacy Act of 1974.

(c) It shall be the duty of the agency which originated any report or document referred to in paragraph (a) of this section to determine whether or not to apply any of the exceptions to disclose set forth in paragraph (b) of this section. If any report or portion thereof is deemed by the originating agency to fall within an exception to disclosure, such agency shall prepare and furnish for inclusion in the institution file a summary of the basic contents of the material to be withheld, bearing in mind the need for confidentiality or impact on the prisoner, or both. In the case of a report prepared by an agency other than the Bureau of Prisons, the Bureau shall refer such report to the originating agency for a determination relative to disclosure, if the report has not been previously cleared or prepared for disclosure.

(d) Upon request by the prisoner, the Commission shall make available a copy of any record which it has retained of a parole or parole revocation hearing pursuant to 18 U.S.C. 4208(f).

(e) Except for deliberative memoranda referred to in paragraph (f) of this section, reports or documents received at regional offices which may be considered by the Commission at any proceeding shall be forwarded for inclusion in the prisoner's institutional file so that he may review them pursuant to paragraph (a) of this section. Such reports will first be referred by the Commission to originating agencies pursuant to paragraph (c) of this section for a determination relative to disclosure if the report has not previously been cleared or prepared for disclosure.

(f) Duplicate copies of records in a prisoner's institutional file as well as deliberative memoranda among Commission Members or staff which do not contain new factual information relative to the parole release determination are retained in Parole Commission regional office files following initial hearing. Records maintained in these files, shall be made available to prisoners, parolees, mandatory releasees, their authorized representative and members of the public upon written request in accordance with applicable law and Department of Justice regulations at 28 CFR Part 16, Subparts C & D. The Commission reserves the right to invoke statutory exemptions to disclosure of its files in appropriate cases under the Freedom of Information Act or Privacy Act text provisions and Alternate Means of Access.

§ 2.56 Special parole terms.

(a) The Drug Abuse Prevention and Control Act, 21 U.S.C. 801 to 966, provides that, on conviction of certain offenses, mandatory "special parole terms" must be imposed by the court as part of the sentence. This term is an additional period of supervision which follows the completion of the regular sentence (including competition of any period on parole or mandatory release).

(b) At the time of release under the regular sentence, whether under full term expiration or under a mandatory release certificate or a parole certificate, a separate Special Parole Term certificate will be issued to the prisoner by the Bureau of Prisons.

(c) Should a releasee be found to have violated conditions of release during supervision under his regular sentence, i.e., before commencement of the Special Parole Term, he will be returned as a violator of his basic supervision period under his regular sentence; the Special Parole Term will follow unaffected, as in paragraph (a) of this section. Should a releasee violate conditions of release during the Special Parole Term he will be subject to revocation on the Special Parole Term as provided in § 2.52, and subject to reparole or mandatory release under the Special Parole Term:

(d) If the prisoner is reparoled under the revoked Special Parole Term a certificate of parole to Special Parole Term is issued by the Commission. If the inmate is mandatorily released under the revoked "special parole term" a certificate of mandatory release to Special Parole Term will be issued by the Bureau of Prisons.

(e) If the prisoner is terminated from regular parole under § 2.43, the Special Parole Term commences to run at that point in time. Early termination from supervision from a Special Parole Term may occur as in the case of a regular parole term, except that the time periods considered shall commence from the beginning of the Special Parole Term.

§ 2.57 Prior orders.

Any order of the United States Board of Parole entered prior to May 14, 1976, including, but not limited to, orders granting, denying, rescinding or revoking parole or mandatory release, shall be a valid order of the United States Parole Commission according to the terms stated in the order.

§ 2.58 Absence of hearing examiner.

In the absence of a hearing examiner, a regional commissioner may exercise the authority delegated to hearing examiners in § 2.23.

§ 2.59 Appointment of committees.

The Chairman shall appoint four permanent committees, as follows: (a) Policy, (b) Budget, (c) Personnel and training, (d) Research, and in addition such ad hoc committees as may from time to time be approved by a majority of the Commissioners, to study, review, and recommend to the Commission and Chairman regarding policies and procedures of the Commission. Such Committees shall be appointed from among the Commissioners.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS

Proposed Annual Operating Plan for FY 1978

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS

Proposed Annual Operating Plan for FY 1978

PUBLICATION FOR COMMENT

The Office for Civil Rights (OCR) is issuing its proposed FY 1978 Annual Operating Plan for public comment. The plan, set forth in detail in the accompanying narrative and charts, establishes the numbers of complaint investigations, compliance reviews, and the other related activities which will be conducted by the investigative, managerial, and non-clerical support staff of OCR's Headquarters and ten Regional offices.

Responses to OCR's solicitation for comments should be received no later than September 6, 1977, and should be addressed to:

Director
Office for Civil Rights
Department of Health, Education, and Welfare
Washington, D.C. 20201

OCR will review its proposed plan in light of the comments received and, within the overall staffing levels included in the plan, will revise the plan to reflect suggestions which have merit. Commentators who recommend OCR undertake activities in addition to those proposed in the plan are urged to indicate the specific activity they would displace, together with the reason for their position, or to identify the specific area to be changed and the impact of that change on the remaining elements of the proposed plan.

Persons seeking clarification of any of the provisions of the proposed plan may contact the Office for Civil Rights, at the above address.

DAVID S. TATEL,
Director.

AUGUST 1, 1977.

OFFICE FOR CIVIL RIGHTS

PROPOSED ANNUAL OPERATING PLAN FOR FY 1978

I. Purpose

The Office for Civil Rights (OCR) within the Office of the Secretary is responsible for assuring that Federally assisted programs are free from unlawful discrimination. The Annual Operating Plan (AOP) represented in the narrative and charts below describes the compliance and compliance related activities OCR will undertake in FY 1978 to carry out that responsibility.

II. Jurisdiction

OCR is charged with enforcing the following statutes and executive orders as they relate to the expenditures of HEW funds:

Title VI of the Civil Rights Act of 1964, which prohibits discrimination on the basis of race, color, or national origin in federally assisted programs and activities;

Title IX of the Education Amendments of 1972, which prohibits discrimination on the basis of sex in federally assisted education programs;

Section 504 of the Rehabilitation Act of 1973, which prohibits discrimination against qualified handicapped persons on the basis of physical or mental handicap in federally assisted programs;

Sections 799A and 855 of the Public Health Service Act, which require that schools of medicine and nurse training, as a condition of receiving Federal support, must provide assurances that there is no discrimination on the basis of sex in admissions;

Executive Order 11246, as amended, which prohibits employment discrimination on the basis of race, color, sex, religion, and national origin and requires affirmative action on the part of Federal contractors and subcontractors;

Title VII of the Education Amendments of 1972 (referred to as the Emergency School Aid Act or ESAA), which provides aid to desegregating institutions;

Age Discrimination Act of 1975, which prohibits discrimination in all federally funded programs on the basis of an individual's age.

III. Balanced Compliance Program

OCR has established as its goal for FY 1978 the conduct of a balanced compliance program designed in view of existing resources to be responsive to the needs of all protected groups served by all institutions and programs over which OCR has jurisdiction. There are two major assumptions underlying the development of this annual operating plan. First, it is OCR's best judgment regarding the implementation of a balanced enforcement program that 55 percent of the total investigative time should be assigned to complaint investigations and 45 percent to compliance reviews. Reserving 45 percent of the time for reviews allows OCR the flexibility to conduct OCR selected compliance reviews as well as pre-grant and pre-award reviews required by law.

Second, OCR recognizes that limiting the resources assigned to complaint processing will result in an increase in the backlog of complaints. However, OCR intends to insure that this resulting increase in the backlog is only a short-term phenomenon. Through increased resources and efficiencies, OCR plans to attempt to reduce the backlog and become current in complaint processing by the end of fiscal year 1980 or 1981. Last year's Annual Operating Plan which indicated that the backlog could be reduced by the end of this fiscal year, was totally unrealistic and disregarded OCR's other lawful responsibilities. The proposed fiscal year 1978 operating plan, unlike last year's, represents an effort to utilize existing resources to fulfill OCR obligations to complainants and at the same time to fulfill other statutory responsibilities. The principle of this plan, together with similar plans for future fiscal years, which will reflect increased resources and efficiencies, will lay the ground work for the elimination of the complaint backlog and the permanent installation of a balanced and responsible enforcement program. The annual operating plan for FY 1978 represents an effort to use resources to meet OCR's obligations to complainants in the fairest and most expeditious manner possible and, at the same time, allow OCR to carry out its other statutory responsibilities.

The essential elements of a balanced compliance program are:

Compliance reviews;
Pre-award and pre-grant reviews;
Complaint investigations; and
Expansion of civil rights responsibilities into all HEW programs.

Balance will be achieved by distributing staff resources and determining numbers of activities to be conducted in a manner that insures coverage of all of OCR's legislative and executive order authorities and all types of recipients/contractors (for example, public school districts, colleges and universities, vocational schools and programs, hospitals, nursing homes, medical laboratories, and various state and local government agencies receiving Federal financial assistance). Since complaint investigations and pre-funding reviews are limited in scope, compliance reviews will be planned and scheduled to include those issues, jurisdictions, and protected groups which would not otherwise be addressed or which would receive inadequate attention were OCR's activities limited to complaint activities.

The actual numbers of activities to be conducted are computed on a total expected OCR staff of 1102 positions[1] in FY 1978. Subtracted from this total is a 3 percent vacancy rate considered acceptable by the Office of Management and Budget. The staffing figures in the plan indicate professional staff only.

IV. Compliance Program

A. Complaint Investigations.—A complaint is an allegation that an HEW contractor or a recipient of HEW funds has violated one or several of the legal authorities OCR is responsible for enforcing by discriminating against an individual or group of individuals. OCR will begin FY 1978 with a backlog of approximately 3025 complaints. During the fiscal year, it expects to receive an additional 2455 complaints. By allocating 232 person years or 55 percent of its total investigative staff, OCR will be able to resolve 42 percent of the backlog and will investigate 10 percent of the new receipts, or a total of 1501 complaints. Within the total staff allocation for complaints, the distribution of resources to the regions to conduct complaint investigations will be based on each region's proportion of the total complaints on hand as of October 1, 1977, and the total number of complaints expected to be received during the fiscal year.

During FY 1978, each regional office will first bring to completion all complaint investigations active on the first of October. All remaining complaints (backlogged and new receipts) will be divided by enforcement area (race, national origin, sex, and handicap), and investigative resources allocated in proportion to the number of complaints in each enforcement area. For example, if 25 percent of a regional office's complaints allege national origin discrimination, then 25 percent of that office's complaint investigation staff, remaining after the assignment of staff to active complaints, will be allocated to the investigation of national origin complaints. Within the proportions established for each regional office, OCR will investigate backlogged and newly received complaints on a one-to-one ratio and within these categories, in chronological order by date of receipt. The proportions for each regional office will be revised on a semi-annual basis and the allocation of resources altered to conform to changes in the proportions. Certain complaint investigations will be consolidated as follows:

1. Before any complaint investigation is initiated, the Regional Office will determine if there are other similar allegations on hand against the same recipient/contractor. If so, all such complaints will be consolidated into one investigation.

2. If a compliance review of a recipient/contractor is scheduled, investigation of all outstanding complaints against the recipient/contractor will be incorporated into the review.

During FY 1978, OCR will concentrate heavily on developing new techniques for increasing complaint handling efficiency. Revised Complaint Handling Procedures, improved work measurements, better policy articulation, improved training, and new approaches to resolving complaints will help OCR reduce its backlog and handle new complaints more efficiently and expeditiously.

B. Pre-Funding Activity.—Under Federal law and executive order OCR, is responsible for conducting a variety of pre-funding reviews. Pre-grant reviews are required to ensure compliance with the civil rights requirements of Section 706 of the Emergency School Aid Act (ESAA). During FY 1978, OCR will allocate 61.44 investigative person years to the processing of ESAA applications, including Title VI action on ineligible or waiver-denied applicant school districts. Routine health and human development pre-grant clearances relevant to Title VI compliance will require a total of 15.5 person years during FY 1978. Also since under Executive Order 11246, OCR has been designated a compliance agency by the Department of Labor's Office of Federal Contract Compliance Programs (OFCCP), 16.1 investigative person years will be devoted to the conduct of pre-award reviews to determine the equal employment compliance status of prospective recipients of HEW contracts in excess of $1 million. In addition to these three specific areas of pre-funding activity, OCR will be working with the HEW principal operating components (POC's) through OCR's new Office of Program Review and Assistance to develop uniform, effective pre-grant review procedures for the Department's funding programs.

C. Compliance Reviews.—A compliance review is an OCR initiated investigation of the policies and practices of a recipient of Federal funds to determine whether that recipient is in compliance with the legal authorities OCR enforces. Unlike a complaint investigation or a required pre-funding review, a compliance review allows OCR to select the site of an investigation, the jurisdiction(s) under which the investigation will be conducted, and the issue(s) the investigation will include. Thus, compliance reviews provide OCR with a tool essential to addressing those areas of discrimination not targeted by complaints or pre-grant reviews.

During FY 1978, OCR will conduct 185 compliance reviews requiring a staff allocation of approximately 113 investigative person years. Investigative staff from the regional offices as well as staff from the headquarters Compliance and Enforcement Office's Compliance Program Branch will participate in the investigations, assisted by staff from the Office of Policy, Planning and Research where policy and procedures are not firmly established.

The reviews will be geographically disbursed and, on a national level, will cover a comprehensive range of issues in all program areas and under all jurisdictional authorities. The selection of the actual issues and jurisdictions to be covered will be made following an assessment of the issues and jurisdictions covered in the complaint investigations and pre-funding reviews to be conducted. Types of recipients and issues to be addressed in compliance reviews include:

Program area	Recipient	Issue
Elementary and secondary education.	State education agencies	Potential discriminatory impact of all policies affecting the treatment of students and the employment of faculty by SEA's.
		Employment within agency.
	Vocational/technical schools	Admission to schools.
		Admission to programs.
	Nonvocational/technical State administered schools.	Admission to schools.
		Admission to programs.
	Local education agencies.	Discipline.
		Special education.
		Migrant education.
Higher education	State education agencies which administer formerly dual systems.	Failure to eliminate vestiges of formal racial duality.
		Potential discriminatory impact of all policies affecting the treatment of students and employment of staff and faculty by public higher education institutions.
		Agency employment.
	Other State education agencies	Potential discriminatory impact of policies.
		Agency employment.
	Professional schools	Admissions.
		Retention.
		Supportive services.
	Graduate schools (nonprofessional)	Admissions.
		Retention.
		Supportive services.
	Undergraduate schools	Admissions.
		Retention.
		Supportive services.
		Employment.
	Community colleges	Retention.
		Supportive services.
		Employment.
Nonprofit organizations.		Do.
Health and human development.	Residential health facilities, (e.g., hospitals, nursing homes).	Site selection.
		Access to facilities.
		Room assignment.
		Comparability of treatment.
	Nonresidential health and human development facilities (e.g., family health centers, vocational rehabilitation centers and work shops).	Site selection.
		Access to facilities.
		Access to services.
		Delivery of services.
	State and local health and human development agencies.	Policies affecting the location and provision of services.
		Adequacy of monitoring vendors.
		Adequacy of complaint handling procedures.

During the fiscal year, OCR will also complete 44 on-going elementary and secondary education Title VI reviews specifically aimed at ensuring equal educational opportunity for non-native English speakers (commonly referred to as *Lau* reviews) and will continue, subject to careful reevaluation and possible limitation, the comprehensive reviews of the public school systems in New York City, Philadelphia, Chicago, and Los Angeles now underway. In addition, OCR will conduct Title VI student assignment reviews where evidence indicates that unconstitutional segregation or its effects exists and where constitutionally acceptable remedies are achievable. These reviews will cover Title IX and Section 504 issues as well.

V. Support

Conduct of the compliance activities described in IV above requires a variety of regional and headquarters support staff. While, with few exceptions, these staff will not participate directly in the conduct of reviews and investigations, they will provide the management and staff support necessary to the full development and implementation of the balanced compliance program. The descriptions below are not meant to be exhaustive, nor do they delineate all of the

[1] This is the staffing level expected to be authorized by Congress. However, the Office of Management and Budget job ceilings may prevent OCR from attaining the authorized level. Accordingly, the activities projected in this AOP may have to be reduced to reflect actual staffing levels.

functions to be performed by the staff. They are meant only to explain the activities which are most critical to the implementation of the compliance program.

A. Regional Management and Professional Support Staff. This staff of 111 provides overall regional office management and management support, including reporting, assessments of regional progress, evaluations of compliance activities, provision of data collection services, provision of administrative support services, and coordination of the correspondence of the regional office, which is largely prepared by the regional investigative staffs.

B. Headquarters Staff.

Unit	Professional staff
Office of the Director	4
Executive Secretariat	3
Office of Inter-Governmental Affairs	8
Office of Public Affairs	7
Office of the Assistant Director, Administration and Management	27
Office of the Deputy Director, Compliance and Enforcement	3
Division of Operational Planning and Support	7
Division of Technical Review and Assistance	65
Division of Training	10
Office of the Associate Director, Policy, Planning and Research	2
Division of Policy and Procedures	32
Division of Planning and Research	12
Office of the Deputy Director, Program Review and Assistance	2
Division of Program Planning and Appraisal	8
Division of Intra-Departmental Technical Assistance	13
Total	203

1. Director.—In addition to the Director, the staff will include the Executive Secretariat responsible for document control; the Office of Public Affairs responsible for planning and directing a comprehensive civil rights public information program; and the Office of Inter-Governmental Affairs responsible for liaison with the Congress, Federal Departments and agencies, and State and local governments and their representative organizations. All three of these offices are responsible for coordinating the preparation of responses to the large volume of congressional, governmental, and other correspondence received by OCR; much of the actual letterwriting is done by the staffs of the operational and policy divisions.

2. Administration and Management.—This staff will provide financial management and personnel and supply services, as well as support of information systems (the automated case tracking system and the other elements of the overall information management system). In addition to providing management analysis, the staff will coordinate the development of the short-term and annual operating plans.

3. Compliance and Enforcement.—This office will provide a wide range of support services to the compliance program and will be the direct link between headquarters and the regions. Staff will oversee the conduct of the compliance activities to ensure that all policies, procedures, and standards are uniformly and effectively implemented. They will also provide direct technical assistance to the regions in the development of cases. Approximately one-third of the staff will participate in the compliance reviews conducted by the regions.

The staff assigned to training will develop, maintain, and administer an OCR staff training program. FY 1978 will be the first year of implementation of an intensive training program designed to provide staff with the skills necessary to implement an effective compliance program. This first year will focus on investigation and negotiation skills development.

4. Policy, Planning and Research.—Roughly two thirds of this staff will be devoted to the development of policies and procedures. Organized by type of discrimination (age, sex, race, handicap) and by function (legislative analysis, dissemination), this staff will concentrate its efforts on developing policies and procedures in all areas, including but not limited to:

Complaint investigation and compliance review procedures.
Guidelines for state health and human development agencies.
Anti-discrimination provisions for the location of health and human development facilities and services.
Policy on vocational education programs.
Policy on discipline in schools.
Title IX policies.
Guidelines, standards, and remedies for language barrier problems in all facilities.
Procedures for monitoring corrective action agreements.
Policy on recipient/contractor record keeping.
Procedures for full implementation of the 504 regulation.

The remaining staff will be responsible for long range planning, research and evaluation, and the design and conduct of surveys and other bulk data collection activities. Projects stemming from this last activity may, subject to the availability of funds, include: the Adams Higher Education state plan evaluation instrument, the survey of college and university enrollments and degrees conferred, the comprehensive urban review data collection efforts, vocational education survey, special school survey, planning and development of a comprehensive health and human development survey, and the elementary and secondary education survey.

In addition, staff will provide data collection and analysis support in the development of individual cases.

5. Program Review and Assistance.—This office, created in FY 1977, is to carry out the new efforts of the Department to infuse civil rights responsibilities into the activities of the HEW program agencies (principal operating components or POC's). It is these agencies that have direct contact with the recipients and beneficiaries of Federal funds. The staff will concentrate their FY 1978 efforts on developing and promoting civil rights responsibilities and providing technical assistance. The focus will be on those operating agencies which have the most critical civil rights responsibilities.

Specific objectives to be accomplished in FY 1978 include:

1. Develop and implement a Self-Assessment Guide with POC's.
2. Develop short and long range goals for OCR, POC civil rights initiatives.
3. Develop a civil rights orientation program for POC program and contracting officers.
4. Develop pre-award grant and contract clearance procedures to be implemented jointly by POC's and OCR.
5. Participate in the revision of the procurement manual used by POC's.
6. Develop consolidated language for all assurances required in grant applications and in contracts.
7. Establish a process for OCR clearance of Vocational Education State Plans.
8. Coordinate, with the POC's, the 504 technical assistance effort of the Department.
9. Develop and implement the initial phase of an OCR/POC technical assistance, education and advocacy program.

C. General Counsel.

Unit:	Professional staff
Headquarters	33
Regions	36
Total	69

The staff of the Civil Rights Division of the Office of the General Counsel (OGC) work in direct support of OCR's compliance program. In addition to OGC involvement in preparing a case for and following it through the administrative enforcement process, emphasis will be placed on OGC involvement in all aspects of OCR's program, including participation in the development and conduct of reviews and investigations, reviews of pertinent legislation and regulations, provision of formal opinions, and participation in the development of policies and procedures.

VI. Work Measurement

To determine investigative staff requirements for complaint and review activity, standard times for each type of activity were computed and then applied against the number of activities to be performed during FY 1978.

The standard time for complaints is 44 person days per investigation. This is an average. The actual work time required to process any one given complaint can vary from as little as a day to as much as the equivalent of several months, depending on the nature of the allegation. OCR has set a goal to increase its efficiency in the investigation of complaints by 30 percent by the end of the fiscal year. Since this goal will be attained throughout the year, the numbers of new investigations planned for FY 1978 reflect an overall increase of 15 percent.

The standard times for reviews are as follows:

Type:	Person days per review
ESAA applications	14
Executive order 11246 preaward revisions.	23
Lau reviews	20
Brown reviews	406
State elementary and secondary education agencies.	118
Vocational/technical schools	84
Health pre-grant reviews	1
Monitoring of Adams State higher education systems.	84
Nonvocational technical State administered elementary and secondary education schools.	84
Elementary and secondary school district discipline practices.	62
Elementary and secondary school district special education programs.	46
Elementary and secondary school district migrant education practices.	76
Formerly dual State higher education systems.	169
Other State higher education systems.	157
Professional schools	105
Graduate schools	105
Undergraduate schools	111
Community colleges	105
Nonprofit organizations	81
Residential health facilities	118
Nonresidential health and human development facilities.	35
State and local health and human development agencies.	149

The time required to conduct any given review depends on the number of issues investigated and the number of jurisdictional authorities covered. The standard times above assume that each type of review listed will cover the issues delineated in Section III and will be conducted under all applicable authorities.

The final standard times for both complaints and reviews shown on the activity charts are stated in person years. A person year contains 169 person days, that figure representing the number of days available to each investigator for complaint and review activity. The 169-day figure was derived by subtracting from the total working days available in a year, Federal holidays, average annual and sick leave, and an average of days an investigator can be expected to spend performing other activities not directly related to the conduct of specific complaint investigations and reviews, such as providing technical assistance, answering non-case related correspondence, attending meetings and conferences, and participating in training. During FY 1978 efforts will be made to reduce the amount of time spent by investigators on non-case related activities. In addition, for all activities on the charts on which some investigative work will have been completed prior to October 1, the standard times have been reduced by 50 percent.

VII. AOP Monitoring and Adjustment

OCR will regularly monitor progress under the AOP. At the end of the second quarter of the fiscal year it will revise the second six months of the plan as required by assessments of the first six months. The revising will include both the numbers and kinds of activities and the time measures used. For example, if incoming complaints are being received at a rate different than expected at the beginning of the fiscal year, the proportions will be recomputed; or if the standard times previously estimated for completing compliance activities were inaccurate, they will likewise be recomputed and built into the plan.

PART V

DEPARTMENT OF LABOR

Employment Standards Administration

■

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions; Index to General Wage Determination Decisions as of July 1, 1977

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

GROUP I
All crane type equipment with 250' of boom or over (including jib)

GROUP II
All crane type equipment with 200' of boom or over (including jib)

GROUP III
All crane type equipment with 150 - 200' of boom (including jib)

GROUP IV
All crane type equipment with 100 - 150' of boom (including jib), all tower cranes and all crane type equipment of 3 cu. yd. or more (as rated by mfg), sideboom (booms (30' & over), guy derrick

GROUP V
Heavy duty mechanic, welder, crane-hood & overhead monorail, whirley, panel board, batch plant operator, piledriver engineer, dragline, shovel, clamshell, backhoe (3/4 yd & over); sideboom (under 30'), gradeall, hydro crane, cherry picker, hoist while operating 2 or more drums, hoists while doing stacks & chimney work (1 or 2 drums), power driven hole digger (with 30' and longer mast)

GROUP VI
Motor patrol (blade), fork lift (35' & over), dozer (engine h.p. 65 or over) fordson tractor or like equipment with hoe or loader equipment or ditcher, scraper type equipment, tournapull, DW 10, 15, 16, 20, 21 and similar rubber tired equipment, euclid, TS-24 and similar, loader operator or Hi-lift (engine h.p. 65 or over), asphalt lay machine, tail boom, conveyor-multiple, panel board control, powder driven hole digger with less than 30' mast, trenching machine, concrete pump-boom type - Engineers for machine not listed under the above classifications shall receive the scale comparable to these classifications

DECISION NO. OK77-4150

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS (CONT'D)

GROUP VII
Locomotive engineer, boring machine, tug boat, mixer, 18 cu. ft. and over, sand barge, dredging machine, tugger, hoist - when operating one drum, welding machine, 3 to 6, air compressor, 3 to 5, 500 cu. ft. & under, air compressor, over 500 cu. ft. (1) pumps, Battery, 3 to 6, fork-lift, bobcat and similar equipment, generator plant engineer, diesel elec., winch truck with A-frame, roller, all types, outside elevator or building type of personnel, hoist, concrete buster or tamper, heaters under jurisdiction of Operating Engineers, fireman, boiler operator, crushing plants, oiler distributor, pulvimixer, farmer tractor with or without attachiments, batch plant operator (portable), conveyor-operator duel, continuous or belt bulk handling, screed operator, concrete pump, form grader, screening plant, well point pump operator, signal man on large whirleys when and if required, operator for rotary drilling machines when operated from console or machines -- Engineers for machines not listed under the above classifications shall receive the scale comparable to those classifications

GROUP VIII
Greaser, tilt top trailer operator

GROUP IX
Permanent elevator - building type (automatic), concrete mixer, with hopper less than 18 cu. ft., air compressor, 500 cu. ft., and under (1 or 2), welding machine (1 or 2) pump (1 or 2), fuelman, conveyor operator-single-continuous belt bulk handling

GROUP X
Asphalt lay machine back end man, mechanic helper and welder helper

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

GROUP I
All crane type equipment with 250' of boom or over (including jib)

GROUP II
All crane type equipment with 200' of boom or over (including jib)

GROUP III
All crane type equipment with 150 - 200' of boom (including jib)

GROUP IV
All crane type equipment with 100 - 150' of boom (including jib), all tower cranes and all crane type equipment of 3 cu. yd. or more (as rated by mfg), sideboom (booms (30' & over), guy derrick

GROUP V
Heavy duty mechanic, welder, crane-hood & overhead monorail, whirley, panel board, batch plant operator, piledriver engineer, dragline, shovel, clamshell, backhoe (3/4 yd & over); sideboom (under 30'), gradeall, hydro crane, cherry picker, hoist while operating 2 or more drums, hoists while doing stacks & chimney work (1 or 2 drums), power driven hole digger (with 30' and longer mast)

GROUP VI
Motor patrol (blade), fork lift (35' & over), dozer (engine h.p. 65 or over) fordson tractor or like equipment with hoe or loader equipment or ditcher, scraper type equipment, tournapull, DW 10, 15, 16, 20, 21 and similar rubber tired equipment, euclid, TS-24 and similar, loader operator or Hi-lift (engine h.p. 65 or over), asphalt lay machine, tail boom, conveyor-multiple, panel board control, powder driven hole digger with less than 30' mast, trenching machine, concrete pump-boom type - Engineers for machine not listed under the above classifications shall receive the scale comparable to these classifications

DECISION NO. OK77-4166

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS (CONT'D)

GROUP VII
Locomotive engineer, boring machine, tug boat, mixer, 18 cu. ft. and over, sand barge, dredging machine, tugger, hoist - when operating one drum, welding machine, 3 to 6, air compressor, 3 to 5, 500 cu. ft. & under, air compressor, over 500 cu. ft. (1) pumps, Battery, 3 to 6, fork-lift, bobcat and similar equipment, generator plant engineer, diesel elec., winch truck with A-frame, roller, all types, outside elevator or building type of personnel, hoist, concrete buster or tamper, heaters under jurisdiction of Operating Engineers, fireman, boiler operator, crushing plants, oiler distributor, pulvimixer, farmer tractor with or without attachments, batch plant operator (portable), conveyor-operator duel, continuous or belt bulk handling, screed operator, concrete pump, form grader, screening plant, well point pump operator, signal man on large whirleys when and if required, operator for rotary drilling machines when operated from console or machines -- Engineers for machines not listed under the above classifications shall receive the scale comparable to those classifications

GROUP VIII
Greaser, tilt top trailer operator

GROUP IX
Permanent elevator - building type (automatic), concrete mixer, with hopper less than 18 cu. ft., air compressor, 500 cu. ft., and under (1 or 2), welding machine (1 or 2) pump (1 or 2), fuelman, conveyor operator-single-continuous belt bulk handling

GROUP X
Asphalt lay machine back end man, mechanic helper and welder helper

GROUP XI
Truck crane oiler driver or track crane oiler

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

Group 1 - Backfiller, backhoe, concrete mixing plants, batching plants, cable way, derrick, derrick boat, dragline, elevating grader, compressors (2 or more), space heaters, hoist (2 active drums or more), pile driving machine, power crane, power shovel, standard gauge locomotive, trenching machine, tunnel mucking machine, whirley rig, certified welders, concrete paver, double concrete pump, front end loader (over 2 yds.), over 4 welders top scale (more than 6, another man), Eimco type overhead loader, wellpoint system, mighty midget with compressor, twin engine scraper (25 yds. and over), mechanic, mechanic's welder, grader

Group 2 - Tractor with attachments (2 or more), bulldozer

Group 3 - Concrete mixer, concrete pump, one drum hoist, narrow gauge locomotive, power roller, asphalt spreader, pumps (not exceeding 4), well drill, engine driven welders (not exceeding 4) single compressors (over 210 C.F.M.), steam hammer, pile extractor, conveyor, stone crusher, hi-lift, front end loader (up to and including 2 yds.), excavating scoop

Group 4 - Finishing machine, bull float, longitudinal float, screeding machine, concrete spreader, sub grader

Group 5 - Fireman, truck crane oiler, wheel tractor, grease truck operator

Group 6 - Oiler, greaser, mechanic's helper, single compressor (up to 210 C.F.M.)

Group 7 - Operators handling or setting steel, stone, prestressed concrete or machinery, tower cranes

WELDERS: Receive rate prescribed for craft performing operation to which welding is incidental.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES
a. Employer contributes 4% of basic hourly rate for 5 years' service and 2% basic hourly rate for 6 months' to 5 years' service as Vacation Pay Credit. 6 Paid Holidays: A through F.

b. Employees who have been employed for a period of 1 year shall have 3 weeks' vacation with pay. Should a holiday listed below occur within a employee's vacation period he shall be allotted an additional day's vacation. Any employee who has served continuously with one company for 12 or more years as of October 31, 1969, will continue to receive an additional week's vacation. For those employees who have voluntarily quit or are terminated prior to working 12 months, there will be accumulated for such employee by each individual employer for all straight time hours worked, 6% of his gross income for such straight time hours upon termination of such employment.

HOLIDAYS:
Straight time shall be paid when the following holidays are worked:
New Year's Day; President's Day; Memorial Day; Independence Day; Pioneer Day; Labor Day; Thanksgiving Day and Christmas Day.
Other than temporary employees shall be paid for all such holidays regardless upon which day in the week the holiday shall fall. When work is performed on a holiday, an additional straight time rate shall be paid. No work will be performed on Labor Day.

POWER EQUIPMENT OPERATORS
Building Construction

Group 2: Assistant to Engineer; Elevator Operator; Hydraulic Monitor; Material Loader or Conveyor Operator

Group 3: Air Compressor Operator; Concrete Mixer Operator (skip-type); Concrete Pump or Pumpcrete Gun Operator; Generator Operator (100 KW or over); Mixer Box Operator or similar (concrete or asphalt plant Continuous mix); Pump Operator; Truck Crane Oiler

Group 4: Front End Loader (up to and including 1 cu. yd. struck M.R.C.); Hoist Operator - 1 drum; Slip Form Pumps

Grup 4-A: Heavy Duty Repairman and Welder

Group 5: Air Compressor Operator (2 or more compressors); Signalman; Small Rubber-tired Tractor; Small self-propelled pneumatic rollers; Towermobile Operator; Welding Machine (2 or more); Concrete Conveyor, building site

Group 6: A Frame Truck and Tugger Hoist; Fork Lift (construction jobsite); Kolman Loader and similar; Loader Operator (over 1 cu. yd. up to and including 2 cu. yds. struck M.R.C.); McGinnis Internall Full Slab Vibrator (on airports, highways, canals and warehouses); Mixermobile Operator; Ross Carrier or similar type; Small rubber-tired tractor (with attachments, including backhoe); Small rubber-tired Trenching Machine; Small Tractor with boom; Gradesetter

Group 7: Bridge Crane; Concrete Mixer Operator (paving or batch plant); Drilling Machine Operator (well or diamond); Dual Drum Mixers; Hoist Operator - 2 drums; Lull High-lift (40 ft. or similar); Roller Operator or self-propelled Compactors; Tractor Operator (Sheep's foot and compacting equipment); Trenching Machine; Concrete Conveyor or Concrete Pump, Truck or equipment mounted (boom length to apply); Self-propelled Compactor with or without dozer

Group 7-A: Tractor Operator (bulldozer or tractor-drawn scraper or drag-type Shovel or boom attachment, up to and including D-7 or similar)

POWER EQUIPMENT OPERATORS (Cont'd)
Building Construction (Cont'd)

Group 8: Chicago Boom (including Stiff Leg and Sheer Pole); Concrete Batch Plant (multiple units); Loader Operator (over 2 cu. yds. up to and including 5 cu. yds. struck M.R.C.); Self-propelled Boom type Lifting Device (center mount) (10 ton capacity or less M.R.C.)

Group 8-A: Heavy Duty Repairman or Welder; Tractor Operator (bulldozer or tractor-drawn scraper or dragf-type shovel or boom attachment, larger than D-7 or similar)

Group 9: Motor Patrol

Group 10: Loader Operator (over 5 cu. yds. up to and including 12 cu. yds. struck M.R.C.); Universal Equipment Operator (shovel, backhoe, dragline, derrick, derrick barge, clamshell, crane, grade-all, etc.) (up to and including 5 cu. yds. struck M.R.C.); Self-propelled Boom type Lifting Device (center mount); Tower Crane (Linden type or similar designa and capacity)

Group 11: Remote Controlled Cranes and Derricks; Tower Cranes Mobile

Group 11-A: Loader Operator (over 12 cu. yds. struck M.R.C. up to 18 cu. yds. M.R.C.)

Group 11-B: Operator of Helicopter (when used in erection work)

Group 12: Cranes over 125 tons

*SEE AREA DEFINITION following Truck Drivers

POWER EQUIPMENT OPERATORS (Cont'd)
Heavy and Highway Construction

Group 1: Repairman Helper

Group 2: Asphalt Plant Fireman; Assistant to Engineer; Brakeman - Locomotive; Elevator Operator; Fireman; Hydraulic Monitor; Material Loader or Conveyor Operator; Partsman - Field; Repairman Helper - Field

Group 3: Air Compressor Operator; Concrete Mixer Operator (skip-type); Concrete Pump or Pumpcrete Gun Operator; Engineer, Dinky Operator; Generator Operator (100 KW or over); Mixer Box Operator or similar (concrete or asphalt plant continuous mix); Pump Operator; Screedman; Self-propelled, automatically applied concrete curing machine (on street, highways, airports and canals); Truck Crane Oiler; Boxman, Asphalt Plant

Group 4: Ballast Jack Tamper; Ballast Regulator; Ballast Tamper - multiple-purpose; Front End Loader (up to and including 1 cu. yd. struck MRC); Hoist Operator - 1 drum; Line Master; Slip Form Pumps

Group 4-A: Slurry Seal Machine or similar

Group 5: Air Compressor Operator (2 or more compressors); Batch Operator (asphalt plant); Motorman; Pavement Breaker Operator (Emsco and similar type); Shuttlecar; Signalman; Small rubber-tired tractor; Small self-propelled pneumatic rollers; Towermobile Operator; Welding Machine (2 or more); Lube and Service Engineer (mobile and grease rack); Concrete Conveyor (building site)

Group 6: A-Frame Truck and Tugger Hoist; Concrete Saws (self-propelled units on streets, highways, airports and canals); Engineer-locomotive; Fork Lift (construction jobsite); Kolman Loader (and similar); Loader Operator (over 1 cu. yd. up to and including 2 cu. yds. struck MRC); Maginnis Internal Full Slab Vibrator (on airports, highways, canal and warehouses); Mixermobile Operator; Pipe Bending Machine Operator; Pipe Cleaning Machine; Pipe Wrapping Machine; Power Jumbo Operator (setting slip forms, etc., in tunnels); Road Mixing Machine Operator; Ross Carrier or similar type; Small rubber-tired tractor (with attachments, including backhoe); Small rubber-tired Trenching Machine; Small Tractor with boom; Surface Heater (self-propelled); Gradesetter

POWER EQUIPMENT OPERATORS (Cont'd)
Heavy and Highway Construction (Cont'd)

Group 7: Bridge Crane; Chip Box Spreader (Flaherty-type and similar); Concrete Mixer Operator (paving or batch plant); Deck Engineer (Marin); Drilling Machine Operator (well or diamond); Dual Drum Mixers; Elevating Grader Operator; Fuller Kenyon Pump and similar types; Heavy Duty Rotary Drill Rigs (such as Quarry Master, Joy Drills or equal); Hoist Operator - 2 drums; Lull High Lift (40 ft. or similar); Mechanical Finisher Operator (asphalt or concrete); Mine or Shaft Hoist; No-Joint Pipe Laying Machine; Pavement Breaker; Pavement Breaker with Compressor Combination; Pavement Breaker, truck mounted, compressor combination; Refrigeration Plant; Roller Operator or self-propelled Compactor; Self-propelled Pipeline, Wrapping Machine (Perault, CRC, or similar types); Slusher Operator; Tractor Compressor Drill combination; Tractor Operator (Sheep's foot and compacting equipment); Trenching Machine; Concrete Conveyor or Concrete Pump, truck or equipment mounted (boom length to apply); Mechanical Burm, Curb and/or Curb and Gutter Machine, Concrete or Asphalt; Self-propelled Compactor with or without dozer; Drilling and Boring Machinery, Horizontal and Vertical (not to apply to waterliners, wagon drills or jackhammers); Self-propelled Compactor (with multiple-propulsion power units)

Group 7-A: Side Boom Operator; Tractor Operator (Bulldozer or tractor-drawn scraper or drag-type shovel or boom attachment, up to and

Group 8: Chicago Boom (including Stiff Leg and Sheer Pole); Combination Slusher and Motor Operator; Concrete Batch Plant (multiple units); Do-mor Loader and Adams Elegrader; Euclid Loader and similar types; Koehring Skooper (or similar) (up to 5 cu. yds. struck MRC); Loader Operator (over 2 cu. yds. up to and including 5 cu. yds. struck MRC); Mechanical Trench Shield; Mucking Machine Operator; Rubber-tired Scrapers (under 35 cu. yds. struck MRC); Saurman-type Dragline (under 5 cu. yds. struck MRC); Self-propelled Boom-type Lifting Devixe (center mount) (10 ton capacity or less MRC); Self-propelled Elevating Grade Plane; Soil Stabilizer (P&H or equal); Subgrader (automatic subgrader - fine grader); Tri-batch Paver; Tunnel Mole (or similar); Asphalt Plant Engineer; Engineer, crushing plant; Combination Backhoe and Loader (3/4 yds. and over struck MRC)

POWER EQUIPMENT OPERATORS (Cont'd)
Heavy and Highway Construction (Cont'd)

Group 8-A: Heavy Duty Repairman or Welder; Tractor Operator (bull-dozer or tractor-drawn scraper or drag-type shovel or boom attach-ment, larger than D-7 or similar)

Group 9: Combination Mixer and Compressor (gunite); Highline Cable-way Signalman; Motor Patrol; Tower Crane (Linden-type or similar designs and capacity)

Group 10: D.W. 10, 20, etc. (Tandem Scrapers); Highline Cableway Operator; Lift Slab Machine (Vagtborg and similar types); Loader Operator (over 5 cu. yds. up to and including 12 cu. yds. struck MRC); Locomotive (over 100 tons) (single or multiple units); Pre-stree Wire Wrapping Machine; Saurman-type Dragline (5 cu. yds. and over struck MRC); Tractor (tandem scrapers); Universal Equip-ment Operator (shovel, backhoe, dragline, derrick, derrick barge, clamshell, crane, gradeall, etc.) (up to and including 5 cu. yds. struck MRC); Self-propelled Boom-type lifting device (center mount (over 10 tons)

Group 11: Automatic Concrete Slip Form Paver; Koehring Skooper (or similar) (5 cu. yds. and over struck MRC); Multiple Pro-pulsion power unit earth movers (up to and including 75 cu. yds. struck MRC); Power Equipment with Shovel-type controls (over 5 cu. yds. up to and including 7 cu. yds. struck MRC); Remote-controlled Cranes and Derricks; rubber-tired Scrapers (35 cu. yds. and over struck MRC); Slip Form Paver (concrete or asphalt); Tandem Tractors; tower Cranes Mobile

Group 11-A: Loader Operator (over 12 cu. yds. struck MRC up to 18 cu. yds. MRC); Multi-purpose earth moving machines (2 or more scrapers) (over 75 cu. yds. struck MRC); Power Shovels and Drag-lines (over 7 cu. yds. struck MRC)

Group 11-B: Operator of Helicopter (when used in erection work); Loader (18 cu. yds. and over)

Group 12: Cranes over 125 tons)

POWER EQUIPMENT OPERATORS (Cont'd)
Steel Erection

Group 1: Assistant to Engineer (oiler)

Group 2: Compressor Operator; Generator, gasoline or diesel driven (100 KW or over)(structural steel or tank erection only); Assistant to Engineer (truck crane oiler)

Group 3: Compressors, Generators and/or Welding Machines or Combination (2 to 6)(structural steel or tank erection only); Deck Engineer; Signalman (using mechanical equipment); Fork Lift

Group 4: Heavy Duty Repairman; Tractor Operator

Group 4-A: Combination Heavy Duty Repairman - Welder

Group 5: Dual-purpose A-Frame or Boom Truck; Boom Cat; Chacago Boom; Crawler Cranes and Truck Cranes (15 tons MRC or less); Self-propelled Boom-type Lifting Device (center mount)(10 ton capacity or less MRC); Single Drum Hoist; Tugger Hoist

Group 6: Crawler Cranes and Trucks Cranes (over 15 tons MRC); Derricks; Highline Cableway; Gantry Rider (or similar equipment); Self-propelled Boom-type Lifting Device (center mount) (over 10 tons); Tower Cranes Mobile (including rail mounted); Universal Liebher and Tower Cranes (and similar types); 2 or more drum Hoist

Group 6-A: Cranes (over 125 tons)

Group 7: Operator of Helicopter

POWER EQUIPMENT OPERATORS (Cont'd)
Piledriving

Group 1-A: Assistant to Engineer (deckhand, fireman, oiler)

Group 1-B: Compressor Operator

Group 1-C: Assistant to Engineer (truck crane oiler)

Group 2-A: Operator of Tugger Hoist (hoisting materials only)

Group 2-B: Compressor Operator (over 2); Generators; Pumps; Welding Machines (powered other than by electricity)

Group 3: Deck Engineer; Fork Lift Operator; A-Frame; Self-propelled Boom-type Lifting Device (center mount) (10 ton capacity or less MRC)

Group 3-A: Heavy Duty Repairman and/or Welder

Group 4: Operating Engineer in lieu of Assistant to Engineer tending boiler or compressor attached to Crane Piledriver; Operator or Piledriving Rigs, skid or floating and derrick barges; Operator of diesel or gasoline powered Crane Piledriver (without boiler) up to and including 1 cu. yd. rating; Self-propelled Boom-type lifting device (center mount) (over 10 tons); Truck Cranes Operator (up to and including 25 tons) (hoisting material only)

Group 5: Operator of diesel or gasoline powered Crane Piledriver (without boiler) over 2 cu. yd. rating; Operator of Crane (with steam, flash boiler, pump or compressor attached); Operator of steam powered Crawler or Universal-type Driver (Raymond or similar type); Truck Crane Operator (over 25 tons) (hoisting material or performing piledriving work)

Group 6: Cranes (over 125 tons)

Laborers
(Heavy and Highway Construction)
Power Equipment Operators
Building Construction)
(Heavy and Highway Construction)
Truck Drivers

Area 1: All areas included in the description defined below which is based upon township and range lines as referenced to the Salt Lake City Base and Meridian:

Commencing at the intersection of the Utah/Nevada border and the Southerly line of township 35 south;
Thence easterly to the S.E. corner of township 35 south, range 17 west;
Thence northerly to the S.E. corner of township 34 south, range 17 west;
Thence easterly to the S.E. corner of township 34 south, range 16 west;
Thence northerly to the S.E. corner of township 30 south, range 16 west;
Thence easterly to the S.E. corner of township 30 south, range 15 west;
Thence northerly to the S.E. corner of township 25 south, range 15 west;
Thence easterly to the S.E. corner of township 25 south, range 14 west;
Thence northerly to the S. E. corner of township 24 south, range 14 west;
Thence easterly to the S.E. corner of township 24 south, range 13 west;
Thence northerly to the S.E. corner of township 23 south, range 13 west;
Thence easterly to the S.E. corner of township 23 south, range 12 west;
Thence northerly to the S.E. corner of township 18 south, range 12 west;
Thence easterly to the S.E. corner of township 18 south, range 11 west;
Thence northerly to the S.E. corner of township 16 south, range 11 west;
Thence easterly to the S.E. corner of township 16 south, range 10 west;
Thence northerly to the S.E. corner of township 15 south, range 10 west;
Thence easterly to the S.E. corner of township 15 south, range 9 west;
Thence northerly to the S.E. corner of township 14 south, range 9 west;
Thence easterly to the S.E. corner of township 14 south, range 8 west;
Thence northerly along the easterly line of range 8 west, crossing the Salt Lake Base Line to the intersection of the easterly line of range 8 west and the northerly border of Utah;
Thence easterly along the northerly border of Utah crossing the Salt Lake Meridian to the Utah/Idaho/Wyoming border;
Thence southerly along the Utah/Wyoming border;
Thence easterly along the Utah/Wyoming border to the intersection of the Utah/Wyoming border and Longitude 111 degrees west;
Thence southerly along Longitude 111 degrees west crossing the Salt Lake Base Line to the intersection of Longitude 111 degrees west and the southerly line of township 4 south;
Thence easterly along the southerly line of township 4 south to the S.E. corner of township 4 south, range 17 east;

AREA DEFINITIONS (Cont'd)

AREA 1: (Cont'd)

Thence northerly to the S. E. corner of township 1 south, range 17 east;
Thence easterly along the southerly line of township 1 south to the intersection of the Utah/Colorado border;
Thence southerly along the Utah/Colorado border to the intersection of the Utah/Colorado border and the southerly line of township 7 south;
Thence westerly along the southerly line of township 7 south to the S.W. corner of township 7 south, range 20 east;
Thence southerly to the S.E. corner of township 8 south, range 19 east;
Thence westerly along the southerly line of township 8 south to the S. E. corner of township 8 south, range 12 east;
Thence southerly along the easterly line of range 12 east to the S. E. corner of township 20 south, range 12 east;
Thence westerly along the southerly line of township 20 south to the S.E. corner of township 20 south, range 3 east;
Thence southerly along the easterly line of range 3 east to the S.E. corner of township 27 south, range 3 east;
Thence westerly to the intersection of the southerly line of township 27 south and the Salt Lake Meridian, thence southerly along the Salt Lake Meridian to the intersection of the Salt Lake Meridian and the southerly line of township 39 south;
Thence westerly crossing the Salt Lake Meridian to the S.E. corner of township 39 south, range 2 west;
Thence southerly to the S.E. corner of township 41 south, range 2 west;
Thence westerly to the S.E. corner of township 41 south, range 3 west;
Thence southerly along the easterly line of range 3 west to the Utah/Arizona border;
Thence westerly along the Utah/Arizona border to the Utah/Arizona/Nevada border;
Thence northerly along the Utah/Nevada border to the point of beginning; commencing at the intersection of the Utah/Colorado border and the southerly line of township 34 south;
Thence westerly to the S.W. corner of township 34 south, range 21 east;
Thence northerly to the S.W. corner of township 29 south, range 21 east;
Thence westerly to the S.W. corner of township 29 south, range 19 east;
Thence northerly to the N.W. corner of township 23 south, range 19 east;
Thence easterly to the N.W. corner of township 23 south, range 22 east;
Thence northerly to the N.W. corner of township 21 south, range 22 east;
Thence easterly to the N.E. corner of township 21 south, range 24 east;
Thence southerly to the N.E. corner of township 31 south, range 24 east;
Thence easterly along the northerly line of township 31 south, to the Utah/Colorado border;
Thence southerly along the Utah/Colorado border to the point of beginning

AREA 2: All areas not included in Area 1 as defined.

DEPARTMENT OF LABOR

Employment Standards Administration

INDEX TO GENERAL WAGE DETERMINATION DECISIONS AND MODIFICATIONS AS OF JULY 1, 1977

There is set forth below an index to general wage determination decisions and modifications as published in the FEDERAL REGISTER pursuant to the Davis-Bacon and related Acts. The index lists general wage determination decisions and modifications by State and County. An updated index is published on the first Friday of each month.

The index is published for the convenience of the public and the Department of Labor will endeavor to keep it accurate and up to date. In the event the data in the index and published general decisions do not coincide, the published general decisions shall control.

Abbreviations:

(B)—Building Construction
(D)—Dredging
(F)—Flood Control Construction
(H)—Heavy Construction
(Hw)—Highway Construction
(R)—Residential Construction
Mod.—Modification
(HE)—Heavy Engineering
(LE)—Light Engineering
(U)—Utility
(W&S)—Water and Sewer

Signed at Washington, D.C. this 29th day of July 1977.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Privacy Act; systems of records ---- 40007

CIVIL AERONAUTICS BOARD

Notices

Hearings, etc.:
World Jet Inc. et al ---- 40007

COAST GUARD

Rules

Merchant marine officers and seamen:
Motorboat operators and staff officers, licensing and registration; birth registration use for officer licenses ---- 39978

Proposed Rules

Engineering equipment specifications; oil pollution prevention equipment; extension of time ---- 40000
Pollution:
Tank vessels carrying oil in bulk; extension of time ---- 39999

COMMERCE DEPARTMENT

See also Economic Development Administration.

Rules

Privacy Act; systems of records ---- 39976

COMPTROLLER OF CURRENCY

Rules

Rulings:
Bad debts; deduction from profits for dividend payment ---- 39969

DEFENSE DEPARTMENT

See also Air Force Department; Army Department; Navy Department.

Notices

Meetings:
Electron Devices Advisory Group (4 documents) ---- 40008

ECONOMIC DEVELOPMENT ADMINISTRATION

Rules

Organization and establishment:
Special Projects Office ---- 39970

ENVIRONMENTAL PROTECTION AGENCY

Rules

Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.:
Bentazon ---- 39977
Water pollution control:
Analysis of pollutants; test procedures; correction ---- 39977

Notices

Air pollution control, new motor vehicles and engines:
Chrysler Corp.; recall order; hearing ---- 40009
Pesticide registration:
Nitrosamines ---- 40009

FEDERAL AVIATION ADMINISTRATION

Rules

Airworthiness directives:
Eiriavion OY ---- 39971
Grumman American ---- 39971
McDonnell Douglas ---- 39972
Control zones (2 documents) ---- 39973, 39974
Control zones and transition areas ---- 39976
Transition areas (5 documents) ---- 39972–39975

Proposed Rules

Transition areas (3 documents) ---- 39993, 39994

FEDERAL COMMUNICATIONS COMMISSION

Rules

FM broadcast stations; table of assignments:
California ---- 39982
Indiana ---- 39981
Radio frequency devices:
RF equipment, wide-band swept ---- 39979

Proposed Rules

Telephone companies:
Tariffs, interface of International Telex Service with Domestic Telex and TWX Services; extension of time ---- 40002
Television broadcast stations:
VHF stations, adding in top 100 markets; extension of time ---- 40003

Notices

Domestic public radio services; applications accepted for filing ---- 40015
FM broadcast stations, table of assignments:
Missouri ---- 40017
Meetings:
Marine Services Radio Technical Commission ---- 40019

FEDERAL CROP INSURANCE CORPORATION

Rules

Crop insurance, various commodities:
Citrus ---- 39956
Oranges ---- 39953

FEDERAL ELECTION COMMISSION

Notices

Advisory opinion requests (2 documents) ---- 40101

FEDERAL ENERGY ADMINISTRATION

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

PART 406—CALIFORNIA ORANGE CROP INSURANCE

Subpart—Regulations for the 1977 and Succeeding Crop Years

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule provides the regulations governing the insuring of oranges grown in California effective with the 1977 and succeeding crop years, and is a revision of the California Orange Crop Insurance Regulations for the 1963 and Succeeding Crop Years, as amended, as published in the FEDERAL REGISTER (28 FR 6528, June 26, 1963). The revisions made in this document are nonsubstantive and deal with the format in an effort to improve the clarity.

EFFECTIVE DATE: July 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3197).

SUPPLEMENTARY INFORMATION: The Federal Crop Insurance Corporation, in accordance with the provisions of the Administrative Procedures Act (5 U.S.C. 553 (b) and (c)), regarding the procedure for notice and public participation, published the California Orange Crop Insurance Regulations in the FEDERAL REGISTER as a notice of proposed rule making (42 FR 33313, June 30, 1977), allowing the public an opportunity to file written data, views, or comments on the proposed regulations, but none were received. The proposed regulations were considered nonsubstantive in nature and dealt with the restructuring of the document to place the meaning of terms sections at the beginning; elimination of the application section in favor of utilizing the Standard Application Form (FCI–12), authorization for the Manager to extend the closing dates for the taking of applications, and minor editorial changes for clarity.

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), 7 CFR Part 406 is revised to read as set forth below and the regulations contained therein are hereby issued to be in force with respect to California Orange Crop Insurance contracts for the 1977 and succeeding crop years until amended or superseded.

Subpart—Regulations for the 1977 and Succeeding Crop Years

Sec.

406.1 Availability of California orange crop insurance.
406.2 Premium rates and amounts of insurance.
406.3 Application for insurance.
406.4 Public notice of indemnities paid.
406.5 Creditors.
406.6 The policy.

AUTHORITY: The provisions of this subpart are issued under secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U.S.C. 1506, 1516.

§ 406.1 Availability of California orange crop insurance.

Orange crop insurance shall be offered for the 1977 and succeeding crop years under the provisions of § 406.1 through § 406.6 in counties in California within the limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from a list of counties approved by the Board of Directors for orange crop insurance. The counties designated by the Manager for orange crop insurance under this subpart for the 1977 and succeeding crop years are as follows: California: Fresno, Kern, and Tulare.

§ 406.2 Premium rates and amounts of insurance.

(a) The Manager shall establish premium rates and amounts of insurance per acre which shall be shown on the county actuarial table on file in the office for the county. Such premium rates and amounts of insurance may be changed from year to year.

(b) The following shall apply to the transfer of any premium reduction earned under the provisions of section 7 of the Policy set forth in § 406.6 if the insured is a partnership, corporation, or any other joint enterprise and there is no break in the continuity of participation. Upon dissolution of such enterprise, such premium reduction may be credited to the contract of any member or stockholder thereof if the Corporation determines that such person is operating only land formerly operated by the dissolved enterprise. Upon formation of a joint enterprise, the smallest premium reduction (zero if none), which the Corporation determines would have been applicable to any insurable acreage brought into the enterprise if the enterprise had not been formed, may be credited to the joint enterprise contract.

§ 406.3 Application for insurance.

An application for insurance, on a form prescribed by the Corporation, may be submitted at the office for the county for the Corporation. Prior to the closing date for the filing of applications, the Corporation reserves the right to discontinue the taking of applications in any county upon its determination that the insurance risk involved is excessive, or to limit the amount of insurance. Such closing date shall be the September 30 immediately preceding the beginning of the crop year. The Corporation further reserves the right to reject any application or to exclude any definitely identified acreage for any crop year of the contract if upon inspection it deems the risk on such acreage is excessive. If any such acreage is to be excluded, the insured shall be notified of such exclusion before insurance attaches for the crop year for which the acreage is to be excluded. The Manager of the Corporation is authorized in any crop year to extend the closing date for acceptance of applications in any county by amendment to the regulations upon his determination that no adverse selectivity exists: *Provided, however,* That if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

§ 406.4 Public notice of indemnities paid.

The Corporation shall provide for posting annually at each county courthouse a listing of the indemnities paid in the county.

§ 406.5 Creditors.

An interest of a person other than the insured in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or any involuntary transfer shall not entitle the holder of the interest to any benefit under the contract other than as provided in the Policy set forth in § 406.6.

§ 406.6 The policy.

The provisions of the policy for California Orange Crop Insurance for the 1977 and Succeeding Crop Years are as follows:

CALIFORNIA ORANGE CROP INSURANCE POLICY

Subject to the regulations of the Federal Crop Insurance Corporation (herein called "Corporation") and in accordance with the terms and conditions set forth in this policy, the Corporation upon acceptance of a person's application does insure such person against unavoidable loss of production of the insured's orange crop due to freeze. No

term or condition of the contract shall be waived or changed on behalf of the Corporation except in writing by a duly authorized representative of the Corporation.

TERMS AND CONDITIONS

1. *Meaning of terms.* For purposes of insurance on oranges the terms:

(a) "Acreage report" means the form prescribed by the Corporation for initially reporting and revising (if necessary) all of the insured's acreage and share therein or oranges in the county.

(b) "Actuarial table" means the forms and related materials approved by the Corporation which are on file for public inspection in the office for the county, and which show the applicable amounts of insurance, premium rates, and related information regarding orange crop insurance in the county.

(c) "Box" or "Boxes" means a standard field box as prescribed in the Agricultural Code of California.

(d) "Contiguous land" means land which is touching at any point, except that land which is separated by only a public or private right-of-way shall be considered contiguous.

(e) "Contract" means the application, this policy, and the actuarial table.

(f) "County" means the county shown on the application and any additional insurable land located in a local producing area bordering on the county, as shown on the actuarial table.

(g) "Crop year" means the period beginning October 1 and extending through September 30 of the following year and shall be designated by the calendar year in which the insurance period begins.

(h) "Harvest" means any severance of oranges from the tree either by pulling, picking, or severing by mechanical or chemical means, or picking up the marketable oranges from the ground.

(i) "Insurable acreage" means the acres of oranges as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, grown on the following: (1) land classified as insurable by the Corporation and shown as such on the actuarial map or appropriate land identification list or (2) land owned or operated by a person to whom a grove classification is assigned by the Corporation or as otherwise provided on the actuarial table.

(j) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(k) "Person" or "Insured" means an individual, partnership, association, corporation, estate, trust, or other business enterprise, or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(l) "Potential" means the production which would have been produced before freeze damage occurred, and shall include oranges which (1) were picked before the freeze damage occurred; (2) remained on the trees after the freeze damage occurred; (3) were lost from freeze; and (4) were lost from an uninsured cause. The potential shall not be less than 200 boxes per acre and shall not include oranges lost or harvested before insurance attaches for any crop year, or oranges lost by normal dropping.

(m) "Share" means the share of the insured as landlord, owner-operator, or tenant in the insured oranges as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect. and no other share in the orange crop shall be deemed to be insurable.

(n) "Tenant" means a person who rents land from another person for a share of the crop or proceeds therefrom.

(o) "Time of loss" means the earlier of (1) the date harvest is completed on the unit or (2) the date the entire crop on the unit is destroyed, as determined by the Corporation.

(p) "Unit" means all insurable acreage in the county of either Navel or Valencia oranges located on contiguous land, on the date insurance attaches for the crop year, (1) in which the insured has a 100 percent share; (2) which is owned by one person and operated by the insured as a tenant; or (3) which is owned by the insured and rented to one tenant. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the crop on such land only shall be considered as owned by the lessee. The Corporation shall determine units as herein defined when adjusting a loss, notwithstanding what is shown on the acreage report, and has the right to consider any acreage and share reported by or for the insured's spouse or child or any member of the insured's household to be the bona fide share of the insured or any other person having the bona fide share.

2. *Cause of loss.* (a) The insurance provided is against unavoidable freeze loss occurring within the insurance period to oranges which are set from the annual bloom.

(b) The contract shall not cover any loss or damage: (1) to the blossoms or trees; (2) due to neglect or malfeasance of the insured, any member of the insured's household, tenants, or employees; (3) due to failure to follow recognized good grove management practices; or (4) due to any cause other than freeze.

3. *Oranges insured.* (a) The oranges insured shall be either or both Navel or Valencia varieties as designated on the insured's application for insurance, and not excluded by the following provisions of this section, which are located on insurable acreage as shown on the actuarial table, and in which the insured has a share on the date insurance attaches: *Provided,* That (1) the oranges can be expected to mature each crop year in the normal maturity period for the variety and (2) the trees have reached at least the sixth growing season after being set out.

(b) Upon approval of the Corporation, the insured may elect to insure or exclude from insurance for any crop year any reported, described, and designated insurable acreage which has a potential of less than 200 boxes per acre. If the insured elects to insure such acreage, the Corporation will, in determining the amount of loss, increase the potential on such acreage to 200 boxes per acre. If the insured elects to exclude such acreage, the Corporation will disregard such acreage for all purposes of his contract. If the insured does not report, exclude, describe, and designate any such acreage, the Corporation will disregard such acreage if the production is less than 200 boxes per acre; however, if the production from such acreage is 200 or more boxes per acre, the Corporation shall determine the percent of damage on all of the insurable acreage for the unit, but will not permit the percent of damage for the unit to be increased by including such acreage.

(c) The Corporation reserves the right for any crop year to exclude acreage from insurance or limit the amount of insurance on any acreage which was not insured the previous crop year.

4. *Life of contract and contract changes.* (a) The contract shall be in effect for the crop year specified on the application, and may not be canceled for such crop year. Thereafter, either party may cancel insurance on either variety of oranges for any crop year by giving written notice to the other by the July 31 immediately preceding such crop year. In the absence of such notice to cancel, and subject to the provisions of subsections (b), (c), and (d) of this section, the contract shall continue in force for each succeeding crop year.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution; however, if such event occurs after insurance attaches for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

(c) If the premium for any crop year is not paid by the Septemer 30 following the calendar year in which the insurance period begins, the contract shall terminate for the succeeding crop year: *Provided,* That the date of payment for a premium (1) deducted from a loss claim shall be the date the insured signs such claim or (2) deducted from payment under another program administered by the U.S. Department of Agriculture shall be the date such payment was approved.

(d) The contract shall terminate if no premium is earned for three consecutive years.

(e) The Corporation reserves the right to change the terms and conditions of the contract from year to year. Notice thereof shall be mailed to the insured or placed on file and made available for public inspection at the office for the county by July 15 immediately preceding the crop year for which such changes are to become effective, and such mailing or filing shall constitute notice to the insured. Acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in subsection (a) of this section.

(f) At the time the application for insurance is made, the applicant shall elect an amount of insurance per acre from among those shown on the county actuarial table. For any crop year, the insured may with the consent of the Corporation change the amount of insurance per acre which was previously elected by notifying the Corporation in writing not later than September 30 immediately preceding such crop year.

5. *Responsibility of the insured to report acreage and share.* (a) The insured at the time of filing the application shall also file on a form prescribed by the Corporation a report of all the acreage of insured oranges in the county in which the insured has a share and show the share therein. Such report shall also include a designation of any acreage which is uninsurable or excluded under the provisions of section 3 above. This report shall be revised by the insured for any crop year before insurance attaches if the acreage to be insured or share therein has changed, and the latest report filed shall be considered as the basis for continuation of insurance from year to year.

(b) If the insured does not submit a report for any crop year in accordance with the provisions of subsection (a) of this section, the Corporation may elect to determine by units the insured acreage and share or

declare the insured acreage for any unit(s) to be "zero."

6. *Insurance period.* Insurance attaches each crop year on October 1, except that for the first crop year if the application is accepted by the Corporation after that date, insurance shall attach on the tenth day after the application is received in the office for the county, and as to any portion of the orange crop, shall cease upon the earlier of harvests or March 31 of the crop year.

7. *Annual premium.* (a) The annual premium for each insurance unit is earned and payable on the date insurance attaches and shall be determined by multiplying the applicable amount of insurance per acre times the applicable premium rate, times the insured's share at the time insurance attaches and, where applicable, applying the premium reduction or adjustment herein provided.

(b) In counties where the actuarial table does not provide for adjustments in premium, the total annual premium on all units shall be reduced as follows after consecutive years of insurance without a loss for which an indemnity was paid on any unit hereunder (eliminating any year in which a premium was not earned): 5 percent after one and two years; 10 percent after three and four years; 15 percent after five years; 20 percent after six years; and 25 percent after seven or more years. However, if the insured has a loss for which an indemnity is paid hereunder, the number of such consecutive years of insurance without a loss shall be reduced by three years, except that where the insured has seven or more such years, a reduction to four shall be made and where the insured has three or less such years, a reduction to zero shall be made: *Provided,* That if at any time, the cumulative indemnities paid hereunder exceed the cumulative premiums earned hereunder from the start of the insuring experience through the previous crop year, the 5, 10, or 15 percent premium reductions in this subsection shall not thereafter apply until such cumulative premiums equal or exceed such cumulative indemnities.

(c) In counties where the actuarial table provides for adjustments in premiums, the provisions of subsection (b) of this section shall not apply.

(d) If there is no break in the continuity of participation, any premium reduction or adjustment applicable under subsection (b) or (c) of this section shall be transferred to (1) the contract of the insured's estate or surviving spouse in case of death of the insured; (2) the contract of the person who succeeds the insured as the insured's transferee in operating only the same grove or groves, if the Corporation finds that such transferee had previously actively participated in the grove operations involved; or (3) the contract of the same insured who stops operating a grove in one county and starts operating a grove in another county.

(e) If there is a break in the continuity of participation, subsection (b) of this section or any reduction in premium earned under subsection (c) of this section shall not thereafter apply.

8. *Notice of damage or loss.* (a) The insured shall give notice to the office for the county immediately after freeze damage to the oranges becomes apparent, giving the date(s) of such damage so that an inspection and determination of the extent of damage can be made prior to harvest.

(b) If a loss is to be claimed on any unit, notwithstanding any prior notice of damage, the insured shall notify the office for the county of the intended date of harvest at least seven days prior to the start of harvest.

(c) If a loss is to be claimed on any unit and if damage occurs within the seven-day period prior to the start of harvest or during harvest, notice of damage must be given immediately to the office for the county.

(d) Notwithstanding any other provisions of this section, no insured freeze damage shall be deemed to have occurred on any acreage unless a notice of damage therefor is given to the office for the county within 30 days after the end of the insurance period for Navel oranges and 60 days after the end of the insurance period for Valencia oranges.

(e) The Corporation reserves the right to reject any claim if any of the requirements of this section are not met and the Corporation determines that the amount of loss cannot be satisfactorily determined.

(f) There shall be no abandonment of the orange crop to the Corporation.

9. *Claim for loss.* (a) Any claim for loss for any unit shall be submitted to the Corporation on a form prescribed by the Corporation within 60 days after the time of loss, but no later than July 31 for Navel oranges and September 30 for Valencia oranges of the crop year. The Corporation reserves the right to provide additional time if it determines that circumstances beyond the control of either party prevent compliance with this provision.

(b) Losses shall be adjusted separately for each unit. The amount of loss with respect to any unit shall be determined by (1) multiplying the amount of insurance for the unit by the average percent of insured damage in excess of 10 percent (i.e. average damage 45%−10%=35% payable); and (2) multiplying this product by the insured share: *Provided,* That for the purpose of determining the amount of loss, the insured share shall not exceed the insured's share in the orange crop at the time of loss or the beginning of harvest, whichever is earlier.

(c) The average percent of damage to the oranges for any unit shall be the ratio of the number of boxes of oranges lost from freeze to the potential. In determining the number of boxes of oranges lost, the average percent of damage shall be applicable only to fruit which was not or could not be packed as fresh fruit.

(d) Any oranges which (1) are or could be marketed as fresh fruit or (2) are harvested prior to an inspection by the Corporation shall be considered as undamaged.

(e) The determination of serious freeze damage to oranges will be made by the Corporation in accordance with the Agricultural Code of California, and such determination shall be the actual oranges lost as shown by cuts made of representative samples of fruit in the grove, regardless of whether or not damaged fruit can be separated from undamaged fruit without cutting: *Provided,* That for any portion of the Navel orange crop which has 55 percent or less damage, the percent so determined shall be increased one additional percentage point for each full percent of damage in excess of 30 percent; however, the total allowable percent of damage shall not exceed 80 percent. If the actual percent of damage as determined by such cuts is in excess of 80, the percent of damage so determined shall be allowed.

(f) Any oranges on the ground as a result of freeze which are not marketed shall be considered as damaged the greater of 70 percent or the percent of damage determined by cuts made of repersentative samples of oranges in the grove, including any increased percentage in the case of Navels; however, if over 90 percent of the potential production on any acreage is on the ground as a result of freeze, the percent of damage for such oranges shall be considered 90 percent.

(g) A final grove inspection to determine the extent of serious freeze damage to oranges which are unharvested at the end of the insurance period shall be made within 30 days after the end of the insurance period for Navels and 60 days for Valencias, or as soon thereafter as possible.

(h) It shall be a condition precedent to payment of any claim that the insured furnish production records and any other information required by the Corporation regarding the manner and extent of damage, including authorizing the Corporation to examine and obtain any record pertaining to the production and or marketing of the oranges insured under this contract from the packinghouse and the Naval Orange and Valencia Orange Administrative Committees established under orders issued by the U.S. Department of Agriculture, pursuant to the Agricultural Marketing Agreement Act of 1937, as amended. The Corporation has the right to delay the final determination of the average percent of damage and the settlement of any claim until the insured makes available to it complete records of the marketing of the oranges for the crop year.

(i) If the Corporation determines that frost protection equipment was not properly utilized or properly reported, the indemnity otherwise computed for the unit shall be reduced by the percentage of premium reduction allowed for frost protection equipment It is the responsibility of the insured to provide the Corporation a record of dates showing each use of frost protection equipment, including the starting and ending times for the period of use.

(j) If any claim for indemnity under the provisions of the contract is denied by the Corporation, an action on such claim may be brought against the Corporation under the provisions of 7 U.S.C. 1508(c): *Provided,* That the same be brought within one year after the date notice of denial of the claim is mailed to and received by the insured.

10. *Payment of indemnity.* (a) Any indemnity will be payable within 30 days after a claim for loss is approved by the Corporation. However, in no event shall the Corporation be liable for interest or damages in connection with any claim for indemnity whether such claim be approved or disapproved by the Corporation.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved after insurance attaches for any crop year, any indemnity will be paid to the person(s) the Corporation determines to be beneficially entitled thereto.

11. *Misrepresentation and fraud.* The Corporation may void the contract without affecting the insured's liability for premiums or waiving any right or remedy including the right to collect any unpaid premiums if at any time, either before or after any loss, the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

12. *Collateral assignment.* Upon submission and approval of forms prescribed by the Corporation, the insured may assign the right to an indemnity for any crop year and the assignee shall have the right to submit the loss notices and forms as required by the contract.

13. *Transfer of insured share.* If the insured transfers all or any part of the insured share in any crop year, the Corporation will, upon submission and approval of forms prescribed by the Corporation, continue to provide protection according to the provisions of the policy to the transferee for such crop year with respect to the transferred share

and the transferee shall have the same rights and responsibilities under the contract as the transferor for the current crop year.

14. *Subrogation.* The insured (including any assignee or transferee) assigns to the Corporation all rights of recovery against any person for loss or damage to the extent that payment hereunder is made and shall execute all papers required and take appropriate action to secure such rights.

15. *Records and access to grove.* The insured shall keep or cause to be kept for two years after the time of loss, separate records of the harvesting, storage, shipments, sale, or other disposition of all insured variety(s) of oranges produced on each unit and on any uninsured acreage of such oranges in the county in which the insured has a share. Any persons designated by the Corporation shall have access to such records and the grove for purposes related to the contract.

16. *Forms.* Copies of forms referred to in the contract are available at the office for the county.

NOTE.—The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

NOTE.—The Federal Crop Insurance Corporation has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

W. OTTO JOHNSON,
Acting Manager, Federal Crop Insurance Corporation.

PART 409—ARIZONA-DESERT VALLEY CITRUS CROP INSURANCE

Subpart—Regulations for the 1977 and Succeeding Crop Years

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule provides the regulations governing the insuring of citrus grown in the Arizona-Desert Valley region effective with the 1977 crop year and is a revision of the Arizona-Desert Valley Citrus Crop Insurance Regulations for the 1974 and Succeeding Crop Years, as published in the FEDERAL REGISTER of June 26, 1974 (39 FR 23045). The revisions made in this document are nonsubstantive and deal with the format in an effort to improve the clarity.

EFFECTIVE DATE: July 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-3197.

SUPPLEMENTARY INFORMATION: The Federal Crop Insurance Corporation, in accordance with the provisions of the Administrative Procedures Act (5 U.S.C. 553 (b) and (c)), regarding the procedure for notice and public participation, published the Arizona-Desert Valley Citrus Crop Insurance Regulations in the FEDERAL REGISTER on June 30, 1977, as a notice of proposed rule making (42 FR 33310) allowing the public an opportunity to file written data, views, or comments on the proposed regulations, but none were received. The proposed regulations were considered nonsubstantive in nature and dealt with the restructuring of the document to place the meaning of terms section at the beginning; elimination of the application section in favor of utilizing the Standard Application Form (FCI-12), and minor editorial changes for clarity.

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), 7 CFR Part 409 is revised to read as set forth below and the regulations contained therein are hereby issued to be in force with respect to Arizona-Desert Valley Citrus Crop Insurance contracts for the 1977 and Succeeding Crop Years until amended or superseded.

Subpart—Regulations for the 1977 and Succeeding Crop Years

Sec.

409.30 Availability of Arizona-Desert Valley Citrus Crop Insurance.
409.31 Premium rates and amounts of insurance.
409.32 Application for insurance.
409.33 Public notice of indemnities paid.
409.34 Creditors.
409.35 The policy.

AUTHORITY: The provisions of this subpart are issued under secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U.S.C. 1506, 1516.

§ 409.30 Availability of Arizona-Desert Valley Citrus Crop Insurance.

Citrus crop insurance shall be offered for the 1977 and succeeding crop years under the provisions of §§ 409.30 through 409.35 in counties in Arizona and the Desert Valley within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from a list of counties approved by the Board of Directors of the Corporation for citrus crop insurance. The counties designated by the Manager for citrus crop insurance under this subpart for the 1977 and succeeding crop years are as follows: Arizona, Maricopa.

§ 409.31 Premium rates and amounts of insurance.

(a) The Manager shall establish premium rates and the amounts of insurance per standard box which shall be shown on the county actuarial table on file in the office for the county. Such premium rates and amounts of insurance may be changed from year to year.

(b) The following shall apply to the transfer of any premium reduction earned under the provisions of section 8 of the Policy set forth in § 409.35 if the insured is a partnership, corporation, or any other joint enterprise and there is no break in the continuity of participation. Upon dissolution of such enterprise, such premium reduction may be credited to the contract of any member or stockholder thereof if the Corporation determines such person is operating only land formerly operated by the dissolved enterprise. Upon formation of a joint enterprise, the smallest premium reduction (zero if none), which the Corporation determines would have been applicable to any insurable acreage brought into the enterprise if the enterprise had not been formed, may be credited to the joint enterprise contract.

§ 409.32 Application for insurance.

An application for insurance on a form prescribed by the Corporation, may be submitted at the office for the county for the Corporation. Prior to the closing date for the filing of applications, the Corporation reserves the right to discontinue the taking of applications in any county upon its determination that the insurance risk involved is excessive or to limit the amount of insurance. Such closing date shall be the September 30 immediately preceding the beginning of the crop year. The Corporation further reserves the right to reject any application or to exclude any definitely identified acreage for any crop year of the contract if upon inspection it deems the risk on such acreage is excessive. If any such acreage is to be excluded, the insured shall be notified of such exclusion before insurance attaches for the crop year for which the acreage is to be excluded. The Manager of the Corporation is authorized in any crop year to extend the closing date for acceptance of applications in any county by amendment to the regulations, upon his determination that no adverse selectivity exists: *Provided however*, That if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

§ 409.33 Public notice of indemnities paid.

The Corporation shall provide for the posting annually at each county courthouse a listing of the indemnities paid in the county.

§ 409.34 Creditors.

An interest of a person other than the insured in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or any involuntary transfer shall not entitle the holder of the interest to any benefit under the contract other than as provided in the Policy set forth in § 409.35.

§ 409.35 The policy.

The provisions of the policy for Arizona-Desert Valley Citrus Crop Insurance for the 1977 and Succeeding Crop Years are as follows:

ARIZONA-DESERT VALLEY CITRUS CROP INSURANCE

Subject to the regulations of the Federal Crop Insurance Corporation (herein called "Corporation") and in accordance with the terms and conditions set forth in this policy, the Corporation upon acceptance of a person's application does insure such person against unavoidable loss of production of the insured's citrus crop due to freeze. No

term or condition of the contract shall be waived or changed on behalf of the Corporation except in writing by a duly authorized representative of the Corporation.

TERMS AND CONDITIONS

1. *Meaning of terms.* For purposes of insurance on citrus the terms: (a) "Acreage report" means the form prescribed by the Corporation for initially reporting and revising (if necessary) all of the insured's acreage and share therein of citrus in the county, the location of acreage by types of citrus, the age of trees, and the estimated production by boxes.

(b) "Actuarial table" means the forms and related material approved by the Corporation which are on file for public inspection in the office for the county, and which show the applicable amounts of insurance, premium rates, and related information regarding citrus crop insurance in the county.

(c) "Box" or "Boxes" means a standard field box as prescribed in the Agricultural Code of California.

(d) "Contiguous land" means land which is touching at any point, except that land which is separated by only a public or private right-of-way shall be considered contiguous.

(e) "Contract" means the application, this policy, and the actuarial table.

(f) "County" means the county shown on the application and any additional insurable land located in a local producing area bordering on the county, as shown on the actuarial table.

(g) "Crop Year" means the period beginning October 1 and extending through September 30 of the following year and shall be designated by the calendar year in which the insurance period begins.

(h) "Harvest" means any severance of citrus fruit from the tree either by pulling, picking, or severing by mechanical or chemical means, or picking up the marketable fruit from the ground.

(i) "Insurable acreage" means the acres of citrus as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, grown on the following: (1) land classified as insurable by the Corporation and shown as such on the actuarial map or appropriate land identification list of (2) land owned or operated by a person to whom a grove classification is assigned by the Corporation or as otherwise provided on the actuarial table.

(j) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(k) "Person" or "Insured" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(l) "Potential" means the production which would have been produced before freeze damage occurred and shall include citrus which (1) was picked before the freeze damage occurred; (2) remained on the trees after the freeze damage occurred; (3) was lost from freeze; and (4) was lost from an uninsured cause. The potential shall not be less than 150 boxes per acre and shall not include citrus lost before insurance attaches for any crop year or citrus lost by normal dropping.

(m) "Share" means the share of the insured as landlord, owner-operator, or tenant in the insured citrus as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, and no other share in the citrus crop shall be deemed to be insurable.

(n) "Tenant" means a person who rents land from another person for a share of the crop or proceeds therefrom.

(o) "Time of loss" means the earlier of (1) the date harvest is completed on the unit; (2) the calendar date for the end of the insurance period; or (3) the date the entire crop on the unit is destroyed, as determined by the Corporation.

(p) "Types of citrus" means any of the following six types of fruit: Type I, Navel oranges; Type II, Orlando tangeloes and sweet oranges; Type III, Valencia oranges; Type IV, Grapefruit; Type V, Lemons; and Type VI, Kinnow mandarins and Minneola tangelos.

(q) "Unit" means all insurable acreage in the county of any of the six citrus types referred to in subsection (p) of this section located on contiguous land, on the date insurance attaches for the crop year, (1) in which the insured has a 100 percent share; (2) which is owned by one person and operated by the insured as a tenant; or (3) which is owned by the insured and rented to one tenant. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the crop on such land only shall be considered as owned by the lessee. The Corporation shall determine units as herein defined when adjusting a loss, notwithstanding what is shown on the acreage report, and has the right to consider any acreage and share reported by or for the insured's spouse or child or any member of the insured's household to be the bona fide share of the insured or any other person having the bona fide share.

2. *Cause of loss.* (a) The insurance provided is against unavoidable freeze loss occurring within the insurance period to the citrus fruit which is set from the annual bloom.

(b) The contract shall not cover any loss or damage (1) to the blossoms or trees; (2) due to neglect or malfeasance of the insured, any member of the insured's household, tenants, or employees; (3) due to failure to follow recognized good grove management practices; or (4) due to any cause other than freeze.

3. *Citrus insured.* (a) The citrus insured shall be any of the type(s) of citrus as defined in section 1(p), and not excluded by the following provisions of this section, which is located on insurable acreage as shown on the actuarial table, and in which the insured has a share on the date insurance attaches: *Provided*, That (1) the citrus fruit can be expected to mature each crop year in the normal maturity period for the variety and (2) the trees have reached at least the sixth growing season after being set out.

(b) Upon approval of the Corporation, the insured may elect to insure or exclude from insurance for any crop year any reported, described, and designated insurable acreage which has a potential of less than 150 boxes per acre. If the insured elects to insure such acreage, the Corporation will, in determining the amount of loss, increase the per acre potential on such acreage to 150 boxes per acre. If the insured elects to exclude such acreage, the Corporation will disregard such acreage for all purposes of this contract. If the insured does not report, exclude, describe, and designate any such acreage, the Corporation will disregard such acreage if the production is less than 150 boxes; however, if the production from such acreage is 150 or more boxes per acre, the Corporation shall determine the percent of damage on all of the insurable acreage for the unit, but will not permit the percent of damage for the unit to be increased by including the undesignated acreage.

(c) The Corporation reserves the right for any crop year to exclude acreage from insurance or limit the amount of insurance on any acreage which was not insured the previous crop year.

4. *Life of contract and contract changes.* (a) The contract shall be in effect for the crop year specified on the application, and may not be canceled for such crop year. Thereafter, either party may cancel insurance on any type of citrus for any crop year by giving written notice to the other by the July 31 immediately preceding such crop year. In the absence of such notice to cancel, and subject to the provisions of subsections (b), (c), and (d) of this section, the contract shall continue in force for each succeeding crop year.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution; however, if such event occurs after insurance attaches for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

(c) If the premium for any crop year is not paid by the September 30 following the calendar year in which the insurance period begins, the contract shall terminate for the succeeding crop year: *Provided*, That the date of payment for a premium (1) deducted from a loss claim shall be the date the insured signs such claim, or (2) deducted from payment under another program administered by the U.S. Department of Agriculture shall be the date such payment was approved.

(d) The contract shall terminate if no premium is earned for three consecutive years.

(e) The Corporation reserves the right to change the terms and conditions of the contract from year to year. Notice thereof shall be mailed to the insured or placed on file and made available for public inspection at the office for the county by the July 15 immediately preceding the crop year for which such changes are to become effective, and such mailing or filing shall constitute notice to the insured. Acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in subsection (a) of this section.

(f) At the time the application for insurance is made, the applicant shall elect an amount of insurance per acre from among those shown on the county actuarial table. For any crop year, the insured may with the consent of the Corporation change the amount of insurance per acre which was previously elected by notifying the Corporation in writing not later than the closing date for filing applications for such crop year.

5. *Responsibility of the insured to report acreage data.* (a) The insured at the time of filing the application shall also file on a form prescribed by the Corporation a report of all the acreage of citrus in the county in which the insured has a share and show the share therein. Such report shall also include a designation of (1) the location of the acreage by types of citrus, (2) age of trees, (3) estimated production by boxes, and (4) any acreage which is uninsurable or excluded under the provisions of section 3 above. This report shall be revised by the insured for any crop year before insurance attaches if

the acreage to be insured or share therein has changed, and the latest report filed shall be considered as the basis for continuation of insurance from year to year.

(b) If the insured does not submit an acreage report for any crop year in accordance with the provisions of subsection (a) of this section, the Corporation may elect to determine by units the insured acreage and share or declare the insured acreage for any unit(s) to be "zero."

6. *Insurance period.* Insurance attaches each crop year on October 1, except that for the first crop year if the application is accepted by the Corporation after that date, insurance shall attach on the tenth day after the application is received in the office for the county, and as to any portion of the citrus crop, shall cease upon the earlier of harvest or January 31 for Types I, II, and V and March 31 for Types III, IV, and VI of the crop year.

7. *Amount of insurance.* The amount of insurance for any crop year for any unit shall be determined by multiplying the estimated production in boxes for the unit for that crop year as reported by the insured or as determined by the Corporation, whichever is smaller, by the applicable amount of insurance per box and multiplying the product thereof by the insured's share: *Provided, however,* That the amount of insurance for any crop year for any unit shall not exceed the product of the insured acreage thereon times the maximum amount of insurance per acre shown on the actuarial table times the insured's share; and, the amount of insurance per acre shall be based on not less than 150 standard field boxes per acre.

8. *Annual premium.* (a) The annual premium for each insurance unit is earned and payable on the date insurance attaches and shall be determined by multiplying the higher of (1) the estimated production in boxes reported by the insured for that crop year for the unit or (2) 150 boxes times the number of acres in the unit, times the applicable amount of insurance per box, times the applicable premium rate, times the insured's share at the time insurance attaches, and where applicable, applying the premium reduction or adjustment herein provided. There will be no revision in premium if the actual production differs from the estimated production applicable for the crop year as provided in section 5 above.

(b) In counties where the actuarial table does not provide for adjustments in premium, to total annual premium on all units shall be reduced as follows after consecutive years of insurance without a loss for which an indemnity was paid on any unit hereunder (eliminating any year in which a premium was not earned): 5 percent after one and two years; 10 percent after three and four years; 15 percent after five years; 20 percent after six years; and 25 percent after seven or more years. However, if the insured has a loss for which an indemnity is paid hereunder, the number of such consecutive years of insurance without a loss shall be reduced by three years, except that where the insured has seven or more such years, a reduction to four shall be made and where the insured has three or less such years, a reduction to zero shall be made: *Provided,* That if at any time, the cumulative indemnities paid hereunder exceed the cumulative premiums earned hereunder from the start of the insuring experience through the previous crop year, the 5, 10, or 15 percent premium reductions in this subsection shall not thereafter apply until such cumulative premiums equal or exceed such cumulative indemnities.

(c) In counties where the actuarial table provides for adjustments in premium, the provisions of subsection (b) of this section shall not apply.

(d) If there is no break in the continuity of participation, any premium reduction or adjustment applicable under subsection (b) or (c) of this section shall be transferred to (1) the contract of the insured's estate or surviving spouse in case of death of the insured; (2) the contract of the person who succeeds the insured as the insured's transferee in operating only the same grove or groves, if the Corporation finds that such transferee had previously actively participated in the grove operation involved; or (3) the contract of the same insured who stops operating a grove in one county and starts operating a grove in another county.

(e) If there is a break in the continuity of participation, subsection (b) of this section or any reduction in premium earned under subsection (c) of this section shall not thereafter apply.

9. *Notice of damage or loss.* (a) The insured shall give notice to the office for the county immediately after freeze damage to the citrus becomes apparent, giving the date(s) of such damage so that an inspection and determination of the extent of damage can be made prior to harvest.

(b) If a loss is to be claimed on any unit, notwithstanding any prior notice of damage, the insured shall notify the office for the county of the intended date of harvest at least seven days prior to the start of harvest.

(c) If a loss is to be claimed on any unit and if damage occurs within the seven-day period prior to the start of harvest or during harvest, notice of damage must be given immediately to the office for the county.

(d) Notwithstanding any other provision of this section, no insured freeze damage shall be deemed to have occurred on any acreage unless a notice of the damage therefore is given to the office for the county within 30 days after the end of the insurance period.

(e) The Corporation reserves the right to reject any claim if any of the requirements of this section are not met and the Corporation determines that the amount of loss cannot be satisfactorily determined.

(f) There shall be no abandonment of the citrus crop to the Corporation.

10. *Claim for loss.* (a) Any claim for loss for any unit shall be submitted to the Corporation on a form prescribed by the Corporation within 60 days after the time of loss. The Corporation reserves the right to provide additional time if it determines that circumstances beyond the control of either party prevent compliance with this provision.

(b) Losses shall be adjusted separately for each unit. The amount of loss with respect to any unit shall be determined by (1) multiplying the amount of insurance for the unit by the average percent of insured damage in excess of 10 percent (i.e. average damage 45% −10% = 35% payable); and (2) multiplying this product by the insured share: *Provided,* That for the purpose of determining the amount of loss, the insured share shall not exceed the insured's share in the citrus crop at the time of loss or the beginning of harvest, whichever is earlier.

(c) The average percent of damage to the citrus for any unit shall be the ratio of the number of boxes of citrus lost from freeze to the potential. In determining the number of boxes of citrus lost, the average percent of damage shall be applicable only to fruit which was not or could not be packed as fresh fruit.

(d) Any citrus which (1) is or could be marketed as fresh fruit or (2) is harvested prior to an inspection by the Corporation shall be considered as undamaged.

(e) The determination of serious freeze damage to citrus will be made by the Corporation in accordance with the state laws for the county, and such determination shall be the actual citrus lost as shown by cuts made of representative samples of fruit in the grove, regardless of whether or not damaged fruit can be separated from undamaged fruit without cutting.

(f) Any fruit on the ground as a result of freeze which is not picked up and marketed shall be considered as damaged the greater of 70 percent or the percent of damage determined from cuts of representative samples of fruit in the grove.

(g) A final grove inspection to determine the extent of serious freeze damage to fruit which is unharvested at the end of the insurance period shall be made within 30 days after the end of the insurance period or as soon thereafter as possible.

(h) It shall be a condition precedent to payment of any claim that the insured furnish production records and any other information required by the Corporation regarding the manner and extent of damage, including authorizing the Corporation to examine and obtain any records pertaining to the production and/or marketing of the citrus insured under this contract from the packinghouse and the Navel Orange, Valencia Orange, Grapefruit and Lemon Administrative Committees established under orders issued by the U.S. Department of Agriculture, pursuant to the Agricultural Marketing Agreement Act of 1937, as amended. The Corporation has the right to delay the final determination of the average percent of damage and the settlement of any claim until the insured makes available to it complete records of the marketing of the citrus for the crop year

(i) If the Corporation determines that frost protection equipment was not properly utilized or properly reported, the indemnity otherwise computed for the unit shall be reduced by the percentage of premium reduction allowed for frost protection equipment. It is the responsibility of the insured to provide the Corporation a record by dates showing each use of frost protection equipment including the starting and ending times for the period of use.

(j) If any claim for indemnity under the provisions of the contract is denied by the Corporation, an action on such claim may be brought against the Corporation under the provisions of 7 U.S.C. 1508(c): *Provided,* That the same be brought within one year after the date notice of denial of the claim is mailed to and received by the insured.

11. *Payment of indemnity.* (a) Any indemnity will be payable within 30 days after a claim for loss is approved by the Corporation. However, in no event shall the Corporation be liable for interest or damages in connection with any claim for indemnity whether such claim be approved or disapproved by the Corporation.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved after insurance attaches for any crop year, any indemnity will be paid to the person(s) the Corporation determines to be beneficially entitled thereto.

12. *Misrepresentation and fraud.* The Corporation may void the contract without affecting the insured's liability for premiums or waiving any right or remedy including the right to collect any unpaid premiums if at any time, either before or after any loss, the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

13. *Collateral assignment.* Upon submission and approval of forms prescribed by the Corporation, the insured may assign the right to an indemnity for any crop year and the assignee shall have the right to submit the loss notices and forms as required by the contract.

14. *Transfer of insured share.* If the insured transfers all or any part of the insured share in any crop year, the Corporation will, upon submission and approval of forms prescribed by the Corporation, continue to provide protection according to the provisions of the policy to the transferee for such crop year with respect to the transferred share and the transferee shall have the same rights and responsibilities under the contract as the transferor for the current crop year.

15. *Subrogation.* The insured (including any assignee or transferee) assigns to the Corporation all rights of recovery against any person for loss or damage to the extent that payment hereunder is made and shall execute all papers required and take appropriate action to secure such rights.

16. *Records and access to grove.* The insured shall keep or cause to be kept for two years after the time of loss, separate records of the harvesting, storage, shipments, sale, and other disposition of all citrus produced on each unit and on any uninsured acreage of such citrus in the county in which the insured has a share. Any persons designated by the Corporation shall have access to such records and the grove for purposes related to the contract.

17. *Forms.* Copies of forms referred to in the contract are available at the office for the county.

NOTE.—The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

NOTE.—The Federal Crop Insurance Corporation has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

W. O. JOHNSON,
Acting Manager, Federal Crop Insurance Corporation.

[Valencia Orange Reg. 566, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period July 29–August 4, 1977. The amendment recognizes that demand for Valencia oranges has improved, since the regulation was issued. This action will increase the supply of oranges available to consumers.

DATES: Weekly regulation period July 29–August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. (202–447–3545).

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of recommendations and information submitted by the Valencia Orange Administrative Committee, established under the marketing agreement and order, and other available information, it is found that the limitation of handling of Valencia oranges as provided in this amendment will tend to effectuate the declared policy of the act.

(2) Demand in the Valencia orange markets has improved since the regulation was issued. Amendment of the regulation is necessary to permit orange handlers to ship a larger quantity of Valencia oranges to market to supply the increased demand. The amendment will increase the quantity permitted to be shipped by 200,000 cartons, in the interest of producers and consumers.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information became available upon which this amendment is based and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of Valencia oranges.

(b) *Order, as amended.* The provisions in paragraph (b)(1) (i), and (ii) of § 908.866 Valencia Orange Regulation 566 (42 F.R. 38379) are hereby amended to read as follows:

§ 908.866 **Valencia Orange Regulation 566.**

* * * * * * *

(b) * * *

(1) * * *

(i) District 1: 312,000 cartons;

(ii) District 2: 488,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Dated: August 3, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 210—GENERAL ALLOCATION AND PRICE RULES

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

1977 Price and Allocation Interpretations

AGENCY: Federal Energy Administration.

ACTION: Notice of Interpretations.

SUMMARY: Attached are five Interpretations issued by the General Counsel or Regional Counsels of the Federal Energy Administration (FEA) between June 6 and July 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Laura Holtz, Office of General Counsel, Federal Building, 12th and Pennsylvania Avenue NW., Room 7132, Washington, D.C. 20461 (202–566–2085).

SUPPLEMENTARY INFORMATION: FEA Interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the FEDERAL REGISTER from time to time in accordance with the editorial and classification criteria set forth in 42 FR 7923, February 8, 1977.

FEA Interpretations depend for their authority on the accuracy of the factual statement used as a basis for the Interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom Interpretations are addressed and other persons upon whom Interpretations are served are entitled to rely on them (§ 205.85(c)). An Interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the Interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). In addition, Interpretations are subject to appeal. The Interpretations appended hereto are published today only for general guidance in accordance with the reasons set forth in the FEA Notice cited above.

Issued in Washington, D.C., August 2, 1977.

ERIC J. FYGI,
Acting General Counsel, Federal Energy Administration.

INTERPRETATION 1977–17

To: Francis O. Scarpulla, Esq.

Date: June 6, 1977.

Rules Interpreted: § 211.51, Ruling 1975–8.

Code: GCR(IX)—AI—Definition of Wholesale Purchaser-Reseller.

This is in response to a request for interpretation dated July 12, 1976 submitted by you on behalf of six named consignees under contract with Union Oil Company of California (Union) concerning whether or not these consignees may be considered wholesale purchaser-resellers under 10 CFR 211.51 of the Mandatory Petroleum Allocation Regulations of the Federal Energy Administration (FEA). Since the test for such characterization depends primarily on the facts of each individual case, this Interpretation applies solely to the six persons filing the request.

FACTS

The facts upon which this interpretation is based are as follows: [1] All of the named consignees entered wholesale consignment agreements with Union between 1964 and 1972. At present, each of these agreements is memorialized in a standard form contract prepared by Union ("Commercial Consignment Agreement," Form No. 3–4H06, Rev. April 1973) (hereinafter, Agreement).

The Agreement provides that the consignee will handle, advertise for sale, and sell within defined geographic areas only those products provided by Union as consignor. Title to all products remains in Union until a sale of the products is consummated by the consignee, at which time he is entitled to a commission in accordance with a schedule attached to the Agreement.

The consignee is obligated to: Sell the consigned products at prices established by Union; use his best efforts to promote the sale of the products within his defined territory; hire all necessary employees, and indemnify Union for any liability arising from operation of any workmen's compensation, unemployment, pension, or retirement program; pay all necessary license fees and all business expenses incurred in the handling, storage, and distribution of the consigned products and in providing equipment therefor; and be responsible for loss or damage to the consigned products. The Agreement expressly states that neither the consignee nor his employees are to be considered employees of Union.

Union, as consignor, must deliver whatever quantity of product the consignee requires for sale and pay the scheduled commissions for product sold. Union also retains the right of prior approval of most credit sales proposed by the consignee beyond a minimum amount and may revoke such approval at any time. The Agreement may be terminated by either party upon seven (7) days notice.

The affidavits submitted reveal that each consignee spends a significant amount of time developing his own customer contacts and accounts. The accounts could similarly be terminated by the consignee (prior to adoption of FEA regulations) without the need to notify Union or obtain its concurrence. The accounts provided directly by Union consisted almost exclusively of a minute number of house accounts, and Union representatives rarely, if ever, initiated customer contacts in the consignee's territory or accompanied him on sales calls. The consignee is responsible for all facets of his service, and customers' complaints are handled by him rather than by Union. Union never evaluates the quality of service provided by the consignee. Although the consignees lease their bulk plants from Union at nominal rent, each has invested in his own transportation and other related equipment. Often in soliciting their own customers, the consignees provide storage tanks either free or at low rent.

ISSUE

The issue presented for interpretation is whether consignees operating pursuant to this agreement and in the manner described above qualify as wholesale purchaser-resellers as defined in 10 CFR 211.51.

INTERPRETATION

It is our opinion that consignees which sell and distribute allocated products pursuant to the terms of the contractual agreement set forth above and under the circumstances described qualify as wholesale purchaser-resellers as defined in 10 CFR 211.51 of the Mandatory Petroleum Allocation Regulations and clarified by FEA Ruling 1975–8.

Wholesale purchaser-reseller is defined in 10 CFR 211.51 as "any firm which purchases, receives through transfer, or otherwise obtains (as by consignment) an allocated product and resells or otherwise transfers it to other purchasers without substantially changing its form" Several situations exist in the industry in which firms take possession of allocated products without taking title. Consignment is one such situation.

FEA Ruling 1975–8 states that the phrase "as by consignment" is included in the definition of wholesale purchaser-reseller to make clear that firms which obtain and resell or otherwise transfer allocated products should not be automatically excluded from the category solely on the ground that they fail to take legal title to the product. This explicitly recognizes that consignment relationships have long existed in the petroleum industry under which consignees perform essentially the same functions as jobbers and, accordingly, should be treated under the allocation regulations in the same manner as jobbers. Therefore, those consignees who have a substantial degree of operational independence in the conduct of their business (as opposed to merely providing a distribution service between a supplier and customers or functioning like a supplier employee) fully qualify as wholesale purchaser-resellers and should be subject to the same benefits and obligations of the allocation program which apply to jobbers.

According to Ruling 1975–8, a consignee who operates in a substantially equivalent manner to an independent jobber will generally have most (but not necessarily all) of the following characteristics: (1) Appropriate facilities and equipment for the conduct of the business of selling and distributing his supplier's products; (b) responsibility, independent of his supplier, for internal financial management and physical and other administrative operations; (c) responsibility for expenses and liabilities arising from and connected with the business of transfer and sale of his supplier's products; and (d) independent control over the disposition of the allocated product, including the right to enter into and terminate relationships with customers rather than being restricted to distributing products solely to customers designated by the supplier. Such consignees should qualify as wholesale purchaser-resellers.

In the factual situation presented herein, the six named consignees possess a full measure of authority in distributing and selling Union's products. They do not simply provide a delivery service, but rather actively solicit customers for consigned products, negotiate terms and conditions for sales, and draft orders and invoices. They are responsible for all aspects of conducting their respective businesses. Indeed, the obligations imposed on the consignees by the Agreement itself satisfy in full the first three elements stated in Ruling 1975–8. The only restrictions imposed by the Agreement are that the consigned products be fully accounted for and sold at authorized prices. There is no limitation expressed regarding sales to particular customers or in specified amounts. Rather, the Agreement exhorts the consignees to develop sales and states that Union will provide product in "such quantity * * * as consignee requires for sale * * *. It is also clear from the information submitted that the consignees retained the power to terminate accounts (subject since 1973 to FEA restrictions), without notice to or approval by Union. The named consignees thus possess all of the characteristics of business independence discussed in Ruling 1975–8.

Thus it is our opinion that the six consignees requesting this Interpretation are wholesale purchaser-resellers as that term is defined in 10 CFR 211.51 and explained in Ruling 1975-8.

INTERPRETATION 1977–18

To: Ball Marketing Enterprise, et al.

Date: June 13, 1977.

Rules Interpreted: §§ 212.31, 212.82.

Code: GCW—PI—Definition of Firm.

This is in response to your letter of August 31, 1976, in which you requested, on behalf of Ball Marketing Enterprise ("BME"), Ball Marketing, Inc. ("BMI"), and Great Southern, that BME, BMI, and Great Southern constitute separate and distinct "firms," under the definition of "firm" in 10 CFR 212.31, for purposes of FEA price controls. This interpretation also concerns the definition of "refiner" in 10 CFR 212.31, the definition of "firm" in 10 CFR 212.82 and related terms.

We understand that your request for interpretation was prompted by a preliminary finding by FEA's area office in New Orleans that Great Southern and BME constitute a single firm for purposes of FEA price regulations.

FACTS

1. Great Southern is a producer of oil and gas, conducting extensive drilling operations in Louisiana for the discovery, production and sale of natural resources. Great Southern is also a "refiner," as defined in § 212.31, by virtue of the fact that it contracts to have crude oil and gas refined and sells the refined covered products. (Section 212.31 states, in part, that "'Refiner' includes any owner of covered products which contracts to have those covered products refined and then sells the refined covered products to resellers, retailer, reseller-retailers or ultimate consumers.")

2. Fifty percent of the shares of Great Southern are held by Mr. Robert McAdams or members of his family. The remaining 50 percent of the shares of Great Southern are held by Mr. Baker Littlefield or members of his family. Mr. McAdams is not related in any way to Mr. Littlefield.

3. BME, a dissolved partnership, was formed on May 15, 1973, for the purpose of "brokering and reselling petroleum products." The partners in this venture were Mr. McAdams, Mr. Littlefield, and Mr. Charles Goss. The latter was the managing partner of BME. During its existence, BME was a "reseller," as defined in § 212.31, and purchased refined petroleum products from Great Southern for resale. Following the incorporation of BMI, the business activities of BME were discontinued and taken over by BMI.

4. BMI was chartered on March 5, 1976. Its outstanding capital stock is owned by Messrs. McAdams, Littlefield, and Goss in portions of one-third each. It continues to purchase refined petroleum products from Great Southern as a "reseller." BMI purchases more than five percent of the covered products it sells from Great Southern, as did BME.

5. BMI pays no more for products purchased from Great Southern than it pays for products purchased from other producers or refiners. Great Southern makes no price concessions to BMI in sales of refined petroleum products to BMI.

6. Great Southern and BMI maintain separate accounts and records under separate management. BME also maintained separate books of account under separate management.

7. Great Southern has filed Form FEO–96 independently, without including BME or BMI as part of the reporting entity.

ISSUE

Are Great Southern and BME/BMI part of a single "firm" for price control purposes under FEA regulations?

INTERPRETATION

The entity consisting of Messrs. McAdams and Littlefield, Great Southern, BME and its successor, BMI, constitutes a single "firm" for price control purposes under FEA regulations.

It is not true, as stated in the interpretation request, that "the definition of firm has obviously substantially changed since Phase II (of the Economic Stabilization Program) and any rulings relating to the Phase II definition cannot and do not apply whether well settled or not under the Phase IV regulations." In an Interpretation issued to the president of Enterprise Products Co. on February 12, 1975 ("Enterprise Interpretation") FEA stated as follows (emphasis added):

In a series of rulings during Phase II of the Economic Stabilization Program the major questions concerning inter-corporate control and control by individuals for purposes of price regulations were fully answered and settled. Under Phase IV Q&A 8–5, CLC Release 367, August 20, 1973, Phase II rulings were deemed not legally binding during Phase IV but were to be used as guidance in the absence of any specific legal interpretation which might be issued. Nothing in the few rulings issued by CLC in Phase IV or by FEA is contrary to the pertinent Phase II rulings discussed in this interpretation. Since these Phase II rulings thus firmly settled this area of the law, and *since the same applicable definitions and concepts to which those rulings relate were continued essentially unchanged in Phase IV and under the FEA regulations*, the FEA believes that it is appropriate to apply the pertinent Phase II rulings in this interpretation.

FEA then quoted in the Enterprise Interpretation the Phase II definition of "firm" and cited related Phase II definitions to show that the concept of "direct or indirect control," which brings within the "firm" all entities "controlled" by the firm, remains essentially the same under FEA regulations. Therefore, because of the definitional similarities considered and explained in the Enterprise Interpretation, Phase II rulings as well as FEA rulings and Interpretations are pertinent to the central question in this Interpretation concerning control.

The starting point for understanding the definition of "firm" is FEA's definition of that term in § 212.31; which reads as follows:

"Firm" means any association, company, corporation, estate, individual, joint-venture, partnership, or sole proprietorship or any other entity however organized including charitable, educational, or other eleemosynary institutions, and the Federal government including corporations, departments, Federal agencies, and other instrumentalities, and State and local governments. The FE[A] may, in regulations and forms issued in this part, treat as a firm: (1) A parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls, (2) a parent and its consolidated entities, (3) an unconsolidated entity, or (4) any part of a firm.

For general price control purposes, FEA has selected the first of the four definitional options listed above.[2] Under FEA's definition of "firm" applicable to refiners in § 212.82, and under FEA's definition of "seller" applicable to resellers and retailers in § 212.92, this determination is expressed as follows:

"Firm" (or in the case of resellers or retailers, "seller") means a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls.

It is clear from the general definition of "firm" in § 212.31 and the definition of "parent," "parent and its consolidated entities" and "unconsolidated entity" in § 212.31 that an "individual" can be the "parent"—i.e., the entity or part of the "firm" to which one ultimately looks to determine the extent or degree of intra-firm control. This matter was expressly considered in CLC Ruling 1972–55 (37 FR 11694, June 10, 1972), where the "firm" was determined to consist of an individual person plus the two corporate entities which he controlled.

It is also clear that control by the individual is not diluted or diminished by the vesting of stock ownership or control in members of the individual's family. FEA's definition of "parent and its consolidated entities" and "unconsolidated entity" include a statement that "An individual shall be deemed to control a firm which is directly or indirectly controlled by him or by his father, mother, spouse, children or grandchildren." A similar statement was included in the Phase II definition of "firm."

Based on the foregoing considerations, neither "individual" nor family control preclude inclusion of Great Southern and BME/BMI in the same "firm." The only remaining question to be considered relates to the 50 percent-50 percent division of control of Great Southern between Messrs. McAdams and Littlefield and the 33⅓ percent-33⅓ percent-33⅓ percent division of control of BMI between Messrs. McAdams, Littlefield, and Goss—i.e., whether a division of control in equal shares, in which no one individual appears to have a predominate position, constitutes an effective means by which the consequences of control can be avoided for purposes of FEA price regulations.

Rulings and Interpretations issued under Phase II and the current price control program affirm that—

* * * the division of ownership or control into exactly equal shares or interests (e.g., 50%-50%, 33⅓%-33⅓%-33⅓%) w(ill) not serve to defeat the purpose of the regulations and rulings concerning control.[3]

For example, under CLC Ruling 1972–77 (37 FR 13652, July 12, 1972), companies A and B each owned a one-half interest in company C which they operated as a joint-venture. Control of C on the part of both A and B (whether deemed direct or indirect) was presumed. The result was that A plus C was considered a single entity and B plus C was considered a single entity, for the purpose of determining the size of the annual sales or revenues of the firm (price category determination), while for other purposes under the Economic Stabilization Program A and B were required to decide which of them would consider C as belonging to it in its entirety.

In the Enterprise Interpretation, a situation even more closely analogous to the present one was presented. There, two individuals each owned 50 percent of an incorporated propane resale business. These two individuals, not acting on a joint-venture basis in any formal sense, together acquired control of two propane retailers. FEA ruled that the "firm" for purposes of price regulations consisted of the two individuals concerned, the resale company, the two retail entities, and any other firm directly or indirectly controlled by the two individuals or their resale company.

In the present case, Messrs. McAdams and Littlefield control Great Southern since they each own 50 percent of the capital stock of that corporation. They also control BMI (and controlled its predecessor, BME) on the basis of their combined two-thirds ownership or interest. BME/BMI did not constitute a subsequent acquisition, as in the Enterprise case, but was created by the two individuals concerned for the express purpose of reselling petroleum products. As in the Enterprise case, BME/BMI has purchased a substantial portion of its products for resale from its affiliate, Great Southern.

CLC Ruling 1972–77 and FEA's Enterprise Interpretation have as a shared element the commonality of interest between the two individuals or venturors in the business or businesses they jointly controlled. It is of little significance whether this finds expression in formal agreement or formal organization, such as under a written joint-venture or partnership agreement, or through less formal but not less purposeful design. The definition of "firm" includes "*any* * * * individual, joint-venture, partnership * * * or *any other entity however organized* * * *." [Emphasis added.] Thus, whether the controlling parent is viewed as two individual "entities" or a single joint "entity" the result is the same: all entities controlled directly or indirectly by the parent are part of the "firm" for price control purposes.

In CLC Ruling 1972–81 (37 FR 15009, July 27, 1972), individual A owned 50 percent of corporation L and 50 percent of corporation M. The two corporations were described as "interdependent" and as performing "complementary functions" because L sold raw materials to M for processing. CLC held that the "firm" included the entities A, L, and M. Although the fact portion of the ruling stated that the remaining stock in L and M was held by relatives of A, the ruling did not turn on the question of family control. The ruling was based on the fact that A held 50 percent of the shares of both L and M and on the complementarity of functions performed by L and M.

[1] On July 22 and 27, 1976 Union responded to the initial request for interpretation and supporting data submitted therewith. Subsequently, counsel for the petitioners provided a response to the Union letters and submitted declarations and affidavits from the six consignees in support of the request. The individual wholesale consignment distributors are: J. C. Lansdowne, Visalia; E. L. Mangiaracina, Roseville; J. A. Martin, Mariposa; R. A. Ramsey, Siskiyou; D. M. Seals, Merced; M. J. Soelzl, Fresno. All information submitted by Union and its consignee agents has been considered in postulating the facts upon which this Interpretation is based.

[2] The second and third options under the general definition of "firm" in § 212.31 were used by CLC and FEA primarily in connection with profit margin regulations no longer effective. The fourth option has been used only in special circumstances, such as in connection with the granting of exceptions.

[3] Enterprise Interpretation, February 12, 1975.

The factor of corporate interdependence or complementarity was also present in the Enterprise case, where propane was channelled through the resale business to the retail outlets for ultimate sale and where control of the retail outlets was apparently obtained for the sole purpose (and under an erroneous view of applicable regulations) of obtaining the benefits of markups at both the wholesale and retail level with respect to the sale of the same propane.

It appears that similar interdependence is present in the case of Great Southern and BME/BMI. BME and BMI were formed by the owners of Great Southern for the purpose of reselling the same products which Great Southern contracts to have refined. BMI does in fact purchase a substantial portion of its products from Great Southern. The fact of common ownership or control of Great Southern and BME/BMI, plus the business relationship between the two companies involving the purchase and sale of refined petroleum products, is sufficient to show interdependence of the kind present in CLC Ruling 1972–81 and FEA's Enterprise Interpretation.

In our view, the interdependence or complementarity present in this case merely serves to confirm the appropriateness of the conclusion already reached concerning control of Great Southern and BME/BMI by the same parent. Because of the often unusual or complex interrelationships between corporate or other business entities, it cannot be expected that any single concept of "firm" would provide a basis for application of price controls which every company would consider most appropriate. However, the "control" basis for identfying business amalgamations is well understood in the industry and is generally easy to apply. Moreover, the "control" basis usually results in a "firm" which consists of or includes business entities which perform interdependent or complementary functions in addition to being under common control.

Furthermore, as previously explained by FEA,[4] the broad "control" basis for the definition of "firm" is appropriate for general pricing purposes because FEA's regulations generally permit prices to be increased to reflect increased costs incurred. Unless "costs" were restricted to the "outside" costs of the "firm"—i.e., costs incurred in trading with persons not under the direct or indirect control of the parent—a "firm" could improperly magnify "costs" through a series of intracorporate sales or transfers of petroleum products at prices reflecting a margin of profit added at each sale or transfer within the firm. Thus, for cost pass-through purposes, the costs which may be passed through are the costs to the "firm" as broadly defined in § 212.82 (or the costs to the "seller" under the same definition in § 212.92), unless otherwise specifically provided. This concept of "firm" serves to assure only a dollar-for-dollar pass-through of actual costs incurred by the "firm" concerned.

That Great Southern may have not in fact treated BMI differently from other purchases similarly situated, through discounted prices or otherwise, is not controlling. The fact that the spirit or purpose of an FEA regulation of general applicability may not have been actually violated or contravened in a specific case does not normally provide a valid basis in the context of a legal interpretation for nonapplication of that regulation to the firm concerned.

Since the basis for FEA's definition of "firm" is control rather than corporate organization, the fact that BMI and Great Southern are separately incorporated and independently organized is not significant. Lack of "managerial" supervision is also not controlling.[5]

INTERPRETATION 1977–19

To: Sterling Stations, Inc.

Date: June 21, 1977.

Rules Interpreted: §§ 211.9, 211.106, 210.62.

Code: GCR(X)—AI—Base Period Supply Obligations, Normal Business Practices.

This is in response to your request for an interpretation of the Mandatory Petroleum Allocation Regulations on behalf of your client, Sterling Stations, Inc.

FACTS

Until approximately May 15, 1976, Sterling Stations, Inc. ("Sterling"), operated branded independent retail gasoline stations at four locations in the Seattle area. Texaco, Inc. ("Texaco"), is the base period supplier of gasoline for each of these stations and delivered gasoline to each of them during the base period and thereafter until the stations were closed by Sterling in May, 1976.

During 1975 Sterling began to experience heavy operating losses at the four stations. In December 1975, it offered to sell the stations to Gull Oil Company ("Gull"), which owns a number of retail service stations in western Washington which sell unbranded motor gasoline supplied to Gull by Texaco.

Gull inquired of Texaco as to whether the motor gasoline allocations for the four stations could be transferred to Gull as a successor to Sterling with the understanding that Gull would receive the total allocation (approximately four million gallons per year) as a jobber, rather than as the operator of the individual stations. Texaco refused to agree to this proposal.

In late April 1976 Sterling again offered to sell the stations to Gull if Gull would take over separately each station's base period use and convert the outlets from branded to non-branded outlets. Gull accepted this proposal from Sterling and requested Texaco to agree to transfer the individual Sterling allocations to Gull after the sale. It is unclear as to whether Texaco refused to agree to the transfer of the allocations at the four Sterling stations to Gull on a nonbranded basis. In its comments dated August 6, 1976, Texaco states that when first approached by Gull Texaco responded that it would honor its obligations under FEA regulations and would continue to supply and deliver gasoline to the four retail outlets, but that it would not agree to transfer the allocations for the four stations to Gull as a jobber. Texaco states that at no time did it indicate to either Gull or Sterling that it was unwilling to continue to deliver gasoline to the stations as mandated by FEA regulations. Texaco does not address the second proposal which Sterling asserts was made to Texaco, that Texaco supply the stations individually on a non-branded basis after the sale to Gull. For purposes of this interpretation, however, it is assumed that Gull proposed that Texaco continue to deliver motor gasoline to the four stations individually in accordance with applicable FEA regulations after the sale to Gull, except that Texaco would deliver the product on a non-branded basis. It is also assumed that Texaco refused this request and that, solely because of Texaco's refusal, the sale to Gull was not consummated. All four stations were closed during the week of May 10, 1976.

ISSUE

The issue presented for interpretation is whether and to what extent Texaco has a supply obligation to the successor on the site of Sterling's motor gasoline retail sales outlets.

INTERPRETATION

It is our opinion that pursuant to § 211.106 (c) the allocation of a motor gasoline retail sales outlet is transferred to the successor on the site, and therefore Texaco would have a supply obligation to Gull if the sale of the stations by Sterling had been consummated. The base period practices to be applied to Texaco's supplier/purchaser relationship with Gull would be those formerly in effect between Texaco and Sterling, except to the extent that Gull failed to qualify for such treatment under the objective criteria applied by Texaco to its customers.

10 CFR 211.106(c) (1) provides in part that:

A wholesale purchaser-reseller which operates a retail sales outlet shall be deemed to have gone out of business with respect to that outlet for purposes of § 211.11 if it vacates the site on which it conducts such business.

Accordingly, Sterling would be considered to have gone out of business at the four outlets as of May 1976, assuming that Sterling vacated the premises. If Gull had subsequently purchased the stations from Sterling and reopened them, Gull would have been entitled to receive the allocation at each station from Texaco under 10 CFR 211.106 (c) which provides that:

The right to an allocation with respect to the retail sales outlet shall be deemed to have been transferred to the former operator's successor on the site: *Provided*, Such successor established the same on-going business on the site within a reasonable period of time, as determined by FEO, after its predecessor vacates the premises.

In your request, you indicated that instead of asking to be supplied by Texaco on terms identical to those under which Texaco supplied Sterling, Gull requested first that it be supplied as a jobber and, second, that Texaco sell non-branded product to Gull. FEA regulations do not require Texaco to agree to such requests. 10 CFR 210.62 provides in part that:

Suppliers will deal with purchasers of an allocated product according to normal business practices in effect during the base period specified in Part 211 for that allocated product, and no supplier may modify any normal business practice so as to result in the circumvention of any provision of this chapter.

The transfer of the allocation at the four stations from Sterling to Gull under 10 CFR 211.106(c) does not obligate Texaco to alter its normal business practices with respect to sales to those four stations. On the contrary, 10 CFR 210.62 requires in general the continuation of base period normal business practices. Such practices may be altered by mutual agreement between the supplier and customer under certain circumstances, and in some instances may be altered unilaterally by the supplier if the supplier provides an adequate downward price adjustment or other compensation to the customer.

You have also argued in your request that 10 CFR 211.9(c) which provides that "the supplier/purchaser relationships required by this part shall not be altered by . . . changes in the brand or franchise under which a wholesale purchaser-reseller maintains its ongoing business" means that Texaco is required to agree to the request by Gull to purchase nonbranded product. In fact, 10 CFR 211.9(c) means that if there is a change in brands the purchaser will still be entitled

[4] See Enterprise Interpretation, Interpretation 1976–8 (May 28, 1976), and Interpretation 1976–8 (October 18, 1976).

[5] See "Tesoro" Interpretation issued August 21, 1975.

to receive an allocation from its base period supplier. This section of FEA regulations would apply to situations in which a retail gasoline station which obtained product from a supplier in 1972 (the base period) under the particular brand had changed to another supplier using a different brand in the period between 1972 and 1974. Under 10 CFR 211.9(c) the customer would nevertheless be entitled to return to its 1972 base period supplier after FEA regulations became effective in 1974. 10 CFR 211.9 does not confer on a purchaser the right to require that its supplier supply non-branded gasoline when the purchaser takes over operation of a branded retail station. Accordingly, Texaco's refusal to agree to sell gasoline to Gull on a non-branded basis at the four stations is not inconsistent with FEA regulations.

Consideration of the second issue raised in your request for interpretation, i.e., whether Sterling has any recourse against Texaco in a civil action for damages under the Federal Energy Administration Act of 1974 or any other federal legislation, is unnecessary in light of our conclusion that the actions alleged to have been taken by Texaco are consistent with FEA regulations.

INTERPRETATION 1977–20

To: John Douglas Hattenhauer.

Date: June 22, 1977.

Rules Interpreted: §§ 211.9(c), 211.25(a).

Code: GCR(X)—AI—Base Period Supply Obligations, Supplier/Purchaser Relationship.

You have requested an interpretation of the Mandatory Petroleum Allocation Regulations of the Federal Energy Administration ("FEA"), 10 CFR Part 211, concerning your rights as a Texaco consigneee distributor. Copies of your request letters were forwarded to Texaco, Inc. ("Texaco") for comment. Comments were received from Texaco.

FACTS

According to your submissions, you are a Texaco consignee located in The Dalles, Oregon. Your contractual relationship with Texaco consists of a Consignment Agreement (Form S–82) dated January 1, 1975, as modified by a Consignment Agreement to Cover Direct Deliveries (Form S–368B) dated January 1, 1975, and by an agreement relating to commissions on emergency deliveries (Form S–368) also dated January 1, 1975. The Form S–368B Agreement provides that Texaco may make deliveries or cause deliveries of product to be made at any time to four retail gasoline outlets located in Hood River, Mosier, Highway 80 N. and Highway 197, The Dalles, and 3902 W. 6th, The Dalles. The Form S–368B Agreement also provides that you will receive a smaller commission when direct deliveries are made by Texaco. At issue in your request are deliveries to three of the four outlets which are the subject of the agreements, the Hood River outlet and the two outlets in The Dalles.

You indicated in your request that you purchased the business on January 1, 1975 from Walter N. Nester, who was a Texaco consignee from 1960 until his retirement on December 31, 1974. Nester supplied the Hood River outlet during the base period from January through August, 1972. Texaco began supplying the outlet in September 1972. Nester supplied the two outlets in The Dallas through all of 1972, and thereafter until August 1974 when Texaco began direct deliveries to those stations. At the time FEA regulations became effective Texaco assigned Nester a base period volume for the two stations in The Dallas, but did not assign him an allocation for the station at Hood River. In 1974 when Texaco began direct deliveries the allocation for the two stations in The Dalles was shifted to the Texaco terminal in Portland. This represented a decrease in Nester's total base period volume of 1,004,494 gallons.

QUESTIONS PRESENTED

The following questions are presented for interpretation:

1. Whether your firm or Texaco is the base period supplier of the retail sales outlets in Hood River and The Dalles;

2. Whether your entering into the Form S–368B Agreement caused a termination of the supplier/purchaser relationship between your firm and the three retail sales outlets.

INTERPRETATION

It is our opinion that your firm is a wholesale purchaser-reseller and thus the base period supplier of the retail sales outlets in Hood River and The Dallas. As such, you are entitled to receive an allocation from the consignee's supplier based on the amount of product distributed by the consignee during the base period. In an interpretation issued April 24, 1975 to the National Association of Texaco Consignees, Inc., FEA determined that Texaco consignees are wholesale purchaser-resellers as that term is defined in 10 CFR 211.51 and thus subject to the provisions of 10 CFR Part 211. See also FEA Ruling 1975–8, Qualification of Certain Consignees as Wholesale Purchaser-Resellers (June 11, 1975).

10 CFR 211.9 provides generally that supplier/purchaser relationships which existed during the base period are to be maintained for the duration of the Mandatory Allocation Program. Since Mr. Nester supplied the two retail sales outlets in The Dalles during the base period 1972 and the outlet in Hood River for the period January through August, 1972, supplier/purchaser relationships existed between Nester and these outlets.

With respect to your purchase of Nester's business, 10 CFR 211.9(c) provides that "The supplier/purchaser relationships required by this Part shall not be altered by (1) changes in the ownership or right of possession of the real property on which a wholesale purchaser or end-user maintains its ongoing business or end use * * *." Therefore, Nesters' supply obligation to the three outlets was transferred to you upon your acquisition of the business from Nester.

As Nester's successor, you are a wholesale purchaser-reseller and are thus entitled to receive from the base period supplier, Texaco, an amount of product equal to Nester's base period purchases from Texaco, with certain adjustments as provided in 10 CFR 211.10 and 211.13. This volume would include amounts purchased during the base period that were supplied to the three retail sales outlets in question.

As the supplier to the three outlets, you retain the obligation to supply them unless the supplier purchaser relationships involved are terminated with the express written approval of FEA. In this regard, the Mandatory Petroleum Allocation Regulations provide that supplier purchaser relationships existing in the base period shall be maintained or restored despite alternative arrangements that may have been made since the base period. Accordingly, it is our opinion that the Form S–368B agreement with Texaco did not terminate your base period supply obligations to the three retail outlets.

Under FEA operating procedures, the Regional Offices may, in their discretion, grant approval to the termination of a base period relationship and reassign the supply obligation if the wholesale purchaser-reseller (in this case, the motor gasoline retail sales outlets) and its base period supplier agree in writing to the termination, and the prospective new supplier agrees in writing to assume a permanent supply obligation with the wholesale purchaser-reseller. Otherwise, an exception from the regulations is required to terminate a base period relationship and reassign a wholesale purchaser-reseller to a new supplier. Neither an application for assignment nor an exception request with respect to these motor gasoline outlets has been received by FEA.

It is our opinion, therefore, that Texaco may not unilaterally or by virtue of the Form S–368B Agreement assume the obligation to supply the Hood River or The Dalles outlets, or reduce the amount of your base period volume by an amount which represents the base period volume of the outlets involved.

INTERPRETATION 1977–21

To: Suburban Propane Gas Corp.

Date: July 11, 1977.

Rules Interpreted: § 212.53(a).

Code: GCW—PI—Export Sales Exemption.

This is in response to a letter of June 29, 1976, supplemented by letters of May 12, 1977 and May 16, 1977 on behalf of Suburban Propane Gas Corporation (Suburban) requesting an interpretation of 10 CFR 212.53(a) which deals with the prices which may be charged for covered products sold for export under the Mandatory Petroleum Price Regulations of the Federal Energy Administration ("FEA").

FEA is aware that Suburban is a defendant in a civil action brought by El Dorado Marketing Co. of Laredo, Gas Del Oro, Inc. and Gas Del Oro International, Inc., (collectively designated hereinafter as "Companies"), in the United States District Court for the Southern District of Texas, Laredo Division, in which the Court stayed further proceedings pending final determination by FEA of certain complaints filed by El Dorado Marketing Co. of Laredo and Gas Del Oro, Inc. with FEA. The complaints concern Suburban's prices in certain sales of propane, butane and butane-propane mixes which the Companies assert to be in excess of maximum lawful prices permitted by FEA regulations.

This interpretation relates only to the general application of 10 CFR 212.53(a) and is not to be interpreted as a determination of either the validity of the Companies' complaints or whether prices charged in specific transactions between the parties are otherwise lawful or unlawful.

In formulating this interpretation, FEA took into account third party comments by the Companies dated August 30, 1976, December 18, 1976 and May 13, 1977 submitted with reference to the interpretation request. In accordance with 10 CFR 205.84, Suburban was afforded an opportunity to respond to the third party submissions and written replies by Suburban dated September 2, 1976, January 3, 1977 and June 6, 1977 were received. These submissions were also taken into account by FEA in formulating this interpretation.

FACTS

Suburban resells butane, propane and butane-propane mixes and the prices it charges in sales of covered products are subject to Subpart F of Part 212 of FEA regulations.

Suburban resells covered products to various third parties among which are the Companies. Since Suburban sold such products during the applicable base periods found in Part 211 of FEA's allocation regulations, Suburban is a base period supplier of both Gas del Oro, Inc. and Gas del Oro International, Inc.

The Companies resell all or part of their purchases from Suburban to Mexican customers either directly or through sales to other exporting companies. However, they have refused to formally certify to Subur-

ban that any of the covered products purchased are for export, although in many of the transactions between the parties it is apparent that shipping documents accompanying the transfer of the product from Suburban's control to the Companies reflect that the product is destined for export. Since February 1, 1974, when its latest contract with the Companies terminated, Suburban has been charging the Companies free market prices in sales of butane, propane and butane-propane mixes except when informed by the Companies that the shipment of purchased product is not for ultimate export. In its complaint to FEA, the Companies allege that Suburban's charging of such free market prices constitutes a violation of FEA price regulations.

ISSUE

Are prices charged by a supplier of covered products in sales to a domestic purchaser exempt from FEA price regulations, pursuant to 10 CFR 212.53(a), if the domestic purchaser fails to expressly certify that the products are for export?

INTERPRETATION

Covered products sold for export are exempt from FEA price regulations (10 CFR 212.53(a)):

The prices charged for export sales [of covered products], including sales to a domestic purchaser which certifies the product is for export, are exempt. (Bracketed portion deleted on July 23, 1976.)

As FEA has pointed out in the past, the policy underlying the export exemption is quite clear and has been given effect since the wage and price control programs of the Cost of Living Council:

Price controls were implemented to benefit United States consumers and the domestic economy. Export sales are exempt from such regulations, not only because there is no intention to benefit foreign buyers through price controls, but also to encourage that the best possible prices be obtained in such sales and thereby to assist in maintaining a favorable trade balance. FEA Ruling 1975–7 (40 FR 30037, July 17, 1975)

Thus, it is the act of exportation which confers upon the sale an exemption from FEA price controls. Clearly this exemption applies to the exporter of record. In addition, 10 CFR 212.53(a) expressly extends the export sales exemption to cases where a supplier sells product to a domestic purchaser who "certifies" to the supplier that the product is for export.

The purpose of the certification is to enable the supplier to ascertain with certainty that the product to be sold is, in fact, destined for export and to provide FEA with a means of verifying that the sale to the domestic purchaser was intended as a sale for export. The export sales regulation does not specify what constitutes certification, but it may be assumed that appropriate language reflecting the purchasers' intent to export the product in bills of lading, invoices or other customary business records transmitted between the supplier and purchaser and associated with the sale will suffice as a certification in the absence of a separate document so designated.

In a case where the domestic purchaser refuses, for whatever reason, to execute a certification that the product is being purchased for export, the export sales exemption will nonetheless apply if certification can be constructively established by a showing that at the time of the sale to the domestic purchaser, the sale was understood by the parties to be intended for export. Such a showing may be made by a supplier claiming the exemption if documentation or other evidence associated with the sale including but not limited to contracts, invoices and other business records clearly shows that the domestic purchaser intended to export the product at the time of the sale and that the supplier was aware of the purchaser's intent at the time of the sale.

A means is therefore available if a domestic purchaser should arbitrarily refuse to provide a supplier with an express certification in order that the scope of the export sales regulation (i.e., to exempt sales to domestic purchasers of products which are destined for export) will not be circumscribed by the unilateral action of the purchaser.

In short, the certification required by 10 CFR 212.53(a) may be constructively shown by a supplier claiming the export sales exemption by the facts and circumstances surrounding the sale in question as discussed hereinabove.

PART 430—ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Test Procedures for Dishwashers

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes final test procedures for dishwashers. Appliance test procedures are one element of the appliance energy efficiency program required by the Energy Policy and Conservation Act.

EFFECTIVE DATE: September 10, 1977.

FOR FURTHER INFORMATION CONTACT:

James A. Smith (Program Office), Room 307, Old Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–4635).

Jim Merna, (Media Relations), Room 3104, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–9833).

Michael Skinker, (Office of General Counsel), Room 5116 Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202–566–9750) or (202–566–9380).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

The Federal Energy Administration (FEA) hereby amends Part 430, Chapter II of Title 10, Code of Federal Regulations, in order to prescribe test procedures for dishwashers pursuant to section 323 (42 U.S.C. 6293) of the Energy Policy and Conservation Act (Act) (Pub. L. 94–163). Dishwasher test procedures were proposed by notice issued March 17, 1977 (42 FR 15423, March 22, 1977), and a public hearing on the proposed test procedures was held on May 9, 1977. The definition of "dishwasher" was proposed at 41 FR 19980, May 14, 1976.

By notice issued May 24, 1977 (42 FR 27896, June 1, 1977), FEA established Subparts A and B of Part 430, Chapter II of Title 10, Code of Federal Regulations. Certain definitions and general provisions applicable to the energy conservation program for appliances have been promulgated in Subpart A. Final test procedures for room air conditioners have been prescribed in Subpart B and several other test procedures have been proposed for inclusion in Subpart B. FEA has also proposed a Subpart C for appliance energy efficiency improvement targets. An outline of the provisions of Part 430 which have so far been established, including provisions in today's notice, is as follows:

Subpart A—General Provisions

Sec.
430.1 Purpose and Scope
430.2 Definitions.

Subpart B—Test Procedures

430.21 Purpose and Scope.
430.22 Test Procedures for Measures of Energy Consumption.
* * * * *
(c) Dishwashers.
* * * * *
(f) Room Air Conditioners.
430.23 Units To Be Tested (Reserved).
430.24 Representations Regarding Measures of Energy Consumption.
* * * * *
(c) Dishwashers.
* * * * *
(f) Room Air Conditioners.

Appendices to Subpart B

* * * * *
Appendix C—Uniform Test Method for Measuring the Energy Consumption of Dishwashers.
* * * * *
Appendix F—Uniform Test Method for Measuring the Energy Consumption of Room Air Conditioners.

B. DISCUSSION OF COMMENTS

Comments were received from industry, consumers, and both federal and state agencies. Comments from industry accounted for a majority of the comments received. Most of the comments were directed toward technical areas of the proposed test procedures, although some of them were specifically directed toward the information that was to be placed on the label, such as the comment that requested that the label recommend that only "full loads" be used by the consumer in the dishwasher. Since the comments which were directly concerned with the content of the label were applicable to the labeling program under section 324 of the Act, rather than to the prescription of final test procedures, they were forwarded to the Federal Trade Commission for consideration in developing labeling rules applicable to dishwashers. The major issues raised by the comments on the proposed test procedures are discussed below.

1. TEST LOAD

Several comments addressed the size and the use of the proposed test load. One manufacturer stated that its four-place setting countertop dishwasher was excluded from the proposed test procedures, and recommended that the test procedures provide for a four-place setting test load for smaller load capacity

dishwashers. Other comments questioned whether or not dishwashers that are too small to handle the proposed eight-place setting test load would have to be tested at all. One comment suggested that it would be better to use a test load equivalent to the place setting for which the dishwasher was designed. It was also suggested that a washing index or performance rating be provided which would reflect how effective the dishwasher under test is at washing dishes.

After the comments were received, FEA, in conjunction with NBS, re-evaluated the need for a standard test load in the test procedures. FEA was interested in what effect the use or size of a test load would have on the energy consumption of the different load capacity dishwashers when operated on the normal cycle or the truncated normal cycle.

Based on over 30 tests on six different models of dishwashers, NBS concluded that there was an insignificant variation in the energy consumed by the internal boost heater between tests conducted with a load and those conducted without a load for dishwashers when operated on the normal cycle. Since none of the models tested had boost heaters that were thermostatically controlled for the normal cycle, the boost heater operated continuously during the wash and rinse cycles, whether or not a load was present. The test results showed that the boost heater consumed nearly a constant amount of energy independent of the number of dishes being washed or the temperature of the water.

In light of the NBS test results, and based on NBS' recommendation, FEA has determined that the use of a standard test load for the testing of any size dishwasher model when operated on the normal cycle or the truncated normal cycle is unnecessarily burdensome on industry and should not be required. Accordingly, 2.6 of Appendix C has been changed to delete the requirement of a test load. Should these test procedures be modified at a later date to require the testing of dishwashers when operated on any other specified cycle type, the need for a test load for other cycle types will be re-evaluated at that time.

The only remaining issue concerning the use of a test load is the suggestion that FEA develop test procedures that provide a means of rating the cleaning performance of a dishwasher. With respect to dishwashers, a performance rating is not necessary to derive the measures of energy consumption required by the Act and specified in the test procedures. Therefore, it is not included in the final test procedures for dishwashers. In the view of both agencies, the final test procedures can be used to provide information which is likely to assist consumers in making purchasing decisions.

2. "BASIC MODEL" DEFINITION

A number of comments were received on the proposed definition for the "basic model" of dishwashers in § 430.2. Some were uncertain whether physical differences which did not affect energy consumption—such as many styling differences and convenience features—would serve to constitute a variety of basic models for purposes of the test procedures. FEA has modified this definition to clarify that a single basic model includes units with any variety of different physical characteristics if these characteristics do not affect energy consumption differently than the physical characteristics of other units within the basic model. For example, the existence of an adjustable rack in one dishwasher should not of itself cause that dishwasher to be in a different basic model than other dishwashers with fixed racks. Further, different tub geometries should result in different basic models where the geometries affect energy consumption. As in the proposed definition, the final definition requires all units in a given basic model to have essentially identical electrical characteristics.

3. "NORMAL CYCLE" DEFINITION

Some of the comments focused on the proposed definition of "normal cycle" which contained the statement "and typically characterized by six water changes." The industry pointed out that the use of six water changes was not always typical nor required to clean a load of dishes under the "normal cycle." Concern was expressed that this portion of the definition might restrict future design innovations toward using fewer water changes while maintaining acceptable performance levels. FEA concurs with these comments and has, therefore, changed the definition of "normal cycle" in section 1.3 of Appendix C by deleting the requirement of six water changes.

4. ENERGY SAVING FEATURES

In the proposed test procedures for dishwashers only the normal cycle (the cycle recommended by the manufacturer for washing a full load of normally soiled dishes) and the truncated normal cycle (the normal cycle interrupted to eliminate the power dry feature) were dealt with. Some of the comments requested that the definition of the truncated normal cycle be modified to include other energy savings features, in addition to the power dry interrupt. Although the suggested comments identified some further energy saving features and cycle types, they did not provide—and FEA does not have available at this time—sufficient consumer usage data for these features or cycles to allow FEA to prescribe test procedures which would accurately reflect the estimated annual operating cost or energy factor of dishwashers containing these particular features or cycles. FEA agrees with the NBS recommendation that until such time as complete and reliable consumer usage data are available for further cycle types than the normal cycle and the truncated normal cycle, the final dishwasher test procedures not make allowance for other energy savings features than the power dry interrupt.

The industry and other interested persons are encouraged to provide any reliable data to FEA as it becomes available concerning usage by the consumer of dishwashers with any energy saving features beyond the power dry interrupt or cycles beyond the normal or truncated normal cycles. This data would be considered by FEA in deciding whether or not to expand the final test procedures to take account of other energy savings features than the power dry interrupt and to include further cycle types than the normal and truncated normal cycles.

FEA agrees with NBS that testing of the normal cycle is representative of actual average consumer usage of dishwashers.

5. ANNUAL OPERATING COST

The estimated annual operating cost is one method to assist the consumer in making a purchasing decision when this information is provided on an appliance label. One manufacturer commented that since the proposed energy factor calculation permitted the 50 percent usage credit for the truncated normal cycle but the proposed estimated annual operating cost calculation did not reflect this credit, the estimated annual operating cost calculation should permit this credit for the truncated normal cycle. FEA concurs and has adopted this change in § 430.22(c)(2) by allowing for a 50 percent usage credit when determining the estimated annual operation cost for dishwashers having a truncated normal cycle.

As discussed above, FEA has determined that it is inappropriate at this time to use a modified definition of the truncated normal cycle to account for other energy saving features than the power dry interrupt in the calculation of the estimated operating cost for dishwashers. FEA has accordingly determined not to promulgate § 430.22(c)(2) as proposed, until such time as complete and reliable usage data are available on cycle types other than the normal cycle and the truncated normal cycle. Proposed § 430.22(c)(2) provided for the estimated annual operating cost of any other cycle types, to be specified, than the normal cycle and the truncated normal cycle. When further usage data is available, FEA will consider modifying the calculations for determining the estimated annual operating cost to include other cycles in addition to the normal and truncated normal cycles.

6. ANNUAL USE CYCLES VS. LOAD SIZE

One consumer comment alleged that the representative average use cycle of 416 cycles per year was too high for large size dishwashers. This comment suggested an approach to vary the average annual use cycle depending upon load capacity. However, no data was presented to support the claim that 416 cycles per year is too high for large size dishwashers, and NBS has recommended this figure for all dishwashers.

The proposed change has not been adopted in the final rule because of the absence of annual usage data to support the claim that large capacity dishwashers

are used less frequently than smaller capacity dishwashers. If statistically valid survey data becomes available which reveals that purchasers of 12 or more place setting dishwashers use their dishwashers less frequently than purchasers of eight or less place setting dishwashers, then FEA and NBS will review the determination that 416 cycles is the representative average usage of dishwashers, regardless of size. It is likely, however, that large dishwashers generally are used no less frequently but are used with about the same frequency to wash more dishes than their smaller counterparts.

7. NUMBER OF UNITS TO BE TESTED

Proposed § 430.23(c) provided for sampling of each basic model to be tested when testing of dishwashers is required by the Act or by program regulations of agencies responsible for administering the Act. This provision was intended both to provide an acceptable level of assurance that test results are applicable to any entire basic model for which testing is required and to minimize the testing burden on manufacturers.

The comments expressed objections to the sampling provision for dishwashers similar in substance to the objections raised to the sampling plan proposed for room air conditioners by notices issued July 22, 1976 (41 FR 31237, July 27, 1976) and March 24, 1977 (42 FR 16811, March 30, 1977). It was pointed out by the comments, however, that there was no large burden on the industry to test dishwashers because there are fewer basic dishwasher models compared to the number of room air conditioner models and that the test procedures for dishwashers are much easier to conduct. One manufacturer specifically stated that the intent of the sampling plan for dishwashers appeared to be acceptable primarily because of the relative simplicity of dishwasher energy testing, although he recommended minor technical changes in the wording of the sampling plan for statistical correctness and clarity.

Test procedures prescribed under section 323 of the Act are intended ultimately to be used, for example, for labeling under section 324, in monitoring the progress of manufacturers toward accomplishing the energy efficiency improvement targets under section 325, and in enforcement testing under section 326. These aspects of the appliance program have not, however, been implemented. It is quite possible that the objectives of appliance testing under each of these parts of the program, as well as the instructions on how a test procedure should be applied (e.g., sampling of production units), may differ. FEA, NBS, and FTC are continuing to evaluate the appropriate method or methods for sampling the units to be tested in order to comply with the statute and satisfy all of the different elements of the appliance program.

While the various parts of the appliance program identified above are not in effect at this time, section 323(c) of the Act provides:

> Effective 90 days after a test procedure rule applicable to a covered product is prescribed under this section, no manufacturer, distributor, retailer or private labeler may make any representation—
>
> (1) In writing (including a representation on a label), or
>
> (2) In any broadcast advertisement, respecting the energy consumption of such product or cost of energy consumed by such product, unless such product has been tested in accordance with such test procedure and such representation fairly discloses the results of such testing.

In order to eliminate the problems discussed above associated with a general sampling provision, proposed § 430.23(c) has been limited in the final test procedures to testing which section 323(c) of the Act requires regarding the advertising of dishwashers. The sampling requirements which apply only for purposes of advertising have been reorganized into § 430.24(c) of the final test procedures. Section 430.24(c) is similar to proposed § 430.23(c), but contains several revisions. Most notably, the units tested are required to be representative of production units or actual production units. This change is intended to reduce the burden which might be caused by requiring post-production rating of basic models in every instance of testing pursuant to section 323(c) of the Act.

Manufacturers are not required test unless they choose to make representations regarding a measure of energy consumption identified in or based upon § 430.22(c). It should also be emphasized that the test procedures prescribed today apply only to the initial rating of a basic model.

In response to comments from the industry, certain technical changes have also been made in the sampling language. Specifically, the mean of the sample is required to be within ±5 percent of the estimate of the true mean of the basic model population.

8. TEST VOLTAGE

One of the comments recommended the use of 115 volts as the standard test voltage rather than the 120 volts required by 2.2 of Appendix C since most dishwashers are nameplate rated at 115 volts and are actually operated at that voltage. FEA agrees with the NBS recommendation that this change be adopted and has amended 2.2 of Appendix C accordingly.

9. TEST WATER TEMPERATURE

One manufacturer felt that the requirement of 2.3 of Appendix C that the test water temperature be maintained between 138°F to 142°F was unduly and unnecessarily restrictive and therefore recommended that the range be increased to 135°F to 145°F.

NBS conducted tests on solenoid valves which control the flow of hot water into the dishwasher to determine if the recommended change in the test water temperature would affect the volume of water consumption per cycle and therefore have an impact on the amount of energy consumption. The test results showed less than a 1 percent variation in the flow rate when the water temperature was permitted to vary from 135°F to 145°F. Therefore, NBS recommended that the requested change be adopted and FEA concurs. Accordingly, 2.3 of Appendix C has been changed to permit the temperature of the test water to range from 135°F to 145°F.

With respect to water temperature, the Consumer Product Safety Commission (CPSC) suggested that the test method for measuring the energy consumption of dishwashers include a method to measure the difference in the annual energy consumption between a water heater set at 145°F and one set at 130°F. The principal interest of the CPSC is to encourage consumers voluntarily to set back the thermostatic control on their water heaters to 130°F in order to reduce or eliminate the hazard of scald injuries around the home from hot water.

The dishwasher is presently the only household appliance which requires water at temperatures greater than 130° F to operate effectively. CPSC believes that many, if not most, homes with dishwashers would consume less energy if the thermostat on their water heater was set at 130° F and these consumers had dishwashers with internal boost heaters capable of raising the water temperature coming into the dishwasher high enough to clean dishes adequately. This suggestion assumes that homeowners would turn down water heater thermostats if they bought dishwashers with internal boost heaters.

FEA appreciates the data provided by CPSC and is sympathetic to the goals CPSC seeks to achieve. However, the test procedures for dishwashers are designed to be representative of typical consumer usage. Under present technology no dishwasher detergent exists that is effective at a temperature of 130° F. Also, most dishwashers are not designed to delay the washing and rinsing process until an internal boost heater sufficiently elevates the water temperature adequately to clean dishes using existing detergents. It is also unclear whether the use of an internal boost heater to elevate the temperature of the water coming into the dishwasher would actually save energy, since NBS has determined that the efficiency of heating water within the dishwasher is less than the efficiency of heating water in the central home water heater, whether it is a gas, oil, or electric water heater. For these reasons, FEA is at this time unable to include provisions in the dishwasher test procedures to account for voluntarily lower thermostatic water heater settings. FEA will consider this comment with respect to the prescription of test procedures for other household products that use hot water, and with respect to test procedures for water heaters themselves. FEA will also review the applicability of this suggestion to the dishwasher test procedures should the state of detergent or dishwasher technology change to accommodate lower water heater temperatures.

10. MISCELLANEOUS

After careful consideration of all of the comments and further consultation with NBS and FTC, FEA has incorporated some minor editorial and substantive changes in the proposed test procedures in the final rule that were not discussed above.

C. REGULATIONS PRESCRIBED

1. TEST PROCEDURES

The test procedures for dishwashers prescribed today are included in Subpart B and are substantially the same as those proposed, with the addition of the changes discussed above. As with the proposed procedures, test methods and conditions incorporate the approach contained in the Association of Home Appliance Manufacturers (AHAM) draft supplement (DW-2EC) for measuring energy consumption for a normal dishwasher cycle to the AHAM dishwasher standard DW-1. The test procedures also used the definition of the term "oil" contained in the American Society for Testing and Materials (ASTM) D396-71. For purposes of FEA's program, the incorporated approach remains applicable as presently written, regardless of any subsequent amendment by AHAM of either the standard or supplement, until further amendment by FEA.

Under the requirements of section 32(c) of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.) as amended by section 9 of the Federal Energy Administration Authorization Act of 1977 (Pub. L. 95-70), the Administrator is to consult with the Attorney General and the Chairman of the Federal Trade Commission concerning the impact on competition of any rules prescribed by FEA which utilize or incorporate any commercial standards.

The Administrator has transmitted copies of the test procedures for dishwashers, which incorporate the above mentioned commercial standards, to the Attorney General and the Chairman of the Federal Trade Commission for their comments concerning the impact of such standards on competition in accordance with section 32(c). Neither official has any comments nor do they recommend against the incorporation or use of these commercial standards in the final test procedures for dishwashers.

2. GENERAL PROVISIONS

Also prescribed today are certain program definitions, including definitions for "dishwasher," "gas," "natural gas," "oil," and "propane." The definition of the term "basic model" for dishwashers has been added. These definitions were previously proposed in Subpart A (41 FR 19977, May 14, 1976; 42 FR 15423, March 22, 1977). Comments which were received regarding these definitions and the issues which they raised have been discussed earlier in this notice.

It should be noted that some of the definitions prescribed today may be applicable to test procedures for other appliances. While these definitions are final, comments to the effect that any of these definitions are inapplicable to a particular appliance will be evaluated to determine whether amendment or modification is appropriate.

3. APPLICATION OF TEST PROCEDURES

As discussed previously, the final dishwasher test procedures prescribed today must be applied before representations regarding a measure of energy consumption can be made. Because the purposes and needs of the different elements of the appliance program (e.g., labeling, targets) vary, application of the standard test methodology prescribed today may differ in some respects for each program element. It is expected that instructions on how to apply the standard test methodology to these other elements of the appliance program will be proposed for comment in the near future.

The requirements of § 430.24(c) of the final regulations apply until such time as final labeling requirements for a particular measure of energy consumption and the associated test procedure application provision are prescribed. After that time, all representations regarding a measure of energy consumption covered by a labeling rule must be the same as represented on the label.

D. UNIT COSTS OF ENERGY

Under section 323(b)(2) of the Act, FEA is to provide manufacturers information as to the representative average unit costs of energy. This information was provided by notice issued July 11, 1977 (42 FR 36549, July 15, 1977).

E. PREEMPTION

Today's rulemaking prescribing final test procedures for dishwashers supersedes any State regulation to the extent required by section 327 of the Act. Pursuant to section 327, all State regulations which provide for the disclosure of information with respect to any measure of energy consumption of dishwashers or which provide for any energy efficiency standard or similar requirement with respect to energy efficiency or energy use of dishwashers must now employ test procedures identical to those specified in today's final rule.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-384; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 430 of Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below, effective September 10, 1977.

Issued in Washington, D.C. August 3, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 430.2 is amended by adding paragraph (3) as part of the definition of "basic model," and by adding in appropriate alphabetical order definitions of "dishwasher," "gas," "natural gas," "oil" and "propane" to read as follows:

§ 430.2 Definitions.

• • • • • •

"Basic model" means all units of a given type of covered product manufactured by one manufacturer and:

• • • • • •

(3) With respect to dishwashers, which have electrical characteristics which are essentially identical and which do not have any differing physical or functional characteristics which affect energy consumption.

• • • • • •

"Dishwasher" means a cabinet-like appliance which with the aid of water and detergent, washes, rinses, and dries (when a drying process is included) dishware, glassware, eating utensils, and most cooking utensils by chemical, mechanical and/or electrical means and discharges to the plumbing drainage system.

• • • • • •

"Gas" means either natural gas or propane.

• • • • • •

"Natural gas" means natural gas as defined by the Federal Power Commission.

• • • • • •

"Oil" means heating oil grade No. 2 as defined in American Society for Testing and Materials (ASTM) D396-71.

• • • • • •

"Propane" means a hydrocarbon whose chemical composition is predominantly C^3H^8, whether recovered from natural gas or crude oil.

• • • • • •

2. Section 430.22 is amended by adding a paragraph (c), to read as follows:

§ 430.22 Test procedures for measures of energy consumption.

• • • • • •

(c) *Dishwashers.* (1) The estimated annual operating cost for dishwashers not having a truncated normal cycle as defined in 1.5 of Appendix C to this subpart shall be—

(i) When electrically-heated water is used, the product of the following three factors: (A) The representative average use cycle of 416 cycles per year, (B) the total per-cycle energy consumption for the normal cycle as defined in 1.3 of Appendix C to this subpart in kilowatt-hours per cycle, determined according to 4.4 of Appendix C to this subpart, and (C) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year, and

(ii) When gas-heated or oil-heated water is used, the product of: The representative average use cycle of 416 cycles per year times the sum of (A) the product of the per-cycle machine electrical energy consumption for the normal cycle in kilowatt-hours per cycle, determined according to 4.3 of Appendix C to this subpart, times the representative average unit cost in dollars per kilowatt-hours as

provided by the Administrator plus (B) the product of the per-cycle water energy consumption for gas-heated or oil-heated water for the normal cycle, in Btu's per cycle, determined according to 4.2 of Appendix C to this subpart, times the representative average unit cost in dollars per Btu for gas or oil, as appropriate, as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(2) The estimated annual operating cost for dishwashers having a truncated normal cycle as defined in 1.5 of Appendix C to this subpart shall be—

(i) When electrically-heated water is used, the product of the following three factors: (A) The representative average use cycle of 416 cycles per year, (B) one-half the sum of (1) the total per-cycle energy consumption for the normal cycle as defined in 1.3 of Appendix C to this subpart plus (ii) the total per-cycle energy consumption for the truncated normal cycle as defined in 1.5 of Appendix C to this subpart, each in kilowatt-hours and determined according to 4.4 of Appendix C to this subpart, and (C) the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year, and

(ii) When gas-heated or oil-heated water is used, the product of: The representative average use cycle of 416 cycles per year times the sum of (A) one-half the product of the per-cycle machine electrical energy consumption for the normal cycle as defined in 1.3 of Appendix C to this subpart, determined according to 4.3 of Appendix C to this subpart, times the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator, plus one-half the product of the per-cycle machine electrical energy consumption for the truncated normal cycle as defined in 1.5 of Appendix C to this subpart, determined according to 4.3 of Appendix C to this subpart, times the representative average unit cost in dollars per kilowatt-hour as provided by the Administrator plus (B) one-half the product of the per-cycle water energy consumption for gas-heated or oil-heated water for the normal cycle as defined in 1.3 of Appendix C to this subpart, in Btu's per cycle, determined according to 4.2 of Appendix C to this subpart, times the representative average unit cost in dollars per Btu for gas or oil, as appropriate, as provided by the Administrator, plus one-half the product of the per-cycle water energy consumption for gas-heated or oil-heated water for the truncated normal cycle as defined in 1.5 of Appendix C to this subpart, in Btu's per cycle, determined according to 4.2 of Appendix C to this subpart, times the representative average unit cost in dollars per Btu for gas or oil, as appropriate, as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(3) The energy factor for dishwashers, expressed in cycles per kilowatt-hour shall be—

(i) For dishwashers not having a truncated normal cycle, as defined in 1.5 of Appendix C to this subpart, capable of being preset, the reciprocal of the total per cycle energy consumption for the normal cycle in kilowatt-hours per cycle, determined according to 4.4 of Appendix C to this subpart, and

(ii) For dishwashers having a truncated normal cycle, as defined in 1.5 of Appendix C to this subpart, capable of being preset, the reciprocal of one-half the sum of (A) the total per-cycle energy consumption for the normal cycle plus (B) the total per-cycle energy consumption for the truncated normal cycle, each in kilowatt-hours per cycle and determined according to 4.4 of Appendix C to this subpart.

(4) Other useful measures of energy consumption for dishwashers shall be those measures of energy consumption for dishwashers which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix C to this subpart.

* * * * *

3. Section 430.24 is amended by adding a paragraph (c), to read as follows:

§ 430.24 Representations regarding measures of energy consumption.

* * * * *

(c) *Dishwashers.* (1) Except as provided in paragraph (c)(4) of this section, no manufacturer, distributor, retailer, or private labeler of dishwashers may make any representation with respect to or based upon a measure or measures of energy consumption described in § 430.22 (c) unless a sample of sufficient size of each basic model for which such representation is made has been tested in accordance with applicable provisions of this subpart such that, for each such measure of energy consumption there is a probability of not less than 0.95 that the mean of the sample is within ±5 percent of the estimate of the true mean of such measures of the basic model.

(2) The sample selected for paragraph (c)(1) of this section shall be comprised of units which are production units, or are representative of production units, of the basic model being tested.

(3) A basic model having dual voltage ratings shall be separately tested at each design voltage such that the requirements of paragraph (c)(1) of this section are satisfied at each rating.

(4) Whenever a rule applicable to dishwashers is prescribed under section 324 of the Act, this paragraph shall not apply to any label covered by such rule, and all representations of any measure of energy consumption covered by such rule shall be identical to the measure of energy consumption on the label.

* * * * *

4. Subpart B of Part 430 is amended to add an Appendix C, to read as follows:

* * * * *

APPENDIX C—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF DISHWASHERS

1. *Definitions.*—1.1 "Cycle" means a sequence of operations of a dishwasher which performs a complete dishwashing operation, and may include variations or combinations of the functions of washing, rinsing and drying.

1.2 "Cycle type" means either any complete sequence of operations capable of being preset on the dishwasher prior to the initiation of machine operation.

1.3 "Normal cycle" means the cycle type recommended by the manufacturer for completely washing a full load of normally soiled dishes, including the power-dry feature.

1.4 "Power-dry feasure" means that function in a cycle in which electrically-generated heat is introduced into the washing chamber for the purpose of improving the drying performance of the dishwasher.

1.5 "Truncated normal cycle" means the normal cycle interrupted to eliminate the power-dry feature after the termination of the last rinse operation.

2. *Testing conditions.*—2.1 *Installation.* Install the dishwasher in accordance with the manufacturer's instruction, except that undercounter dishwashers need not be installed under a counter.

2.2 *Electrical supply.* Maintain the electrical supply to the dishwasher within two percent of 115 volts and within one percent of its nameplate frequency as specified by the manufacturer.

2.3 *Water temperature.* Maintain the water supply temperature between 135°F and 145°F.

2.4 *Water pressure.* Maintain the pressure of the water supply between 32.5 and 37.5 pounds per square inch.

2.5 *Ambient and machine temperature.* Maintain the room ambient air temperature between 70°F and 85°F, and assure that the dishwasher is at room ambient temperature at the start of each test cycle.

2.6 *Load.* The dishwasher shall be tested on the normal cycle and the truncated normal cycle without a test load.

3. *Test cycle and measurements.*—3.1 *Test cycle.* Perform a test cycle by establishing the testing conditions set forth in 2 of this Appendix, setting the dishwasher to the cycle type to be tested, initiating the cycle and allowing the cycle to proceed to completion.

3.2 *Machine electrical energy consumption.* Measure the machine electrical energy consumption, Me, specified as the number of kilowatthours of electrical energy consumed during the entire test cycle, using a kilowatthour meter having a resolution no larger than 0.001 kilowatthours and a maximum error no greater than one percent.

3.3 *Water consumption.* Measure the water consumption, specified as the number of gallons delivered to the dishwasher during the entire test cycle, using a water meter having a resolution no larger than 0.1 gallon and a maximum error no greater than 1.5 percent for all water flow rates from one to five gallons per minute and for all water temperatures encountered in the test cycle.

3.4 *Reported values.* State the reported values of machine electrical energy consumption and water consumption as measured.

4. *Calculation of derived results from test measurements.*—4.1 *Per-cycle water energy consumption using electrically heated water.* Calculate for the cycle type under test the per-cycle water energy consumption using electrically heated water, W_e, expressed in kilowatt-hours per cycle and defined as:

$$W_e = V \times T \times K,$$

where
V = reported water consumption in gallons per cycle for the cycle type under test.
T = nominal water heater temperature rise = 90°F.
K = specific heat of water in kilowatt-hours per gallon per degree fahrenheit = .00240.

4.2 *Per-cycle water energy consumption using gas-heated or oil-heated water.* Calculate for the cycle type under test the per-cycle water energy consumption using gas-heated or oil-heated water, W_g, expressed in Btu's per cycle and defined as:

$$W_g = \frac{V \times T \times C}{e},$$

where
V and T are defined in 4.1 of this Appendix, and
C = specific heat of water in Btu's per gallon per degree fahrenheit = 8.1966.
e = nominal gas or oil water heater efficiency = 0.75.

4.3 *Per-cycle machine electrical energy consumption.* Use the measured value recorded in 3.2 as the per cycle machine electrical energy consumption, M_e, expressed in kilowatt-hours per cycle.

4.4 *Total per-cycle energy consumption.* Calculate for the cycle type under test the total per-cycle energy consumption, E_t, expressed in kilowatt-hours per cycle, and defined as the sum of the per-cycle machine electrical energy consumption, M_e, plus the per-cycle water energy consumption of electrically-heated water, W_e, calculated for the cycle type, determined according to 4.3 and 4.1, respectively.

Title 12—Banks and Banking

CHAPTER I—COMPTROLLER OF THE CURRENCY, DEPARTMENT OF THE TREASURY

PART 7—INTERPRETIVE RULINGS

Payment of Dividends; Bad Debts

AGENCY: Comptroller of the Currency.

ACTION: Final rule.

SUMMARY: 12 CFR 7.6125 interprets the statutory requirement of 12 U.S.C. 56 that national banks deduct bad debts (frequently referred to as "statutory bad debts") from net profits then on hand in order to compute funds available for the payment of dividends. The revised ruling is intended to clarify further the meaning of the term "bad debts" as that term is used in the statute. Confusion over what constitutes a bad debt became evident when certain overdue real estate loans were being classified as statutory bad debts even though appropriate long-term workout schedules had been arranged which were reasonably expected to result in little or no loss to the bank.

EFFECTIVE DATE: August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard H. Neiman, Staff Attorney, Office of the Comptroller of the Currency, Washington, D.C. 20219. Tel. No. (202-447-1884).

SUPPLEMENTARY INFORMATION: On December 14, 1976, the Comptroller of the Currency published in the FEDERAL REGISTER (41 FR 54600) for comment a proposed revision of 12 CFR 7.6125, an interpretive ruling relating to the payment of dividends and bad debts. The primary purpose of the proposed revision was to clarify the meaning of the term "bad debt" as that term is used in 12 U.S.C. 56.

In response to the proposed revision, ten comments were received. Those commenting included national banks, bank holding companies, law firms, trade associations, and national bank examiners.

DISCUSSION OF MAJOR COMMENTS

Virtually all of the comments received were favorable and agreed that the proposed revision had met its stated purpose of clarifying the meaning of the term "bad debt", as that term is used in 12 U.S.C. 56. One commenter remarked that it was a positive step that should bring clarity and understanding to an area which was previously subject to individual interpretation and varying contention over definitions.

1. *Installment Loans.* Paragraph (b) of the proposed ruling provided in part that "installment loans on which any payment is six months past due will be considered matured even though acceleration of the total debt may not have occurred." The former ruling provided that "installment obligations on which interest is past due for six months are statutory bad debts subject to other conditions of the statute, to the extent that payments of principal are in default."

One commenter suggested a clarification of the term "installment loans." The definition which the commenter suggested, would limit such loans to those loans payable in four or more installments, the proceeds of which are used primarily for personal, family or household purposes. According to the commenter, loans which do not fall within this definition, but are payable in installments, would be subject to the general rule that such loans are statutory bad debts (assuming interest is six months past due) only to the extent that payments of principal are in default. In response to this comment it should be pointed out that one of the purposes of revising the paragraph on installment loans was to delete the provision that such loans could be classified as statutory bad debts only to the extent that payments of principal were in default. Under the revised ruling, any installment loan on which any payment is six months past due and is not well secured or in the process of collection will be considered a statutory bad debt for the full amount of the loan. As stated in the proposed ruling, this change is in part a result of the complexity of computing interest on installment loans and is also intended to establish a more definite standard with regard to such loans. After careful consideration, the Comptroller believes there should not be a distinction between consumer-type installment loans and those for business or commercial purposes with regard to the payment of dividends and hence has adopted the language of the proposed ruling.

2. *Net Profits Then On Hand.* Four commenters suggested a clarification of the phrase "net profits then on hand" as that term is used in 12 U.S.C. 56. Two of these commenters apparently have based their suggestion on the inaccurate assumption that "net profits then on hand" is limited to net profits of the current year. However, in fact, the phrase "net profits then on hand" as used in 12 U.S.C. 56 represents a cumulative figure and is not limited to net profits of the current year. Nonetheless, the comments suggest that enough confusion may exist concerning the phrase "net profits then on hand" that an interpretive ruling further defining this phrase may be appropriate. However, the Comptroller has concluded that a separate ruling, rather than an addition to the presently proposed ruling, would be preferable. Accordingly, the modification to 12 CFR 7.6125 is being adopted without reference to a separate definition for the phrase "net profits then on hand."

3. *Documentation.* Paragraph (e)(2) of the proposed ruling required a bank to maintain, at a minimum, monthly progress reports on its collection efforts. One commenter suggested that the documentation provision should instead provide that progress reports be prepared on a basis which bears a reasonable relationship to the collection plan and, at a minimum, as often as a payment is required under the collection plan. The Comptroller believes that in most if not all situations an effective collection plan requires monthly monitoring at a minimum. Some situations will require more frequent monitoring and these will be dealt with on an individual basis. Therefore, the Comptroller has left the documentation requirement unchanged from the proposed ruling.

DRAFTING INFORMATION

The principal drafters of this document were Mr. John M. Miller, Acting Deputy Chief Counsel and Mr. Richard H. Neiman, Staff Attorney.

ADOPTION OF AMENDMENT

12 CFR Part 7 is amended by revising § 7.6125 to read as follows:

§ 7.6125 Payment of dividends; bad debts.

(a) *General.* Pursuant to the provisions of 12 U.S.C. 56, bad debts must be deducted from net profits then on hand in computing funds available for payment of dividends. Bad debts, as that term is used in the statute, means matured obligations due a national bank on which interest is past due and unpaid for six months unless the debts are well secured and in the process of collection. Every type of overdue indebtedness owing to the bank must be considered, including loans and investment securities. The six month period of default on interest may begin at any time, regardless of when the debt matures.

(b) *Matured debt.* Whether a debt has matured for purposes of the statute usually will be determined by applicable contract law. Generally, a debt is matured when all or part of the principal

is due and payable as the result of demand, arrival of the stated maturity date, acceleration by contract or by operation of law. Nevertheless, any demand debt on which the payment of interest is six months past due will be considered matured even though payment of the debt has not been demanded. Installment loans on which any payment is six months past due will be considered matured even though acceleration of the total debt may not have occurred.

(c) *Well secured debt.* A debt is well secured within the meaning of the statute if it is secured by collateral in the form of liens on, or pledges of, real or personal property, including securities, having a realizable value sufficient to discharge the debt in full, or by the guaranty of a financially responsible party. In the event that the loan is partially secured, only that portion not properly secured will be considered a statutory bad debt.

(d) *Debt in the process of collection.* A debt is in the process of collection if collection of the debt is proceeding in due course, either through legal action, including judgment enforcement procedures, or, in appropriate circumstances, through collection efforts not involving legal action which are reasonably expected to result in repayment of the debt or in its restoration to current status. In any case, the bank should have a plan of collection setting forth the reason for the selected method of collection, the responsibilities of the bank and the borrower, and the expected date of repayment of the debt or its restoration to current status.

(e) *Miscellaneous.* (1) *Debts of bankrupt or deceased debtors.* A claim duly filed against the estate of a bankrupt or deceased debtor is considered as being in the process of collection. The obligation will be considered well secured if it meets the criteria set forth above; or the claim of the bank against the estate has been duly filed, the statutory period for filing claims has expired and the assets of the estate are adequate to discharge all obligations in full.

(2) *Documentation.* The bank must maintain in its files documentation to support its evaluation of the security. In addition, the bank must retain, at a minimum, monthly progress reports on its collection efforts, noting and explaining any deviation from the collection plan.

Dated: August 2, 1977.

JOHN G. HEIMANN,
Comptroller of the Currency.

[FR Doc.77-22706 Filed 8-5-77;8:45 am]

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 9, Amdt. 10]

PART 123—DISASTER LOANS

New Physical Disaster Policy for Farmers Having a Partial Crop Loss

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes the criteria SBA will use to establish the physical damage when a farmer suffers a partial production loss. This rule results from farmer's being defined in Pub. L. 94-305 as small businesses eligible for SBA assistance.

EFFECTIVE DATE: August 8, 1977.

ADDRESSES: Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

Richard L. Wray, Financial Analyst, (202-653-6470).

SUPPLEMENTARY INFORMATION: Section 123.0(a) advises that disaster policy may be changed without advance notice due to the emergency nature of disasters. In this instance SBA has indications that there is an immediate need for this rule in the agricultural portions of the country. Therefore, a delay in the effective date of this policy could cause additional suffering. Any interested person is, however, invited to send written comments, in duplicate, to the Associate Administrator for Finance and Investment. The complete address appears under the "Addresses" hearing.

Pursuant to the authority of Section 5(b)(6) of the Small Business Act (15 U.S.C. 634) Part 123, Chapter I, Title 13 of the Code of Federal Regulations, is amended by redesignating the paragraph after § 123.2(a)(3) "Evidence of Loss" as subparagraph (i) and inserting a new subparagraph (ii) to read as follows:

§ 123.2 Eligibility.

(a) * * *

(1) * * *

(2) * * *

(3) *Evidence of loss.* * * * (i) * * *

(ii) Assistance may be extended for full or partial farm production losses upon presentation of evidence supporting the physical loss. The applicant must present evidence of the expected production after the effects of the disaster compared to a normal year's production. The amount of a partial loss will be established by an estimate of the damage by a Farmers Home Administration or other U.S. Department of Agriculture employee or other knowledgeable person, not the applicant, acceptable to SBA. A normal year's total production is the applicant's average production per animal (number X production) or per acre (acres X yield) for the four (4) years immediately proceeding the disaster. The applicant's own records will be used to establish the average production. When the applicant has no records or has been operating the farm for less than four years, the records for the county maintained by the Crop Reporting Service, Agricultural Stabilization and Conservation Service, Agricultural Extension Service of the State College or other reliable and complete record may be used to establish the past four years' production.

* * * * *

Dated: July 21, 1977.

A. VERNON WEAVER,
Administrator.

[FR Doc.77-22633 Filed 8-5-77;8:45 am]

CHAPTER III—ECONOMIC DEVELOPMENT ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 301—ESTABLISHMENT AND ORGANIZATION

Office of Special Projects

AGENCY: Economic Development Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: This regulation describes the functions and responsibilities of a newly created office within the Economic Development Administration, the Office of Special Projects.

DATES: Effective date: August 8, 1977. Comments by: September 7, 1977.

ADDRESSES: Send comments to: Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT:

James F. Marten, U.S. Department of Commerce, Room 7009, Washington, D.C. 20230 (202-377-5441).

SUPPLEMENTARY INFORMATION: The Office of Special Projects was created by an amendment to Department of Commerce Organization Order 45-1.

Because this regulation relates to the EDA grant and loan program, it is exempted from the procedures described in Section 553 of the Administrative Procedure Act (5 U.S.C. 553). However, in the spirit of public policy set forth in that Act, interested persons may submit written suggestions regarding this regulation to the above address.

NOTE.—EDA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Accordingly, 13 CFR Part 301 is amended by the addition of a new § 301.42 and by renumbering the present § 301.42 as § 301.43. New § 301.42 reads as follows:

§ 301.42 Office of Special Projects.

The Office of Special Projects serves as the principal staff office of the Assistant Secretary. It provides advice, direction and coordination for the development and implementation of selected innovative economic development programs and projects to assist selected urban areas, special areas such as the Mexican-American border and Puerto Rico, and special groups identified by the Assistant Secretary. In accomplishing these functions, the Office develops

necessary implementation plans, strategies and procedures, and it coordinates, as appropriate, with other Federal, State, and local organizations.

§ 301.43 [Redesignated from § 301.42]

(Department of Commerce Organization Order 45-1 as amended (40 FR 5549, as amended); sec. 701, Pub. L. 89-136, 79 Stat. 570 (42 U.S.C. 3211); Department of Commerce Organization Order 10-4, as amended, (40 FR 56702, as amended).)

ROBERT T. HALL,
Assistant Secretary for Economic Development.

AUGUST 1, 1977.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 76-SO-25; Amdt. 39-3003]

PART 39—AIRWORTHINESS DIRECTIVES

Grumman American Aviation Corp. Models G-159 and G-1159

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises AD 77-13-01 to allow for a grant of extension for the structural modification of Grumman G-159 and G-1159 nose landing gear drag struts on an individual aircraft basis. This change is permitted because of unavailability of parts for the modification.

DATES: Effective date: August 8, 1977. Compliance required within 10 hours time in service after June 21, 1977 (original effective date of the AD).

ADDRESSES: Grumann American Aviation Corporation Aircraft Service Change No. 226 may be obtained from Grumman American Aviation Corporation, P.O. Box 2206, Savannah, Georgia 31402, telephone 912-964-3000. A copy of the Service Change is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Curtis Jackson, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Southern Region, P.O. Box 20636, Atlanta, Georgia 30320. Telephone 404-763-7407.

SUPPLEMENTARY INFORMATION: When AD 77-13-01 was issued, modification kits were to be made available by Grumman American Aviation Corporation in sufficient numbers so that those operators desiring to install the structural modification in lieu of the placard could do so in a reasonable time. It has since been learned that kits cannot be produced in sufficient quantity to permit compliance within a reasonable period of time. Since the danger of the drag strut penetration of the cockpit floor occurs during a very severe landing or following a crash and does not occur during normal operations, the FAA feels that an extension of the compliance time for the structural modification may be given to operators on an individual basis, provided they submit adequate justification for their need to utilize the jumpseat.

Operators desiring an extension of the compliance time for the structural modification should send documentation with justification for the need for an extension to the Federal Aviation Administration, Chief, Engineering and Manufacturing Branch, P.O. Box 20636, Atlanta, Georgia 30320. Also required is evidence of a firm commitment from Grumman American Aviation Corporation or any other approved source on the available date for the modification kit for that serial number aircraft. Each request for an extension will be handled on an individual aircraft basis.

Since this amendment imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Curtis Jackson, Engineering and Manufacturing Branch, Flight Standards Division, and Ronald R. Hagadone, Office of the Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13), Amendment 39-2919, AD 77-13-01 is amended to read as follows:

GRUMMAN AMERICAN AVIATION CORPORATION (GAAC). Applies to Grumman American Aviation Corporation, Model G-159, all serial numbers, and Model G-1159, serial numbers 1 through 208 and 775, airplanes certificated in all categories.

Compliance required within 10 hours time in service after June 21, 1977, unless already accomplished.

To prevent injury to an occupant of any jumpseat located between fuselage stations 119 and 169 on Grumman American Aviation Corporation Models G-159 and G-1159 airplanes, accomplish one of the following:

(a) Install a placard either on the bulkhead adjacent to the jumpseat or at any equivalent location approved by the Federal Aviation Administration utilizing a minimum of 3/16 inch high letters with the wording: "Jumpseat Occupancy During Taxi, Takeoff, or Landing Prohibited," or

(b) Modify in the following manner:

1. The Model G-159 nose landing gear drag strut fused or bulkhead modification in accordance with GAAC Aircraft Service Change No. 226, Part I or II, or later FAA-approved revision, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region.

2. The Model G-1159 nose landing gear wheel well bulkhead is modified to eliminate drag strut penetration in accordance with GAAC Aircraft Service Change No. 226, Part II, or later FAA approved revision, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region, or

(c) Upon a grant of extension of compliance time by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region, the required placard may be removed for the length of the extension. Interested operators must furnish documentation with justification for the need of an extension to the Federal Aviation Administration, Chief, Engineering and Manufacturing Branch, P.O. Box 20636, Atlanta, Georgia 30320. Also required in this documentation is evidence of a firm commitment from Grumman American Aviation Corporation on the available date for the modification kit for that serial number aircraft. Each request for an extension will be handled on an individual aircraft basis.

When either of the modifications described in paragraph b(1) or b(2) are accomplished, or the individual grant of extension is issued in accordance with paragraph (c), the required placard of paragraph (a) may be removed.

This amendment becomes effective August 8, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958 as amended, (49 U.S.C. 1354(a), 1421, and 1423; sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on July 29, 1977.

PHILLIP M. SWATEK,
Director.

[FR Doc.77-22496 Filed 8-5-77;8:45 am]

[Docket No. 17066, Amdt. 39-3005]

PART 39—AIRWORTHINESS DIRECTIVES

Eiriavion OY Model PIK-20D Sailplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the FEDERAL REGISTER and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to known operators of certain Eiriavion OY Model PIK-20D sailplanes by individual telegrams dated July 7, 1977. The AD requires replacement or repair of the wing to prevent wing structural failure.

DATES: Effective August 8, 1977, except with respect to certain persons specified in the body of the AD. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from Smitty's Soaring Service, Deansboro Road, Route 12B, Clinton, New York 13323, or from Sailplane Repair Service, Inc., 216 Commerce Drive, P.O. Box 1462, Fort Collins, Colorado 80522. A copy of the service bulletin is contained in the Rules Docket, Rm. 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, telephone 513.38.30.

SUPPLEMENTARY INFORMATION: Pursuant to the authority delegated by the Administrator, an AD was adopted on June 24, 1977, and made effective immediately by telegram as to all known operators of Eiriavion OY Model PIK-20D sailplanes having certain serial numbers because of possible insufficient bonding of the wing main spar shear web to the wing upper panel spar cap. That AD required either replacement of wing panels or wing repair in accordance with a method to be approved by the FAA, Europe, Africa, and Middle East Region to prevent failure. Subsequently, the FAA determined that a specific repair procedure developed by the manufacturer provides an acceptable corrective action.

An AD superseding the AD adopted on June 24, 1977, was adopted on July 6, 1977, and issued by individual telegrams dated July 7, 1977. The superseding AD requires, in the alternative, replacement of wing panels, repair in accordance with the aircraft manufacturer's service bulletin, or repair in accordance with some other FAA-approved means of compliance.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the AD effective immediately as to all known operators of Eiriavion OY Model PIK-20D sailplanes by individual telegrams. These conditions still exist and the AD is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

The principal authors of this document are P. Cormacci, Europe, Africa, and Middle East Region, E. Newberger, Flight Standards Service, and J. Jeffrey, Office of the Chief Counsel.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following airworthiness directive:

EIRIAVION OY (formerly MOLINO OY). Applies to Model PIK-20D sailplanes with serial numbers 20510 through 20532, 20534 through 20540, 20542 through 20544, 20546, 20548, 20552, 20555, and 20556.

To prevent separation of wing upper panel spar cap and wing main spar shear web, before further flight, unless already accomplished, comply with paragraph (a), (b), or (c).

(a) Replace wing panels with new wing panels identified by the manufacturer as serviceable replacements.

(b) Repair existing wing panels in accordance with appendix 1 of Eiriavion Service Bulletin No. M 17, dated June 17, 1977, at an FAA certificated repair station that is a manufacturer's authorized repair facility. Following rebonding, visually inspect the affected area to ensure that the new resin forms a continuous bond on both sides of the wing shear web for its full length.

(c) Repair in accordance with an alternate means of compliance which must be approved by the Chief, Aircraft Certification Staff, FAA, Europe, Africa, and Middle East Region, c/o American Embassy, Brussels, Belgium.

NOTE.—Copies of the applicable service bulletin are available at the following manufacturer's authorized repair facilities:

Smitty's Soaring Service, Deansboro Road Route 12B, Clinton, New York 13323:

Sailplane Repair Service, Inc., Rich Roberts, 216 Commerce Drive, P.O. Box 1462, Fort Collins, Colorado 80522.

This amendment is effective August 8, 1977, as to all persons except those persons to whom it was made immediately effective by the telegram dated July 7, 1977, which contained this amendment.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on July 28, 1977.

JAMES M. VINES,
Acting Director,
Flight Standards Service.

[FR Doc.77-22497 Filed 8-5-77;8:45 am]

[Docket No. 74-WE-42-AD; Amdt. 39-2999]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas DC-8 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment of an existing airworthiness directive (AD) clarifies the type of main tank pump which is to be operated during certain phases of flight in McDonnell Douglas DC-8 series airplanes, which incorporate Pratt & Whitney JT3D engines.

EFFECTIVE DATE: August 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Kyle L. Olsen, Executive Secretary, Airworthiness Directive Review Board Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles California 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: After issuing AD 74-23-06 experience reveals that a lack of clarity exists as to which type of pump must be used during the regimes of flight specified in the AD.

After thorough review and study the FAA has determined that all fuel tank boost pumps must be operative and that the fuel tank reservoir feed pump has no effect on engine acceleration. Therefore, the FAA is amending AD 74-23-06 to clarify that only the fuel tank boost pumps must be operated during those regimes of flight specified in the AD.

Since this amendment provides a clarification and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Marvin F. Rammelsberg, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13), Amendment 39-2005 (39 FR 39717), AD 74-23-06 is amended as follows:

Add a new paragraph to read:

(4) One reservoir feed pump may be inoperative provided:

(a) The affected reservoir feed pump switch position is placarded inoperative.

(b) Established maintenance procedures for this item are followed.

(c) Sufficient fuel is carried in the associated tank to provide a minimum of 2000 pounds of additional fuel in excess of the fuel (including reserves) needed for the flight.

(d) Fuel Loading and Management is in accordance with the FAA approved Airplane Flight Manual.

This amendment becomes effective August 10, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif. on July 26, 1977.

ROBERT H. STANTON,
Director, Federal Aviation Administration, Western Region.

[FR Doc.77-22495 Filed 8-5-77;8:45 am]

[Airspace Docket No. 77-SW-16]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area, Bogalusa, La.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a transition area at Bogalusa, La., to provide controlled airspace for aircraft executing a VOR/DME instrument approach procedure established for the George R. Carr Memorial Air Field.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to designate a transition area at Bogalusa, La.

On May 16, 1977, a notice of proposed rule making was published in the FEDERAL REGISTER (42 FR 24752) stating that the Federal Aviation Administration proposed to designate a transition area at Bogalusa, La., to provide controlled airspace for aircraft executing an instrument approach procedure established for the George R. Carr Memorial Air Field and coincident with this action, the airport would be changed from VFR to IFR.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

DRAFTING INFORMATION

The principal authors of this document are John A. Jarrell, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 440) is amended effective 0901 GMT, October 6, 1977, as hereinafter set forth.

In Subpart G, § 71.181 (42 FR 440), the following transition area is added.

BOGALUSA, LA.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the George R. Carr Memorial Air Field (Latitude 30°48'41.6" N., Longitude 89°51' 53.9" W.), and within 2.5 miles either side of the Picayune VOR 335 radial extending 1 mile from the 5-mile radius.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on July 26, 1977.

PAUL J. BAKER,
Acting Director,
Southwest Region.

[FR Doc.77-22491 Filed 8-5-77;8:45 am]

[Airspace Docket No. 77-SW-30]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone, Hobbs, New Mexico

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the effective hours of operation of the Hobbs, N.M. (Lea County Airport), control zone to coincide with the hours of operation of the Hobbs Air Traffic Control Tower (ATCT) which were reduced from continuous to 0600 to 2200 local time daily. This reduces the availability of special weather observations accordingly and necessitates the change in the control zone hours of operation to conform to the air traffic control tower hours of operation.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: In Subpart F, § 71.171 (42 FR 355) of FAR Part 71, the Hobbs, N.M., control zone is designated as continuous (through the omission of any reference to specific dates and times of operation). This conforms with the air traffic control tower hours of operation. Special weather observations are provided on a 24-hour basis which is one of the requirements for a continuous control zone operation.

A traffic survey was completed on March 31, 1977, which indicated insufficient activity to retain the continuous control tower operation. On October 6, 1977, the air traffic control tower hours of operation will be reduced to 0600 to 2200 local time daily. This will necessitate a similar reduction in the control zone hours of operation.

The aforementioned action will reduce the constraints and, in effect, the impact on the user imposed by the control zone operation. Consequently, we have elected to omit circularization of the change for comment.

DRAFTING INFORMATION

The principal authors of this document are John A. Jarrell, Airspace and Procedures Branch, and Robert C. Nelson, Office of the Regional Counsel.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 355) is amended, effective 0901 GMT, October 6, 1977, as hereinafter set forth.

In Subpart F, § 71.171 (42 FR 355), the Hobbs, N.M., control zone is amended by adding the following sentence:

This control zone is effective during the specific dates and times established in advance by a notice to airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on July 26, 1977.

PAUL J. BAKER,
Director,
Southwest Region.

[FR Doc.77-22492 Filed 8-5-77;8:45 am]

[Airspace Docket No. 76-RM-27]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Delta, Utah, 700 Foot Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Delta, Utah, 700 foot transition area to provide controlled airspace for aircraft executing VOR approaches at the Delta Municipal Airport.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Clyde A. Powers, Airspace Specialist, Operations, Procedures and Airspace Branch, ARM-538, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010, telephone 303-837-3937.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER on Thursday, June 16, 1977, (42 FR 30638) which proposed to alter the Delta, Utah, 700 foot transition area to provide airspace for aircraft executing a new VOR instrument approach procedure to runway 16 and an amended VOR instrument approach procedure (amendment 1) to runway 34 for the Delta, Utah, Municipal Airport. No objections were received in response to this notice.

DRAFTING INFORMATION

The principal authors of this document are Clyde A. Powers, Air Traffic Division, and Daniel J. Peterson, Office of Regional Counsel, Rocky Mountain Region.

Accordingly, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR 71.181) is amended, effective October 6, 1977, as follows:

Amend § 71.181 (42 FR 440) so as to alter the following 700 foot transition area to read:

DELTA, UTAH

That airspace extending upward from 700 feet above the surface within a 9-mile radius of Delta Municipal Airport (latitude 39°23'00" N., longitude 112°30'35" W.); and within 10.5 miles northwest and 5 miles southeast of the Delta VORTAC 203° radial, extending from the 9-mile radius area to 18.5 miles southwest of the VORTAC; within 5 miles east of the Delta VORTAC 186° radial, extending from the 9-mile radius area to 13 miles south of the VORTAC; within 8 miles west and 6.5 miles east of the Delta VORTAC 360° radial, extending from the 9-mile radius area to 30 miles north of the VORTAC • • •

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Aurora, Colo., on July 27, 1977.

M. M. MARTIN,
Director,
Rocky Mountain Region.

[FR Doc.77-22493 Filed 8-5-77;8:45 am]

[Airspace Docket No. 77-CE-19]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone, Emporia, Kansas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the designation of the Emporia, Kansas, control zone from a continuous to a part-time control zone. This action is necessary because the Emporia Flight Service Station is reducing its hours of operation and will make additional airspace available without undue restriction.

EFFECTIVE DATE: August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Gary W. Tucker, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-538, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, telephone 816-374-3408.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the designation of the Emporia, Kansas, control zone from a continuous to a part-time control zone. The Emporia, Kansas, Flight Service Station will reduce its hours of operation effective August 1, 1977. This action removes the availability of weather and communications which are mandatory requirements for the operation of a control zone. Therefore, this action is necessary in order to have the control zone effective only during the hours of operation of the Emporia Flight Service Station. The control zone will be effective during the specific dates and times established in advance by a Notice to Airman. The effective dates and times will thereafter be continuously published in the Airman's Information Manual. Since there is no present alternative to this action, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest and good cause exists for making this amendment effective in less than thirty (30) days after its publication.

DRAFTING INFORMATION

The principal authors of this document are Gary W. Tucker, Air Traffic Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

Accordingly, the Federal Aviation Administration revises § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR 71.171), by amending the following Control Zone:

EMPORIA, KANSAS

Within a 5 mile radius of the Emporia, Kansas, Municipal Airport (Latitude 38°20'-00" N, Longitude 096°11'15" W) and 1.5 miles either side of the 010° bearing from the airport extending from the 5 mile radius to 6 miles north. This Control Zone is effective during the specific dates and times established in advance by a Notice to Airman. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.69 Federal Aviation Regulations (14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Missouri, on July 29, 1977.

C. R. MELUGIN, Jr.,
Director, Central Region.

[FR Doc.77-22494 Filed 8-5-77;8:45 am]

[Airspace Docket No. 77-GL-04]

PART 71—DESIGNATION OF FEDERAL AIRWAYS AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to provide additional controlled airspace in proximity to Lada Airport, Petersburg, Michigan, to accommodate a proposed instrument procedure into the Lada Airport.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Doyle Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone 312-694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircraft operating under visual conditions. The floor of the controlled airspace in this area will be lowered from 1200' above ground to 700' above ground. The circumstance which created this action was a request from the Lada Airport officials to provide that facility with instrument approach capability. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the 700-foot floor of controlled airspace. In addition aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order the comply with applicable visual flight rule requirements.

DRAFTING INFORMATION

The principal authors of this document are Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, and Joseph T. Brennan, Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On page 29515 of the FEDERAL REGISTER dated June 9, 1977, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Petersburg, Michigan. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective October 6, 1977, as follows:

In § 71.181 (42 FR 440), the following transition area is added:

PETERSBURG, MICHIGAN

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Lada Airport (latitude 41°53'15" N, longitude 83°40'45" W) and within 2 miles each side of the Carleton, Michigan VORTAC 226° radial extending from the 5-mile radius area to 9.5 miles southwest of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.81, Federal Aviation Regulations (14 CFR 11.61).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on July 27, 1977.

JOHN M. CYROCKI,
Director, Great Lakes Region

[FR Doc.77-22698 Filed 8-5-77;8:45 am]

[Airspace Docket No. 77-GL-05]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of the Federal action is to designate additional controlled airspace near Pulaski, Wis., to accommodate a new VOR/DME instrument approach procedure into the Carter Airport.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Doyle Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircraft operating under visual conditions. The floor of the controlled airspace in this area will be lowered from 1,200' above ground to 700' above ground. The circumstance which created this action was a request from Carter Airport officials to provide that facility with instrument approach capability. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

DRAFTING INFORMATION

The principal authors of this document are Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, and Joseph T. Brennan, Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On page 29516 of the FEDERAL REGISTER, dated June 9, 1977, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Pulaski, Wis. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective October 6, 1977, as follows:

In § 71.181 (42 FR 440) the following transition area is added:

PULASKI, WIS.

That airspace extending upward from 700 feet above the surface within a 9-mile radius of Austin-Straubel Airport, Green Bay, Wis. (latitude 44°29'16" N., longitude 88°07'-49" W.); within 2½ miles each side of the Green Bay ILS southwest localizer course extending from the 9-mile radius to 8 miles southwest of the OM; within 5 miles to the southwest side and 8 miles to the northeast side of the Green Bay 326° radial, extending from the 9-mile radius area to 10 miles northwest of the VORTAC; and within 5 miles each side of the Green Bay ILS localizer northeast course extending from the 9-mile radius to 14 miles northeast of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.81, Federal Aviation Regulations (14 CFR 11.61).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on July 27, 1977.

JOHN M. CYROCKI,
Director, Great Lakes Region.

[Airspace Docket No. 77-GL-06]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to designate additional controlled airspace near Camp McCoy Army Airfield, Fort McCoy, Wis., to accommodate a new NDB Runway 29 instrument approach procedure into the Camp McCoy Airfield.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Doyle Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircraft operating under visual conditions. The floor of the controlled airspace in this area will be lowered from 1,200' above ground to 700' above ground. The circumstance which created this action was a request from the Department of the Army to provide Camp McCoy Airfield with this instrument approach. This development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

DRAFTING INFORMATION

The principal authors of this document are Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, and Joseph T. Brennan, Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On page 29514 of the FEDERAL REGISTER, dated June 9, 1977, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Fort McCoy, Wis. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective October 6, 1977, as follows:

In § 71.181 (42 FR 440), the following transition area is added:

FORT MCCOY, WIS.

That airspace extending upward from 700 feet above the surface within an 11-mile radius of the Camp McCoy Army Airfield (latitude 43°57'15" N., longitude 90°44'15" W.), and within 3.5 miles each side of the 109° bearing from the Camp McCoy RBN, extending from the 11-mile radius to 7.8 miles east of the Camp McCoy RBN, excluding that portion that overlies the LaCrosse, Wis., transition area.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.81, Federal Aviation Regulations (14 CFR 11.61).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on July 27, 1977.

JOHN M. CYROCKI,
Director, Great Lakes Region.

[FR Doc.77-22700 Filed 8-5-77;8:45 am]

[Airspace Docket No. 77-GL-07]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area and Alteration of Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to expand the existing control zone serving Delta County Airport, Escanaba, Mich., and to designate additional controlled airspace to encompass revisions to existing approach procedures.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Doyle Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of aircraft utilizing various instrument approach procedures in instrument weather conditions and other aircraft operating under visual conditions. The expansion and slight alteration to the control zone boundary is mainly a redefinition of the boundary. The additional airspace required for the transition area would lower the floor of controlled airspace in this area from 1,200' above ground to 700' above ground. The circumstance which created this action was the need to update existing procedures and the addition of a new procedure (LOC Rwy 9) serving this airport. A review of the terminal airspace requirements necessitates the FAA to add the additional airspace to insure that all procedures will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace. In addition, aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

DRAFTING INFORMATION

The principal authors of this document are Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, and Joseph T. Brennan, Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On page 29513 of the FEDERAL REGISTER, dated June 9, 1977, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.171 of Part 71 of the Federal Aviation Regulations so as to amend the control zone at Escanaba, Mich. It was further proposed to amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Escanaba, Mich. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective October 6, 1977, as follows:

In § 71.171 (42 FR 355), the following control zone is amended to read:

ESCANABA, MICH.

Within a 5 statute mile radius of Escanaba VORTAC (latitude 45°43'19" N., longitude 87°05'31" W.); within 3 statute miles each side of the Escanaba VORTAC 007° and 101° radials, extending from the 5-mile radius zone to 8.5 statute miles north and east of the VORTAC; within 3 statute miles each side of the Escanaba VORTAC 266° radial extending from the 5-mile radius zone to 8 statute miles west of the VORTAC.

In § 71.181 (42 FR 440), the following transition area is added:

ESCANABA, MICH.

That airspace extending upward from 700 feet above the surface within a 6.5 statute mile radius of the Escanaba VORTAC; within 3 statute miles each side of the Escanaba VORTAC 007° radial from the 6.5-mile radius zone to 8.5 statute miles north of the VORTAC; within 3 statute miles each side of the Escanaba VORTAC 101° radial from the 6.5-mile radius zone to 9 statute miles east of the VORTAC; within 3 statute miles north and 4 statute miles south of the Escanaba VORTAC 270° radial from the 6.5-mile radius zone to 13.5 statute miles west of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.81, Federal Aviation Regulations (14 CFR 11.61).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Ill., on July 27, 1977.

JOHN M. CYROCKI,
Director, Great Lakes Region.

[FR Doc.77-22701 Filed 8-5-77;8:45 am]

Title 15—Department of Commerce

SUBTITLE A—OFFICE OF THE SECRETARY OF COMMERCE

PART 4b—PRIVACY ACT

Changes in Appendices to Regulations

AGENCY: Office of the Secretary, Commerce.

ACTION: Final rule.

SUMMARY: The Department of Commerce is amending Appendix A to Part 4b of title 15, "Officials to Receive Inquiries, Requests for Access and Requests for Correction or Amendment", to the Privacy Act regulations to reflect organizational changes. Appendix C to Part 4b of title 15 is also being amended to delete references to a General Services Administration government-wide system of records which applied to Commerce but is no longer maintained by GSA.

EFFECTIVE DATE: August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph O. Smiroldo, Director, Office of Organization and Management Systems, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-3707).

SUPPLEMENTARY INFORMATION: The appendices were originally published as part of the 1976 Compilation—Volume IV, pages 691-701—and in the daily edition of the FEDERAL REGISTER—October 2, 1975, pages 45619-45632; October 30, 1975, page 50662; and November 3, 1975, page 51168.

The Department has made four changes in the appendices to the regulations. These changes, which are of a technical rather than substantive nature, are described below for the benefit of the public.

In Appendix A, "Officials to Receive Inquiries, Requests for Access and Requests for Correction or Amendment:"

1. Delete "Office of Energy Programs" and the corresponding address.

This Office (now renamed Office of Energy & Strategy Resource Policy) is not an Operating Unit of the Department as defined in Department regulations and should not be listed separately. The appropriate official to contact for records within the jurisdiction of this unit is the individual designated for records of the Office of the Secretary and all Departmental Staff Offices, the Director, Office of Organization and Management Systems.

2. Change the designated Privacy Officer for the Office of Minority Business Enterprise from "Assistant Director, Field Operations and Administration," to "Privacy Officer, Office of Chief Counsel." This change reflects actual delegation of responsibility.

3. Change the designated Privacy Officer for the United States Travel Service from "Executive Director" to "Director, Office of Administration." The position of Executive Director no longer exists.

In Appendix C, "Systems of Records Noticed by Other Agencies and Applicable to Records of the Department and Applicability of this part thereto:"

4. Delete "Federal motor vehicle accidents" from the column entitled "Category of records"; delete "General Services Administration" from the column entitled "Other Federal Agency"; delete the related footnote 3; and both above and below, change footnote 4 to 3. This deletion is made because the General Services Administration noticed in the FEDERAL REGISTER on June 9, 1977 at page 29561 that these records no longer meet the criteria for a Privacy Act system of records.

Because these changes pertain solely to agency organization and management, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are unnecessary.

Dated: July 1, 1977.

ELSA A. PORTER,
Assistant Secretary for Administration.

[FR Doc.77-19898 Filed 8-5-77;8:45 am]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—ORGANIZATION, PROCEDURES, AND RULES OF PRACTICE

PART 3—RULES OF PRACTICE FOR ADJUDICATIVE PROCEEDINGS

Amicus Curiae Briefs

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: This rule describes procedures for interested persons who wish to file an amicus curiae brief with the Commission.

DATES: Effective immediately.

FOR FURTHER INFORMATION CONTACT:

John T. Irick, Office of the General Counsel, Federal Trade Commission, Washington, D.C. 20580, 202-523-3731.

SUPPLEMENTARY INFORMATION: Amicus curiae briefs may be filed only with the approval of the Commission, except those of Federal and state governmental agencies. Motions requesting permission to file or supporting papers must identify the interest of the applicant(s) and state how such interest would be affected by a Commission decision of the issue(s) appealed. The motion should also contain information which demonstrates why an amicus curiae brief would be desirable.

Parties to the proceeding will be given notice of motions requesting to file amicus curiae briefs or of the Commission's request and will be given a reasonable opportunity, time permitting, to comment on the desirability of an amicus curiae brief.

Except for those instances in which the Commission grants extensions for good cause shown, an amicus curiae must file its brief within the period allowed parties in subsection (b) of Rule 3.52, 16 CFR 3.52(b). Although a person requesting amicus curiae treatment may file a brief with the motion, the brief will only be considered if the motion is granted. While no specific time limit is placed on when a motion seeking leave may be filed, such motions should be filed within a reasonable time after the filing of notices of appeal as specified in subsection (a) of Rule 3.52, 16 CFR 3.52(a).

Accordingly, 16 CFR § 3.52 is amended by adding a new subsection (h) to read as follows:

§ 3.52 Appeal from initial decisions.

* * * * *

(h) *Briefs of Amicus Curiae.*—A brief of an amicus curiae may be filed by leave of the Commission granted on motion with notice to the parties or at the request of the Commission, except that such leave shall not be required when the brief is presented by an agency or officer of the United States; or by a State, territory, commonwealth, or the District of Columbia, or by an agency or officer of any of them. The brief may be conditionally filed with the motion for leave. A motion for leave shall identify the interest of the applicant and state how a Commission decision in the matter would affect the applicant or persons it represents. The motion shall also state the reasons why a brief of an amicus curiae is desirable. Except as otherwise permitted by the Commission, an amicus curiae shall file its brief within the time allowed the parties whose position as to affirmance or reversal the amicus brief will support. The Commission shall grant leave for a later filing only for cause shown, in which event it shall specify within what period such brief must be filed. A motion for an amicus curiae to participate in oral argument will be granted only for extraordinary reasons.

AUTHORITY: 15 U.S.C. § 46(g).

By direction of the Commission dated July 25, 1977.

CAROL M. THOMAS,
Secretary.

[FR Doc.77-22773 Filed 8-5-77;8:45 am]

PART 3—RULES OF PRACTICE FOR ADJUDICATIVE PROCEEDINGS

Appeal From Initial Decision

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: This amendment will permit each party at least five days to file a notice of appeal from an initial decision in response to another party's timely notice of appeal. Patterned after a similar provision in Rule 4(a) of the Federal Rules of Appellate Procedure, it is intended to add flexibility to the filing deadline now in the rule.

EFFECTIVE DATE: August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Jack Schwartz, Assistant to the General Counsel, Federal Trade Commission, Washington, D.C. 20580, 202-523-3615.

Accordingly, pursuant to the authority of 15 U.S.C. 46(g), 16 CFR Part 3 is amended by revising § 3.52(a) to read as follows:

§ 3.52 Appeal from initial decision.

(a) *When may file; notice of intention.*—Any party to a proceeding may appeal an initial decision to the Commission: *Provided*, That within ten (10) days after completion of service of the initial decision such party files a notice of intention to appeal. *Provided further*, That if a timely notice of intention to appeal is filed by a party, any other party may file a notice of intention to appeal within five (5) days after service of the first notice, or within the time otherwise prescribed by this subsection, whichever period last expires.

By direction of the Commission dated May 19, 1977.

JOHN A. DUGAN,
Acting Secretary.

[FR Doc.77-22772 Filed 8-5-77;8:45 am]

Title 40—Protection of the Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 765-1]

SUBCHAPTER D—WATER PROGRAMS

PART 136—GUIDELINES ESTABLISHING TEST PROCEDURES FOR THE ANALYSIS OF POLLUTANTS

Amendment; Correction

Correction

In FR Doc. 77-20768 appearing on page 37205 in the issue of Wednesday, July 20, 1977, the signature at the end of the document should read as follows:

STEPHEN J. GAGE,
Acting Assistant Administrator for Research and Development.

[FRL 772-5; PP 7F1889/R133]

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Bentazon

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the herbicide bentazon. The amendment was requested by BASF Wyandotte. This rule establishes a maximum permissible level for residues of bentazon on lima beans.

EFFECTIVE DATE: Effective on August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M Street, SW, Washington, DC 20460, 202–426–2632.

SUPPLEMENTARY INFORMATION: On May 23, 1977, notice was given (42 FR 26240) that BASF Wyandotte Corp., 100 Cherry Hill Road, PO Box 181, Parsippany NJ 07054, had filed a pesticide petition (PP 7F1889) with the EPA.

This petition proposed that 40 CFR 180.355 be amended to establish a tolerance for combined residues of the herbicide bentazon (3-isopropyl-1*H*-2,1,3-benzothiadiazin - 4(3*H*) - one - 2,2-dioxide) and its 6- and 8-hydroxy metabolites in or on the raw agricultural commodity lima beans (succulent) at 0.05 part per million (ppm). No comments were received in response to this notice of filing.

The data submitted in the petition have previously been evaluated in connection with a tolerance established on May 26, 1977 (42 FR 26978) for combined residues of bentazon and its 6- and 8–hydroxy metabolites in or on the raw agricultural commodity group seed and pod vegetables (dry) at 0.05 ppm. The 0.05 ppm tolerance on lima beans (succulent) should have been established along with this tolerance but was not because it had been inadvertently omitted from the original notice of filing (41 FR 3191). Thus, the pertinent data and conclusions of the rulemaking document of May 26, 1977, are included in this document by reference. It has been determined that this tolerance will protect the public health.

Any person adversely affected by this regulation may, on or before September 7, 1977, file written objections with the Hearing Clerk, EPA, East Tower, Rm. 1019, 401 M St. SW, Washington DC 20460. Such objections should be submitted in quintuplicate and should specifiy both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on August 8, 1977, Part 180 is amended as set forth below.

(Sec. 408(d)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)).)

Dated: August 1, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, § 180.355 is amended in paragraph (a) by alphabetically inserting a tolerance of 0.05 ppm on lima beans to read as follows:

§ 180.355 Bentazon; tolerances for residues.

(a) * * *

Commodity:	*Parts per million*
* * * * *	
Beans, lima (succulent)	0.05
* * * * *	

[FR Doc.77-22626 Filed 8-5-77;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 114—DEPARTMENT OF THE INTERIOR

PART 114–25—GENERAL

Utilization of Service Station Self-Service Pumps

AGENCY: Office of the Secretary, Interior.

ACTION: Final regulations.

SUMMARY: This document establishes a policy that Interior employees driving Government-owned or leased vehicles shall utilize service station self-service pumps when such use is feasible and economically advantageous.

DATE: This amendment is effective immediately.

FOR FURTHER INFORMATION CONTACT:

James O. Wyatt, Chief, Division of Property Management, Office of Administrative and Management Policy, Department of the Interior, Washington, D.C. 20240, telephone 202–343–3185.

SUPPLEMENTARY INFORMATION: Because this amendment relates only to internal Departmental procedures, the proposed rulemaking procedures are inapplicable. The primary author of this document is Charles H. Young, Property Management Officer, Office of Administrative and Management Policy, telephone 202–343–3185.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

RICHARD R. HITE,
Deputy Assistant Secretary of the Interior.

JULY 29, 1977.

Pursuant to the authority of the Secretary of the Interior contained in 5 U.S.C. 301 and 40 U.S.C. 486(c), Chapter 114, Title 41 of the Code of Federal Regulations is amended as set forth below.

Subpart 114–25.3 is amended by adding 114–25.303 to read as follows:

§ 114–25.303 Gasoline for use in motor vehicles.

In addition to using unleaded gasoline as required by FPMR 101–25.303, Interior employees shall use self-service pumps when such use will result in the purchase of gasoline at the lowest available price.

[FR Doc.77-22777 Filed 8-5-77;8:45 am]

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 77–116]

PART 10—LICENSING OF OFFICERS AND MOTORBOAT OPERATORS AND REGISTRATION OF STAFF OFFICERS

Use of Birth Registration for Officer Licenses

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment revises the regulations governing the issuance of an original license to allow a birth registration to be used to establish proof of citizenship. Present regulations do not provide for acceptance of a birth registration. In some cases, an applicant for a license does not have a birth certificate and must use a birth registration. The use of a birth registration is an acceptable alternative to a birth certificate.

EFFECTIVE DATE: This amendment is effective on August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202–426–1477).

SUPPLEMENTARY INFORMATION: Since this amendment provides for an alternative to an existing requirement, under 5 U.S.C. 553(b), notice of proposed rulemaking and public procedure are unnecessary, and the amendment may be made effective in less than 30 days after publication in the FEDERAL REGISTER, because 5 U.S.C. 553(d) does not apply.

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: Commander Lloyd Burger, Project Manager, Office of Merchant Marine Safety and Lieutenant Edward J. Gill, Jr., Project Attorney, Office of the Chief Counsel.

Accordingly, Part 10 of Title 46 of the Code of Federal Regulations is amended by revising § 10.02–5(c) to read as follows:

§ 10.02–5 Requirements for original licenses.

* * * * *

(c) * * *

(1) An original or certified copy of—

(i) A birth certificate; or

(ii) A birth registration.

* * * * *

(R.S. 4405, as amended (46 U.S.C. 375); R.S. 4462, as amended (46 U.S.C. 416); sec. 6(b)(1), 80 Stat. 937 (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b).)

Dated: July 29, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard, Commandant.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20620; RM–2426; FCC 77–537]

PART 15—RADIO FREQUENCY DEVICES

Operation of Wide-Band Swept RF Equipment Used as Anti-Pilferage Devices

AGENCY: Federal Communications Commission.

ACTION: Final rules.

SUMMARY: Report and Order in Docket No. 20620, adopting new provisions under Subpart F of Part 15 of the rules for operation of wide-band swept RF equipment. The existing rules have been updated to meet requirements of manufacturers and commercial establishments, such as stores, libraries, etc., in the development and use of anti-theft, anti-pilferage devices.

EFFECTIVE DATE: September 12, 1977.

ADDRESSES: Federal Communications Commission, Wash., D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Don Olmstead, RF Devices and Experimental Branch, Office of Chief Engineer, 202–632–7095.

SUPPLEMENTARY INFORMATION:

Adopted: July 27, 1977.

Released: August 5, 1977.

In the matter of the amendment of Part 15 to provide for the operation of wideband swept RF equipment used as anti-pilferage devices, Docket No. 20620, RM–2426.

1. This proceeding was initiated in response to a petition for rulemaking filed by Checkpoint Systems, Inc. (Checkpoint) on July 30, 1974,[1] along with related pleadings,[2] to provide for the operation of swept frequency anti-pilferage devices. The petition for rulemaking was placed on public notice and in response comments were received from the 3–M Company (3–M) and Knogo Corporation (Knogo) questioning the necessity for additional provisions for anti-pilferage equipment. Both 3–M and Knogo produce anti-pilferage devices which operate within the existing Part 15 Rules. In view of these contentions, the Commission issued a Notice of Inquiry[3] seeking information as to the need for additional rules; and if so, the form these rules should take. After considering the comments the Commission concluded that reasonable grounds existed for the issuance of a notice of proposed rulemaking.[4]

2. Only three parties submitted comments: Checkpoint, Knogo and Schlage Electronics (Schlage). Checkpoint and Knogo also submitted reply comments.[5] The Schlage comments were filed late with a motion to accept late filed comments stating that they had just become aware of the Commission's proposal in this docket. To the extent possible the Schlage comments will be considered; however, many aspects of their filing, while relevant, go beyond the scope of this proceeding and would require extensive study and coordination before they could be adopted. To avoid further delay (such as a further notice of proposed rulemaking) in finalizing this docket, the Schlage comments are being treated as a separate petition for rulemaking (RM–2831) with their concurrence.

3. Checkpoint manufactures electronic detection systems used as anti-pilferage devices in retail and department stores, libraries, and other commercial establishments. An RF generator that sweeps over the frequency range of operation is used to detect a tag that is concealed in, or attached to, the protected article. When the frequency sweep detects one of the tags, each of which contains a resonant printed circuit, the operator is alerted to the presence of a protected item. Normally the tag is deactivated or removed at the cashier's desk before the protected item is carried through the gate housing the anti-pilferage equipment. In the case of library books the circuit labels are permanently affixed under the book pockets or under the bindings and the anti-pilferage equipment is deactivated or circumvented to permit removal after the books have been properly checked out.

4. In general, all of those commenting agreed with the proposal to provide additional regulations for the operation of wide band swept RF equipment for use as anti-pilferage devices. Even Knogo which had originally opposed any rule changes, has changed its position and now supports this proceeding. All agree that pilferage is a serious and expensive problem to libraries, government agencies, retail outlets, etc., and the consumer is the one who must ultimately pay the cost; that anti-pilferage devices are an effective deterrent; and, that more liberal rules will provide greater flexibility in the design and operation of these devices, thus permitting wider use, without materially increasing the risk of interference to other users of the radio spectrum.

5. The Commission proposed a field strength of 50 μV/m at 30 meters on the emissions within the bands of operation specified, with the requirement that all emissions falling outside these bands to be kept below 5 μV/m at 3 meters. All the comments agreed that the field strength proposed by the Commission was too low for efficient operation of swept-radio frequency equipment; that it would impair the operating efficiency of such equipment without a countervailing benefit to the public interest; and, that operation with higher field strengths (6 dB above the field strength proposed by the Commission) does not cause harmful interference or adverse environmental effects while at the same time providing a greater potential for development of existing uses and also new applications. New applications in the health care field are currently under study by Knogo to provide patient monitoring systems which would replace physical and chemical restraints used in many institutions.

6. Checkpoint has requested a field strength of 100 μV/m at 30 meters, and Knogo has requested 300 μV/m at 30 meters. Schlage supports a field strength of 100 μV/m at 30 meters. In support of the higher field strengths it is pointed out that daily use of hundreds of Checkpoint systems operating at 100 μV/m at 30 meters over the period of several years has not resulted in a single complaint of interference. It is also claimed that the higher power is necessary to insure reliable operation of security systems since there is normally high ambient radio frequency noise in retail stores caused by fluorescent lighting, air conditioning, elevators, cash registers, etc., which would overwhelm a system with less power. In addition, anti-pilferage devices are installed inside buildings which can be expected to attenuate the signals radiated from these devices and further reduce the chance of interference.

7. Because of the factors mentioned above, the Commission believes that a field strength of 100 μV/m at 30 meters can be considered to be acceptable and is not likely to cause interference.[6] In addition, these devices operate on a non-interference basis to licensed services, and in the unlikely event that a situation should arise involving harmful interference, it would be local to the interfered service and thus easily identified and corrected.

8. With respect to the Commission's proposal that spurious emissions be kept to less than 5 μV/m at 3 meters, or "approximately 40 dB down," the comments agreed that it is desirable to suppress

[1] RM–2426.

[2] With the rulemaking request, Checkpoint filed a petition for waiver of the present Part 15 requirements to permit it to market the proposed system during the pendency of the rulemaking. This waiver was granted by the Commission on December 13, 1974. The Knogo Corporation requested a stay of the waiver which was denied by the Commission on February 26, 1975.

[3] Docket No. 20620, released October 16, 1975 (40 FR 48942).

[4] Notice of Proposed Rulemaking and Order Denying Petition For Reconsideration, released July 7, 1976 (41 FR 28537).

[5] Additional comments were filed by Checkpoint objecting to any further delay as a result of new issues raised by the Schlage comments. Also, an informal comment was filed by Gettysburg College, Gettysburg, Pennsylvania, on August 3, 1976, requesting that the final decision in this docket should not require them to modify their recently installed Checkpoint system in the school library. A letter was also received from Sentronic International which is discussed in paragraph 16 of this Order.

[6] The original Checkpoint waiver for operation pending the outcome of this rulemaking permitted an emission level of 100 μV/m at 30 meters. This was modified to 50 μV/m at 30 meters when the NPRM was adopted on June 24, 1976. Systems already installed were permitted to continue operating at the higher strength pending outcome of this proceeding.

all emissions a minimum of 40 dB relative to the maximum field strength at a distance of 30 meters. But it was argued by Checkpoint that the Commission's proposal assumes that the field strength varies inversely with the square of the distance, when in fact it is more nearly the cube of the distance in this case, and that the desired result would be obtained by using the standard 1 μV/m at 30 meters. The Commission agrees that the original proposal may have been too stringent. Accordingly, the limits for out of band emissions are revised, and the rules will provide that out of band emissions shall be suppressed at least 40 dB below the fundamental.

9. The Commission's original waiver for Checkpoint permitted them to use the frequencies 5±0.5 MHz and 8.2±0.8 MHz. In the NPRM the Commission proposed three frequencies for anti-pilferage equipment using swept frequency techniques, namely 2±0.3 MHz, 4.5±0.45 MHz and 8±0.6 MHz. The waiver was also modified to confine the frequency bands Checkpoint could use to 4.05 to 4.95 MHz and 7.4 to 8.6 MHz.[7] Checkpoint does not object to changing the center frequency from 5.0 to 4.5 MHz for future installations, but contends that to make this relatively minor change on equipment presently located in the field would result in serious disruption of service and severe economic hardship without countervailing benefits. Checkpoint states that approximately 20 million circuit labels have been permanently affixed to books in 400 libraries. These labels are located under or in book pockets and bindings. It would be necessary to remove the old labels before new ones could be installed in order to make the system work. This would be very time consuming and result in the libraries being without the security system for a substantial period of time, as well as costing Checkpoint at least 3 million dollars.

10. The center frequency was changed from 5.0 to 4.5 MHz to avoid any potential interference with the standard frequency/time signal at 5.0 MHz. Future systems will be required to use a center frequency of 4.5 MHz. However, since no complaints of interference have been received from the limited number of systems already installed, and because of the problems mentioned above, the Commission will permit the presently installed systems operating on 5.0 MHz to continue operation indefinitely (including expansion to update systems), subject to the condition that any interference complained of be immediately eliminated.

11. Though the Commission's proposal to change the band from 8.2±0.8 MHz to 8.0±0.6 MHz appears relatively minor, Checkpoint states that this would significantly affect the use of this frequency, since operation of wide-band swept-radio frequency devices depend on a fixed deviation from the center frequency, and not on the absolute bandwidth swept by the system. The minimum fixed deviation required is plus or minus ten percent (10 percent) of the center frequency. Under the present state of the art it is not economically feasible because of technical reasons, according to Checkpoint, to develop and market a system requiring a lesser deviation due to the costs involved. Resonant circuits (tags) cannot be mass-produced with a frequency tolerance better than plus or minus 7.5 percent. The transmitter must sweep entirely through the center frequency of the tag to be detected, thus the deviation must be at least plus or minus 10 percent if the frequency tolerance of the tag is only 7.5 percent. Since at least a few thousand tags are required for each installation, significant increases in cost of the tags would quickly price any anti-pilferage system out of many markets. Checkpoint states that present cost per tag is very low "* * * because all processing is done in continuous rolls of material two feet wide and 10,000 feet long. Each roll contains 300,000 double-sided printed circuits attached together." To improve the tag to operate with a tolerance of less than plus/minus 7.5 percent would require each circuit to be individually measured and adjusted in the manufacturing process which could substantially increase the price of each tag.

12. It appears that requiring the frequency sweep to be confined to 7.4–8.6 MHz, (8.0±0.6 MHz) rather than 7.4–9.0 MHz, (8.2±0.8 MHz) would place a substantial economic hardship on the manufacturers and users. It is also noted that none of the systems presently in operation using 7.4–9.0 MHz have caused interference nor does it appear likely that they will. In view of the above, we are accepting Checkpoint's argument and have expanded the band at 8 MHz to 7.4–9.0 MHz (8.2±0.8 MHz) instead of 7.4–8.6 MHz (8.0±0.6 MHz) as proposed in our notice. In the unlikely event that operation of such an anti-pilferage device were to cause harmful interference, it becomes subject to the general requirement in sections 15.3 and 15.311 and the operator will be required to stop operating the device until such time as the harmful interference is eliminated.

13. The proposed rules evaluated the interference effect of the anti-pilferage signal on the basis that this signal would move across the band and not remain at a fixed point in the band for any length of time. However, in the absence of a specific requirement that the signal sweep through the authorized band, there is a danger that some person may elect to operate at a fixed frequency, and thereby increase the interference potential to licensed equipment operating on such fixed frequency. To minimize this possibility, we have added a requirement that the signal sweep through not less than half the authorized band at a minimum rate of forty sweeps per second (40 hertz).

14. No objections were raised to the provision that swept frequency anti-pilferage devices require certification. As stated in the proposal, measurements shall be made with the frequency sweep stopped using an average reading field strength meter. Out of band emissions shall be checked over the frequency range 300 kHz to 300 MHz. Also, the measurement report shall include spectrum analyzer photographs of the broadband signal emitted by such equipment during normal operation.

15. By letter, dated February 14, 1977, from Sentronic International, a division of General Nucleonics, Inc. (Sentronic), the Commission was asked to hold in abeyance final action in this docket pending further study of the possible effects of low level radiation on people. In general Sentronic maintains that more information is needed on the genetic, clinical, physiological, biological, and behavioral effects of long-term, low level radiofrequency exposures; and, that standards, based on that information, should be developed which are more strict than those presently in use. While we agree that health considerations are an important factor, it would appear that studies of such a complex nature would take many years. If action in this docket were to be held in abeyance, then it would be incumbent on the Commission to stay the grant of almost any new telecommunications facility, since the radiated power density of a Checkpoint system is over one million times less than that generated by a citizens-band transmitter. The problem of personal hazard was discussed in both the Notice of Inquiry and at some length in the Notice of Proposed Rulemaking particularly with respect to pacemakers. Tests have been conducted by both manufacturers of pacemakers and anti-pilferage equipment. The Food and Drug Administration has sponsored an open public meeting on this subject. While final definitive information is not available, the results to date indicate little or no adverse effects. In the absence of strong reasons for the present standards to be changed, postponement of this docket is unwarranted. As stated in the Notice, our regulations are designed to eliminate interference while those of the FDA are intended to minimize personal hazard. Accordingly, at this time the Commission is adopting regulations dealing only with the radio interference potential of anti-pilferage devices. If the studies now underway to evaluate the effect of low level RF radiation on people should find that the present technical specifications constitute a hazard to the people, the Commission will at that time review the technical specifications adopted herein.

16. In writing rules for new devices to operate under Part 15, consideration must be given to the possible electromagnetic pollution that may be created by the new device—in this instance, the swept frequency anti-pilferage device. We are aware that anti-pilferage systems exist which use magnetic tapes and do not require access to the RF spectrum. The comments received herein show that the RF operated systems are in general less costly and have a greater degree of flexibility in their use. We consider these advantages of the RF operated systems to outweigh the disadvantages of possible spectrum pollution.

17. In consideration of the foregoing, the Commission finds that amendment of the rules as contained below is in the public interest. Authority for these rule amendments is contained in sections 4(i), 302, 303(g), and 303(r) of the Communications Act of 1934, as amended.

18. Accordingly, *it is ordered*, That effective September 12, 1977, Part 15 of the Commission's rules is amended as set forth below. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; sec. 302, 82 Stat. 290; (47 U.S.C. 154, 302, 303).)

FEDERAL COMMUNICATIONS COMMISSION,[8]
VINCENT J. MULLINS,
Secretary.

Part 15 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. In § 15.305 paragraph (c) is added to read as follows:

§ 15.305 General technical specification.

* * * * *

(c) Alternative to paragraphs (a) and (b) of this section, a wide-band swept field disturbance sensor may be operated on any frequency listed below subject to the technical requirements set out in §§ 15.321 and 15.323.

Center frequency (MHz):		*Band limits (MHz)*
2	±0.3	(1.7–2.3)
4.5	±0.45	(4.05–4.95)
8.2	±0.8	(7.4–9.0)

2. Two new §§ 15.321 and 15.323 are added to read as follows:

§ 15.321 Emission limitations for operation under § 15.305(c).

(a) The field strength shall not exceed 100 μV/m at 30 meters on emissions within the bands specified.

(b) Out of band emissions shall be suppressed at least 40 dB below the level of the fundamental. The measurement procedure involved will be discussed in an OCE bulletin.

(c) A minimum frequency deviation of one-half the authorized maximum deviation is required on all specified frequencies.

(d) A minimum frequency modulation rate of 40 hertz is required for all operations.

§ 15.323 Measurement requirements for operation under § 15.305(c).

Measurements shall be made with the frequency sweep stopped using an average reading field strength meter. Measurements on all frequencies shall be made using a loop antenna. Out of band emissions shall be checked over the frequency range 300 kHz to 300 MHz. In addition, the measurement report shall include spectrum analyzer photographs of the broadband signal emitted.

[FR Doc.77-22732 Filed 8-5-77;8:45 am]

[7] Equipment marketed prior to August 1, 1976, could continue to use the original waiver frequencies.

[8] Commissioner Washburn absent.

[Docket No. 20708; RM-2551; RM-2693]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Versailles, Indiana; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: Action herein assigns a first Class A FM channel to Versailles, Indiana. Petitioner, James Robert Albritton, states that this action will provide Versailles with an opportunity to acquire its first local aural broadcast service.

EFFECTIVE DATE: September 12, 1977

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau (202-632-7792).

SUPPLEMENTARY INFORMATION:

Adopted: July 29, 1977.

Released: August 5, 1977.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Versailles, Indiana), Docket No. 20708, RM-2551, RM-2693.

1. The Commission has under consideration the Notice of Proposed Rulemaking in the above-entitled proceeding, adopted February 4, 1976, 41 FR 7120, proposing the assignment of FM Channel 276A to Versailles, Indiana. James Robert Albritton ("petitioner") originally proposed Channel 280A for Versailles, but in Docket No. 21121, Second Report and Order,[1] the Commission assigned Channel 280A to Versailles. However, a Commission staff study revealed that Channel 276A could be assigned to Versailles in conformance with the minimum mileage separation requirements, if the transmitter site were to be located approximately 10 kilometers (6 miles) north of Versailles. Supporting comments were filed by the petitioner in which he reaffirmed his intent to apply for the channel, if assigned, and to promptly build the station, if authorized.

2. On April 30, 1976, Mid America Radio, Inc. ("Mid America"), licensee of FM Station WXTZ, Indianapolis, Indiana, filed a counterproposal (RM-2693) in which it proposed the assignment of Channel 237A to Versailles in lieu of Channel 276A. Mid America states that it does not take issue with the ostensible desirability of assigning a first Class A channel to Versailles, but because of the existence of certain special and unique circumstances, it believes the public interest would better be served by the substitution of Channel 237A for 276A. Mid America argues that substitution of Channel 237A for 276A would prevent irreparable injury from being caused to the public that WXTZ serves, without materially altering Mr. Albritton's basic proposal. Mid America further states that on April 7, 1972, WXTZ filed a "major change" application with a view toward changing, inter alia, its transmitter location (BPH-7867, granted May 22, 1972), and at that time it was thought that WXTZ's proposed 70 dBu contour would cover the entire city limits of Indianapolis. Mid America notes that, around that time, the Indianapolis city limits were expanded so as to be virtually coincident with those of Marion County, and that it was not until the Commission was considering the allocation to Batesville that WXTZ discovered that its 70 dBu contour did not fully cover the revised Indianapolis city limits. Mid America contends that, if the Versailles proposal were to be adopted, WXTZ would be substantially impaired in its ability to move closer to Indianapolis to permit it to serve its city of license in a manner contemplated by the Commission. It adds that the existing WXTZ transmitter location has created a situation of only a marginally sufficient signal existing over the center of the city of Indianapolis where there is an area of interference. Mid America asserts that computer analyses have been undertaken and no feasible solution short of moving the transmitter location has been found and, therefore, the only realistic option is to move its transmitter. It contends that large areas would be made unavailable to WXTZ if Channel 276A were to be assigned to Versailles, but that would not be true if the Commission were to allocate Channel 237A to Versailles. Mid America claims that efforts are already underway and have been underway for some time to secure a new transmitter location for WXTZ.

3. Mid America states that substitution of Channel 237A for Channel 276A would have no adverse effect on Mr. Albritton's proposal, and that the channel may be used in the center of Versailles with concomitant savings in terms of STL's, telephone lines, etc., which would be necessary were Mr. Albritton required to maintain separate transmitter/studio facilities. However, it acknowledges that the availability of Channel 237A to Versailles, Indiana, is contingent upon a favorable resolution in a rule making to move Channel 237A from Falmouth, Kentucky, to Versailles, Kentucky, in Docket No. 20877.

4. Since the Commission, on May 9, 1977, adopted a Report and Order in Docket No. 20877 (42 FR 25505) which, among other things, retained the assignment of Channel 237A at Falmouth, Kentucky, Mid America's counterproposal to assign Channel 237A to Versailles is no longer workable and must be denied. However, the counterproposal is also being treated as an objection to the proposed assignment of Channel 276A to Versailles, but the Commission believes

[1] 40 FR 19644, 41 FR 13378, March 30, 1976.

that this objection is not well taken, as will be shown below.

5. Station WXTZ is located in the northern portion of the expanded city of Indianapolis and operates with 13 kW (11.2 dBk) and 850 feet a.a.t. from a tower which extends 312 meters (1,022 feet) above ground. It is noted that the 70 dBu contour encompasses most of the expanded city with the exception of small portions of the southern part of the city, about three percent of the city area.

6. The distance between Station WXTZ and the required Versailles transmitter site, about 10 kilometers (6 miles) north of that community, is approximately 116 kilometers (72.3 miles) which allows about 11.7 kilometers (7.3 miles) leeway in the southeasterly direction. This leaves about fifty percent of the city area in which WXTZ could move its transmitter site if it desires. Assuming that WXTZ were to operate with maximum facilities as it now operates, a site 8 kilometers (5 miles) in the southeasterly direction, or 8.5 kilometers (5.3 miles) in the southerly direction, would allow it to completely encompass the city limit with a 70 dBu signal. There is a leeway of about 16 kilometers (10 miles) in the southerly direction in which the transmitter site may be relocated.

7. Mid America has asserted that its station places only a marginally sufficient signal over the center of the city of Indianapolis where it encounters an area of interference. However, it does not indicate the signal level there or the type of interference it alleges it suffers. Without a proper showing, we are unable to conclude that a signal level of 80 dBu (10 mV/m) which is expected in the area would be only "marginally sufficient." There is also question of whether a change in the transmitter site or an increase in the signal level would alleviate any such interference problem or would just move it to another area. The Commission believes that, although the assignment of Channel 276A to Versailles, Indiana, would somewhat limit the flexibility in the choice of an alternate transmitter site for Station WXTZ, a provision for a first local aural broadcast station to a community without such a facility presents a more important public interest consideration. Such a conclusion is consistent with the stated objective of the Commission's allocation priorities. The channel is the only one available for assignment to this area.

8. The Canadian Government has given its concurrence to the proposed assignment of Channel 276A to Versailles, Indiana.

9. Authority for the adoption of the amendment contained herein appears in sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

10. In view of the foregoing: *It is ordered*, That effective September 12, 1977, § 73.202(b) of the Commission's rules, the FM Table of Assignments, as regards Versailles, Indiana, is amended as follows:

City and Channel No.
Versailles, Indiana, 276A.

11. *It is further ordered*, That, the counterproposal filed by Mid America Radio, Inc. (RM-2693) is denied.

12. *It is further ordered*, That, this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082 (47 U.S.C. 154, 155, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.77-22730 Filed 8-5-77;8:45 am]

[Docket No. 21174; RM-2790]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Palm Springs, Calif., Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: Action taken herein assigns a third FM channel (Class B) to Palm Springs, California, at the request of Joe F. Mackey. The Commission's FM criteria ordinarily would limit the number of assignments to a community the size of Palm Springs to one or two channels. However, since Palm Springs' population exceeds 50,000 during certain portions of the year due to the influx of tourists and visitors, and because it is located in an area isolated from major markets by mountainous terrain, the Commission believes that a third channel for Palm Springs would be consistent.

EFFECTIVE DATE: September 12, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau (202-632-7792).

SUPPLEMENTARY INFORMATION:

Adopted: July 29, 1977.

Released: August 5, 1977.

In the matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Palm Springs, California), Docket No. 21174, RM-2790.

1. On March 18, 1977, at the request of Joe F. Mackey ("petitioner"), the Commission adopted a Notice of Proposed Rulemaking, 42 FR 16450, proposing the assignment of Class B Channel 291 to Palm Springs, California, as its third FM assignment. Supporting comments and reply comments were filed by petitioner. Comments in opposition were filed by Tourtelot Broadcasting Company ("Tourtelot"), licensee of Stations KDES and KDES-FM, Palm Springs, California, and Glen Barnett ("Barnett"), licensee of Stations KWXY and KWXY-FM, at nearby Cathedral City, California.

2. Palm Springs, (pop. 20,936) in Riverside County (pop. 459,074),[1] is located in south central California, approximately 173 kilometers (108 miles) east of Los Angeles. Local service is provided by three full-time AM stations—KCMJ (Class III); KDES (Class III); KPSI (Class IV) and one FM station—KDES-FM (Channel 284). In addition to the educational FM channel (202D) which is assigned to Station KPSH-FM at Palm Springs, commercial FM Channel 265A is also assigned. There are three applications pending on Channel 265A.

3. Petitioner states that Palm Springs has long been noted as one of the nation's leading resort areas. It is said to be the retail and financial center of Coachella Valley with 34 percent of its employed citizens engaged in services and 22 percent in retail trade. Petitioner claims that the population of Palm Springs has increased from 20,936 to 29,132 persons between 1970 and 1975. Petitioner reaffirms his intention to apply for the channel, if assigned, and to construct and operate a station if granted.

4. In supporting comments petitioner emphasizes the influx of population to Palm Springs during the months of January through May and October through December. According to petitioner, estimates of the Riverside County Planning Department puts the additional tourist population at 50,000 to 60,000 for the area and the Coachella Valley Association of Governments places the total population of Palm Springs for eight of the twelve months of the year at approximately 64,410, with a weighted average throughout a year of 52,507. Petitioner contends that the Commission's population criteria (limiting a city under 50,000 population to one or two FM channels) are only guidelines and under the circumstances here there are no impediments to the assignment. Petitioner also asserts that, since Palm Springs is already intermixed with a Class B and Class A channel, the addition of a second Class B channel would not contravene the Commission's policy on intermixture.

5. In opposing comments, Tourtelot argues that petitioner has failed to demonstrate the basis for his population estimates. It states that, while the Coachella Valley Association of Governments substantiates the peak population for the city currently at 64,410, the Association notes that this figure refers to the maximum number of people present within the city at a specific time only. Tourtelot points out that in a 1976 study conducted for the Community Redevelopment Agency of the City of Palm Springs, the average monthly population of Palm Springs was 38,583 during 1976. Tourtelot acknowledges that the total population of Palm Springs may reach the level of 50,000 during the months of February and March, however. Tourtelot contends that there are a sufficient number of aural services available to Palm Springs and the surrounding Coachella Valley. In this connection it states that there are three FM stations which place city grade contours over Palm Springs. Moreover, Tourtelot asserts that, since petitioner must locate his station 15 miles east of Palm Springs, Station KWXY-FM, Cathedral City, would place a far superior signal over the city than petitioner's proposed facility.

6. Barnett, in opposition to the proposal, argues that the existence of Station KWXY-FM at Cathedral City should have been taken into account in proposing a third channel for Palm Springs. He contends that the number of AM and FM channels already assigned to Palm Springs, plus available outside service from Station KWXY-FM, provide a sufficient choice of program fare and that the proposed channel could better serve the public interest if assigned elsewhere. Barnett questions whether a transmitter located in the area proposed could serve the entire city due to multipath reflections and shadow effects of the surrounding mountains.

7. In response, petitioner points out that Tourtelot and Barnett both serve Palm Springs, and thus it argues that it is obvious that their opposition to assignment of another channel to that city is solely on economic grounds. Petitioner states that Barnett's questions about the adequacy of coverage are unsupported by engineering opinion and contends that they also are misplaced. Petitioner asserts that they should be deferred until an application is tendered. On the question of the need for the assignment, petitioner argues that Tourtelot's submission of an excerpt from a 1976 study conducted for the Community Redevelopment Agency of the City of Palm Springs is not otherwise identified and that its worth has not been demonstrated. Moreover, petitioner asserts that, even if Palm Springs' present and projected population is slightly smaller than as previously shown, the opponents do concede that it is a burgeoning community in a growing area.

8. We have carefully considered the record in this proceeding and find that it would be in the public interest to assign Channel 291 to Palm Springs, California. Under normal circumstances, the Commission's FM assignment criteria would limit the number of assignments to a community of the size of Palm Springs to one or two channels. However, on occasion this limit in the number of assignments has been relaxed where special considerations have been found.[2] Palm Springs is a growing resort community, with the officially recognized 1970 population of 20,936 inhabitants, and is located in an area which is isolated from large major markets by mountainous terrain. The petitioner has alleged that during the tourist seasons, the population of the community reaches as much as 64,410 persons, with the weighted average of 52,507 for the year. Tourtelot in opposition acknowledges that the population of the community could exceed 50,000 persons for at least two months. Thus, it is reasonable to conclude that, during certain portions of the year, the population of Palm Springs exceeds 50,000 persons. With these points in mind it is clear that a third channel for Palm Springs would be consistent with the spirit of the population criteria even if it is not consistent with its literal terms. Another consideration in favor of the proposed assignment is that the use of the channel here would not result in significant preclusion because the communitie located in the two precluded areas each has at least one FM assignment or station and at least one AM station. As to the assertion that stations located in other communities provide service to Palm Springs, we must point out that such stations are not called upon to provide programs directed to meeting the special needs, interests and problems of the community as are local stations.

9. Although intermixture is involved, it presents no problem in this instance as Palm Springs is already intermixed with a Class A and a Class B assignment and there are three mutually exclusive applications[3] pending for the Class A channel. None of these applicants has opposed the proposed Class B channel assignment. Moreover, any qualified party may apply for the new Class B channel, including, if they so desire, the applicants for Channel 265A at Palm Springs, which could relinquish any interest in that channel and seek instead to use the Class B channel which we are assigning in this Report and Order.

10. Mexican concurrence has been obtained for the assignment of Channel 291 to Palm Springs, California.

11. Accordingly, pursuant to authority contained in sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules: *It is ordered*, That, effective September 12, 1977, the FM Table of Assignments, § 73.202(b) of the Commission's rules, is amended for the city listed below, to read as follows:

City and Channel No.
Palm Springs, California, 265A, 284, 291.

12. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303).)

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. FE 77-02; Notice 2]

PART 529—MANUFACTURERS OF MULTISTAGE AUTOMOBILES

Correction

In FR Doc. 77-21507 appearing on page 38369, in the issue for Thursday, July 28, 1977. On page 38372, § 529.3(b)(2), (7) and (8) should read:

§ 529.3 Definitions.

* * * * * *

(b) * * *

(2) "Completed automobile" means an automobile that requires no further manufacturing operations to perform its intended function, other than the addition of readily attachable components, such as mirrors or tire and rim assemblies, or minor finishing operations such as painting.

* * * * * *

(7) "Incomplete automobile manufacturer" means a person who manufactures an incomplete automobile by assembling components none of which, taken separately, constitute a complete automobile.

(8) "Intermediate manufacturer" means a person, other than the incomplete automobile manufacturer or the final-stage manufacturer, who performs manufacturing operations on an incomplete automobile.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

New Pneumatic Tires for Passenger Cars

AGENCY: National Highway Traffic Safety Administration.

ACTION: Final rule.

SUMMARY STATEMENT: This amendment adds certain tire size designations to Standard No. 109, New Pneumatic Tires—Passenger Cars. This addition is made pursuant to a request from the Rubber Manufacturers Association to permit the production of tires with the specified designations.

EFFECTIVE DATE: September 7, 1977, if objections are not received.

FOR FURTHER INFORMATION CONTACT:

John A. Diehl, Office of Crash Avoidance, Motor Vehicle Programs, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1715.

SUPPLEMENTARY INFORMATION: According to agency practice, regular amendments are published modifying the

Appendix of Standard No. 109. Guidelines were published in the FEDERAL REGISTER on October 5, 1968 (33 FR 14964), and amended August 31, 1974 (39 FR 28980), specifying procedures by which routine additions could be made effective 30 days from publication in the FEDERAL REGISTER, if no objections are received. If objections are received, rulemaking procedures for the issuance of motor vehicle safety standards (49 CFR Part 553) are followed.

The principal authors of this document are John A. Diehl, Office of Crash Avoidance, and Roger Tilton, Office of Chief Counsel.

Accordingly, Appendix A of 49 CFR 571.109 is amended subject to the 30 day provision indicated above, as specified below.

§ 571.109 [Appendix Amended]

Amendment requested by Rubber Manufacturers Association:

In Table I–HH, the following new tire size designation and corresponding values are added.

(Secs. 103, 119, 201, and 202, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1407, 1421, and 1422); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on August 1, 1977.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

TABLE I—HH.—*Tire load rating, test rims, minimum size factors, and section widths for 'P/75' series ISO-type tires*

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1271]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Service Order No. 1271).

SUMMARY: There is a shortage of high capacity cars for transporting bulk shipments of fertilizer, grain, grain products, soybeans or soybeans products at stations on the Union Pacific Railroad. Simultaneously there is a surplus of smaller capacity cars suitable, except for size, for transporting such freight. Service Order No. 1771 authorizes the Union Pacific to substitute sufficient smaller cars for larger cars ordered to transport the shipment offered regardless of tariff requirements, requiring the use of the larger cars. Consent of the shipper is required before any substitution is made.

DATES: Effective August 3, 1977. Expires October 31, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423. Telephone 202–275–7840, Telex 89–2742.

SUPPLEMENTAL INFORMATION: The order is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 2nd day of August, 1977.

It appearing, That there is an acute shortage of freight cars on the Union Pacific Railroad Company for transporting shipments of fertilizer, grain, grain products, soybeans or soybean products; that certain tariff provisions require the use of cars of specified cubic or weight carrying capacities; that the carrier is unable to furnish sufficient such cars to transport shipments of such weights; that cars of lesser capacity are available; that such cars cannot be used because of certain tariff provisions; that there is immediate need to use every available car for transportation of these products; that the inability of the carrier to furnish sufficient large-capacity cars results in great economic loss; and that present regulations and practices with respect to the use, supply, control, movement, and distribution of freight cars are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1271 Distribution of freight cars.

(a) Subject to the concurrence of the shipper, the Union Pacific Railroad Company may substitute a sufficient number of smaller cars for larger cars ordered to transport shipments of fertilizer, grain, grain products, soybeans or soybean products regardless of tariff requirements specifying minimum cubic or weight carrying capacity. (See exceptions (b) and (c).)

(b) *Exception.* This order shall not apply to shipments subject to tariff provisions requiring the use of twenty-five or more cars per shipment.

(c) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(d) *Rates and Minimum Weights Applicable.* The rates to be applied and the minimum weights applicable to shipments for which cars smaller than those ordered have been furnished and loaded as authorized by section (a) of this order shall be the rates and minimum weights applicable to the larger cars ordered.

(e) *Billing to be Endorsed.* The carrier substituting smaller cars for larger cars as authorized by section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Car of (------) cu. ft. and of (------) lbs. or greater capacity ordered. Smaller cars furnished. authority ICC Service Order No. 1271.

(f) *Concurrence of Shipper Required.* Smaller cars shall not be furnished in lieu of cars of greater capacity without the consent of the shipper.

(g) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(h) *Rules and Regulations Suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(i) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(j) *Effective date.* This order shall become effective at 12:01 a.m., August 3, 1977.

(k) *Expiration date.* This order shall expire at 11:59 p.m., October 31, 1977, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That, a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael. Member Robert S. Turkington not participating.

H. G. HOMME, Jr.,
Acting Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

Subchapter B—Taking, Possession, Transportation, Sale, Purchase, Barter, Exportation and Importation of Wildlife

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Determination of Critical Habitat for Mississippi Sandhill Crane

AGENCY: U.S. Fish and Wildlife Service.

ACTION: Final rulemaking.

SUMMARY: The Director, U.S. Fish and Wildlife Service (hereinafter, the Director and the Service, respectively) hereby issues a rulemaking which determines Critical Habitat for the Mississippi sandhill crane (*Grus canadensis*

pulla). This rulemaking is issued pursuant to Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543; 87 Stat. 884; hereinafter the Act). In accordance with Section 7, all Federal agencies will be required to insure that actions authorized, funded, or carried out by them do not adversely affect this Critical Habitat.

EFFECTIVE DATE: September 7, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director, Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240 (202–343–4646).

SUPPLEMENTARY INFORMATION:

BACKGROUND

In the FEDERAL REGISTER of September 3, 1975 (40 FR 40521–40522), the Fish and Wildlife Service published a proposed determination of Critical Habitat for the Mississippi sandhill crane (*Grus canadensis pulla*). This Critical Habitat was described as being a five-sided area of land, water, and airspace in Jackson County, Mississippi, between the West Pascagoula River and the Jackson-Harrison County line, and bounded by the following coordinates: 30°33′ N 88°37′ W, 30°25′ N 88°37′ W, 30°22′ N 88°44′ W, 30°29′ N 88°51′ W, 30°33′ N 88°51′ W.

SUMMARY OF COMMENTS

The Governor of Mississippi expressed opposition to the designation of the entire proposed area as Critical Habitat, though he indicated that a smaller area might be acceptable. Also opposing the designation as proposed were 15 local governmental and commercial organizations, and approximately 477 private citizens, most of whom had signed petitions on the matter.

The Mississippi Game and Fish Commission responded favorably to a determination of Critical Habitat which would assist in the preservation of the Mississippi sandhill crane, but did not comment on the necessity of including the entire proposed area. Also favoring the proposal in general were eight major National and local conservation organizations, including Monitor, Inc., which expressed the views of 14 additional organizations; and 26 private citizens. The U.S. Forest Service concurred that the approximately 150 acres of land administered by it within the designated area should be included as Critical Habitat. The Mississippi Wildlife Federation favored the designation of a smaller area as Critical Habitat. Approximately ten other parties wrote to provide or request information, without indicating a position on the matter.

BASIS FOR DETERMINATION

The proposal of September 3, 1975, involved a relatively large area which corresponded roughly to the overall range of the Mississippi sandhill crane. The same area had been determined to be Critical Habitat in an emergency rulemaking published on June 30, 1975 (40 FR 27501–27502). The area delineated below in the final determination of Critical Habitat represents a considerable reduction. The decision to make this reduction was based on a more thorough assessment of available biological data, particularly that provided by the Mississippi Sandhill Crane Recovery Team. After reviewing this information, it became apparent that much of the land area in the original proposal is of little or no known use to the crane. There are winter feeding sites in farmland to the north of the Critical Habitat zones delineated below, but these sites are scattered over a large area, and their use by the cranes varies with the crops and other factors. Nonetheless, all Federal agencies should be aware of the presence of the feeding sites and other areas of sporadic, but possibly important use within the overall zone originally proposed in the FEDERAL REGISTER of September 3, 1975, as described above and bounded by the following coordinates: 30°33′ N 88°37′ W, 30°25′ N 88°37′ W, 30°22′ N 88°44′ W, 30°29′ N 88°51′ W, 30°33′ N 88°51′ W. Federal agencies are required by Section 7 of the Endangered Species Act of 1973 to insure that their actions do not jeopardize the continued existence of Endangered species, and this requirement should be considered with respect to any actions within or near the area delineated above.

The Critical Habitat areas delineated below include all known breeding, summer feeding, and roosting sites of the Mississippi sandhill crane. Also included are the flight paths connecting the more important sites. At present these areas are the only ones that can be said with certainty to be necessary for the survival and recovery of the crane, and that can be specifically delineated as Critical Habitat. Should more precise information become available regarding other sites within the originally proposed zone, or should range expansions or reintroductions of the crane occur, the recognized Critical Habitat could be increased.

EFFECTS OF THE RULEMAKING

Most of the persons who commented on the proposal apparently were confused regarding the meaning and implications of a Critical Habitat designation. For example, many persons expressed concern that the designation would automatically halt or greatly restrict all human activities and development within the entire designated area. Many

seemed to think that Section 7 provisions would apply to the actions of all parties, not just Federal agencies. Perhaps most unfortunately, many persons apparently thought that the Fish and Wildlife Service could arbitrarily determine or not determine, enlarge or reduce a Critical Habitat area based on non-biological factors.

It should be realized that Critical Habitat is not created by a government agency; it already exists in nature, and in most cases has existed for countless centuries. All species of wildlife have their own Critical Habitat, a term which has been interpreted (40 FR 17764 as meaning habitat necessary to the normal needs or survival of a species. Although such habitat does exist, its precise location and perimeters are not generally known to the public and government agencies. The function of the Fish and Wildlife Service is to biologically delineate such habitat, with easily identified boundaries, so that other Federal agencies may conveniently refer to this information in following their responsibilities under Section 7. Although disagreements may arise regarding what habitat is actually necessary for a species, or how to most accurately delineate an area, the final determination must express a consensus of the best biological information that is available.

A Critical Habitat designation points out specific areas within the United States where Federal agencies may have to assess their actions relative to possible effects on Endangered species. This requirement itself is the only direct meaning of a Critical Habitat determination. No specific kinds of actions would be affected, regardless of the extent of the Critical Habitat, unless such actions actually could be considered detrimental to the species involved. For more information, please contact the "Proposed Provisions for Interagency Cooperation" in the FEDERAL REGISTER of January 26, 1977.

NATIONAL ENVIRONMENTAL POLICY ACT

An environmental assessment has been prepared and is on file in the Service's Office of Endangered Species in Washington, D.C. The assessment is the basis for a decision that the determinations of this rulemaking are not major Federal actions that would significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

FINAL RULEMAKING

The Director has considered all comments and data submitted in response to the proposed determination of Critical Habitat for the Mississippi sandhill crane. The Director also has considered other information received by the Service, both prior to and subsequent to the publication of the proposed Critical Habitat determination in the FEDERAL REGISTER of September 3, 1975. Based on this review, the areas delineated below are determined to be Critical Habitat for the Mississippi sandhill crane.

This rulemaking is issued under the authority contained in the Endangered Species Act of 1973 (16 U.S.C. 1531–1543; 87 Stat. 884), and was prepared by Dr. Ronald M. Nowak, Office of Endangered Species.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

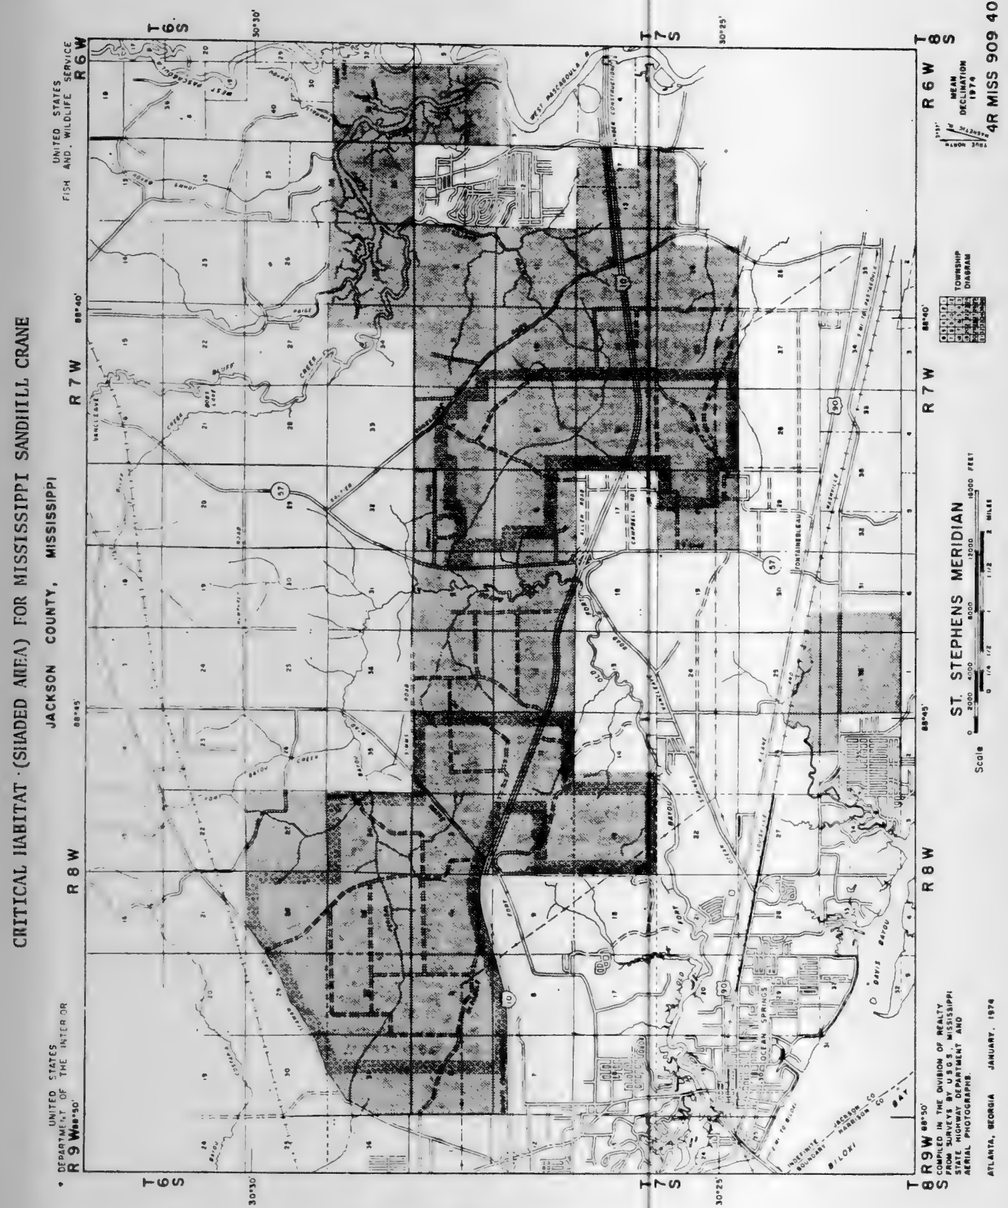
Dated: July 29, 1977.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

Accordingly, § 17.95(b), Part 17, Subpart I, Title 50 of the Code of Federal Regulations is amended by adding the following Critical Habitat description after the Critical Habitat description for the American peregrine falcon.

Subpart I—Interagency Cooperation

§ 17.95 Critical Habitat—Fish and Wildlife.



* * * * *

(b) Birds.

* * * * *

Mississippi Sandhill Crane (*Grus canadensis pulla*).

MISSISSIPPI. Areas of land, water, and airspace in Jackson County, with the following components (St. Stephens Base Meridian): T6S R6W Sec. 31; T6S R7W E½ of E½ Sec. 34, Sec. 35–36, S½ Sec. 38; T6S R8W Sec. 27, those portions of Sec. 28–31 south of Seaman Road, Sec. 32–34; T7S R6W N½ of N½ Sec. 3, Sec. 6; T7S R7W Sec. 2–11, Sec. 13–16, Sec. 20–22, W½ Sec. 23, W½ of E½ Sec. 23, NE¼ of NE¼ Sec. 23, N½ of N½ Sec. 24, that portion of the SW¼ of SW¼ Sec. 30 south of the Louisville and Nashville Railroad, W½ of W½ Sec. 31, W½ Sec. 37, that portion of the E½ Sec. 37 north of U.S. Interstate Highway 10; T7S R8W Sec. 1–3, that portion of Sec. 4 north of U.S. Interstate Highway 10, Sec. 5–6, those portions of Sec. 7–8 north of U.S. Interstate Highway 10, Sec. 10–12, W½ of W½ Sec. 14, Sec. 15, that portion of Sec. 25 south of the Louisville and Nashville Railroad, that portion of the SE¼ of Sec. 26 south of the Louisville and Nashville Railroad and southeast of Davis Bayou, N½ of NE¼ Sec. 35, Sec. 36.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 917]

FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

Proposed Extension of Grade, Size, and Container Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice proposes an amendment which would extend the current minimum grade, size, and container requirements for shipments of fresh California Bartlett, Max-Red Bartlett, and Red Bartlett variety pears through July 31, 1978. These requirements are needed to provide for orderly marketing in the interest of producers and consumers.

DATES: Comments must be received on or before August 23, 1977. Proposed effective dates: September 1, 1977, through July 31, 1978.

ADDRESSES: Send two copies of comments to the Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: Pear Regulation 7 (42 FR 35973) currently in effect requires that shipments of fresh pears meet certain grade, size, and container requirements through August 31, 1977. This proposed amendment would continue these requirements for the period September 1, 1977, through July 31, 1978, as recommended by the Pear Commodity Committee, established under the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917). This marketing agreement and order regulates the handling of fresh pears, plums, and peaches grown in California, and is effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Fresh shipments of California Bartlett pears from the 1977 crop have been estimated at 4,210 carlots by the Pear Commodity Committee, as compared with 4,159 carlots shipped in 1976, and 3,819 carlots shipped in 1975. Shipments of pears from the production area are currently underway.

The grade and size requirements are designed to permit shipment of ample supplies of fruit of acceptable grades and sizes in the interest of both growers and consumers. The container requirements are necessary to assure that the fruit contained therein is protected during transit, and that containers are properly marked as to variety. The proposed amendment is consistent with the objectives of the act of promoting orderly marketing and protecting the interest of consumers.

The proposal is that § 917.445 Pear Regulation 7 (42 FR 35937) be amended to read as follows:

§ 917.445 Pear Regulation 7.

(a) During the period September 1, 1977, through July 31, 1978, no handler shall ship:

(1) Bartlett or Max-Red (Max-Red Bartlett, Red Bartlett) varieties of pears which do not grade at least U.S. Combination with not less than 85 percent by count, of the pears grading at least U.S. No. 1;

(2) Any box or container of Bartlett or Max-Red (Max-Red Bartlett, Red Bartlett) varieties of pears unless such pears are of a size not smaller than the size known commercially as size 150: *Provided*, That a handler may ship, during any day from any shipping point, a quantity of such pears which are smaller then the size known commercially as size 150 if (i) such smaller pears are not smaller than the size known commercially as size 165, and (ii) the quantity of such smaller pears shipped from such shipping point does not, at the end of any day during the aforesaid period, exceed 5.263 percent of such handler's total shipments of such pears, shipped from the same shipping point, which are not smaller than the size known commercially as size 150;

(3) Any box or container of Bartlett or Max-Red (Max-Red Bartlett, Red Bartlett) varieties of pears unless such box or container is stamped or otherwise marked, in plain sight and in plain letters, on one outside end with the name of the variety; and

(4) Any box or container of Bartlett or Max-Red (Max-Red Bartlett, Red Bartlett) varieties of pears in volume fill cartons (not packed in rows and not wrap packed) unless (i) such cartons are well filled with pears fairly uniform in size; (ii) there is an approved top pad in each carton that will cover the fruit with no more than ¼ inch between the pad and any side or end of the carton; and (iv) the top of the carton shall be securely fastened to the bottom: *Provided*, That 10 percent of the cartons in any lot may fail to meet the requirements of this paragraph.

(b) *Definitions.* (1) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order.

(2) "Size known commercially as size 150" means a size of pear that will pack a standard pear box, packed in accordance with the specifications of a standard pack, with 150 pears and that a 12-pound random sample, representative of the size of the pears in the box or container, contains not more than 39 pears.

(3) "Size known commercially as size 165" means a size of pear that will pack a standard pear box, packed in accordance with the specifications of a standard pack, with 165 pears and that a 12-pound random sample, representative of the size of the pears in the box or container, contains not more than 43 pears.

(4) "Standard pear box" means the container so designated in Section 1380.9 of the Regulations of the California Department of Food and Agriculture.

(5) "U.S. No. 1", "U.S. Combination" and "standard pack" shall have the same meaning as when used in the U.S. Standards for Pears (Summer and Fall) 7 CFR 51.1260–51.1280.

(6) "Approved top pad" shall mean a pad of wood-type excelsior construction, fairly uniform in thickness, weighing at least 160 pounds per 1,000 square feet (e.g., an 11 inch by 17 inch pad will weigh at least 21 pounds per 100 pads) or an equivalent made of material other than wood excelsior approved by the committee.

Dated: August 3, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-22781 Filed 8-5-77;8:45 am]

[7 CFR Part 929]

HANDLING OF CRANBERRIES GROWN IN CERTAIN STATES

Allotment Transfers and Disposition of Growers Annual Allotment Certificate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal would establish procedures governing the transfer of

unused allotment and cranberries among growers and the disposition of each grower's annual allotment certificate. The proposal is designed to keep the Cranberry Marketing Committee informed of transfers in connection with filing deficiencies in allotment or cranberries and to enable the committee to check compliance with regulations applicable to handlers of cranberries.

DATE: Comments must be received on or before August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–3545.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department is considering proposed amendment, as hereinafter set forth, of the rules and regulations (Subpart—Rules and Regulations; 7 CFR 929.101 et seq.) currently in effect pursuant to the applicable provisions of the amended marketing agreement and Order No. 929, as amended (7 CFR Part 929). The order regulates the handling of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York. This is a regulatory program effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The proposal to amend said rules and regulations was recommended by the Cranberry Marketing Committee established under the order as the agency to administer the terms and provisions thereof.

Section 929.49(c) of the order specifies, in part, that as a condition to a transfer of allotment or cranberries each grower or handler shall furnish a full report to the committee, including the names of the parties, the quantity involved in the transaction and other necessary information. This proposal would establish the procedure by which such information shall be furnished to the committee. The proposal is designed to keep the committee informed of transfers in connection with filling deficits in allotment or cranberries and to enable the committee to ascertain that no handler has handled cranberries in excess of a grower's annual allotment and any transferred allotment.

The proposal is to add a new section reading as follows:

§ 929.151 Allotment transfers and disposition of the Growers Annual Allotment Certificate.

(a) Growers who transfer or receive the transfer of cranberries or allotment to fill deficiencies pursuant to § 929.49(c) shall report the details of such transfer to the committee on CMC forms T3 through T6, as applicable, within 10 days of the effective date of such transfer.

(b) Growers may enter into an agreement with a handler or handlers as to the disposition of the grower's annual allotment. The terms of the agreement shall be contained on CMC form T7 or a similarly executed agreement acceptable to the committee, and shall include the following:

(i) The quantity of allotment available to the handler for transfer;

(ii) The effective date of the agreement; and

(iii) The signature of the grower and the handler or their authorized representatives.

Any transfer effected by the handler pursuant to this agreement shall be documented on committee forms and submitted to the committee within 10 days of the effective date of such transfer.

(c) Each grower shall submit to the committee his annual allotment certificate within 10 days following the completion of his harvest: *Provided*, That each grower may authorize a handler to submit the annual allotment certificate to the committee. Notification that the handler agrees to perform this service shall be provided to the committee and the terms of the agreement shall be contained on CMC for T7 or similarly executed agreement acceptable to the committee. Each handler shall submit the allotment certificate to the committee by January 15 of each year. Each allotment certificate submitted by the grower or his authorized handler shall show quantities of cranberries purchased by handlers and the dates on which such purchases were made. Each certificate shall be signed by the handler and indicate the date on which any transfers were submitted to the committee.

All persons who desire to submit written data, views, or arguments in connection with this proposal should file the same, in duplicate, with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, not later than August 23, 1977. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: August 3, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agriculture Marketing Service.

[FR Doc.77-22782 Filed 8-5-77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 211]

MANDATORY PETROLEUM ALLOCATION REGULATIONS

Proposed Amendments Clarifying Entitlements Treatment of Exchanges for the Strategic Petroleum Reserve

AGENCY: Federal Energy Administration.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Federal Energy Administration (FEA) proposes to adopt amendments to the domestic crude oil allocation (entitlements) program to clarify the entitlements treatment of exchanges or matching purchase and sales transactions which the Federal Government enters into in connection with the acquisition of crude oil for storage in the Strategic Petroleum Reserve (SPR). The proposed amendments would provide that refiners or firms other than refiners which enter into exchanges or matching purchase and sales transactions with the Federal Government for the delivery of crude oil for storage in the SPR would not earn entitlements for the delivery of that crude oil. In such cases, the entitlements would be earned by the refiner or other firm from which the Federal Government purchases crude oil for purposes of satisfying its obligation pursuant to the exchange or matching purchase and sale transaction.

DATES: Comments by August 18, 1977, 4:30 p.m.; Requests to speak by August 11, 1977, 4:30 p.m.; Hearing date: August 18, 1977, 9:30 a.m.

ADDRESSES: Comments and requests to speak to: Executive Communications, Room 3317, Federal Energy Administration, Box OL, Washington, D.C. 20461; Hearing Location: 12th and Pennsylvania Avenue, NW., Room 3000B, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Deanna Williams (FEA Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461, 202–566–9161.

Michael Paige or Fred Wolgel (Office of General Counsel), 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202–566–9565 (Paige); 202–566–2454 (Wolgel).

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

On April 25, 1977, FEA adopted amendments to the entitlements program which provide that any refiner or firm other than a refiner that sells imported crude oil to the United States Government for storage in the SPR shall receive entitlement issuances for those volumes delivered and accepted by the United States Government for storage in the SPR (42 FR 21761, April 29, 1977). The value of the entitlement benefits received by refiners or other firms for SPR sales serves to reduce the Government's payment obligation for the imported crude oil purchased by the amount of the benefits earned. Refiners obtain entitlement issuances for SPR sales by adjusting the volume of their crude oil runs to stills to include the actual volumes of imported crude oil delivered to and accepted for delivery by the United States Government for storage in the SPR in the month following the month in which delivery was made to the Government. Firms other than refiners receive entitlement issuances for sales of imported crude oil to the Federal Government on the same basis as is provided for refiners.

Concurrently with the April 25, 1977, final rule, FEA issued a notice of proposed rulemaking setting forth conforming amendments to the Mandatory Petroleum Price Regulations, 10 CFR Part 212, for sales of crude oil to the SPR, and solicited further comments on the issues pertaining to the modification to the entitlements program for sales of domestic crude oil for the SPR (42 FR 21789, April 29, 1977). On May 27, 1977, FEA issued the conforming amendments to the price regulations to provide for sales of both domestic and imported crude oil to the SPR (42 FR 27908, June 1, 1977). FEA is currently evaluating the comments received with respect to modification of the entitlements program to permit purchases of domestic crude oil for the SPR.

Title I, Part B of the Energy Policy and Conservation Act, Pub. L. 94–163 (EPCA) requires FEA to acquire up to one billion barrels of crude oil and refined petroleum products for storage in the SPR. The first amendment to the SPR Plan, effective June 20, 1977, requires FEA to store 250 million barrels of crude oil in the SPR by December 22, 1978. To meet this goal, FEA has already commenced crude oil acquisition activities.

Section 160 of the EPCA permits the Administrator of FEA to acquire crude oil for the SPR by "purchase, *exchange* or otherwise" (emphasis added). In order to obtain deliveries of imported crude oil for the SPR as efficiently and inexpensively as possible, it has become necessary to enter into exchange agreements or matching purchase and sales transactions with refiners or other firms. For example, because the Federal Government will make use of commercial terminals to receive shipments of imported crude oil for the SPR, if a SPR shipment should arrive at the terminal earlier than scheduled, it may be less expensive for the Government to enter into an exchange agreement with regard to the shipment rather than to incur demurrage charges. In such a situation, the Federal Government may prefer to enter into an agreement to exchange the early arriving shipment, purchased from one firm, for a later arriving shipment, title to which is in a second firm. Similarly, if unanticipated opportunities for SPR site fill should develop, crude oil exchanges may offer the best and possibly the only means of taking advantage of such opportunities. In such instances, the Government may find it advisable to accept a shipment of crude oil and agree to subsequently reimburse the supplier in kind. Because of scheduling and delivery difficulties such as those described above, such exchanges are necessary in order to facilitate the acquisition of crude oil for the SPR.

When the Federal Government enters into an exchange agreement with a refiner or other firm, the Government must purchase an approximately equal volume of crude oil from another firm for delivery to the first firm pursuant to its obligation under the exchange. Because the first firm actually delivers crude oil to the Government, there has been uncertainty among refiners and other firms as to which firm would receive entitlement issuances for sales of crude oil to the SPR.

II. PROPOSED AMENDMENTS

To clarify the entitlements treatment of exchanges associated with SPR acquisitions, FEA is proposing for public comment in this notice an amendment to § 211.67(d)(6) to provide that a refiner would not earn entitlements for delivery of crude oil to the Federal Government for storage in the SPR, where that delivery is part of an exchange or part of a matching purchase and sale transaction which has the same effect as such an exchange. In such cases, the entitlements would be earned by the refiner or other firm from which the Government purchases crude oil for purposes of satisfying its obligation pursuant to the exchange or matching purchase and sale transaction. The entitlement issuances to such refiner or other firm would be on the same basis as those with respect to refiners or other firms from which imported crude oil is acquired for storage in the SPR. Section 211.67(d)(7) also would be amended to provide the same entitlements treatment for firms other than refiners that enter into exchange agreements or matching purchase and sales transactions with the Federal Government. The proposed amendments would not affect the treatment of crude oil exchanges or matching purchase and sales transactions under § 211.67(g).

An example of the application of the proposed amendments is as follows: The Government will contract to receive barrels of crude oil delivered to the SPR in the month of July from firm A, in exchange for which the Government will deliver 100 barrels of crude oil to firm A in September. In September, the Federal Government purchases 100 barrels of crude oil from firm B to be delivered to firm A and thus fulfill the Government's obligation under the exchange agreement. Under the amendments proposed today, firm B would earn entitlements for delivering 100 barrels of crude oil to the Government for redelivery to firm A on the same basis as if the imported crude oil were delivered to the Federal Government for storage in the SPR. Thus, firm B's September sale to the Government would be reported in October as an adjustment to firm B's August crude oil runs to stills.

III. WRITTEN COMMENT AND PUBLIC HEARING PROCEDURE

A. WRITTEN COMMENTS

Interested persons are invited to submit data, views or arguments with respect to these proposed amendments to Executive Communications, FEA, Box OL, Washington, D.C. 20461. Comments should be identified on the outside envelope and on the document with the designation "Clarifying Amendmens on Entitlements Treatment of Exchanges for the Strategic Petroleum Reserve." Fifteen copies should be submitted. All comments received by 4:30 p.m., e.s.t., August 18, 1977, and all relevant information, will be considered by FEA.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing in accordance with the procedures stated in 10 CFR 205.9(f). The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

B. PUBLIC HEARING

1. *Request Procedure.* A public hearing on the subject matter of this notice will be held at the time and place indicated in the dates section of this preamble. If necessary to present all testimony, the hearing will be continued to 9:30 a.m. of the next business day following the first day of the hearing.

Any person who has an interest in the proposed amendments, or who is a representative of a group or class of persons that has an interest in the proposed amendments, may make a written request for an opportunity to make oral presentation. Requests to testify at the public hearing should be directed to Executive Communications, FEA, 1200 Pennsylvania Avenue NW., Washington, D.C. 20461, and must be received before 4:30 p.m., e.s.t., August 11, 1977. Such requests may be hand delivered to Room 3317, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., e.s.t., Monday through Friday. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through the day before the hearing.

Each person selected to be heard will be so notified by the FEA before 4:30 p.m., e.s.t., August 15, 1977 and must submit 50 copies of his or her statement to Executive Communications Room 3317, 12th and Pennsylvania Avenue NW., Washington, D.C., before 4:30 p.m., e.s.t., on August 17, 1977.

2. *Conduct of the Hearing.* The FEA reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of

each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearing will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be the subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing, to Executive Communications, FEA, Box OL before 4:30 p.m., e.s.t., August 16, 1977. Any person who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the FEA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this proposal has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments on this proposal.

In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-163, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is proposed to be amended as set forth below.

Issued in Washington, D.C., August 3, 1977.

ERIC J. FYGI,
Acting General Counsel.

Section 211.67 is amended by adding the following at the ends of the first sentences of subparagraphs (6) and (7) of paragraph (d):

§ 211.67 Allocation of domestic crude oil.

* * * * *

(d) *Adjustments to volume of crude oil runs to stills.*

* * * * *

(6) * * *; and, *Provided further*, That, is any case where the United States Government acquires imported crude oil for storage in the Strategic Petroleum Reserve pursuant to an exchange or pursuant to a matching purchase and sale transaction which has the same effect as such an exchange, the refiner from which that imported crude oil is acquired for storage in the Strategic Petroleum Reserve shall not be eligible for any entitlement issuances under this subparagraph (6), but a refiner or firm other than a refiner from which the United States Government acquires imported crude oil for purposes of satisfying its obligation pursuant to the aforementioned exchange or matching purchase and sale shall be eligible for entitlement issuances on the same basis as refiners from which imported crude oil is acquired for storage in the Strategic Petroleum Reserve.

(7) * * *; and, *Provided further*, That, in any case where the United States Government acquires imported crude oil for storage in the Strategic Petroleum Reserve pursuant to an exchange or pursuant to a matching purchase and sale transaction which has the same effect as such an exchange, the firm from which that imported crude oil is acquired for storage in the Strategic Petroleum Reserve shall not be eligible for any entitlement issuances under this subparagraph (7), but a refiner or firm other than a refiner from which the United States Government acquires imported crude oil for purposes of satisfying its obligation pursuant to the aforementioned exchange or matching purchase and sale shall be eligible for entitlement issuances on the same basis as refiners from which imported crude oil is acquired for storage in the Strategic Petroleum Reserve.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 107]

SMALL BUSINESS INVESTMENT COMPANIES

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: The proposed amendment (1) authorizes a Licensee to incur reasonably necessary expenditures which, together with its total investment attributable to such assets, may not exceed 20 percent of its Private Capital ("overline limit"), to maintain, preserve, or (subject to prior SBA approval) make improvements designed to render assets in liquidation saleable, pending disposition, and (2) in addition to the foregoing, permits require expenditures to be made for prior mortgage interest and principal payments, taxes, and necessary insurance coverage allocable to such assets in an aggregate amount which, together with Licensee's total investment attributable thereto, does not exceed 35 percent of its Private Capital.

Where additional Financing is provided to a Portfolio concern over which temporary Control has been taken to protect a Licensee's original investment, the proposed amendment would require the plan of divestiture already approved by SBA to be resubmitted only where it requires significant changes.

It is further proposed that the existing requirement that Licensees maintain fidelity insurance in the minimum amount of $25,000 be rescinded.

DATES: Comments must be received on on before September 7, 1977, in triplicate, by the Associate Administrator for Finance and Investment, Small Business Administration, Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

Peter F. McNeish, Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416, telephone 202-653-6584.

Notice is hereby given that pursuant to the authority contained in section 308 of the Small Business Investment Act of 1958, as amended, it is proposed to amend, as set forth below, §§ 107.810, 107.901(f), and 107.1104 of Part 107, Chapter I, Title 13 of the Code of Federal Regulations.

1. Section 107.810 would be amended to read as follows:

§ 107.810 Assets in liquidation.

(a) A Licensee shall dispose of assets acquired in total or partial liquidation of a Portfolio asset, within a reasonable period of time.

(b) (1) A Licensee may incur reasonably necessary expenditures for maintenance and preservation of such assets, and

(2) A Licensee may, subject to prior written SBA approval, incur reasonably necessary expenditures for improvements to render such assets saleable: *Provided, however*, That aggregate expenditures made pursuant to paragraphs (a) and (b) of this section plus Licensee's total investment attributable to such assets, shall not exceed its overline limit under § 107.301(d), except as specifically approved in writing by SBA.

(3) In addition to the amounts authorized by paragraphs (a) and (b) of this section, a Licensee may make the following required expenditures allocable to such assets in an aggregate amount which, together with its total investment attributable thereto, and its expenditures pursuant to paragraphs (a) and (b) of this section do not exceed 35 percent of its Private Capital, except as specifically approved by writing by SBA: (i) Prior mortgage interest and principal payments, (ii) taxes and (iii) necessary insurance coverage.

(c) Application for SBA approval under paragraphs (b)(2) and (b)(3) of this section shall specify all expenses estimated to be necessary pending disposal of the assets.

2. Section 107.901(f) would be amended to read as follows:

§ 107.901 Control of small concern.

* * * * *

(f) A Licensee which has assumed Control of a Small Concern may later provide additional Financing, without an exemption under § 107.1004(b)(1), and shall within 30 days resubmit its divestiture plan for SBA approval only where the additional Financing requires significant changes in such SBA-approved plan on file in order to effect divestiture of Control.

3. Section 107.1104 (Fidelity insurance) would be repealed:

§ 107.1104 [Reserved]

APPENDIX—[AMENDED]

4. Subdivision X of Appendix A—Audit Guide for Small Business Investment Companies, dealing with fidelity bonds, would be rescinded.

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 77-NE-13]

CONTROL ZONE AND TRANSITION AREA [1]

Alteration of Control Zone and 700-Foot Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice (NPRM) proposes to alter the description of the control zone and 700-foot transition area at Burlington International Airport, Burlington, Vermont. This alteration is needed to provide controlled airspace for aircraft executing revised VOR and radar standard instrument approach procedures to Runway 1 at the airport. This action will enlarge the control zone and transition area.

DATE: Comments must be received on or before September 2, 1977.

ADDRESSES: Send comments in triplicate to the Federal Aviation Administration, Office of the Regional Counsel, ANE-7; Attention: Rules Docket Clerk, Docket No. 77-NE-13, 12 New England Executive Park, Burlington, Massachusetts 01803.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT:

Richard G. Carlson, Operations Procedures and Airspace Branch, ANE-536, Air Traffic Division, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone 617-273-7285.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking process by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Office of the Regional Counsel, ANE-7, Attention: Rules Docket Clerk, Docket No. 77-NE-13, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803. All communications received on or before September 2, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this Notice of Proposed Rule Making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering amending Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR PART 71) to alter the description of the Burlington, Vermont, control zone and 700-foot transition area serving the Burlington International Airport, Burlington, Vermont. This alteration will provide controlled airspace for aircraft executing revised VOR and radar standard instrument approach procedures to Runway 1 at the Burlington International Airport, Burlington, Vermont. The intended effect of this action is to insure separation of aircraft using these approach procedures in instrument weather conditions, and other aircraft operating under visual conditions. The alteration would be reflected on appropriate aeronautical charts and maps.

DRAFTING INFORMATION

The principal authors of this document are Richard G. Carlson, Air Traffic Division, New England Region, and George L. Thompson, Associate Regional Counsel, New England Region.

THE PROPOSED AMENDMENT

Accordingly, the FAA proposes to amend Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations as follows:

1. In § 71.171 of Part 71 (42 FR 440), the following control zone is amended to read as follows:

§ 71.171 [Amended]

BURLINGTON, VERMONT, CONTROL ZONE

"Within a 7-mile radius of the center, (lat. 44°28'17" N., long. 73°19'13" W), of Burlington International Airport, Burlington, Vermont; within 2.5 miles each side of Runway 33, extending from the 7-mile radius zone to 8 miles southeast of the runway end; within 3 miles each side of the Burlington, Vermont VORTAC 201° radial, extending from the 7-mile radius zone to 8.5 miles southwest of the VORTAC."

2. In § 71.181 of Part 71 (42 FR 440), the following 700-foot transition area is amended to read as follows:

§ 71.181 [Amended]

BURLINGTON, VERMONT, 700-FOOT TRANSITION AREA

"That airspace extending upward from 700 feet above the surface within a 14-mile radius of the center, (lat. 44°28'17" N., long. 73°19'13" W), of Burlington International Airport, Burlington, Vermont; within 9.5 miles northeast and 4.5 miles southwest of the Burlington ILS northwest localizer course, extending from the 14-mile radius area to 18.5 miles northwest of the Burlington LOM; within 3.5 miles each side of the Burlington, Vermont VORTAC 201° radial, extending from the 14-mile radius area to 12 miles southwest of the VORTAC; excluding that airspace that coincides with Plattsburgh, New York and Highgate, Vermont transition areas."

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); and Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

[1] Map filed as part of original.

Issued in Burlington, Massachusetts, on July 22, 1977.

WILLIAM E. CROSBY,
Acting Director,
New England Region.

[14 CFR Part 71]

[Docket No. 77-SO-32]

TRANSITION AREA, COLUMBIA, MISSISSIPPI

Proposed Designation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: A public use instrument approach procedure is being developed for the Columbia-Marion County, Mississippi, Airport, and additional controlled airspace is required for containment of IFR operations. This proposed rule will designate the Columbia, Mississippi, transition area and will lower the base of controlled airspace in the vicinity of the airport from 1200 to 700 feet to accommodate the anticipated IFR operations.

DATES: Comments must be received on or before: September 6, 1977.

ADDRESS: Send comments on the proposal to: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320. Telephone 404-763-7947.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Federal Aviation Administration, Attention: Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. All communications received on or before September 6, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Columbia, Mississippi, 700-foot transition area. This action will provide additional controlled airspace to accommodate aircraft performing IFR operations at Columbia-Marion County Airport. If the proposed designation is acceptable, the airport operating status will be changed from VFR to IFR.

DRAFTING INFORMATION

The principal authors of this document are William F. Herring, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by adding the following:

COLUMBIA, MISSISSIPPI

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Columbia-Marion County Airport (Lat. 31°17'45" N., Long. 89°48'50" W.)

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on July 28, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[14 CFR Part 71]

[Airspace Docket No. 77-WE-19]

TRANSITION AREA, FORT HUACHUCA, ARIZONA

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Fort Huachuca, Arizona, 700 foot transition area. This proposal is necessary in order to provide controlled airspace for radar vector procedures north of Fort Huachuca, Arizona.

DATES: Comments must be received on or before August 31, 1977.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Chief, Airspace and Procedures Branch, AWE-530, 15000 Aviation Boulevard, Lawndale, California 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261. Telephone: 213 536-6182.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the Airspace Docket Number and be submitted in triplicate to the Chief, Airspace and Procedures Branch, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261. All communications received on or before August 31, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to Federal Aviation Administration, Chief, Airspace and Aviation Boulevard, Lawndale, Califor- Procedures Branch, AWE-530, 1500 nia 90261, or by calling 213-536-6180. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSALS

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the 700 foot transition area at Fort Huachuca, Arizona. The present 700 foot transition area was found to be inadequate to provide controlled airspace for radar vector procedures north of Fort Huachuca.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division and DeWitte T. Lawson, Jr., Esquire, Regional Counsel, Western Region.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

§ 71.181 [Amended]

FORT HUACHUCA, ARIZONA

Following "* * * extending clockwise from a line 5 miles * * *"; delete "* * * northwest of and parallel to the 033° radial * * *" and substitute therein: * * * "west of and parallel to the 357° radial" * * *

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on July 20, 1977.

FRANK HAPPY,
Acting Deputy Director,
Western Region.

Health Care Financing Administration

[20 CFR Part 405]

[Reg. No. 5]

FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Payment Under Medicare for Items and Services Rendered by Indian Health Service Hospitals and Skilled Nursing Facilities and by Certain Veterans' Administration Hospitals

AGENCY: Health Care Financing Administration, HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: These proposed amendments would revise the Medicare regulations to permit payment for items and services rendered Medicare patients by hospitals and skilled nursing facilities of the Indian Health Service (IHS) and by certain Veterans' Administration (VA) hospitals. With certain exceptions, IHS hospitals and skilled nursing facilities and VA hospitals were previously excluded from receiving Medicare payments under the general prohibition against Medicare payments to Federal providers.

The amendments incorporate the provisions of section 401 of the Indian Health Care Improvement Act (Pub. L. 94-437) and section 115(a) of the Veterans Omnibus Health Care Act (Pub. L. 94-581) into the regulations. For IHS facilities the change will permit them to receive Medicare reimbursement for services to Medicare beneficiaries and use that reimbursement to improve their facilities. For VA hospitals and the non-VA hospitals with which VA hospitals have agreements to treat certain types of patients, the change will permit extension by the Medicare program of coverage to a wider range of those services furnished in VA hospitals than previously permitted.

DATES: Consideration will be given to written comments or suggestions received on or before September 22, 1977.

When commenting please refer to BHI-1-P.

Agencies and organizations are requested to submit their comments in duplicate.

Comments will be available for public inspection, beginning approximately 2 weeks after publication, in room 5225 of the Department's offices at 330 C Street SW., Washington, D.C., on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (area code 202-245-0950).

ADDRESS: Address comments to: Administrator, Health Care Financing Administration, Department of Health, Education, and Welfare, P.O. Box 2372, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Mr. John B. Russell, Bureau of Health Insurance, Health Care Financing Administration, Telephone 301-594-8260.

SUPPLEMENTARY INFORMATION: The proposed amendments incorporate into the Medicare regulations provisions of section 401 of Pub. L. 94-437 (the Indian Health Care Improvement Act) and section 115(a) of Pub. L. 94-581 (the Veterans Omnibus Health Care Act).

The Medicare law (title XVIII of the Social Security Act (42 U.S.C. 1395)) generally prohibits payment (other than for emergency services) (1) to any Federal provider of services except providers which have been determined to be providing services to the general public as community institutions or agencies, (2) to any provider of services for items or

services which the provider is obligated under a law of the United States or contract with the United States to render at public expense, and (3) for items or services which are paid for directly or indirectly by a governmental entity. Therefore, prior to enactment of Pub. L. 94–437, payment could not be made under Medicare for services (other than for emergency services) rendered by Indian Health Service (IHS) hospitals and skilled nursing facilities (SNF's) except in the case of certain hospitals in Alaska that had been determined to be serving the general public as community institutions. Likewise, prior to the enactment of Pub. L. 94–581, payment could not be made under Medicare for services (other than for emergency services) rendered by Veterans' Administration (VA) hospitals except for the treatment of end-stage renal disease by certain VA hospitals that were determined to be serving the general public as community institutions for purposes of end-stage renal disease treatment only. The exception for end-stage renal disease treatment was pursuant to a Memorandum of Understanding between the Administrator of Veterans' Affairs and the Secretary of Health, Education, and Welfare.

Section 401 of Pub. L. 94–437 (which amended 42 U.S.C. 1395f and 1395n and added 1395qq), by permitting payment to be made for services rendered Indians by IHS hospitals and SNF's, notwithstanding their status as Federal providers, eliminates a technical impediment to participation in Medicare by IHS facilities. Medicare payments would be made to IHS hospitals and SNF's under this amendment, whether or not the Medicare beneficiary who receives the services would otherwise be entitled to free care from the IHS.

Section 115(a) of Pub. L. 94–581 (which amended 38 U.S.C. 5053(d)), by permitting Medicare payment to certain VA hospitals and non-VA hospitals with which they have agreements to share facilities, makes it possible to extend Medicare coverage of services rendered in VA hospitals to services other than end-stage renal disease services. At the same time this will encourage the sharing of scarce medical resources between VA and non-VA health care facilities. The amendments would require that the non-VA hospital be participating in the Medicare program and that the Medicare beneficiary treated in the VA hospital not be a veteran eligible for care from the VA.

The proposed amendments are to be issued under the authority contained in sections 1102, 1814 (c) and (d), 1835(d), 1862(a)(3), 1871, and 1880 of the Social Security Act; 49 Stat. 647, as amended, 79 Stat. 294, as amended, 79 Stat. 303, as amended, 79 Stat. 325, as amended, 79 Stat. 331; 90 Stat. 1408, 42 U.S.C. 1302, 1395f (c) and (d), 1395n(d), 1395y (a)(3), 1395hh, 1395qq; Pub. L. 94–581, 90 Stat. 2842.

NOTE.—The Health Care Financing Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: June 6, 1977.

ROBERT A. DERZON,
Administrator, Health Care Financing Administration.

Approved: July 30, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Part 405 of Chapter III of Title 20 of the Code of Federal Regulations is amended as set forth below:

1. Section 405.101 is amended by revising the material in paragraph (a) which precedes paragraph (a) (1) to read as follows:

§ 405.101 Hospital insurance benefits; general.

(a) An individual who meets the conditions for entitlement to hospital insurance benefits provided under Part A of title XVIII of the Act is eligible to have payment made on his behalf, or to him (for certain hospital services), subject to the conditions, limitations, and exclusions set out in this part and in the Act, for:

* * * * *

2. Sections 405.154 and 405.155 are revoked and reserved.

§ 405.154 [Reserved]

§ 405.155 [Reserved]

3. Section 405.252 is amended by revising the material preceding paragraph (a) and by revoking and reserving paragraphs (b) and (c) to read as follows:

§ 405.252 Conditions prohibiting payment of benefits.

In addition to any other limitation, condition, or exclusion set out in this part or in the Act, payment of supplementary medical insurance benefits may not be made under the following circumstances:

* * * * *

(b) [Reserved]
(c) [Reserved]

* * * * *

4. Sections 405.311a and 405.311b are added to read as follows:

§ 405.311a Nonreimbursable expenses; items or services furnished by a Federal provider of services or other Federal agency.

(a) Payment may not be made under title XVIII of the Act for expenses incurred for any items or services that are furnished by a Federal provider of services or other Federal agency, except that:

(1) Payment may be made for emergency hospital services where the conditions in § 405.152 or § 405.249 are met;

(2) Payment may be made to a participating Federal provider which has been determined to be providing services to the public generally as a community institution or agency; and

(3) Payment may be made to participating hospitals and skilled nursing facilities of the Indian Health Service, notwithstanding § 405.311.

(b) For purpose of paragraph (a) (2) of this section, Veterans' Administration (VA) hospitals which have contracts or agreements with participating non-VA hospitals pursuant to 38 U.S.C. 5053(d) are considered community institutions with respect to items and services furnished pursuant to those contracts or agreements. Payment may be made, in accordance with such contracts or agreements either to the VA hospital or to the non-VA hospital, for items and services furnished to individuals who are not veterans eligible for care from the Veterans' Administration.

§ 405.311b Nonreimbursable expenses; items or services which a provider or other person is obligated to furnish at public expense under a law of, or contract with, the United States.

Payment may not be made to any provider of services or other person (except a hospital or skilled nursing facility of the Indian Health Service) for items or services which such provider or person is obligated by a law of, or contract with, the United States to furnish at public expense.

5. Section 405.312 is amended by revising paragraph (e) to read as follows:

§ 405.312 Nonreimbursable expenses; items or services paid for by governmental entity.

* * * * *

(e) Payment may be made to participating hospitals and skilled nursing facilities of the Indian Health Service in accordance with §§ 405.311a and 405.311b.

LMSA–16: Investigatory files—Special Investigation Staff.
OASAM–3: General investigation file.

In the published notice for the exemption of DOL/LMSA–1, certain lines were omitted as were the notices for exemptions for DOL/LMSA–4 and 16. Further, in order to avoid possible confusion, the Secretary proposes to amend the rules by publishing the systems notice for the general exemptions under sec. 3(j) separately from those of the specific exemptions under sec. (k). The Secretary also proposes to amend the exemption rule to include three new systems identified as DOL/ETA–18: Analysis of Delayed and Never Filers for Unemployment Insurance, DOL/ETA–19: Impact of Disqualification Provisions of State Unemployment Insurance Laws, and DOL/LMSA–17: Investigatory Files—PWBP, Division of Enforcement. DOL/ETA–18 and 19 are statistical records maintained by contractors, ABT Associates, Inc., Cambridge, Mass., and Stanford Research Institute, Menlo Park, Calif., under a research study contract with the Employment and Training Administration. The purpose of the study is to collect data from state agencies and individuals for the preparation of reports under section 906 of the Social Security Act, to determine the extent of and the reasons for delayed filing or never filing for unemployment benefits, and to determine the impact of the disqualification provisions of state unemployment insurance laws. The records will be used solely for statistical purposes and no information from the system of records will be used in making determinations about identifiable individuals. Personal identifying information will be destroyed after all necessary cross references have been accomplished. The contractors will furnish the Federal agency with statistical information without personal identifiers.

DOL/LMSA–17 is comprised of investigatory files formerly associated with and published as a part of DOL/LMSA–16: Special Investigations File. These records have been segregated and are maintained in two locations under different systems managers. These records have not changed their character as investigatory files and continue to be exempted under subsections (j)(2) and (k)(2) of the Act.

This amendment is proposed under the authority of the Privacy Act of 1974, Pub. L. 93–579, 5 U.S.C. 552a.

Signed at Washington, D.C., this 28th day of July 1977.

RAY MARSHALL,
Secretary of Labor.

Section 70a.13 of Title 29 of the Code of Federal Regulations is amended as follows:

§ 70a.13 Exemptions.

(a) * * *

* * * * *

(5) The Department of Labor has published notice of intention to exempt the following record systems under the general exemption:

(i) DOL/LMSA–1: LMSE Index Cards and Case Files, Division of Enforcement.

(A) *Purpose.* The information contained in the system of records primarily relates to activities carried out under the Labor-Management Reporting and Disclosure Act of 1959 and related statutes and executive orders. Disclosure of information would substantially compromise the effectiveness of the Division's

investigations. Knowledge of such investigations would enable subjects to take action to prevent detection, conceal evidence or escape prosecution. Disclosure of information could lead to the intimidation of, or harm to, informants, witnesses and their families; and could jeopardize the well-being of investigative personnel or their families.

(B) *Exemption.* Under the authority of subsection (j)(2) of 5 U.S.C. 552a, DOL/LMSA-1 is exempted from the provisions of 5 U.S.C. 552a, except for the requirements of subsections (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i) of the Act.

(ii) DOL/LMSA-4: PWBP, Division of Enforcement and Special Investigations Staff Case Files. Criminal Law Enforcement.

(A) *Purpose.* The information contained in the system of records relates to activities under the Welfare and Pension Plan Disclosure Act, Title I of the Employee Retirement Income Security Act of 1974 and related statutes and executive orders. The reasons for the exemption are the same as those set forth in paragraph (a)(5)(i)(A) of this section which are hereby incorporated by reference.

(B) *Exemption.* Under the authority of subsection (j)(2) of 5 U.S.C. 552a, DOL/LMSA-4 is exempted from the provisions (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i) of the Act.

(iii) DOL/LFSA-16: Investigatory Files—Special Investigation Staff; Criminal Law Enforcement.

(A) *Purpose.* The information contained in the system of records relates to activities under the Welfare & Pension Plan Disclosure Act, Title I of the Employee Retirement Income Security Act of 174 and related statutes and executive orders. The reasons for the exemption are the same as those set forth in paragraph (a)(5)(i)(A) of this section which are hereby incorporated by reference.

(B) *Exemption.* Under the authority of subsection (j)(2) of 5 U.S.C. 552a, DOL/LMSA-16 is exempted from the provisions of 5 U.S.C. 552a, except for the requirements of subsections (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i) of the Act.

(iv) DOL/LMSA-17: Investigatory Files—PWBP, Division of Enforcement; Criminal Law Enforcement.

(A) *Purpose.* The information contained in the system of records relates to activities under the Welfare and Pension Plan Disclosure Act and the Employee Retirement Income Security Act of 1974. The reasons for the exemption are the same as those set forth in paragraph (a)(5)(i)(A) of the section which are hereby incorporated by reference.

(B) *Exemption.* Under the authority of subsection (j)(2) of 5 U.S.C. 552a, DOL/LMSA-17 is exempted from the provisions of 5 U.S.C. 552a, except for the requirements of subsections (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i) of the Act.

(v) DOL/OASAM-3: General Investigations File.

(A) *Purpose.* Information contained in the system of records relates to the enforcement of various criminal laws. The reasons for the exemption are the same as those set forth in paragraph (a)(5)(i)(A) of this subsection which are hereby incorporated by reference.

(B) *Exemption.* Under the authority of subsection (j)(2) of 5 U.S.C. 552a, DOL/OASAM-3 is exempted from the provisions of 5 U.S.C. 552a, except for the requirements of subsection (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i) of the Act.

(b) *Special exemptions.*

* * * * *

(2) * * *

* * * * *

(iii) * * *

(A) *Purpose.* DOL/ETA-18, Analysis of Delayed and Never Filers for Unemployment Insurance; and DOL/ETA-19, Impact of Disqualification Provisions of State Unemployment Insurance Laws. These systems of records contain personal information furnished by individuals and state unemployment compensation agencies for the purpose of a study required by section 906 of the Social Security Act. The records are maintained by the contractors only until all pertinent cross-references have been completed. Data will be transmitted to the Employment and Training Administration in statistical form only without personal identifiers. The agency will not use the data to make any determinations about individuals. Imposing the procedural requirements of the Privacy Act for access to the records will only impede the progress of the study and will be of no benefit to the individuals involved.

(B) *Exemption.* Under the authority of subsection (k)(4), DOL/ETA-18 and DOL/ETA-10 are exempted from the provisions of subsections (e)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f) of the Act.

* * * * *

(d) * * *

* * * * *

(2) OASAM-3, General Investigation File, is exempt under subsections (k)(2), (3), and (5) as material relating to civil law enforcement investigations, including shared information, files maintained in connection with assisting the U.S. Secret Service to provide protective services to government officials, and investigative material compiled to determine the suitability, eligibility and qualifications of DOL contractors. In the first two instances, the material is exempted from the requirements of paragraphs (c)(3), (d), (e)(4) (G), (H), and (I), and (f) of the Act. Contract investigations are exempt from the provisions of (c)(3), (d), and (f). Civil Law enforcement material is exempted until such time as a determination is made based upon the information except that information which would reveal the identity of a confidential source will continue to be exempted. Contract information is exempt to the extent that disclosure would reveal the identity of a source when an express pledge of confidentiality has been given or the circumstances indicate that confidentiality has been implied. These exemptions are necessary to preserve the integrity of the investigations and to prevent the intimidation or harassment of informants, witnesses or their families.

(3) LMSA-1, Index Cards, Division of Enforcement, relates to investigations under the Labor-Management Reporting and Disclosure Act and E.O. 11441. In accordance with subsection (k)(2) of the Act, this system is exempted from the requirements of subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f). Disclosure of information related to civil law enforcement would enable the subject of the investigation to take action to prevent detection of illegal activities and could lead to the harassment or intimidation of witnesses, informants, or their families or could do harm to the well-being of investigative personnel or their families.

(4) DOL/LMSA-4: PWBP-Division of Enforcement and Special Investigations Staff Case Files, relates to the card index and case files of the Special Investigations Staff of the Division of Enforcement of Pension and Welfare Benefits Programs. In accordance with subsection (k)(2) of the Act, this system is exempted from the requirements of subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f). Disclosure of information contained in the civil investigative file would enable subjects of the investigations to take action to prevent detection of illegal activities, conceal evidence or otherwise escape detection or avoid the consequences of violation of the law. Disclosure of information could lead to the harassment or intimidation of witnesses, informants or their families or could do harm to the well-being of investigative personnel or their families.

(5) DOL/LMSA-16: Investigatory Files—Special Investigations Staff, relates to criminal and civil law enforcement investigations under the Welfare & Pension Plans Disclosure Act, E.O. 11441, and title I of the Employee Retirement Income Security Act of 1974. In accordance with the provisions of subsection (k)(2) of the Act, this system is exempted from the requirements of subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f). Disclosure of information contained in the files could jeopardize the effectiveness of the investigation and enable the subject of the investigation to take action to prevent detection or otherwise avoid the consequences of violation of the law. Further, disclosure could lead to the intimidation or harassment of witnesses, informants, or their families or could do harm to investigative personnel or their families.

(6) DOL/LMSA-17: Investigatory Files—PWBP, Division of Enforcement, relates to criminal and civil law enforcement investigations under the Welfare and Pension Plans Disclosure Act, E.O. 11441, and title I of the Employee Retirement Income Security Act of 1974. In accordance with the provisions of subsection (k)(2) of the Act, this system is exempted from the requirements of subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f). Discosure of information contained in the files could jeopardize the effectiveness of the investigation and enable the subject of the investigation to take action to prevent detection or otherwise avoid the consequences of violation of the law. Further, disclosure could lead to the intimidation or harassment of witnesses, informants, or their families or could do harm to investigative personnel or their families.

DEPARTMENT OF DEFENSE

Department of the Air Force

[32 CFR Part 865]

PERSONNEL REVIEW BOARDS

Subpart A—Air Force Board for Correction of Military Records

AGENCY: Department of the Air Force, DOD.

ACTION: Proposed rule.

SUMMARY: The Department of the Air Force is considering amendment to the rule covering the Air Force Board for Correction of Military Records. A review by the Board of its procedures revealed an apparent need for elaboration in certain paragraphs of this rule. The amendments are intended to result in clearer understanding by persons desiring correction of their military records.

DATES: Comments must be received by September 12, 1977.

ADDRESSES: Comments should be submitted to: Frank S. Dispenza, Deputy Executive Secretary, Air Force Board for the Correction of Military Records, Office of the Assistant Secretary of the Air Force, Washington, D.C. 20330.

FOR FURTHER INFORMATION CONTACT:

Mr. Frank S. Dispenza, Deputy Executive Secretary, Air Force Board for the Correction of Military Records, Office of the Assistant Secretary of the Air Force, Washington, D.C. 20330 (202-697-2391).

SUPPLEMENTARY INFORMATION:

On March 29, 1977, the Department of the Air Force, DOD, published a final rule (42 FR 16623) to revise 32 CFR 865, Subpart A, Air Force Board for Correction of Military Records. Since that time, further review by the Board of its procedures has revealed an apparent need for clarification by addition of further information to the sections on Actions by the Secretary of the Air Force, Release of Records of Proceedings to the Applicant, counsel, and the public. Interested persons are invited to participate in this proposed rulemaking by submitting written views, data or arguments.

These proposed amendments are issued under the authority of Sections 1552, 8012, 70A Stat. 116, 488; 10 USC 1552, 8012.

The amendments are proposed to read as follows:

§ 865.7 [Amended]

1. In Section 865.7, a new subparagraph (d) is added to read as follows:

§ 865.7 Review of application.

* * * * *

(d) *Written proceedings.* When the Board determines that the record should be corrected or that the application be denied, the determination of the Board will be made in writing. The writings (proceedings) will include, but not be limited to, all facts of record, and statement of ground(s) upon which the Board's determination is based. Where the Board concludes complete relief should not be granted, written proceedings will address applicant's claim(s) of constitutional, statutory, and/or regulatory violation rejected by the Board and/or reviewing authority. In those cases involving the characterization of an individual's discharge or dismissal from the military service, the factors required by Air Force regulations to be considered for determination of the character of and reason for the discharge or dismissal in question shall be included.

2. Section 865.13 is revised to read as follows:

§ 865.13 Action by the Secretary of the Air Force.

All records of proceedings, except those finalized by the Board under the authority contained in § 865.12(a)(5) or denied by the Board without a hearing, will be forwarded to the Secretary of the Air Force who will direct such action in each case as he determines to be appropriate, which may include the return of the record to the Board for further consideration when deemed necessary. Those cases returned for further consideration will be accompanied by a brief statement setting out the reasons for such action and any specific instructions. If the Secretary's decision is to deny relief, such decision shall be in writing and, unless he expressly adopts in whole or in part the findings, conclusions and recommendations of the Board, he shall include a brief statement of the ground(s) for denial. All Secretarial decisional documents shall be furnished to the applicant and counsel.

3. Section 865.14 is amended by revising subparagraphs (f) and (g) to read as follows:

§ 865.14 Staff action.

* * * * *

(f) *Release of record of proceedings to the applicant and counsel.* After action on the record by the Secretary of the Air Force, his designee, by the Board acting under the authority in § 865.12(a)(5), or when the Board denies an application without a hearing, the Board will furnish applicant and counsel a copy of the record of proceedings and all decisional documents. Privileged or classified material may be deleted only if a written statement of the bases for deletion is provided. The statement will not reveal the nature of the withheld material.

(g) *Release of record of proceedings to the public.* After action on the record by the Secretary of the Air Force, his designee, by the Board acting under the authority contained in § 865.12(a)(5), or when the Board denies an application without a hearing, the Board will release for public inspection and copying, at a designated reading room within the Washington, D. C. Metropolitan Area, a sanitized and indexed copy of the record of proceedings and all decisional documents. To the extent required and to prevent a clearly unwarranted invasion of personal privacy, identifying details of applicant and other persons will be deleted from all documents. Privileged or clasified material may be deleted only if a written statement of the bases for deletion is provided. The statement will not reveal the nature of the withheld material. An index of record of proceedings shall be formulated so as to enable those who represent applicants to isolate from all those decisions that are indexed those cases that may be similar to an applicant's case and which indicate the grounds for which the Board and/or the Secretary granted or denied relief. The index will be published quarterly and available for public inspection and sale at the reading room. Inquiries concerning the index or reading room should be addressed to Air Force Board for Correction of Military Records, Department of the Air Force, Washington, D.C. 20330.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison, Directorate of Administration.

[CGD 76-088b]

TANK VESSELS CARRYING OIL IN BULK

Miscellaneous Rules Providing for Protection of Marine Environment

AGENCY: Coast Guard, DOT.

ACTION: Extension of comment period for proposed rules.

SUMMARY: On June 27, 1977, the Coast Guard published proposed requirements in the FEDERAL REGISTER (42 FR 32684) concerning installation and use of approved cargo monitors on board tank vessels carrying oil in bulk. This notice extends the comment period to September 2, 1977. The original closing date was August 11, 1977. Two requests have been

received to extend the comment period in order to allow additional time for a thorough review of the proposal.

DATES: As explained above, comments must be received on or before September 2, 1977.

ADDRESSES: As explained in the notice of proposed rulemaking published on June 27, 1977, comments should be submitted to the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

DRAFTING INFORMATION

The principal persons involved in drafting this notice are: Lowell F. Martin, Project Manager, Office of Merchant Marine Safety, and William R. Register, Project Attorney, Office of the Chief Counsel.

OIL POLLUTION PREVENTION EQUIPMENT

Approval Requirements; Extension of Comment Period

AGENCY: Coast Guard, DOT.

ACTION: Extension of comment period for proposed rules.

SUMMARY: In the FEDERAL REGISTER of June 27, 1977 (42 FR 32686) the Coast Guard proposed amendments that would add approval procedures and specifications for oil-water separators, cargo monitors, bilge monitors, and bilge alarms to the existing approval requirements for engineering equipment used on merchant vessels. This notice extends the comment period to September 2, 1977. The original closing date was August 11, 1977. Two requests have been received to extend the comment period in order to allow additional time for a thorough review of the proposal.

DATES: As explained above, comments must be received on or before September 2, 1977.

ADDRESSES: As explained in the notice of proposed rulemaking published on June 27, 1977, comments should be submitted to the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[43 CFR Part 1880]

PUBLIC ADMINISTRATIVE PROCEDURES; FINANCIAL ASSISTANCE, LOCAL GOVERNMENTS

Payments in Lieu of Taxes

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: Rulemaking is proposed to implement the Act of October 20, 1976 (31 U.S.C. 1601). The Act provides for Payments in Lieu of Taxes to units of local government to ameliorate the fiscal burden of tax exempt Federal land within their boundaries. This proposed rulemaking defines the unit of local government entitled to receive payments in lieu of taxes, and sets forth procedures to establish the amount of payments.

DATES: Comment by September 7, 1977.

ADDRESS: Send comments to the Director (210), Bureau of Land Management, 1800 C St. NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Edward P. Greenberg, 202-343-3624

SUPPLEMENTARY INFORMATION: The principal author of this document is Billy R. Templeton of the Bureau of Land Management, Division of Legislation and Regulatory Management, assisted by Lyle Rising of the Office of Solicitor, Department of the Interior.

The Act of October 20, 1976 (31 U.S.C. 1601 et seq.) provides for payments in lieu of lieu of taxes to qualified units of local government to offset the tax burden of certain tax exempt Federal lands within their boundaries.

Section 6(c) of the Act, authorizes the Secretary of the Interior to determine which units of local government are units of general government which are eligible for payments authorized by Section 1 of the Act. Section 6(c) further provides that this determination is to be made on the same principles as are used by the Bureau of the Census for general statistical purposes.

A unit of general government is a unit of that type of government which, within its state, is the principal provider of governmental services affecting the use of entitlement lands. Generally, units of local government will be eligible for payment to the extent that they have been identified by the Bureau of the Census or county-type areas. Listed below is a preliminary list of units of local government eligible for payment under Section 1 of the Act to the extent that such units of government contain entitlement lands within their boundaries.

Alabama	Counties.
Alaska	Boroughs, and the cities of Juneau and Sitka (City/Boroughs).
Arizona	Counties.
Arkansas	Counties.
California	Counties, and the city of San Francisco (City/County).
Colorado	Counties, and the city of Denver (City/County).
Connecticut	Towns.[1]
Delaware	Counties.
District of Columbia.	City of Washington.
Florida	Counties, and the County of Duval (City of Jacksonville).
Georgia	Counties, and the independent city of Columbus.
Guam	Counties, and the city of Honolulu (City/County).
Hawaii	Counties.
Idaho	Counties.
Illinois	Counties, and the County of Marion (City of Indianapolis).
Indiana	Counties.
Iowa	Counties.
Kansas	Counties.
Kentucky	Counties.
Louisiana	Parishes, and the Parish of Orleans (City of New Orleans) and Parish of East Baton Rouge (City of Baton Rouge).
Maine	Towns.[1]
Maryland	Counties, and the independent city of Baltimore.
Massachusetts	Towns[1] and County of Nantucket (Township of Nantucket), and County of Suffolk (City of Boston).
Michigan	Counties.
Minnesota	Counties.
Mississippi	Counties.
Missouri	Counties, and the independent city of St. Louis.
Montana	Counties.
Nebraska	Counties.
Nevada	Counties, and the independent city of Carson City.
New Hampshire.	Towns.[1]
New Jersey	Counties.
New Mexico	Counties.
New York	Counties (counties of Bronx, Kings, New York, Queens, and Richmond are all New York City).
North Carolina.	Counties.
North Dakota	Counties.
Ohio	Counties.
Oklahoma	Counties.
Oregon	Counties.
Pennsylvania	Counties, and the County of Philadelphia (City of Philadelphia).
Puerto Rico	Municipios.
Rhode Island	Towns.[1]
South Carolina.	Counties.
South Dakota	Counties, except Shannon, Todd, and Washabough, which are attached to other counties for government purposes.
Tennessee	Counties, and the metropolitan government of Nashville and Davidson county.
Texas	Counties.
Utah	Counties.
Vermont	Towns.[1]
Virginia	Counties, and the 38 independent cities.
Virgin Islands	Virgin Islands.
Washington	Counties.
West Virginia	Counties.
Wisconsin	Counties.
Wyoming	Counties.

[1] Where organized town governments exist. If towns are unincorporated or the town governments are inactive, payments shall be made to counties.

State governments have been asked to help implement the Act by providing information needed to compute payments this year. These requests were made because, without adequate information to make all payments, equitable payments could not be made to any of the qualified units of local government.

Payments will not be made for exchanged lands or for lands which, at the time they were acquired from the states were receiving payments in lieu of taxes from the states but were not subject to the payment of real estate taxes.

State, local, and Federal agencies will be consulted as appropriate in resolving any conflicts arising from computation of payments and establishment of eligibility for payments.

The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis under Executive Order 11821 and OMB Circular A-107.

It is hereby determined that publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (43 U.S.C. 4332(2)(C)) is required.

Under the authority of the Act of October 20, 1976 (31 U.S.C. 1601 et seq.), it is proposed to amend Group 1800, Subchapter A, Chapter II, Title 43 of the Code of Federal Regulations by adding Part 1880 to read as follows:

Group 1800—Public Administrative Procedures

PART 1880—FINANCIAL ASSISTANCE, LOCAL GOVERNMENTS

Subpart 1881—Payments in Lieu of Taxes

Sec.
1881.0-1 Purpose.
1881.0-3 Authority
1881.0-5 Definitions.
1881.1 Procedures.
1881.1-1 Procedures, Section 1 payments.
1881.1-2 Procedures, Section 3 payments.
1881.1-3 Procedures, Absence of information.
1881.2 Use of payments.
1881.3 Protests.
1881.4 Appeals.

§ 1881.0-1 Purpose.

The regulations establish procedures for making payments in lieu of taxes to units of local government for certain federal lands within their boundaries.

§ 1881.0-3 Authority.

The authority for these regulations is the Act of October 20, 1976, Pub. L. 94-565, 90 Stat. 2662, 31 U.S.C. §§ 1601-1607, hereinafter referred to as "the Act."

§ 1881.0-5 Definitions.

(a) A "government," as that term is used by the Bureau of the Census for general statistical purposes, is an organized entity having substantial autonomy and whose officers are either popularly elected or appointed by publicly elected officials. Other indicia of governmental character include (1) a high degree of responsibility to the public for performance of duties of a governmental nature, (2) power to levy taxes, and (3) power to issue debt paying interest exempt from Federal taxation.

(b)(1) "Unit of general government" means a unit of that type of government which, within its state, is the principal provider of governmental services affecting the use of entitlement lands. Those services of government include (but are not limited to) maintenance of land records, police protection, fire protection, taxation, land use planning, search and rescue and road construction. Ordinarily, a unit of general government will be a county. However, where a smaller unit of government is the principal provider of governmental services affecting the use of public lands within a state, the smaller unit, even though within a larger unit of government, will be considered a general unit of government and will receive payments under the Act. These units of general government will ordinarily be "towns" or townships within states having nonexistent or nearly nonexistent county governments. The term "unit of general government" also includes:

(i) Governments with the functions of a unit of general government in that state combined with another type of government such as city, township, parish, borough or county, e.g., a city and county as in the City and County of Denver.

(ii) Cities located outside of any of the units of general government for that state and administering functions commonly performed by those units of general government.

(iii) Alaskan boroughs in existence on October 20, 1976.

(iv) The Governments of the District of Columbia, Puerto Rico, Guam and the Virgin Islands.

(b)(2) The term "unit of general government" excludes single purpose or special purpose units of local government such as school districts or water districts.

(c)(1) "Entitlement lands" are lands owned by the United States which are:

(i) Within the National Park System including wilderness areas;

(ii) Within the National Forest System including wilderness areas and also including those areas of Superior National Forest, Minnesota, set forth in 16 U.S.C. §§ 577d and 577d-1 (1970);

(iii) Administered by the Secretary of the Interior through the Bureau of Land Management;

(iv) Water resource projects administered by the Bureau of Reclamation or Corps of Engineers; or

(v) Dredge disposal areas administered by the Corps of Engineers.

(2) "Entitlement lands" do not include:

(i) Lands which were owned or administered by State and local governments which at time of acquisition by the Federal government were not subject to State and local taxes.

(ii) Any land for which any money was paid to a unit of local government pursuant to the Act of August 28, 1937 (50 Stat. 875) or the Act of May 24, 1939 (53 Stat. 753) in that fiscal year.

(d) "Money transfers" means those money or cash payments made by or through the State government to entitled units of local government pursuant to the laws set forth in section 4 of the Act.

(e) "Authorized officer" means that official within the Bureau of Land Management delegated the authority to carry out the provisions of the Act.

§ 1881.1 Procedures.

§ 1881.1 Procedures, Section 1 payments.

(a) The authorized officer shall determine which governments are units of general government eligible to receive payments under section 1 of the Act in accordance with section 6(c) of the Act and the definitions in § 1881.0-5 of these regulations. In resolving questions about the eligibility of any unit of general government and the status of entitlement lands, the authorized officer may consult with the Bureau of the Census, officials of the appropriate State and local government, and officials of the agency administering the entitlement lands.

(b) In order to determine which units of local government are entitled to receive payments under the Act (the minimum payment is $100), the authorized officer shall obtain the data necessary for making computations pursuant to the formula in section 2 of the Act as follows:

(1) The amount of entitlement lands within the boundaries of each unit of local government and the amount of payments made directly to those governments pursuant to the laws listed in section 4 of the Act shall be obtained from the administering Federal agencies;

(2) The amount of money transfers made by the State to eligible units of local government pursuant to the laws listed in section 4 of the Act shall be obtained from the Governor or his designated officials;

(3) The population of each unit of local government shall be obtained from current Bureau of the Census statistics.

(c) The authorized officer shall compute and certify the amount of payment to be made each unit of local government based on (1) the formula and limitations set forth in section 2 of the Act and (2) the amount of actual appropriations.

(d) If money actually appropriated by Congress for distribution during any fiscal year is insufficient to provide full payment to each unit of local government, all payments made to eligible recipients in that fiscal year shall be reduced proportionally, to the extent determined necessary by the authorized officer.

(e) No computation will be certified by the authorized officer for payment until the Governor of the State in which the unit of local government is located or his delegate has provided the authorized officer with:

(1) a statement of the amount of all money transfers received during the previous fiscal year[2] by each entitled unit of local government from the State from revenues derived under those laws listed in Section 4 of the Act; and

(2) to the extent practicable, a determination that those lands formerly owned or administered by a State or local government and acquired by the Federal Government were subject to State and local real property taxes at the time of conveyance to the Federal Government.

§ 1881.1–2 Procedures, Section 3 payments.

(a) The authorized officer shall make payments to qualified units of local government under section 3 of the Act, provided that the administering agencies supply information as follows:

(1) Acreage of entitlement land within the boundaries of each qualified unit of local government; and

(2) Such other information as may be required to certify payments to qualified units of local government.

(b) Payments received by counties shall be distributed by those counties to affected units of local government and affected school districts, as defined in section 3 of the Act, within 30 days of the receipt of such payment. Distribution shall be in proportion to the tax revenues collected by the affected units of local government and school districts in the year prior to acquisition of the entitlement lands by the Federal Government.

§ 1881.1–3 Procedures, Absence of information.

The authorized officer shall certify payments under the Act only to the extent sufficient data is available to determine the amount due the qualified units of local government.

[2] For Fiscal Year 1977, the transition quarter, July 1, 1976 to September 30, 1976, shall be excluded.

§ 1881.2 Use of Payments.

The monies paid to entitled units of local government may be used for any governmental purpose.

§ 1881.3 Protests.

(a) Computation of payments shall be based upon Federal land records.

(b) Any affected unit of local government may protest the results of the computations of its payment to the authorized officer.

(c) Any protesting unit of local government shall submit sufficient evidence to show error in the computations or the data on which the computations are based.

(d) All protests to the authorized officer shall be filed by the first business day of the calendar year following the end of the fiscal year for which the payments were made.

(e) The authorized officer shall consult with the affected unit of local government and the administering agency to resolve conflicts in land records.

§ 1881.4 Appeals.

Any affected unit of local government whose protest has been rejected by the authorized officer may appeal to the Interior Board of Land Appeals pursuant to the provisions of 43 CFR, Part 4.

GARY J. WICKS,
Secretary of the Interior.

AUGUST 3, 1977.

[Docket No. 21005]

INTERFACE OF THE INTERNATIONAL TELEX SERVICE WITH DOMESTIC TELEX AND TWX SERVICES

Order Extending Time for Filing Comments and for Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: This order extends, at the request of RCA Global Communications, Inc., the time for filing responsive comments in Docket No. 21005.

DATES: Responsive Comments must be received on or before August 8, 1977, and Replies on or before August 22, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

John F. Copes, International Programs Staff, Common Carrier Bureau (202–632–3214).

Order. In the matter of Interface of the International Telex Service with the Domestic Telex and TWX Services, Docket No. 21005.[1]

Adopted: August 1, 1977.

Released: August 3, 1977.

1. We have before us for consideration a request filed by RCA Global Communications, Inc. (RCA) on July 21, 1977 seeking extension of the time in which to file responsive comments in the above-referenced proceeding from August 1 until September 15, 1977. In support of its request, RCA cites the press of regulatory matters—in particular, Docket No. 18875 and 20778—and the absence of key personnel due to the vacation period. RCA asserts that the requested extension is needed to permit it to provide the Commission with more meaningful data on the issues under consideration in this proceeding.

2. We find that RCA has not shown good cause for an extension of six weeks. By Order adopted June 10, 1977, we have already granted one extension of six weeks for the filing of responsive comments in this proceeding. Noting that we were there granting the fifth extension of time, we stated that any further extension should be granted only on a showing of specific hardship. We find that RCA has not demonstrated such hardship. RCA does not cite any specific scheduling conflicts within the proceedings it cites but only the general allegation that it will be required to prepare for the proceedings. Indeed, in Docket No. 20778, we recently extended the date for filing cost studies until November 15, 1977. Therefore, the August 1 date cannot be said to conflict any more with that deadline than does the September 15 date RCA seeks. Further, with respect to Docket No. 18875, RCA notes a tight schedule extending until November 1, 1977. Again, the August 1 date conflicts no more than would the date sought.

3. However, we do recognize the need for some additional time because of conflicts caused by the recent Congressional hearings and the disruption occasioned by the power blackout in New York City. Therefore, although we do not find that RCA has justified a six-week extension, we do find that an extension of one week is warranted.

4. Accordingly, pursuant to § 0.303(c) of the Commission's Rules and Regulations, 47 CFR 303(c) (1977), *It is ordered*, That the above-referenced Motion for Extension of Time of RCA Global Communications, Inc. is granted to the extent that the date for filing responsive comments in this proceeding is extended until August 8, 1977, and that the date for filing replies is extended until August 22, 1977; and that the RCA Motion is otherwise denied in all respects.

FEDERAL COMMUNICATIONS COMMISSION,
PHILIP V. PERMUT,
Acting Deputy Chief, Common Carrier Bureau.

[Docket No. 20418; RM-2346; RM-2727]

ADDING NEW VHF STATIONS IN THE TOP 100 MARKETS

Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: Action taken herein extends by about 5 weeks the time for filing comments and reply comments to a Notice of Proposed Rule Making in Docket 20418 (VHF Drop-Ins) at the request of Holston Valley Broadcasting Corporation, licensee of UHF Television Station WKPT–TV, Channel 19, Kingsport, Tennessee. WKPT–TV was granted the extension to obtain assistance from an expert on television audience ratings.

DATES: Comments are due on or before October 1, 1977, and reply comments on or before November 1, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau (202–632–7792).

SUPPLEMENTARY INFORMATION:

Adopted: July 25, 1977.

Released: August 4, 1977.

In the matter of petition for rulemaking to amend television table of assignments to add new VHF stations in the top 100 markets and to assure that the new stations maximize diversity of ownership, control and programming.

1. Holston Valley Broadcasting Corporation, licensee of UHF Television Station WKPT–TV, Channel 19, Kingsport, Tennessee ("WKPT"), requests a three month extension of time for filing comments in this proceeding from August 22, 1977, to November 22, 1977, and for filing reply comments from September 22, 1977, to December 22, 1977. Alternatively, WKPT asks for an extension of time to October 1, 1977, for comments, and November 1, 1977, for reply comments. The request is opposed by the Group for the Advancement of Television Service ("GATS"), proponent of the Johnstown drop-in proposal, and partially opposed by South Central Broadcasting Corporation ("South Central"), licensee of Television Station WTVK, Knoxville, Tennessee.

2. WKPT states as reasons for granting the extension the length of the Memorandum Opinion and Order and Notice of Proposed Rulemaking in this proceeding and its attendant documents and studies included in the record. WKPT further notes that the study entitled "Impact on WKPT–TV (Channel 19, ABC) by the Knoxville Channel 8 Drop-In" was not added to the docket until May 13, 1977, when called to the Commission's attention by WKPT. Furthermore, WKPT argues that the due date for comments falls within a traditional summer vacation period for both members of the Commission and parties interested in this proceeding.

3. We are unconvinced that these reasons are cause for extending the filing deadlines. The deadlines have been extended once already based upon the unexpected delay in making certain studies and documents, including the one mentioned by WKPT, available to the parties. As GATS states in its opposition, all of the above factors were already considered in establishing the present filing dates.

4. However, WKPT asserts one more ground for extension which we find merits consideration. WKPT has employed Dr. C. A. Kellner of Marshall University to assist it in preparing comments in response to reliance upon ARB television audience survey data in the Commission's Notice. Dr. Kellner was formerly employed by ARB, and WKPT considers him to be an expert regarding television audience reporting data and related matters. WKPT states that Dr. Kellner's educational background and professional experience would be of importance to the Commission in properly evaluating the impact upon WKPT–TV from the proposed Channel 8 drop-in at Knoxville. Unfortunately, we are told, Dr. Kellner has just undergone surgery and is now convalescing, but hopes to be able to complete his work on the project. For this reason, WKPT asks that we grant it an extension of time for comments.

5. GATS opposes an extension of comment dates because it believes the public and parties to the proceeding should receive a prompt disposition of other drop-in proposals. It says that WKPT should attempt to find a qualified expert to replace Dr. Kellner, or that separate comment dates should be established for the Knoxville drop-in only so as not to delay other proposals. South Central objects to a three month extension but states that an extension to October 1, would be equitable to all concerned.

6. We find insufficient reason to extend the comment deadline for three months, but we think a shorter extension would allow all parties time to perfect their comments and would not unduly delay the proceeding as GATS fears. We shall not establish a separate deadline for Knoxville as proposed by GATS, because we think it would be administratively more efficient to receive comments on all drop-ins at the same time. The Commission has stated that opportunity will be given for comment on the Johnstown/Altoona drop-in proposals after the ITS terrain study of that area is completed, but progress on that study indicates that it should be completed in time for comment within the extended dates of the general proceeding.

7. We conclude that it would be in the public interest to receive the information WKPT seeks from Dr. Kellner regarding the audience impact a Knoxville drop-in would have on this neighboring UHF station. UHF impact is a difficult area for precise prediction, and the advice of experts outside the Commission could be of great value. The statements attached to the Notice by the Commissioners indicate that a full record is desired for consideration at the time of final decision in this rule making proceeding. Therefore, we shall grant a two month extension, but deny the request for a three month extension for filing comments and reply comments in this proceeding.

8. Accordingly, *it is ordered*, That the subject request is granted to the extent that the time for filing comments to the Notice of Proposed Rulemaking in Docket 20418 IS EXTENDED to October 1, 1977, and the time for filing reply comments IS EXTENDED to November 1, 1977.

9. *It is further ordered*, That the subject request is denied in all other respects.

10. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

[49 CFR Parts 173, 174, 178, 179]

[Docket No. HM-139 Notice No. 77-7]

INDIVIDUAL EXEMPTIONS, CONVERSION TO REGULATION OF GENERAL APPLICABILITY

Transportation of Hazardous Materials

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Materials Transportation Bureau is considering amending the regulations governing the transportation of hazardous materials in incorporate a number of changes based on existing exemptions which have been granted to individual applicants allowing them to perform particular functions in a manner that varies from that specified by the regulations. Adoption of these exemptions as rules of general applicability would provide wider access to the benefits of transportation innovations recognized as effective and safe.

DATES: Comments by September 6, 1977.

ADDRESS COMMENTS TO: Section of Dockets, Office of Hazardous Materials Operations, Materials Transportation Bureau, Department of Transportation, Washington, D.C. 20590. It is requested that five copies be submitted.

FOR FURTHER INFORMATION CONTACT:

Dr. C. Hugh Thompson, Chief Regulations Division, Office of Hazardous Materials Operations, 2100 Second Street SW., Washington, D.C. 20590 (202–426–2075).

SUPPLEMENTARY INFORMATION: Each of the proposed amendments described in the table below is founded upon either: (1) Actual shipping experience gained under an exemption, or (2) the data and analysis supplied in the application. In each case the resulting level of safety being afforded the public is considered at least equal to the level of safety provided by the current regulations. Primary drafters of this proposal are Darrell L. Raines, and John C. Allen, Office of Hazardous Materials Operations, and George W. Tenley, Jr., Office of the Assistant General Counsel for Materials Transportation Law.

These proposals would not significantly affect the costs of regulatory enforcement, nor would additional costs be imposed on the private sector, consumers, or Federal, State or local governments, since these proposals would merely authorize the general use of shipping alternatives previously available to only a few users under exemptions. The safety record of shipments under the identified exemptions demonstrates that significant environmental impacts would not result from the proposals.

Adoption of an amendment derived from an existing exemption would obviate the need for that exemption and effectively terminate it. Upon such termination, the holder of the exemption and parties thereto would be individually notified. Adoption of an amendment derived from an application for exemption should provide the relief sought, in which event the exemption request would be denied and the applicant so notified. In the event the Bureau decides not to adopt anv of these proposals each pertinent application would be evaluated and acted upon in accordance with the applicable provisions of the exemption procedures in 49 CFR Part 107, Subpart B. Consequently, persons commenting on proposed amendments may wish to address both the proposed amendment and the exemption application. Consideration of comments of the merits of including within an amendment modes of transportation other than those for which the exemption application requested is anticipated. Each mode of transportation for which a particular exemption is authorized or requested is indicated in the "Nature of Exemption or Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. The status of the exemption action is indicated in the column titled Identification Number where prefix "E" means an exemption has been issued and prefix "SP" means a special permit exists under previous authorities. The suffix "No" means no applications for exemptions are pending, but the Bureau is taking action by this proposal; the suffix "X" means a renewal application is pending; the suffix "P" means one or more party status applications are pending; and the suffix "N" means a new application for exemption is pending.

Proposed amendments of hazardous materials regulations to terminate special permits and exemptions

Application No.	Applicant or holder	Regulation affected	Nature of exemption or application	Nature of proposed amendment
E 4041–No	U.S. Department of Defense; United Technologies; Hercules Inc.	173.65(a)	Authorizes shipments of ammonium perchlorate, particle size of 5 to 15 μm as high explosives in DOT specification 17H or 37A steel drums each having a minimum of 0.003 in thick polyethlene liner. Maximum capacity 30 gal. (Modes 1 and 2)	To revise paragraph (a)(3) to read: (3) Specification 17H or 37A (secs. 178.118 and 178.131 of this subchapter). Metal drums (single-trip). Authorized only for ammonium perchlorate in the 5 to 15 μm range. Maximum capacity 30 gal.
E 5208–No	U.S. Department of Defense.	172.101, 173.54 (b), 173.89 (a), (b).	Authorizes shipments of ammunition for cannon with tear gas projectiles, class A and ammunition for cannon with tear gas projectiles, class B in accordance with 49 CFR 173.54(a). (Modes 1 and 2).	To amend sec. 172.101 to add ammunition for cannon with tear gas projectiles, class A and ammunition for cannon with tear gas projectiles, class B to read as in footnote below.[1] To revise sec. 173.54 to read: sec. 173.54 Ammunition for cannon. (a) Ammunition for cannon. (a) Ammunition for cannon with explosive projectiles, gas projectiles, smoke projectiles, incendiary projectiles, illuminating projectiles, or shell must be packed and properly secured in strong wooden or metal containers, or in plastic containers of approved military specifications complying with sec. 173.7(a). (b) Each outside package must be plainly marked "AMMUNITION FOR CANNON WITH EXPLOSIVE PROJECTILES," "AMMUNITION FOR CANNON WITH SMOKE PROJECTILES," "AMMUNITION FOR CANNON WITH INCENDIARY PROJECTILES," "AMMUNITION FOR CANNON WITH ILLUMINATING PROJECTILES," OR "AMMUNITION FOR CANNON WITH TEAR GAS PROJECTILES," as appropriate. To revise sec. 173.89 to read: Sec. 173.89 Ammunition for cannon with empty projectiles, inert-loaded projectiles, solid projectiles, tear gas projectiles, or without projectiles or shell. (a) Ammunition for cannon with empty projectiles, inert-loaded projectiles, solid projectiles, tear gas projectiles, or without projectiles or shell, must be well packed and properly secured in strong wooden or metal containers. (b) Each outside package must be plainly marked "AMMUNITION FOR CANNON WITH EMPTY PROJECTILES," "AMMUNITION FOR CANNON WITH INERT-LOADED PROJECTILES," "AMMUNITION FOR CANNON WITH SOLID PROJECTILES," "AMMUNITION FOR CANNON WITHOUT PROJECTILES," OR "AMMUNITION FOR CANNON WITH TEAR GAS PROJECTILES" as appropriate.
E 5573–No	Austin Powder Co.	173.182(c)(4)	Authorizes shipment of nitro carbo nitrate in DOT 23G specification cylindrical fiberboard boxes as prescribed by sec. 173.182(c)(4) except maximum net weight is 65 lb instead of 50 lb. (Modes 1 and 2.)	To revise paragraph (c)(4) to read: (4) Specification 23G (sec. 178.218 o this subchapter). Cylindrical fiberboard box. Maximum net weight not over 65 lb.
E 6145–No	Kerr-McGee Chemical Corp.; Union Carbide Corp.	173.154(a)	Authorizes shipments of sodium perchlorate or magnesium perchlorate, wet with 10 pct or more of water, equally distributed within the cargo tank in DOT specification MC 303, MC 304, MC 306, MC 311, or MC 312 cargo tank with additional requirements. (Mode 1.)	To add paragraph (a)(4) to read: (4) Specification MC 303, MC 304, MC 306, MC 311, or MC 312 (secs. 178.341, 178.342, and 178.343 of this subchapter). Tank motor vehicles. Tanks must comply with sec. 178.340-8. Discharge valves must be located inside the tank or at a point outside the tank where the line enters or leaves the tank. Valve seat must be located inside the tank or within the welded flange, its companion flange, nozzle, or coupling. Each product discharge opening shall have a secondary closing means, remote from tank filling or discharge openings, for operation in event of fire or other accident. Tanks may have heating coils if an inorganic heating medium is used. Authorized only for sodium perchlorate or magnesium perchlorate, wet, with 10 pct or more or water, equally distributed within the cargo tank.

Application No.	Applicant or holder	Regulation affected	Nature of exemption or application	Nature of proposed amendemtn
E 6628–No	E. I. du Pont de Nemours & Co., Inc.	173.2 (i)(22)	Authorizes shipments of sulfuric acid in DOT specification 111A100W6 tank cars constructed of type 304–L stainless steel. NOTE.—This change is to prohibit the use of a car having bottom outlets and was inadvertently omitted in Docket No. HM–139 dated June 2, 1977. (Mode 2.)	To add a sentence at the end of par. (i)(22) to read: Bottom outlets prohibited.
E 6662–No	Hercules Inc., Pennwalt Corp.	173.154(a)	Authorizes shipment of dicumyl peroxide and an organic peroxide, solid, n.o.s. in DOT specification 57 metal portable tanks. Tanks must have a fusible plug having a fusing temperature between 70° C. and 90° C. and 90° C. (Modes 1 and 2.)	To add par. (a)(3) to read (3) Specification 57 (sec. 178.253 of this subchapter). Portable tanks. Tanks must have a fusible plug having a fusing temperature between 70° C. and 90° C. Authorized only for dicumyl peroxide, dry and a,a'-bis(t-butylperoxy) diisopropylbenzene, solid.
E 6682–No	Foote Mineral Co.	173.308(a)	Authorizes shipment of lithium metal foil wound on nonsparking spools, packed in hermetically sealed, tin-coated steel cans, and overpacked in DOT specification 21C fiber drums. (Modes 1 and 2.)	To add par. (a)(3) to read: (3) Specification 21C (sec. 178.224 of this subchapter). Fiber drums with inside hermetically sealed tin-coated steel cans with a miminum wall thickness of 0.015 in. Not more than 4 spools made of nonsparking material may be packed in each inside container with not more than 2½ lb net weight of product in each inside container. Each metal can shall be individually separated with double-faced corrugated partitions and noncombustible packing material. Authorized only for lithium metal in ribbons.
E 6941–No	Mobay Chemical Corp.; Allied Chemical Corp.; BASF Wyandotte Corp.	173.346(a)(12)	Authorizes shipments of toluene diisocyanate in tank motor vehicles that comply with DOT specifications MC 304, and MC 307 except bottom discharge outlets are equipped with external ball valves of the Hill-McCanna type or equivalent. (Mode 1.)	To amend par. (a)(12) to read: (12) Specifications MC 300, MC 301, MC 302, MC 303, MC 304, MC 305, MC 306, MC 307, MC 310, MC 311, or MC 312 (secs. 178.341, 178.342, and 178.343 of this subchapter). Tank motor vehicles. Tank motor vehicles designed and constructed to specification MC–304 or MC–307 except for bottom outlets equipped with external ball valves may be used only for toluene diisocyanate.
E 6943–No	Mason & Hanger-Silas Mason Co., Inc.; Rockwell International Corp.; ERDA; Lawrence Livermore Lab	173.65(d)	Authorizes shipment of triaminotrinitrobenzene (TATB), trichlortrinitrobenzene (TCTNB), and hexanitrostilbene (HNS) as reagents in accordance with 49 CFR 173.65(d). (Modes 1, 2, and 4.)	To revise par. (d) to read: (d) The following materials may be shipped dry, in quantities not exceeding 4 oz in 1 outside package, by rail freight, or highway, as drugs, n.o.s., or medicines, n.o.s., without any other requirements when in securely closed bottles or jars cushioned to prevent breakage: (1) Ammonium picrate (2) Dipicrylamine. (3) Dipicryl sulfide. (4) Dinitrophenylhydrazine (5) Nitroguanidine (6) Picramide. (7) Picric acid. (8) Picryl chloride (9) Trinitroanisole. (10) Trinitrobenzene. (11) Trinitrobenzoic acid (12) Trinitro-m-cresol. (13) Trinitronaphthalene. (14) Trinitroresorcinol (15) Trinitrotoluene. (16) Urea nitrate. (17) Triaminotrinitrobenzene (18) Trichlortrinitrobenzene. (19) Hexanitrostilbene. Not authorized for transportation by air
E 7507–No	Witco Chemical Corp.	173.119(m)(8)	Authorizes shipment of certain flammable liquids which are also corrosive, and organic peroxide solutions in 12P/2U composite packaging as prescribed in the regulations except capacity may be 6 gal instead of 5. (Modes 1 and 3.)	To revise paragraph (m)(8) to read: (8) Specification 12P (sec. 178.211 of this subchapter). Fiberboard boxes with inside specification 2U (sec. 178.24 of this subchapter) polyethylene containers not over 6 gal capacity each. Authorized only for material which will not react dangerously with or cause decomposition of polyethylene. Not authorized for transportation by air.
		173.221(a)(9)		To revise paragraph (a)(9) to read: (9) Specification 12P (sec. 178.211 of this subchapter). Fiberboard boxes with inside specification 2U (sec. 178.24 of this subchapter) polyethylene containers not over 6 gal capacity each. Wire staples are not authorized for assembly or closure of boxes, except when polyethylene container is completely enclosed in inside boxes free of wire staples or other projections that could cause failures.
E 7514–No	Olin Corp.	173.217(a)	Authorizes shipment of certain oxidizing materials in a DOT specification 12B fiberboard box with 2 inside polyethylene bottles each with a net weight not over 16 lb. (Modes 1, 2 and 3.)	To add paragraph (a)(7) to read: (7) Specification 12B (sec. 178.205 of this subchapter). Fiberboard boxes with inside polyethylene bottles with a minimum wall thickness of 0.015 in. Not more than 2 polyethylene bottles may be packed in 1 box and each bottle shall contain not more than 16 lb net weight of commodity. Container must be such that it will not react dangerously with or be decomposed by the conmodity.
E 7525–No	Connecticut Valley Arms, Inc.	173.107(d)	Authorizes percussion caps in DOT specification 12B fiberboard box with inside plastic cans packed tightly inside chipboard boxes. (Modes 1 and 2.)	To add paragraph (d)(2) to read: (2) Specification 12B (sec. 178.205 of this subchapter). Fiberboard box. Caps must be packed in inside plastic cans containing not more than 100 caps each. Cans must then be packed in a chipboard box with not more than 8 such chipboard boxes tightly packed in the 12B fiberboard box. The completed package must be such that the explosion of part of the caps will not cause the explosion of all the caps.
E 7537–No	Pennwalt Corp.	173.157(b)(3)	Authorizes shipments of benzoyl peroxide wet with at least 20 pct water by weight in accordance with 49 CFR 173.157(b)(3) except the net weight (dry weight) in each outside box may not exceed 50 lb. (Mode 1.)	To revise par. (b)(3) to read: (3) Specification 12B (sec. 178.205 of this subchapter). Fiberboard box with securely closed inside plastic containers made of polyethylene film at least 0.004 in thick. Net weight (dry weight) in each inside container may not exceed 10 lb. Each inside container must be surrounded by asbestos or an equivalent fire-resistant cushioning material. Net weight (dry weight) in each outside box may not exceed 50 lb.
E 7602–No	Gaspro, Inc.	173.850	Authorizes shipment of calcium oxide, an ORM–B material, in non-DOT specification dry bulk containers not over 40,000 lb net weight by cargo vessel. (Mode 3.)	To add par. (a)(7) to read: (7) Sift-proof bulk freight container with net weight not over 40,000 lb.
E 7626–No	Commercial Metals Co.; Johnson Scan Star.	173.1025	Authorizes shipments of nonferrous metal borings, shavings, turnings, or cuttings in plastic lined freight containers. Freight containers with open tops must have lading protected from weather and water. Lading must be at or below 150° F. when loaded. (Mode 3.)	To amend sec. 173.1025 to read. Metal borings, shavings, turnings or cuttings, when offered for transportation by water, must be prepared for shipment in compliance with sec. 173.510 and must be packaged in a metal barrel or drum, or, for nonferrous material only, in compressed bales wrapped in burlap provided the burlap shows no sign of oil, or, in plastic lined freight containers. Freight containers with open tops must have lading protected from weather and water and the lading must be at or below 150° F when loaded.

Application No.	Applicatn or holder	Regulation affected	Nature of exemption or application	Nature of proposed amendment
E 7649-N	Ford Motor Co.	173.306(d)	Requests authority to ship a nonflammable, compressed gas in authorized DOT specification cylinders in the trunks of passenger automobiles when the container is part of a tire inflator system.	To add paragraph (d)(4) to read: (4) A cylinder which is part of a tire inflator system in a motor vehicle, charged with a nonliquefied, nonflammable compressed gas is excepted from the requirements of pts. 170-189 of this subch. except: (i) Unless otherwise authorized by the Department, each cylinder must be in compliance with 1 of the cylinder specifications in pt. 178 and authorized for use in Sec. 173.302 for the gas it contains. (ii) Each cylinder must be in compliance with the filling requirements of Sec. 173.301. (iii) Each cylinder must be securely installed in the trunk of the motor vehicle and the valve must be protected against accidental discharge.
E 7655-No.	Tennessee Eastman Co.	173.119(m)	Authorizes shipment of a flammable liquid which is also corrosive in a DOT specification 19A wooden box with an inside 1-gal polyethylene jug. (Mode 1.)	To revise par. (m)(2) to read: (2) Specifications 15A, 15B, 15C, 16A, or 19A (sec. 178.168, 178.169, 178.170, 178.185, and 178.190 of this subchapter). Wooden boxes with inside containers which must be glass, earthenware, or polyethylene, not over 1-gal capacity each, cushioned with noncombustible packing material in sufficient quantity to absorb the contents of the inner container.
E 7782-N	Eastman Kodak Co.	176.800(a)	Waives the general stowage requirements specified in 49 CFR 176.800(a) for hazardous materials in limited quantities when loaded in transport vehicles and freight containers. (Mode 3.)	To revise paragraph (a) to read: (a) Each package of a corrosive material being transported on a vessel must be stowed well away from living quarters, foodstuffs, and cargo of an organic nature except when in limited quantities and loaded in transport vehicles and freight containers.
7797-N	Food Materials Corp.	172.100(g)	Requests an exemption to ship certain flammable liquids with a flash point greater than 73° F in 1-gal and 55-gal quantities per package aboard passenger and cargo-only aircraft respectively, as now generally authorized for flammable liquids, n.o.s. (Modes 4 and 5.)	To revise par. (g)(3) to read: (3) For flammable liquids the net quantity limitation for carriage aboard a passenger-carrying aircraft or railcar is 1 gal per package, and for cargo-only aircraft is 55 gal per package if: (i) The material has a flash point of 73° F or higher; (ii) The material does not meet the definition of any other hazard class as defined in this part, and (iii) The flash point, or an indication that the flash point is 73° F or higher, is marked on the outside package.

EXPERT PANEL ON NITRITES AND NITROSAMINES

Correction in the Room Number for the Nitrites and Nitrosamines Meeting

The room number for the Expert Panel on Nitrites and Nitrosamines meeting was incorrectly stated in the August 2, 1977, FEDERAL REGISTER (Vol. 42, No. 148), 39123.

The meeting will be held in the Jefferson Auditorium, South Building, Department of Agriculture, 18th and Independence Avenue SW., Washington, D.C., August 17, 1977, at 9:30 a.m.

Done at Washington, D.C., on August 4, 1977.

ROBERT ANGELOTTI,
Administrator, Food Safety and Quality Service.

Forest Service

LAND MANAGEMENT PLAN, MOHAWK UNIT, PLUMAS AND TAHOE NATIONAL FORESTS

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the land management plan, Mohawk Unit, Plumas and Tahoe National Forests, Calif. USDA-FS-R5-FES(Adm)76-06.

The environmental statement concerns a proposed land management plan for the 120,000 acres of National Forest lands known as the Mohawk Unit of the Plumas and Tahoe National Forests, in Plumas and Sierra Counties, Calif. Twenty-six thousand acres within this Unit have been inventoried as "roadless."

This final environmental statement was transmitted to the Council on Environmental Quality (CEQ) on August 1, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3210, 12th Street and Independence Avenue SW., Washington, D.C. 20013.

Regional Forester, USDA, Forest Service, 630 Sansome Street, Room 529, San Francisco, Calif. 94111.

Forest Supervisor, USDA, Forest Service, Plumas National Forest, 159 Lawrence Street, Quincy, Calif. 95971.

Forest Supervisor, USDA, Forest Service, Tahoe National Forest, Highway 49 and Coyote Streets, Nevada City, Calif. 95959.

A limited number of copies are available, upon request, from Forest Supervisor Lloyd Britton, Plumas National Forest, Box 1500, Quincy, Calif. 95971.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

EINAR L. ROGET,
Acting Deputy Chief.

GREAT BEAR WILDERNESS STUDY AREA REPORT

Public Hearing

Notice is hereby given that a public hearing will be held, beginning at 10 a.m. on September 6, 1977, at the Outlaw Inn, Kalispell, Montana, and 10 a.m. on September 8, 1977, at the Rainbow Hotel, Great Falls, Montana, on a proposal for the future management of the Great Bead Wilderness Study Area comprised of approximately 386,560 acres within the Flathead and Lewis & Clark National Forests in the Counties of Flathead, Teton and Pondera in the State of Montana.

A brochure containing a map and information about the proposal may be obtained from the Forest Supervisor, Flathead National Forest, 290 North Main Street, P.O. Box 147, Kalispell, Montana 59901.

Individuals and organizations may express their views by appearing at this hearing, or may submit written comments for inclusion in the official record to the Great Bear Wilderness Study, P.O. Box 147, Kalispell, Montana 59901. Comments must be received by October 8, 1977, in order to be considered in the preparation of the final proposal. Those persons wishing to present oral testimony at the hearing should notify the Regional Forester, Northern Region, Missoula, Montana 59801, prior to August 26, 1977.

JOHN R. MCGUIRE,
Chief, Forest Service.

Department of the Navy

RAMP INDUSTRIES, INC.

Intent To Grant Limited Exclusive Patent License

Pursuant to the provistons of Part 746 of title 32, Code of Federal Regulations (41 FR 55711–55714, December 22, 1976), the Department of the Navy announces it intention to grant to RAMP Industries, Inc., a corporation of the State of New York, a revocable, nonassignable, limited exclusive license for a period of five years under Government-owned U.S. Patent Number 3,868,572 issued February 25, 1975, entitled "Audio Transmission and Reception Assembly," inventors Rubin P. Kaufman, Jack B. Rosenfeld, and Elaine Schiller.

This license will be granted unless by October 7, 1977, an application for a nonexclusive license from a responsible applicant is received by the Office of Naval Research (Code 302), Arlington, Va. 22217 and the Chief of Naval Research or his designee determines that such applicant has established that he has already brought or is likely to bring the invention to the point of practical application within a reasonable period under a nonexclusive license; or the Chief of Naval Research or his designee determines that a third party has presented to the Office of Naval Research (Code 302) evidence and argument which has established that it would not be in the public interest to grant the limited exclusive license.

Any objection thereto, together with a request for an opportunity to be heard, if desired, should be directed to the Office of Naval Research (Code 302), Arlington, Va. 22217 within 60 days from the publication of this notice. Also, copies of the patent may be obtained for fifty cents ($0.50) from the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

For further information concerning this notice, contact:

Dr. A. C. Williams, Staff Patent Adviser, Office of Naval Research (Code 302), Ballston Tower No. 1, 800 North Quincy Street, Arlington, Va 22217; Telephone No. 202–692–4005.

Dated: August 2, 1977.

K. D. LAWRENCE,
Captain, JAGC, U.S. Navy, Deputy Assistant Judge Advocate General (Administrative Law).

DOD ADVISORY GROUP ON ELECTRON DEVICES

Meeting

Working Group D (Mainly Laser Devices) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, New York, N.Y., on September 27–28, 1977.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The laser area includes programs on developments and research related to low energy lasers for such applications as battlefield surveillance, target designation, ranging, communications, weapon guidance and data transmission. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in Section 552b(c) of Title 5 of the United States Code, specifically, subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

DOD ADVISORY GROUP ON ELECTRON DEVICES

Meeting

Working Group C (Mainly Imaging and Display) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, New York, N.Y., on September 7, 1977.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. This special device area includes such programs as Infrared and Night Vision Sensors. The review will include classified program details throughout.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in Section 552b(c) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

DOD ADVISORY GROUP ON ELECTRON DEVICES

Meeting

Working Group B (Mainly Low Power Devices) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session at Naval Air Systems Command, 1421 Jefferson Davis Highway, Room 110, Arlington, Virginia on August 23-24, 1977.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with tactical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group B meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The low power device area includes such programs as integrated circuits, charge coupled devices and memories. The review will include details of classified program details throughout.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in Section 552b(c) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

ENVIRONMENTAL PROTECTION AGENCY

[FRL 772-4]

MOTOR VEHICLE POLLUTION CONTROL; RECALL ORDER, CHRYSLER CORP.

Public Hearing

On February 8, 1977, a notice was published in the FEDERAL REGISTER (42 FR 7983) setting forth the details of a recall order issued by the Environmental Protection Agency (EPA), to the Chrysler Corp. on December 8, 1976. The order required Chrysler to recall 208,000 of its 1975 model year cars with the 360 and 400 cubic inch displacement engines due to EPA findings that a substantial number of these vehicles are not meeting the Federal carbon monoxide standard. The notice also described Chrysler's response of January 19, 1977, which requested a public adjudicatory hearing to contest the findings of the Administrator. No date or location of the hearing was announced in the notice, pending prehearing discovery and decisions on possible petitions for intervention.

Since the publication of the notice, the time for the filing of petitions for intervention has elapsed without any such petitions being filed. The date for the commencement of the hearing has been established as September 19, 1977. The hearing will begin at 10 am. and is to be held in Room 2126 of the Mall area of the U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Interested parties may inspect the hearing docket at the Office of the Hearing Clerk (A–110), Room 1019E, at the above address between the hours of 8 a.m. and 4:30 p.m. The Hearing Clerk may be contacted at 202–755–7733.

Dated: August 1, 1977.

NORMAN D. SHUTLER,
Acting Assistant Administrator for Enforcement (EN–329).

OFFICE OF PESTICIDE PROGRAMS

Response to Petition To Suspend Certain Products Containing Nitrosamines

On February 3, 1977, the U.S. Environmental Protection Agency (EPA) received from Congressman Andrew Maguire and Henry Waxman, the Migrant Legal Action Program, Inc., the Maricopa County Legal Aid Society, and several migrant farmworkers a petition to suspend the registrations of certain pesticide products containing nitrosamines, in accordance with section 6(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136 et seq.). Specifically, the petition referred to the following: Treflan E.C. (EPA Reg. No. 1471–35), Trysben 200 (EPA Reg. No. 352–250), and Benzac 1281 (EPA Reg. No. 264–92). The full text of the petition was published in the FEDERAL REGISTER on February 24, 1977 (42 FR 10886).

This document serves as EPA's response to the petition. The attachments referred to are available for public scrutiny in Room 447, East Tower, ATTN: Ms. Suzanne Harker, Office of Special Pesticide Review (WH–566), EPA, 401 M St. SW., Washington, D.C. 20460 (telephone 202–755–5687).

Dated: July 29, 1977

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs

NITROSAMINE PETITION DECISION DOCUMENT

A. BACKGROUND

On February 3, 1977 the Agency received from Congressmen Andrew Maguire and Henry Waxman, the Migrant Legal Action Program, the Maricopa County Legal Aid Society, and migrant farmworkers a petition to suspend the registration of Treflan (EPA Reg. No. 1471–35), Trysben 200 (EPA Reg. No 352–250), and Benzac 1281 (EPA Reg. No. 264–92), pursuant to section 6(c) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA).

The petitioners claimed:

The continued use of nitrosamine-containing herbicides will have an unreasonable adverse effect on the environment and constitutes an imminent hazard to man during the time required for cancellation. The risks involved in the case of Trysben 200, Benzac and Treflan far outweigh their benefits when viewed in light of the fact that: (a) These three herbicides have been found to contain significant quantities of nitrosamines; (b) nitrosamines are known to be potent carcinogens; and (c) there is a high risk of human exposure to these herbicides in both agricultural and garden use.

The Office of Special Pesticide Reviews (OSPR) in the Office of Pesticide Programs was assigned the responsibility for gathering information necessary to respond to the petition and recommending a response. In accordance with OSPR procedures, a Working Group was established consisting of the OSPR Project Manager and representatives of other concerned offices within the Agency.

In order to compile information necessary to respond to the petition in an informed way, a number of sources of information and advice were utilized.

To evaluate the potential risks associated with use of the subject products it was necessary to identify use practices and to determine the amount of exposure to the nitrosamines contained in each product. Information on these issues was sought through FIFRA section 21(b) hearings, which were held in Phoenix, Arizona on March 7, 1977 and in Washington, D.C. on March 9, 1977, and through public comment. Notice of these hearings and opportunity for comment was published in the FEDERAL REGISTER on February 24, 1977. Information on use practices also was sought from the registrant of each product. Evidence of benefits associated with the use of these products, including the feasibility of using alternative products, was provided by the registrants, users, the U.S. Department of Agriculture, and this Agency. The comment period ended April 5, 1977.

This document summarizes and discusses the information which the Working Group has compiled and relates the recommendations of the Working Group concerning the disposition of the petition.

B. DISCUSSION AND SUMMARY OF RECOMMENDATIONS

The petition asks the Administrator to suspend the registrations of three pesticide products on the basis that they contain carcinogenic contaminants. Under the statute, suspension is an interim remedy which may be utilized to halt the distribution, sale and use of a product during the lengthy period of time required to complete cancellation proceedings, wherein the ultimate fate of a registration is determined. Accordingly, in order to suspend, a cancellation proceeding must be in progress or be initiated at the same time as the suspension proceeding. In both suspension and cancellation proceedings, the basic statutory test under FIFRA applies, i.e. whether the pesticide causes an "unreasonable adverse effect on the environment." This term is defined (FIFRA section 2(bb)) so as to require the Administrator to balance the risks associated with the use of a pesticide against its benefits.

The key distinctions between cancellation and suspension, for present purposes, are the period of time to be con-

sidered in balancing risks and benefits, and the intensity and thoroughness of the review. Essentially, cancellation decisions involve intensive analyses and weighing of the risks and benefits associated with indefinite future use, while suspension decisions involve preliminary assessments of the likelihood that risks will exceed benefits during the period of time (usually two years) necessary for cancellation proceedings.

Accordingly, the aim of the Working Group has been to determine in as sound a manner as possible in the limited period of time available whether the risks associated with the use of these products during the period of time necessary for cancellation proceedings exceed the benefits which would result from their use during this period. For purposes of this analysis the Working Group assumed that two years would be required for cancellation proceedings.

For the reasons developed fully below, the Working Group has concluded that, based on the available data, the risks associated with the use of Treflan for a two-year period are substantially exceeded by the benefits which would result from its use during the period, and accordingly recommends against the suspension of Treflan. With respect to Trysben and Benzac the Working Group has concluded that, based on available data, the risks and the benefits are both essentially zero and the extremely low risks that have been identified do not justify the extraordinary commitment of Agency time and resources which a suspension proceeding would entail. Therefore the Working Group recommends against suspension of these pesticides. At the same time it recommends that the Agency require certain labeling changes in order to keep individual exposure to a minimum.

With respect to all three pesticides, however, the Working Group has concluded that the oncogenic risk criterion of 40 CFR 162.11(a)(3) has been met or exceeded; and, therefore, that a rebuttable presumption against registration (RPAR) should be issued against these pesticides. The Working Group recommends that the resource efficient OSPR policy of proceeding against all pesticides in a generic group be followed by not issuing an RPAR against these three nitrosamine-containing pesticides until the Agency has determined what other pesticides contain these nitrosamines, so that a common RPAR proceeding may be conducted. The Working Group further recommends that the Agency assign a priority ranking to these pesticides for RPAR attention in accordance with its usual procedures for prioritization of OSPR chemicals (see OSPR Project Manager Manual, 1976), and that in the course of pre-RPAR review it determine whether other risk criteria (in addition to the oncogenic criterion) have been met or exceeded. In the Working Group's view, these RPAR recommendations are consistent with a deadline for issuance of an RPAR of October 1, 1977, and recommends that this deadline be established.

The findings of the analyses conducted to reach these conclusions are summarized below.

C. TREFLAN

Treflan (common name trifluralin) is registered by Elanco Products Division, Eli Lilly Co.; it is a pre-emergent soil-incorporated herbicide used primarily on soybeans and cotton, and, to a lesser extent, on other field crops and fruits and vegetables to control broadleaf weeds and annual grasses. Between 24–30 million acres of these crops are treated annually with Treflan. Treflan is not registered for use around the home.

Although the petition limited its discussion on Treflan to its use on cotton, we have estimated the exposure to and risks associated with all registered uses of Treflan. This approach was taken because the petitioners called for suspension of the registration of the product, not just its use on cotton.

1. *Analysis of nitrosamines in Treflan.* In the tests cited in the petition Fine found 154 ppm nitrosodipropylamine (NDPA) in Treflan.

After Fine's report had been presented (September 1976), Elanco changed its manufacturing process specifically to reduce the formation of NDPA in trifluralin. Tests conducted by Fine and by the OPP Technical Services Division Chemical and Biological Investigation Branch (CBIB) showed average levels of NDPA of 19 ppm and 12 ppm, respectively, in Treflan produced by this improved process.[1] The analyses discussed below are based on Treflan containing 16 ppm NDPA because this level represents an upper limit of NDPA in the Treflan currently being produced.

Elanco expects to be able to reduce NDPA levels by yet an additional order of magnitude by August, 1978.

2. *Exposure to nitrosamines in Treflan.* The two primary routes of human exposure to Treflan are inhalation and skin absorption during application and subsequent field work such as chopping, thinning, and weeding. The field monitoring data used to assess inhalation exposure were supplied by Elanco. No other data were available.

(a) *Inhalation exposure.* Elanco had collected air samples using a personal air monitoring device consisting of a pump and a charcoal adsorber tube. Agency personnel who reviewed this method concluded that it would probably give a reliable measure of vapor concentration of NDPA but would neglect any NDPA present on particulates in the air. However, Elanco's results have been used as the basis for calculating exposure to NDPA because of a lack of any alternative air measurements. It is recognized that additional but unquantifiable exposure of applicators could result from inhalation under dusty conditions.

[1] Treflan samples were collected by Agency inspectors at the Lilly Tippecanoe labs on February 10, 1977, and were sent half to Thermo Electron Research Center. Thus, CBIB's and the contractor's tests were conducted on the same sample.

(i) *Applicator inhalation exposure.* Applicator exposure to NDPA in Treflan was estimated on the basis of the results of field studies conducted by Elanco and submitted to EPA on February 14, 1977. These studies involved the use of both Treflan containing NDPA at ca. 160 ppm and Treflan containing NDPA at ca. 6 ppm; both Treflan and NDPA were measured in the air surrounding the applicators and application equipment.

The total number of applicators to which these calculations apply is estimated to be 470,000. It was concluded that the average annual work time for the majority of Treflan applicators was approximately 15 hours apiece; from the testimony at the Phoenix hearing, it was concluded that a small but undetermined number of applicators could spend up to 450 hours per year apiece applying Treflan.

Inhalation exposure to NDPA during the two years required for cancellation proceedings was calculated as follows: Air concentration × volume of air inhaled (1.8 m^3/hr × hours of exposure per year (15 for applicators; 100 for fieldworkers) × 2 years ÷ (70 × 365). The last two numbers convert the total two year exposure to a daily average over the lifetime of an individual. The air concentration of NDPA in the breathing zone of the applicators was estimated to be 0.0024 $\mu g/m^3$, based on (1) conversion of the Elanco air monitoring data to a median value (as discussed in detail in the Appendix of Attachment 1), and (2) the assumption that the air concentration of NDPA resulting from the use of Treflan containing 16 ppm NDPA would be tenfold lower than the air concentration of NDPA measured by Elanco when using Treflan containing 160 ppm NDPA.

The lifetime daily average exposure to NDPA from Treflan containing 16 ppm NDPA is thus computed to be 0.005 μg day for applicators.

The significance of the air concentration of NDPA used in these calculations—0.0024 $\mu g/m^3$—can be illustrated by comparing this level with the maximum air concentration assuming total volatilization of NDPA immediately into the first two meters of air over the treated area. Using this theoretical approach, we calculated that applicators would be continuously exposed to a maximum air concentration of 1.8 $\mu g/m^3$ NDPA. Such a concentration could never be attained, however, since wind and diffusion processes would continuously disperse the NDPA.

(ii) *Fieldworker inhalation exposure.* Fieldworker exposure was evaluated on the basis of data submitted by Elanco on March 23, 1977. Elanco had collected air samples above four fields which had been treated with Treflan four to six weeks earlier. Levels of NDPA in the Treflan used in these tests ranged from 77.7 to 458 ppm.

Fieldworker inhalation exposure was calculated in the same manner as for applicators. The highest level of NDPA detected—0.032 $\mu g/m^3$ (disregarding an arguably aberrant value of 1.80 $\mu g/m^3$)—was found at the breathing zone of one of the workers. However, 70 to 77 air samples had no detectable NDPA, as shown in Table III of Attachment 1. The median air concentration of NDPA in air over these fields was estimated to be 0.0013 $\mu g/m^3$, based on (1) conversion of the Elanco air monitoring data to a median value (as discussed in detail in the Appendix of Attachments (1) and (2) the assumption that air concentration of NDPA resulting from the use of Treflan containing 16 ppm NDPA would be tenfold lower than the air concentration of NDPA measured by Elanco over fields treated with Treflan containing NDPA at levels ranking from 77.7–458 ppm. The lifetime daily average exposure to NDPA from two years use of Treflan containing 16 ppm NDPA is computed to be 0.0018 ng/day for fieldworkers.

The total number of fieldworkers exposed to trifluralin and NDPA was estimated to be in the neighborhood of 38,000. On the basis of testimony given at the FIFRA section 21(b) hearings, it was concluded that fieldworker exposure to Treflan is limited to cotton production.

On April 26, 1977, the Agency received from Elanco a second study of NDPA concentrations in air and soil over and in Treflan-treated cotton fields in Arizona. This information was not received in time to permit full consideration in the exposure analysis. However, a cursory review of these new data shows that they would have little impact on exposure estimates.

(b) *Dermal exposure.* From testimony given at the FIFRA section 21(b) hearing in Phoenix, the Working Group concluded that Treflan applicators and fieldworkers may experience dermal exposure to NDPA. Dermal exposure of applicators may occur during mixing, loading, and spraying operations, and during equipment cleaning; dermal exposure of fieldworkers may occur during chopping, weeding, and thinning in cotton fields.

Since there are no published studies of residues on surfaces resulting from either vapor or particulate levels of NDPA, it was necessary to estimate potential dermal exposure to NDPA using the average ratio of dermal and inhalation exposures measured in other pesticide spray application situations. It was assumed that these other applications would provide a reasonable model for estimating dermal exposure to Treflan applicators and fieldworkers. The daily average lifetime dermal exposure to NDPA is calculated to be 0.16 ng/day for applicators and 0.059 ng/day for fieldworkers, assuming ten percent absorption of the NDPA that reaches the skin.

(c) *Unquantifiable exposures.* Several unquantifiable aspects of actual field use of the pesticides are not accounted for in these calculations and, taken together, would increase the inhalation, dermal, and/or oral exposure to an unknown extent. The factors are sporadic in occurrence for most individuals, but could be continuous for others.

The sporadic exposures include accidental spillage of the compound on the skin or clothing during mixing and loading it into spray equipment and cleaning out plugged spray nozzles by blowing into the spray rigs. The unquantifiable routine exposures for some individuals include such factors as wearing clothing contaminated with the pesticide for several days and eating food with unwashed hands. Families of workers could also be exposed in their dwellings, perhaps ultimately through contaminated clothing of the worker.

The aggregate of these unquantifiable exposures, averaged over the entire population at risk, will increase the average total exposure to an unknown extent. Another potential factor that would cause the exposure estimates to be higher than the calculated values is the failure of the air sampling method to measure airborne particulates. The magnitude of these over-estimates is not likely to be large if averaged over the entire population at risk. However for the individuals accidentally exposed or careless in routine handling of the pesticide, these exposures could be large.

For a comprehensive discussion of exposure, see Attachment 1.[2]

3. *Risk associated with use of Treflan.* In order to assess the carcinogenic risk to man resulting from exposure to a chemical, it is necessary to extrapolate data from animal experiments conducted at high levels of exposure. Virtually all competent scientists, however, recognize that this type of extrapolation is at best highly speculative and based on many unverifiable assumptions. Thus, the estimate of the resulting number of cases of cancer produced in man should be viewed as a rough measure of hazard that incorporates as well as possible both the degree of carcinogenic activity of a chemical and the exposure levels to which man is suspected to be subjected.

The carcinogenic risks associated with use of Treflan were evaluated using the estimates of average lifetime daily inhalation exposure summarized above in part 2 and carcinogenic data from animal experiments. Because the only animal inhalation experiment available used nitrosodimethylamine (DMN), it was necessary in evaluating the risk from inhaling NDPA to assume that the ratio of carcinogenic potencies of NDPA to DMN via inhalation is the same as the potency ratio via drinking water (=1.65).

Using the one-hit model for low dose extrapolation, the number of cases of cancer expected to be induced in 470,000 spray applicators during the two years required in the event of cancellation would be about 0.0029 from inhalation plus about 0.093 from dermal exposure for a total of about 0.096 from both exposure routes combined. This implies that the chances are about 1 out of 10 that there may be at least one person among the 470,000 applicators who will get cancer as a result of two years inhalation and dermal exposure to Treflan containing 16 ppm NDPA. Stated another way, each of these applicators has about one chance in 5,000,000 of getting cancer.

Using the one-hit model for the estimated 38,000 field workers, the number of cases of cancer induced by 2-year exposures would be about 0.00008 due to inhalation plus about 0.0026 due to dermal exposure for a total of about 0.0027 cases for both exposure routes combined. This implies that the chances are about 3 out of 1,000 that there may be at least one person among the 38,000 field workers who will get cancer as a result of two years inhalation exposure to Treflan containing 16 ppm of NDPA. Stated another way, each of these field workers has about one chance in 14,000,000 of getting cancer.

If the same exposure and animal response data are used for a log-probit extrapolation the total number of cases for both exposure routes would be about 2×10^{-4} cases in spray applicators and 3×10^{-11} cases in fieldworkers. All of these calculations assume the use of Treflan containing ca. 16 ppm NDPA during the two-year period, not the use of either Treflan manufactured prior to 1977 or Treflan containing further reduced levels of NDPA.[3]

There are also risks associated with the unquantifiable exposures mentioned in part C–2–c which have not been explicitly considered in the calculation. It is estimated that the additional number of cases of cancer in the population due to these exposures is small, since the exposures will occur in only a small fraction of the population at risk. However, for the individuals experiencing these unquantifiable exposures, the associated risk could be larger than the risks to these individuals which we have been able to quantify. Our concern for these individuals and for this risk is not trivial. But to the extent that it results from use or application practices which are at odds with label warnings or common

[2] Inhalation and dermal exposure of field workers to NDPA has been quantified only for treated cotton fields. As soon as information on exposure is available for tractor drivers and field workers in other treated crops, the Agency will determine the associated risks and consider such in the risk/benefit analysis.

[3] If the number of cases of cancer were calculated for the purpose of suspension from the date this petition was submitted to the Agency, about half of the two year exposure would be to Treflan containing 160 ppm NDPA (the concentration cited in the petition) and about half to Treflan containing 16 ppm NDPA. This would result in the number of cases of cancer expected to be induced to be 5.5 times higher than noted in the body of this document using the one-hit linear model. The Agency has determined, however, that almost all Treflan containing the higher level cited in the petition has been used and that Treflan now contains 16 ppm NDPA as an upper limit. Accordingly, estimates based on 16 ppm NDPA were utilized by the Working Group.

sense, or from preventable accidents, our concern for this group of individuals is tempered by the realization that the remedy of a more careful practice of one's trade seems more appropriate than administrative remedies.

It is recognized that the risk estimates are very inexact due to the uncertainty in air concentration of NDPA in particulate form, the lack of dermal penetration data on NDPA, the uncertainties in the exposure estimates under field conditions, the applicability of animal carcinogenesis data to man, the carcinogenic response in man at very low doses and other factors discussed in the exposure and risk background documents. Therefore, the calculations should only be regarded as a rough indication that the risks of NDPA exposure from use of Treflan appear very small.[4]

For a detailed discussion of risk, see Attachment 2.

4. *Benefits associated with use of Treflan.* The FIFRA requires that the Administrator take into account not only the economic, social, and environmental costs, but also the benefits of the use of any pesticide when determining whether its continued use during the time required for cancellation proceedings would be likely to result in an unreasonable risk to man or the environment.

In conducting the benefit analysis the Agency must first look at available alternatives. If it is found that another pesticide is as effective at the same or lower cost as the product in question, no benefit derives from the use of the subject product. If, however, no other pesticide is as effective at the same or lower cost as the subject product, a benefit is derived from the use of the subject product. In this case, the Agency must analyze the impact of prohibiting use of this product. Those areas of impact which must be examined include the impact on production and prices of agricultural commodities, retail food prices, and other elements of the agricultural economy. The remainder of this part summarizes the Treflan benefits analysis.

(a) *Alternatives to Treflan.* The feasibility of using alternative weed control methods was examined by the National Herbicides Assessment Team, consisting of representatives of the USDA Agricultural Research Service, the USDA Economic Research Service, and state land grant universities; this group's full report may be found in Attachment 3.

The feasibility of alternative weed control methods was analyzed in terms of per acre yield (efficacy) and cost relative to Treflan. Other dinitroanilines were not considered as alternatives as they are also likely to contain nitrosamines. Following is a summary of the conclusions reached by the Team. It should be noted that although the members of the Team represent many years of experience in assessing the efficacy of various pesticides, their conclusions should be viewed as preliminary because of the time constraints imposed on their study. Those pesticides in parentheses were later identified as ones which could potentially contain nitrosamines.

Alternatives to Treflan for use on soybeans: Lasso, Dynap, Sencor, Lorox, Amiben, (Vernam), and cultivation

Alternatives to Treflan for use on cotton: Karmex, Caparol, Lasso, Cotoran, Dacthal, Prefar and (Zorial), followed by cultivation

Alternatives to Treflan for use on fruits and vegetables: Prefar, Alanap, Devrinol, Amiben, Furloe, Sinbar, Dalapon, TOK, Lorox, (Tillam, Enide[5] and Eptam), mechanical cultivation, and hand weeding

Alternatives to Treflan for use on other field crops: Lasso, Amiben, (Vernam and Eptam), mechanical cultivation, and hand weeding

The Team concluded for all of these use sites that the efficacy of these alternative weed control methods is less than that associated with use of Treflan and/or that these alternatives are more costly than Treflan.

The petition submitted to the Agency listed eight products which might serve as alternatives to Treflan. Of these, two (nitralin and fluoridifen) are not presently on the market, and three (dinitramine, vernolate, and diphenamid) potentially contain nitrosamine contaminants. Of the remaining three pesticides, chlorobromuron and chloramben are not registered for use on cotton and, together with linuron, were found to be less efficacious and/or more costly on the use sites for which they are registered.

(b) *Economic Impact of Suspending Treflan.* Because the alternatives to Treflan were found to be less effective and/or more costly than Treflan, it was necessary to analyze the economic impact of a possible suspension. This task was performed by EPA and USDA economists. In their analyses they used information provided by the National Herbicides Assessment Team which included information on acreage treated by trifluralin, weed control input requirements and yield differences for the alternatives most likely to be used in place of trifluralin. Any error in these field estimates would, of course, result in corresponding errors in the economic predictions. It should also be noted that the economic analysis was based on use of all the pesticides listed above in part C-4-a although, as has been noted, some of those pesticides may also contain nitrosamines. The full report of the economists may be found in Attachment 3.

It should be noted that the following analyses are based on the same assumptions which underlie most economic analyses, i.e., that those market forces not specifically included in the models remain constant. Examples of these forces include consumer tastes and preferences, the state of technology (in this case, with respect to agricultural practices and changes in the efficacy of alternative pesticides), etc. Because these forces are not fully taken into consideration in the economic analysis and because the assumptions utilized in the analysis may or may not adequately represent the considered sectors of the economy, the resulting conclusions should be viewed as a general indication of the possible effects of a suspension.

(i) *Short-Run Impact.* These impacts were estimated separately for each agricultural sector which would be affected. Partial budgeting techniques, combined with various assumptions regarding demand elasticity, were used to reach the following conclusions:

Production costs for soybeans would increase by $36.0 million. Due to the widespread use of Treflan for soybeans (38% of the U.S. acreage), the substantial cost increase, and the expected yield declines, 4.5 million acres might shift to corn production. The price of soybeans would increase by 24% over current prices.

Cotton production costs would increase by $5.9 million on the 8.3 million acres currently treated. Also, yield declines on this acreage might be as high as 12 percent. The resultant impact on cotton producers who use Treflan would be a reduction in income of $77 million.

Income losses for other agricultural sectors using Treflan would be $25.8 million for peanut, sugar beet and sunflower producers and $38.2 million for fruit and vegetable growers.

The income of all agricultural producers would decline by $521 million as a result of increased cost and reduced yields.

Due primarily to the increased corn production, which would significantly lower corn prices, the consumers of agricultural products in aggregate would be relatively better off in the short run. The monetary cost of a suspension would be borne primarily by the agricultural sectors during the first year following suspension.

(ii) *Long-Run Impact.* As the economic impact of a suspension must be evaluated in terms of the time required for cancellation proceedings, approximately two years, we must look beyond the short run (one year) estimates described above in part C-4-b-i. The USDA and EPA economists used the EPA Linear Programming Model to evaluate these long run impacts. This model assumes market adjustment in 1-3 growing seasons although it could take up to five years for the market fully to adjust. Thus, the long run impacts discussed below represent the movement that the market would begin to take during the second year of suspension.

The linear programming model used in this analysis was designed to evaluate the impact of pesticide regulatory policy on major sectors of U.S. agriculture. As such, the model addresses such issues as the ability to meet food, feed and fiber demands, cost of production, land allocation, monetary returns to the agricultural sector and the impact of alternative policy on these parameters. The model was not designed to assess consumer level impacts directly, but has been utilized to draw inferences concerning such impacts. For a number of reasons, principal of which is an extremely inelastic demand component of the model, such inferences may tend to overestimate actual results. Therefore, the conclusions which were drawn from the analysis are expressed at the farm level.

The most critical assumptions in the modelling effort relate to yield and cost changes following a pesticide restriction. In the case of Treflan for soybean and cotton production, these estimates were derived by biological scientists who were considered expert in the area of herbicide use. The estimates were not necessarily directly supportable by field research and are therefore considered to be tentative at this time. However, due to the assumption that the biologists worked under, namely that alternative herbicides would not be available in sufficient supply to satisfy a void created by suspension, the biological data should be considered as extreme upper bound estimates of yield losses in the long run. The assumption of supply availability has more merit for the short run impact estimation previously discussed.

Conclusions reached in this analysis were:

Increases in the cost of production plus yield effects, if passed on to the consumer in their entirety, would increase the price of soybeans by $1.17 per bushel, or approximately a 20 percent increase over recent prices.

Coincident with a price increase for soybeans, production would decline by 66 million bushels (4.5 percent) even after a substantial increase in planted acres of 4.4 million acres (an increase of 8.3 percent).

The impact on soybeans would transmit through the entire feedgrain economy, raising corn production costs by as much as $0.14 per bushel and corn prices by 5 percent.

Production and yield impacts associated with cotton could result in an added cost of $29.00 per bale for raw cotton, or a 10 percent increase. Translated to price impacts, this could result in an increase of 13.4 percent over the recent price of $216.30 per bale. The impact on final prices for finished cotton products was not estimated. To meet current cotton demand from domestic and international sectors following suspension, an increase in planting of 1.2 million acres (12.3 percent) would be required.

Overall Impact: Due to the inelastic nature of demand for agricultural products, the gross effect of the impact on the agricultural sector would be borne by consumers. Under the assumed changes in yield and cost the increase in consumer expenditures could be as high as $3.8 billion. Of this, $0.35 billion would be accounted for by increases in production cost and $3.45 would be in the form of windfall gains to the agricultural sector. However, these windfall gains would not be distributed equally between those farmers directly affected by the suspension and the rest of agriculture. The majority of the gain would go to the latter.

5. *Risk/Benefit Analysis.* The risk estimates in part C-3 indicate that the use of Treflan containing NDPA impurities would probably result in a very small number of cancer cases: Each of the 470,000 applicators has about one chance in 5,000,000 of getting cancer as a result of two years exposure to Treflan; and each of the 38,000 fieldworkers has about one chance in 14,000,000 of getting cancer from such exposure. Unquantifiable exposures might raise these averages but probably not by much, considering all the uncertainties. For certain individuals, the sporadic exposure resulting from accidental spillage and mis-handling of the pesticide will be very hazardous.

In the short run (one growing season), the economic impact of suspending Treflan would be a $521 million decrease in income to growers due to an increase in production costs and a decrease in per acre yield. In the long run, prices of agricultural commodities would rise. When compared with alternatives, the benefits of Treflan are that it does not require rain activation and that, with one annual application, it controls a wide variety of weeds and broadleaf grasses.

The Working Group finds that the small risks of Treflan use considering both the quantifiable and unquantifiable factors, do not outweigh the benefits derived from its use.

6. *Conclusions and Recommendations.* Nitrosodipropylamine (NDPA) is a suspected human carcinogen present as a contaminant in Treflan. Between 24-30 million acres of soybeans, cotton, fruits and vegetables, and other field crops are treated annually with Treflan.

Because risk associated with the use of Treflan during the two years required in the event of cancellation are exceeded by the benefits derived from its use, an imminent hazard does not exist, and the Working Group recommends against the suspension of Treflan.

Failure to find imminent hazard, however, does not mean that the Working Group has determined that the risk associated with the continued use of Treflan is acceptable. Rather, it means that during the two years required in the event of cancellation proceedings, which is the time period relevant to the decision of whether or not to issue a suspension order, the risks do not appear to outweigh the benefits.

40 CFR 162.11(a)(3)(ii)(A) provides that if any pesticides ingredient has been found to induce oncogenic effects in experimental mammalian species or in man as a result of oral, inhalation, or dermal exposure, a rebuttable presumption against registration (RPAR) shall be issued. Since Treflan is known to contain a carcinogenic contaminant, a rebuttable presumption against the reregistration of this product must be issued.

Evidence gathered by the Agency indicates that NDPA is present in a number of pesticides. Thus the Agency is requiring all pesticide registrants and applicants to test their products for NDPA and other potential nitrosamine contaminants. Since it is the practice of the Office of Special Pesticide Reviews to examine all pesticides containing a given ingredient as a class rather than to examine each one individually as it is called to our attention, the Agency should initiate an RPAR action against all products containing NDPA. This RPAR should be based not only on the presence in the pesticides of the carcinogenic nitrosamine, but also on all other RPAR risk criteria.

The timing of the examination of given pesticide ingredients and the issuance of an RPAR should follow the published prioritization criteria of the Agency (Office of Special Pesticide Reviews Project Manager Procedures Manual, 1976) rather than the timing of petitions or referrals sent to the Agency. These weighted prioritization criteria include: amount of production, oncogenicity, and other chronic toxicity, acute toxicity, persistence, biomagnification, and bioaccumulation, and environmental mobility. In the Working Group's view, this RPAR recommendation is consistent with a deadline for issuance of an RPAR of October 1, 1977 and recommends that this deadline be established.

If the information on other pesticides containing NDPA is not available to the Agency by October 1, 1977, the Agency should proceed with the issuance of an RPAR against Treflan on that date.

Finally, as indicated above, there are significant deficiencies in exposure data which should be rectified. The Working Group therefore recommends that the Agency require the registrant (under 40 CFR 162.8(d)) to conduct further studies on exposure questions and particularly on the questions of respiratory exposure due to particulates and dermal exposure. The Working Group recommends that exposure studies be designed jointly by Agency scientists and registrants.

Protocols should be finalized within 30 days and data should be developed and submitted as soon as possible. Deadlines for completion of studies should be imposed which are designed to produce as much data as possible before the next growing season. Of course, if these or any other data reflect that exposure concerns are more serious than currently anticipated, the Agency can reconsider the suspension question at that time. In any event, any exposure data submitted would be utilized in the RPAR process.[6]

D. TRYSBEN AND BENZAC

Trysben 200 and Benzac 1281, registered by E. I. Du Pont de Nemours and Amchem Products, Inc., respectively, are trade names for trichlorobenzoic acid

[4] A comparison of these exposures to Treflan with other common nitrosamine exposures may be useful to set the problem in context. The total annual exposure of a spray applicator is about 2,160 ng/year, but Fine has estimated the nitrosamine content of 16 slices of bacon is about 2,000 ng and the DMN intake from 20 cigarettes is about 1,600 ng.

[5] Diphenamid (Enide) has been tested for nitrosamines; none were found at a sensitivity of 1 ppm. Although this product is registered for use on cotton and soybeans, it was not included in the Team's recommendations for alternatives for cotton and soybeans.

[6] The Working Group also considered label changes to provide protecting against exposure because of careless handling, wearing contaminated clothing, and other similar problems. However, the Working Group concluded that current labels contain strong warnings against these hazards which could not be significantly strengthened. Accordingly, the Working Group decided not to

dimethylamine salt. These products are recommend label alterations in this area. used to control broadleaf weeds on utility pipelines, rights-of-way, and other industrial sites, on ditchbanks and fencerows, and around farm buildings. A total of approximately 10,000 acres are treated annually with these products.

1. *Analyses of Nitrosamines in Trysben and Benzac.*—(a) *Trysben.* In the tests cited in the petition Fine found 187 ppm nitrosodimethylamine (DMN) in Trysben. These results were based on samples taken from one gallon containers. Du Pont informed the Administrator by letter on September 14, 1976 that DMN was formed by a chemical reaction of a pesticidal ingredient with sodium nitrite, which was used as a corrosion inhibitor in the one gallon containers but not in the 5 and 30 gallon drums. Du Pont further stated that production and sale of the one gallon container had been discontinued. Tests conducted by Fine and by the OPP CBIB showed levels of 1.3 and 2.0 ppm DMN in Trysben samples taken from a five gallon container.[1]

(b) *Benzac.* In the tests cited in the petition Fine found 640 ppm DMN in Benzac. These results were based on samples from one gallon containers, a size which also utilized sodium nitrite as a corrosion inhibitor. In a February 23, 1977 letter to the Director of the Office of Special Pesticide Reviews, Amchem stated that the other two size containers, 5 and 30 gallon drums, do not use this corrosion inhibitor. Nevertheless, tests conducted by Fine and by CBIB on Benzac samples taken from a five gallon drum showed DMN at average levels of 277 and 355 ppm.[1]

2. *Exposure to Nitrosamine in Trichlorobenzoic Acid.* Based on estimates from Du Pont and Amchem, it is believed that there may be 45 Benzac and 450 Trysben applicators using automated equipment such as railroad tank cars or trucks. Benzac users may spend as many as 200 hours per year applying the pesticide; Trysben users, 320 hours. In addition, there may be 5 Benzac and 60 Trysben back-pack operators using hand-gun sprayers; Benzac handgun operators apparently apply the pesticides for only one hour apiece per year; Trysben hand-gun operators, 24 hours/year.

(a) *Inhalation Exposure.* No information was available concerning the air concentration of DMN resulting from use of these products. However, the air concentration of DMN was estimated by analogy with other spray application situations in which air concentrations could be related to application rates. The range of this relationship is about 5–100 $\mu g/m^3$ per pound per acre. As a conservative estimate, the factor 100 $\mu g/m^3$ was used in the following formula to calculate the air concentration of DMN: 15 pounds per acre $\times$ 100 $\mu g/m^3$ $\times$ concentration of DMN in the pesticide (3 ppm in Trysben; 300 ppm in Benzac). The calculated air concentration of DMN is 0.0045 $\mu g/m^3$ for Trysben and 0.45 $\mu g/m^3$ for Benzac. Inhalation exposure to DMN during the two years required for cancellation proceedings was then calculated as follows: Air concentration $\times$ volume of air inhaled (1.8 m^3/hr) $\times$ hours of exposure per year (24 for Trysben; 1 for Benzac) $\times$ 2 years $\div$ (70 $\times$ 365). The last two numbers convert the total two year exposure to a daily average over the lifetime of an individual. The daily lifetime average inhalation exposure of the applicator to DMN in Benzac would be 0.063 ng/day. From the data furnished by the registrant, about five people would have this exposure to DMN from the use of Benzac. From use of Trysben, which currently contains less than 3 ppm DMN, the daily lifetime average inhalation exposure for the 60 hand-gun users is calculated to be 0.015 ng DMN per day. Professional applicators who wear adequate clothing and respirators would have even less exposure.

The inhalation exposure of operators of automated equipment to DMN is expected to be much lower than that of hand-gun operators given the greater distance of the operator from the spraying apparatus and the protection afforded by the cab on automated equipment.

(b) *Dermal Exposure.* Since there are no published studies of residues on surfaces resulting from either vapor or particulate levels of DMN, it was necessary to calculate potential dermal exposure to DMN using the same model and assumptions discussed in part C–2–b above. Using this model and the inhalation exposures estimated above, the value for daily lifetime average dermal exposure to DMN from two years use of Trysben is calculated to be 0.49 ng/day; and of Benzac, 2.1 ng/day.

Exposure to DMN is more thoroughly discussed in Attachment 1.

3. *Risk Associated with Use of Trichlorbenzoic Acid.* In order to assess the carcinogenic risk to man of exposure to a chemical, it is necessary to extrapolate data from animal experiments conducted at high levels of exposure. Virtually all competent scientists, however, recognize that this type of extrapolation is at best highly speculative and based on many unverifiable assumptions. Thus, the estimate of the resulting number of cases of cancer produced in man should be viewed as a rough measure of hazard that incorporates as well as possible both the degree of carcinogenic activity of a chemical and the exposure levels to which man is suspected to be subjected.

Using the one-hit model, the number of cancer cases for back-pack operators due to two years inhalation and dermal exposure to Trysben containing 3 ppm of DMN would be about 2.2×10^{-5} cancer cases in the population of approximately 60 people. This implies that the chances are about 2 out of 100,000 that there may be at least one person among the 60 Trysben handgun applicators who will get cancer as a result of two years exposure to Trysben containing 3 ppm DMN. Stated another way, any one of these users would have about one chance in 2,700,000 of getting cancer from Trysben use.

Using the one-hit model for the approximately five back-pack users of Benzac the number of cancer cases due to two years inhalation and dermal exposure would be about 7.9×10^{-4}. This implies that the chances are about 1 out of 130,000 that there may be at least one person among the 5 Benzac users who will get cancer as a result of two years exposure. Stated another way, any one of these users has about one chance in 630,000 of getting cancer.

In addition to these calculated risks, there are also the same types of unquantifiable exposures as discussed in section C–2–c. The same uncertainties in the risk estimates apply for the Trysben and Benzac users as for the Treflan users. The calculations should be regarded as indicating roughly that the risks of exposure appear very small.

If the log-probit model with a slope of one were used to calculate the number of cases for these people, the result would be about 10^{-11} cancer cases in Trysben hand-gun users and about 10^{-10} cancer cases in Benzac hand-gun users.

4. *Benefits Associated With Use of Trysben and Benzac.* Picloram/2,4–D is registered for essentially the same uses as Trysben and Benzac and currently is the most commonly used pesticide for controlling broadleaf weeds along fencerows, utility rights-of-way, and pipelines. However, at least one sample of 2,4–D has been found to contain nitrosodiethanolamine. If picloram/2,4–D remains on the market, there would be minimal economic impact from the suspension of Trysben and Benzac because there is apparently only negligible difference in efficacy and cost between picloram/2,4–D and the trichlorobenzoic acids and thus users of the suspended products would likely shift to picloram/2,4–D.

Another alternative herbicide not suspected of containing nitrosamines is Pramito 25E (common name prometone). However, prometone costs approximately $67.50 per acre more than Trysben or Benzac and may not be as effective as the products in question. With approximately 10,000 acres currently being treated with Trysben or Benzac, the minimum total cost of shifting to prometone would be $675,000.

5. *Risk/Benefit Analysis.* Approximately 500 persons apply Trysben and or Benzac annually using automated equipment. The risk associated with such use is expected to be minimal due to the protection afforded by the cab and the positioning of the spray nozzles relative to the cab.

The risk associated with hand-gun application of the two products is potentially greater. The risk estimates in section 3 indicate that a very small number of cancer cases would be caused by this use of these two products. The average estimates are that each of the 60 Trysben hand gun users has about one chance in 2,700,000 of getting cancer from two years exposure and that each of the 5 Benzac hand gun users has about one chance in 630,000 of getting cancer.

If these products were suspended, it is likely that current users of such products would shift to picloram/2,4-D, which is approximately equal to the trichlorobenzoic acids in efficacy and cost. Because picloram/2,4-D is an equivalent alternative to Trysben and Benzac, benefits are valued at zero.

6. *Conclusions and Recommendations.* Nitrosodimethylamine (DMN) is a suspected human carcinogen present in Trysben and Benzac. Approximately 10,000 acres of non-crop land are treated annually with Trysben and Benzac.

The problem presented to the Agency is what action is appropriate when the risks posed by a pesticide are small and not appreciable and the advantages are zero. While an RPAR action against pesticides containing oncogenic ingredients is mandatory upon the Agency, the extraordinary action of suspension is discretionary. The Working Group recommends against the suspension of Trysben and Benzac (1) because it finds that there will be no appreciable difference in hazard to the individuals coming in contact with these pesticides and no significant threat of danger to their health whether their registrations are immediately suspended or whether these registrations are canceled in the near future, if warranted; and (2) because it finds that a disruptive, resource intensive effort in this discretionary, small hazard situation will delay other, mandatory efforts by the Agency on pesticides posing potentially greater hazards to man and the environment.

A recommendation by the Working Group not to suspend Trysben and Benzac does not mean that the Agency will not take action to reduce the risks these pesticides pose to applicators during the next two years. A statement of Agency policy on N-nitroso compounds (of which nitrosamines are a subclass) will require labeling changes on all products containing carcinogenic nitrosamines. In addition, the Working Group recommends that Trysben and Benzac labels provide that application of these herbicides be made by either automated equipment or individuals completely protected with clothing, goggles, and respirators.

Further, failure to find imminent hazard does not mean that the Working Group has determined that the risks associated with the continued use of Trysben or Benzac are acceptable. 40 CFR 162.11(a)(3)(ii)(A) provides that if any pesticide ingredient has been found to induce oncogenic effects due to oral, inhalation, or dermal exposure, a rebuttable presumption against registration (RPAR) shall be issued. Since Trysben and Benzac are known to contain a carcinogenic contaminant, rebuttable presumptions against the reregistrations of these products must be issued.

Evidence gathered by the Agency indicates that DMN is present in a number of pesticides. Thus the Agency is requiring all pesticide registrants and applicants to test their products for DMN and other potential nitrosamine contaminants. Since it is the practice of the Office of Special Pesticide Reviews to examine all pesticides containing a given ingredient as a class rather than to examine each one individually as it is called to our attention, the Agency should initiate an RPAR action against all pesticides containing DMN. This RPAR should be based not only on the presence in the pesticides of the carcinogenic nitrosamine, but also on all other RPAR risk criteria.

The timing of the examination of given pesticide ingredients and the issuance of an RPAR should follow the published prioritization criteria of the Agency (Office of Special Pesticide Reviews Project Manager Procedures Manual, 1976) rather than the timing of petitions or referrals sent to the Agency. These weighted prioritization criteria include: amount of production, oncogenicity, and other chronic toxicity, acute toxicity, persistence, biomagnification, and bioaccumulation, and environmental mobility. In the Working Group's view, this RPAR recommendation is consistent with a deadline for issuance of an RPAR of October 1, 1977 and recommends that this deadline be established.

If the information on other pesticides containing DMN is not available to the Agency by October 1, 1977, the Agency should proceed with the issuance of an RPAR against Trysben and Benzac on that date.

Finally, as indicated above, there are significant deficiencies in exposure data which should be rectified. The Working Group therefore recommends that the Agency require the registrant (under 40 CFR 162.8(d)) to conduct further studies on exposure questions and particularly on the questions of respiratory exposure due to particulates and dermal exposure. The Working Group recommends that exposure studies be designed jointly by Agency scientists and registrants. Protocols should be finalized within thirty days and data should be developed and submitted as soon as possible. Of course, if these or any other data reflect that exposure concerns are more serious than currently anticipated, the Agency can reconsider the suspension question at that time. In any event, any exposure data submitted would be utilized in the RPAR process.

[FR Doc.77-22627 Filed 8-5-77;8:45 am]

[1] Both the Benzac and Trysben samples were collected at the Dupont Biochemicals Department in Philadelphia, PA on February 11, 1977.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 869]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's rules and regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein it must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. (See §§ 1.227(b)(3) and 21.30(b) of the Commission's Rules.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

21782–CW–TC–77 Marianas Telephone Co. Consent to Transfer of Control from Air Guam Inc., Transferor to Guam International Motors Inc., Transferee. Station WWA347, Alutom, Island of Guam

21783–CD–P–77 Pacific Northwest Bell Telephone Company, (KOE520), C.P. to relocate facilities, change antenna system and replace transmitter operating on 35.26 MHz, located at Lookout Mountain 4.7 Miles SE of Bellingham, Washington

21784–CD–P–77 Platteville Telephone Company, (KSJ826), C.P. for additional facilities to operate on 454.625 MHz located 0.7 mile south of Platteville, Wisconsin

21785–CD–P–77 Alan H. Rosenson Trust d/b/a All Florida Communications Co. (KIN645), C.P. to relocate facilities and change antenna system operating on 43.22 MHz at Loc No 4: 7150 West 32nd Ave Hialeah, Florida.

21786–CD–P–(2)–77 Waco Communications Inc. (KLB498), C.P. to relocate facilities and change antenna system operating on 152.06 MHz from Loc. No. 1 to Loc No 3. 817 South First Street, Temple, Texas; and for additional facilities to operate on 152.06 MHz at Loc. No. 5: 1200 Block of North 16th Street, Waco, Texas

21787-CD P 77 Philadelphia Mobile Telephone Company (KGI775), C.P. to relocate facilities operating on 454.300 MHz to a new Loc. No. 2: Lewis Tower Bldg., 225 S. 15th Street, Philadelphia, Pennsylvania.

21788-CD-P-(2)-77 Sully Buttes Telephone Cooperative, Inc. (new), C.P. for a new station to operate on 152.06 and 152.66 MHz to be located 4 miles East 0.50 mile South of Onida, South Dakota.

21789-CD-P-77 Advance Business Communications, Inc. (new), C.P. for a new 1-way signaling station to operate on 158.70 MHz to be located at 202–204 South Main Street, Aberdeen, South Dakota.

21790-CD-P-77 Telpage of Tennessee, Inc. (new), C.P. for a new 1-way signaling station to operate on 152.24 MHz to be located at Dug Gap Mtn., approximately 4 miles SW. of Dalton, Georgia.

21791-CD-P-77 Pueblo Telephone Secretarial Service, Inc. (new), C.P. for a new 1-way signaling station to operate on 152.24 MHz to be located at 2226 TV Lane, Pueblo, Colorado.

21792-CD-P-(2)-77 Electropage, Inc. (KMD986), C.P. for additional facilities to operate on 72.58 and 72.88 MHz, Control at a new Loc. No. 4: 4799 24th Street, Sacramento, California.

21793-CD-P-(2)-77 General Communications Service, Inc. (KOE254), C.P. to change antenna system and replace transmitter operating on 152.03 and 152.06 MHz at Loc. No. 6: Atop Mt. Eden—4 miles NE. of Flagstaff, Arizona.

21794-CD-P-77 General Communications Service, Inc. (KUO575), C.P. to change antenna system and replace transmitter operating on 152.24 MHz located Atop Mt. Elden, 4 miles NE. of Flagstaff, Arizona.

21795-CD-P-77 Empire Paging Corporation (KAA209), C.P. for additional facilities to operate on 152.24 MHz at a new Loc. No. 3: 5 Horizon Road, Fort Lee, New Jersey

CORRECTION

21492-CD MP-(2)-77 Airsignal of Colorado, Inc. (KWU523), Correct File Number to read: 21492-CD-MP-77. All other particulars are to remain as reported on PN No. 868, dated July 25, 1977.

MAJOR AMENDMENT

21172-CD-77, ARCH, A Joint Venture (KDS495), Amend to change frequencies to 870.000–870.960 MHz at Loc. No. 1; and to 880.000–880.960 MHz at Loc. No. 2; and to change the antenna systems and effective radiated powers. All other particulars of operation remain as reported in PN No. 856, dated May 2, 1977.

21237-CD-P-77, James D. & Lawrence Garvey d.b.a. RADIOFONE (KUS290), Amend to lower and side mount antenna with tip at 295' AGL with maximum lobes at 135 and 315 degrees. All other particulars of operation remain as reported in PN No. 857, dated May 9, 1977.

RURAL RADIO

60350 CR-P L-77 Robert H. Jones Ranch (new), C.P. and license for a new Rural Subscriber station to operate on 158.49, 152.03, 158.52 and 152.06 MHz to be located 5 miles N.E. of Cedar Grove on Hwy. 344, 2 miles E. of Hwy. 344 on dirt road, Cedar Grove, N. Mex.

60351-CR-P/L-77 Puerto Rico Communications Authority (new), C.P. and license for a new Rural Subscriber station to operate on 459.375, 459.400, 459.425, 459.450, 459.475, 459.500, 459.525 and 459.550 MHz to be located at Bo. Guanajibo, Carr. 344 Km. 2.1, Hormigueros, P.R.

[FCC 77-515; RM-2756]

FM BROADCAST STATIONS; CERTAIN CITIES IN MISSOURI

Table of Assignments; Memorandum Opinion and Order—Proceeding Terminated

In the matter of amendment of §73.-202(b), Table of Assignments, FM Broadcast Stations (Caruthersville, Dexter, Malden and Portageville, Missouri), RM-2756.

Adopted: July 14, 1977.

Released: July 27, 1977.

1. The Commission has before it a petition for reconsideration filed by Communications Systems, Inc. ("CSI"), license of Station KFMP(FM), Cape Girardeau, Missouri, of the Broadcast Bureau's action, adopted February 3, 1977, by Memorandum Opinion and Order (Mimeo 77851), which denied certain changes in the FM Table of Assignments which were designed to permit changing the designation of petitioner's channel from Class B to Class C.[1] An opposition has been submitted by Jim Southard, Cecil Poff, and Solan Lott, petitioners for an FM channel at Blytheville, Arkansas. A motion to strike was filed by Tri-County Broadcasting Co., Inc., licensee of Station KTCB(AM), Malden, Missouri, and applicant for an FM station at Malden (BPH-10018).

2. The Memorandum Opinion and Order denied petitioner's request to have its facility upgraded because, in order to do so, an applied for FM channel at Malden would have to be deleted and substitutions of Class A channels at three Missouri communities would have to be made. After weighing the public interest benefits and detriments of petitioner's request, the Commission, by delegated authority, denied the petition. Note was made of the fact that petitioner had not provided the data to support its allegation that a first aural service could be provided to any area by the increased facilities. Without such service, the provision for a first local service at Malden was thought to have a higher priority than an extension of service to already served areas.[2]

3. In its petition for reconsideration, CSI in effect deals with five areas in which it says the Commission erred. First, it argues that the Bureau lacked the delegated authority to take the action. Second, it contends that its station has been discriminatorily placed in a "degraded" status as the only Class B station in Zone II. Third, CSI claims that assignment of the Malden FM channel was premised upon early "activation" of the channel, which did not occur. Fourth, CSI avers that the *Anamosa, Iowa*, case[3] provides precedent for a grant of petitioner's request for Class C status here. Fifth, it alleges that the Commission's rejection of petitioner's claims of first aural service is based on erroneous assumptions. Each of these points is discussed below.

4. In their opposition, Jim Southard, et al., complain that this petition for reconsideration is repetitive and identical to previous requests that have been denied by the Commission. They also contend that it has no substantive merit. They urge the Commission to dispose of this proceeding promptly so we can consider forthwith their conflicting petition for an FM channel at Blytheville, Arkansas. We agree that this matter should be resolved and we turn to the points raised by CSI.

5. Petitioner's first contention is that the Bureau did not have delegated authority to issue its Memorandum Opinion and Order. Petitioner argues that this matter should have been referred to the Commission because there was no precedent dispositive of the issues presented. Further, it asserts that if any delegated authority existed for the dismissal of its petition for reconsideration, then it was vested in the General Counsel under § 0.251 (c) and (d).

6. We find that the Bureau's action was properly taken pursuant to delegated authority found in § 0.281(b) (6) of the Commission's rules. There was no need to refer the matter to the Commission since no novel question was presented. Contrary to petitioner's assertions, the issues presented by the petition were of a routine nature,[4] namely weighing the comparative factors used in choosing between communities and in evaluating the importance of the service each proposal could provide. The General Counsel's authority, under § 0.251(c) of the Commission's rules, to dismiss repetitious petitions for reconsideration applies only to rulemaking proceedings of general applicability and not to those subject areas already in the exclusive jurisdiction of a particular Bureau.[5] In any event, by virtue of the present consideration of this case by the Commission, petitioner's argument on the point of action by delegated authority in effect becomes moot.[6]

7. The remaining issues deal with the substantial matter of the Commission's assignment policies in choosing between

[1] The Memorandum Opinion and Order also dismissed an alternative petition for reconsideration of two previous actions which had denied the identical relief. See Cape Girardeau, Mo., et al., 51 F.C.C. 2d 492 and 54 F.C.C. 2d 896 (1975). An appeal of these actions is presently pending before the D.C. Circuit Court of Appeals, sub. nom. *Communications Systems, Inc. v. F.C.C.*, No. 75-1992, filed October 8, 1975.

[2] Petitioner's allegations that a first aural service could be provided were found insufficient for two reasons. First, it failed to provide the measurement data that would show that the proposed area of first aural service was not already served at least in part by AM Station KMOX, St. Louis, Missouri, as appeared to be the case. Second, petitioner assumed that it could utilize facilities of 275 meters (900 ft) and 100 kW power in order to provide the alleged first aural service, but the Federal Aviation Administration had previously announced an objection to this proposal, and the Commission had not been notified up to that time that this position had changed as petitioner had asserted. We have been informed by a recent letter that the FAA had no objection to facilities of 100 kW power at 282 meters (923 ft.) HAAT.

[3] *Anamosa and Iowa City, Iowa*, 46 F.C.C. 2d 520 (1974); 60 F.C.C. 2d 1041 (1976).

[4] Moreover, we do not believe, as petitioner implies, that a question arises because there was no specific statement that the case was a routine one.

[5] By virtue of § 1.429(i) of the Commission's rules, the Bureau has authority to dismiss as repetitious a second petition for reconsideration in the Bureau's area of responsibility. See §§ 1.429(a) (Note); 1.420 and 0.281(b) (6) of the Commission's rules. See also § 1.106(k) (3). If at that point a petitioner wishes to offer any new information or arguments not previously before the acting authority it may do so in a new petition for rule making. This was done here, and full consideration was given to the merits of petitioner's filing in the Memorandum Opinion and Order.

[6] The Motion to Strike CSI's petition, submitted by Tri-County Broadcasting, cites § 1.106 of the Commission's rules for its argument that CSI has violated the Commission's procedural requirements by directing its petition for reconsideration to the Commission. In addition the Motion asserts that under § 1.43(c) of the Commission's rules, separate pleadings should have been submitted for reconsideration of the Memorandum Opinion and Order of February 3, 1977, and of the Commission's action of February 26, 1975, and August 13, 1975. As to these contentions, CSI responds that §§ 1.404(c) and 1.115(a) apply and that § 1.43(c) was misstated. However, we find that both parties are incorrect as to the applicable provision because § 1.429(a) governs rulemaking proceedings and permits referral of petitions for reconsideration to the Commission. Thus, CSI is not barred from requesting Commission action. Regarding the requirement of filing separate pleadings, CSI is correct about § 1.43. The applicable provision is § 1.44 which does not require separate pleadings in the instant situation.

Malden and Cape Girardeau. The Commission is chiefly concerned in the assignment of FM channels that a distribution be made on a fair and equitable basis and be in accordance with well established priorities. Although we would favor the upgrading of an existing Class B station to Class C status, a different result might be necessary if the effect would be a net loss to the public. Here our concern focussed on the loss of Malden's only FM channel. CSI, pursuant to the principle announced in the Anamosa, Iowa, case of 1974, sought to overcome this concern by demonstrating that some area would receive a first aural service. However, a proper showing had not been submitted by February 3, 1977, the date of the Bureau action although CSI's petition in this proceeding originally was filed on June 17, 1976. The measurement data was not received until March 15, 1977, along with the petition for reconsideration, and FAA approval was not received until April 18, 1977. Without this data the Bureau properly found no basis for concluding that an upgrading of CSI's facilities would serve the public interest when the consequence would be to deny a first fulltime local aural service to Malden, Missouri.

8. Petitioner contends that its station has somehow been placed in a "degraded" status by having to operate with Class B facilities in a zone designated for higher powered Class C facilities and in competition with these stations. Further, it argues that the station should be restored to the Class C status it originally had when assigned to Cape Girardeau. However, it was the voluntary choice of CSI's predecessor to locate in Zone I thereby making it a Class B station. Then, pursuant to §§ 73.206(b)(2), 73.208 and 73.211(c) of the Commission's rules, the Commission gave the station the protection afforded a Class B assignment. When CSI purchased this facility, it had notice of the class of station and the location of the transmitter as well as the extent of the power and height then in use. With this in mind, there is no basis for considering the proposal as representing a restoration of Class C status, as this particular station never had such status. It was not the Commission that decided how this station was to compete with a Class C station at Cape Girardeau: that was a voluntary choice of the applicant. Nor, in any event, has it been demonstrated that the station cannot survive in competition with Station KGMO-FM, which we note is itself operating at Cape Girardeau with facilities equivalent to those of Class B stations—28.5 kW at 52 meters (170 ft.) HAAT.[1]

9. We do not believe, as petitioner argues, that having a Class C and a Class B station licensed to the same community can be viewed as being in conflict with our intermixture policy. That policy is designed to distribute certain classes of channels on an equitable basis, taking into account various factors in chosing between a Class A or a Class B/C channel. Petitioner claims that the relief it seeks is similar to that provided in the Anamosa, Iowa, case where the Commission avoided intermixture of a Class A assignment and a Class C assignment, at Iowa City, Iowa, by returning its second Class C channel and by deleting the Class A assignment which had been assigned as a substitute for the second Class C channel. This was done even though the result was that Anamosa could not have a first local FM service. Contrary to its assertions, petitioner's situation is not like the one involved in that case.[2] There is no policy against the kind of intermixture that allegedly affects petitioner. In fact, there is little reason to refer to it as intermixture at all since the frequency is referred to in the Commission's Rules as a Class B/C channel. See § 73.206. The Commission's intermixture policy is designed to avoid the combination in a community of a Class A channel with either a Class B or a Class C assignment. It was not intended to cover intermixture in the technical sense of a Class B and a Class C operation. It is only by choice of a transmitter site by the applicant that the actual class of station is established. The economic consequences of the allegedly unwise choice here must be assumed by the applicant and its successors in interest. Necessarily, the Commission needs to rely on this choice in taking other actions regarding that channel or adjacent channels.

10. Petitioner also argues that the Malden assignment was conditioned upon early activation of the channel, but no such condition was specified. Nor is there a policy requiring us to delete an assigned channel if not activated within a certain stated period. Moreover, the June 29, 1976, submission of an application for the Malden channel was not unreasonably late, and it did not prejudice the use of the channel elsewhere in the interim. In any event, no harm is involved since we are considering this petition seeking deletion of the Malden channel on its merits.

11. Although reconsideration of the previous action would have been repetitious, this did not preclude consideration of petitioner's proposal in terms of a new petition for a rule making where we could consider CSI's assertion of significant first aural service. Petitioner argues that the Bureau relied on erroneous assumptions as to the coverage of Station KMOX(AM), St. Louis, in its Memorandum Opinion and Order. In this regard, CSI asserts that Station KMOX(AM) does not provide 0.5mV/m service to the area in question that would purportedly be served for the first time by petitioner's upgraded facilities[3] and that this first service area would be of the following dimensions, depending on the height of petitioner's antenna, as follows (all are approximate figures and all assume 100 kW power):

Height above average terrain	Area	Population
207 m (680 ft)	346 km² (133 mi²)	700
275 m (900 ft)	572 km² (220 mi²)	1,750
336 m (1,110 ft)	770 km² (296 mi²)	2,100

12. After reviewing petitioner's engineering study, it appears that petitioner is substantially correct that the coverage of Station KMOX(AM) in the purportedly unserved area is less than 1 percent asuming facilities of 275 meters (900 ft.) HAAT with 100 kW power.[4] Its first aural service showing is defective nonetheless because it fails to depict Station KMMX(FM) at Poplar Bluff, Missouri (Channel 238) and Station KTJJ(FM) at Farmington, Missouri (Channel 253). The extent of coverage of the alleged first aural service area is approximately 35 percent from the Poplar Bluff station and 100 percent from the Farmington station assuming petitioner's proposed facilities of 100 kW power at 275 meters (900 ft.) HAAT. Thus, contrary to CSI's assertions, there would be no first aural or FM service to any area.[5] A second aural service could be provided to an area of 377 sq. km. (145 sq. mi.) and a population of 1,150 also assuming facilities of 100 kW and 275 meters (900 ft.) HAAT. However, the Commission does not believe that the provision of this service outweighs the first local aural nighttime service to be provided to Malden. The result is consistent with the Commission's announced priorities of service in the Anamosa, Iowa, case, supra at 524–525. (See and compare prioritites (2), (3) and (4).) Therefore, the Bureau's Memorandum Opinion and Order must be affirmed.

12. *Accordingly, it is ordered*, That the "Petition to Set Aside Broadcast Bureau's Memorandum Opinion and Order and For Commission Reconsideration of the Commission's Orders released February 26, and August 13, 1975" filed by Com-

[1] Station KGMO-FM has submitted an application (BPH-10024) to operate with 100 kW at approximately 105 meters (345 ft.) HAAT. With these proposed facilities its 60 dBu contour should extend 32 miles. Petitioner's present facility's 60 dBu contour extends 22 miles.

[2] Furthermore, there were other reasons for our action in Anamosa, Iowa. The Iowa City proponent of the second Class C channel was able to demonstrate that it would serve a substantial first FM service area and population. As will be discussed later, no such first FM service exists in petitioner's proposed coverage area. Thus, its reliance on Anamosa is misplaced.

[3] Petitioner has tendered an application for an increase in facilities to 100 kW power at approximately 275 meters (900 ft.) HAAT.

[4] The engineering study reveals a depiction of the 0.5 mV/m contour of Station KMOX(AM) as extending 75 miles. However, its measurement data indicate that the contour should reach 82 miles. At point 15 of measurements, the signal reads 0.51 mV/m at 81.3 miles. We also note that its data regarding Station KMOX was not offered in time to take into account earlier.

[5] There would be no first aural or FM service to any area even if petitioner's facilities were increased to 336 meters (1,100 ft.) HAAT.

munications Systems, Inc., on March 15, 1977, is denied.

13. *It is further ordered*, That this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meetings

In accordance with Pub. L. 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

Special Committee No. 71, "VHF Automated Radiotelephone Systems". Notice of 2nd meeting, Wednesday, August 24, 1977, 9:30 a.m. (Full-day meeting). Conference Room A-110, 1229-20th Street NW., Washington, D.C.

AGENDA

1. Call to order; Chairman's report.
2. Introduction of attendees; adoption of agenda.
3. Acceptance of SC-71 Summary Record.
4. Morning session (9:45 a.m.–11:45 a.m.). Presentation and discussion of automated VHF radio system characteristics.
5. Afternoon Session (1.45 p.m.–4 p.m.). Presentation and discussion of digital selective calling techniques as applicable to VHF automated systems.
6. Other business.
7. Establishment of next meeting date.

John J. Renner, Chairman, Advanced Technology Systems, Inc., 2425 Wilson Blvd., Arlington, VA 22201. Phone: 703-525-2664.

To comply with the advance notice requirements of Pub. L. 92-463, a comparatively long interval of time occurs between publication of this notice and the actual meeting. Consequently, there is no absolute certainty that the listed meeting room will be available on the day of the meeting. Those planning to attend the meeting should report to the room listed in the notice. If a room substitution has been made, the new meeting room location will be posted at the room listed in this notice.

Agendas, working papers, and other appropriate documentation for the meeting is available at that meeting. Those desiring more specific information may contact either the designated Chairman or the RTCM Secretariat. (Phone 202-632-6490).

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. Problems are studied by Special Committees and the final report is approved by the RTCM Executive Committee. All RTCM meetings are open to the public. Written statements are preferred but by previous arrangement, oral presentations will be permitted within time and space limitations.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

STATE ENERGY CONSERVATION PLANS

Negative Determination of Environmental Impact Re Rhode Island, Maine, Iowa, Oregon, Georgia, Michigan, Louisiana and Idaho Energy Conservation Plans

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation by the States of Rhode Island, Maine, Iowa, Oregon, Georgia, Michigan, Louisiana and Idaho of their State Energy Conservation Plans. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of these plans, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for these plans.

Single copies of the environmental assesments of the State Plans for Rhode Island, Maine, Iowa, Oregon, Georgia, Michigan, Louisiana and Idaho are available upon request from the FEA National Energy Information Center, Room 1406, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessments will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plans are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessments to Executive Communications, Box OM, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—(Name of State) Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., August 18, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., August 3, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77-22791 Filed 8-5-77;8:45 am]

SYNTHETIC NATURAL GAS

Availability of a Supplement to Indiana Gas Company Draft Environmental Impact Statement

AGENCY: Federal Energy Administration.

ACTION: Notice of availability.

SUMMARY: On December 23, 1976, the Federal Energy Administration (FEA) made available to the Counsel on Environmental Quality and the Public a draft environmental impact statement concerning the assignment of synthetic natural gas feedstocks to an Indiana Gas Company Synthetic Natural Gas plant (41 FR 56842). A public hearing was held on January 25, 1977, to receive comments from interested parties. The written comment period closed on April 8, 1977. As a result of comments received FEA determined that the draft environmental impact statement should be supplemented by inclusion of a conservation section.

DATE: Comments by September 19, 1977.

ADDRESS: Written comments to: Mr. Finn K. Neilsen, Acting Directors, Speciality Fuels, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Ed Vilade (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461, 202-566-9833; Finn K. Neilsen (Regulatory Programs), 2000 M Street NW., Room 6318, Washington, D.C. 20461, 202-254-9730; Joel Yudson (Office of the General Counsel), 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

The draft conservation section addresses energy conservation in two steps. First, it estimates the amount of gas which can be saved through conservation programs and the costs associated with the installation of energy conservation devices; second, it lists various possible means of implementing the identified conservation programs and discusses the practicality, effectiveness, and timeliness of such programs.

Single copies of the draft conservation section may be obtained from the National Energy Information Center, Room 1404, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the draft conservation section will also be available for public review in the FEA Freedom of Information Reading Room, Room 2107, Federal Building, 12th and

Pennsylvania Avenue NW., Washington, D.C. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

B. COMMENT PROCEDURE

Interested parties are invited to submit written comments with respect to the draft conservation supplement to the Indiana Gas Company draft environmental impact statement to Mr. Finn K. Neilsen, FEA, Room 6318, 2000 M Street, NW., Washington, D.C. 20461. Comments should be identified on the outside of the envelope and on the documents submitted to FEA with the designation "Draft EIS, Indiana Gas Company SNG Plant". Five (5) copies should be submitted. All comments and related information should be received by FEA by September 19, 1977, in order to ensure consideration.

Any information or data, submitted in response to the Indiana Gas Company draft EIS, considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only, in accordance with the procedures set forth in 10 CFR 205.9(f). Any material not accompanied by a statement of confidentiality will be considered to be non-confidential. FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

Issued in Washington, D.C., August 3, 1977.

J. PETER LUEDTKE,
Acting General Counsel,
Federal Energy Administration.

FEDERAL HOME LOAN BANK BOARD

[No. AC-43]

FIRST FEDERAL SAVINGS AND LOAN ASSOCIATION OF FRESNO

Post Approval Amendment of Conversion Application Final Action

AUGUST 3, 1977.

Notice is hereby given that on July 29, 1977, the Federal Home Loan Bank Board, as the operating head of the Federal Savings and Loan Insurance Corporation by Resolution No. 77-488, approved the amendment to the application of First Federal Savings and Loan Association of Fresno, Fresno, California, for permission to convert to the stock form of organization. The application to convert was approved on July 13, 1977, by Resolution No. 77-436. Copies of the application are available for inspection at the Office of the Secretary of said Corporation, 320 First Street NW., Washington, D.C. 20552 and at the Office of the Supervisory Agent of said Corporation at the Federal Home Loan Bank of San Francisco, 600 California Street, San Francisco, California 94120.

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary,
Federal Home Loan Bank Board.

FEDERAL MARITIME COMMISSION

PACIFIC WESTBOUND CONFERENCE AND THE FAR EAST CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement, accompanied by a statement of justification, has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement and the statement of justification at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement and the statement of justification at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and Old San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before August 29, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Wilkan Turk, Jr., Esq., Burlingham Underwood & Lord, One Battery Park Plaza, New York, N.Y. 10004.

Essentially, Agreement 8200, as amended, permits the Pacific Westbound Conference and the Far East Conference, both of whom are engaged in our trades from the United States to the Far East, to discuss and agree upon the rates and rules applicable to the transportation of cargoes in vessels of their member lines from ports of the United States to various Far Eastern ports (overland common point cargoes excluded).

Agreement 8200-5, the subject of this notice, would amend that arrangement to permit discussion and agreement as well on the rates and rules applicable to the transportation of cargo from points in the United States (including overland common point and mini-landbridge cargoes) to points overseas in the Far East.

By order of the Federal Maritime Commission.

Dated: August 3, 1977.

JOSEPH C. POLKING,
Acting Secretary.

FEDERAL POWER COMMISSION

[Docket No. ER77-518]

ALABAMA POWER CO.

Notice of Filing of Initial Rate Schedule

AUGUST 2, 1977.

Take notice that Alabama Power Company (Alabama) on July 18, 1977, tendered for filing an Agreement with Dixie Electric Cooperative, Inc., intended as an initial rate schedule. Alabama indicates that the filing is for the proposed Cecil delivery point of the Dixie Electric Cooperative, Inc. Alabama further indicates that the delivery point will be served at the Company's applicable revision to Rate Schedule REA-1 incorporated in FPC Electric Tariff Original Volume No. 1 of Alabama Power Company as allowed to become effective, subject to refund, by Commission order in FPC Docket No. ER76-659.

According to Alabama, copies of the filing were served upon Dixie Electric Cooperative, Inc., and its Agent, Alabama Electric Cooperative.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22662 Filed 8-5-77;8:45 am]

[Docket Nos. ER77-493 and ER77-480]

BLACKSTONE VALLEY ELECTRIC CO. AND MONTAUP ELECTRIC POWER CO.

Order Accepting for Filing, Suspending Proposed Increased Rates and Consolidating Proceedings

JULY 29, 1977.

On July 1, 1977, Blackstone Valley Electric Company (Company) tendered for filing cost of capital computations for use in determining transmission rentals to Montaup Electric Company.[1] The filing would increase the Company's revenues by $21,612, or 4.45 percent, based on the 12-month period ending December 31, 1977.

The Company proposes an effective date of August 1, 1977, with a five month suspension until January 1, 1978 in order to comply with a prior settlement agreement. It also requests consolidation of this docket with docket No. ER77-480.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges has not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges tendered by the Company on July 1, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charge tendered by the Company on July 1, 1977, are hereby accepted for filing.

(B) The proceeding in Docket No. ER77-493 is hereby consolidated with the proceeding in Docket No. ER77-480 for purposes of hearing and decision.

(C) Pending hearing and decision thereon, the increased rates and charges tendered by the Company are hereby suspended and the use thereof deferred until January 1, 1978, when they shall become effective subject to refund.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22674 Filed 8-5-77;8:45 am]

[1] Rate Schedule Designation to be provided to the Company by future letter.

[Docket No. ER77-525]

BOSTON EDISON CO.

Notice of Tariff Filing

AUGUST 1, 1977.

Take notice that Boston Edison Company (Edison) on July 25, 1977, tendered for filing a letter agreement between itself and Montaup Electric Company (Montaup) providing for the use of certain transmission facilities. Edison and Montaup, which has filed a certificate of concurrence, have requested that the agreement be allowed to become effective as of December 1, 1975, and therefore request waiver of the Commission's notice requirements.

Edison indicates that the purpose of the agreement is to provide an independent contractual basis for the use of the facilities for the purposes described in subsections (a) through (e) of Section 13.2 of the New England Power Pool Agreement and for the movement of power from Montaup's Canal Unit No. 2 to the Montaup system and to provide an alternative path for the movement of power from Edison's Pilgrim Unit No. 1 to the Edison system. Edison states that it has served copies of the filing upon Montaup and upon the Secretary of the New England Power Pool Management Committee.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426 in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to ake protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. ER77-494 and ER77-480]

BROCKTON EDISON CO. AND MONTAUP ELECTRIC POWER CO.

Order Accepting for Filing, Suspending Proposed Increased Rates and Consolidating Proceedings

JULY 29, 1977.

On July 1, 1977, Brockton Edison Company (Company) tendered for filing cost of capital computations for use in determining transmission rentals to Montaup Electric Company.[1] The filing would increase the Company's revenues by $53,220, or 6.4 percent, based on the 12-month period ending.

The Company proposes an effective date of August 1, 1977, with a five month suspension until January 1, 1978, in order to comply with a prior settlement agreement. It also requests consolidation of this docket with Docket No. ER77-480.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges has not been shown to be justified and may be unjust, unreasonable, unduly discriminatory, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges tendered by the Company on July 1, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges tendered by the Company on July 1, 1977, are hereby accepted for filing.

(B) The proceeding in Docket No. ER77-494 is hereby consolidated with the proceeding in Docket No. ER77-480 for purposes of hearing and decision.

(C) Pending hearing and decision thereon, the increased rates and charges tendered by the Company are hereby suspended and the use thereof deferred until January 1, 1978, when they shall become effective subject to refund.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22673 Filed 8-5-77;8:45 am]

[1] Rate Schedule Designation to be provided to the Company by future letter.

[Docket No. ER77-514]

CENTRAL POWER AND LIGHT CO.

Tariff Change Application

AUGUST 1, 1977.

Take notice that Central Power and Light Company (Company), on July 12, 1977, tendered for filing proposed FPC Electric Tariff, Original Volume No. 1. The Company indicates that the proposed tariff would increase revenues from jurisdictional sales and service by $1,012,302 based upon the twelve (12) month period ending June 30, 1978.

The Company estimates its rate of return on its jurisdictional rate base, for sales for resale for the calendar year year ending December 31, 1976, to be 4.21%. The Company further states that such return is substantially below its weighted cost of capital, imbedded cost of debt and preferred stock, and therefore will not attract the capital for planned construction and expansion programs. According to the Company, the proposed rates are based upon a 10.89% overall rate of return.

The Company indicates that copies of the filing have been served upon the Company's jurisdictonal customers and upon the Public Utilities Commission of the State of Texas. The proposed effective date of the tariff is August 7, 1977, and the Company therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest the application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22656 Filed 8-5-77;8:45 am]

[Docket No. CI77-119]

CITIES SERVICE OIL CO.

Order Setting Matter of Hearing

JULY 29, 1977.

On November 19, 1976, Cities Service Oil Company (Cities) filed in Docket No. CI77-119 an application for Commission authorization to abandon a sale of casinghead gas made under a percentage sales contract. Such sale was made to Phillips Petroleum Company, the plant operator, pursuant to a contract dated April 30, 1959. Cities terminated said contract on February 10, 1976, pursuant to Section 15 of the contract; such termination was effective on April 30, 1976.

Cities' application was published in the FEDERAL REGISTER on December 16, 1976 at 41 FR 54991. Timely petitions to intervene were filed on January 3, 1977, by Phillips and by American Liberty Oil Company (American Liberty).

Phillips processes the subject gas at the Artesia Plant in Eddy County, New Mexico. American Liberty owns the plant and is the actual buyer of the gas. American Liberty then sells the gas to Transwestern Pipeline Company (Transwestern) under a contract dated January 29, 1960, as amended. American Liberty operates under a small producer certificate issued in Docket No. CS73-276.

In its application Cities asserts that abandonment should be permitted on the grounds that the contract between Cities and Phillips had expired, that Cities is desirous of processing the gas in its own plant, and that it is making "contractual arrangements" to sell and deliver its gas directly to Transwestern. By additional information filed April 29, 1977, Cities states that in the event its application for abandonment is allowed, Transwestern will receive more gas over the reservoir life than under the present arrangement.

In their petitions to intervene, Phillips and American Liberty request that Cities' application for abandonment be denied, or in the alternative, that it be set for formal hearing. They allege that allowance of the abandonment application will result in processing costs, increased costs for Transwestern, earlier abandonment of Cities' gas sales, and higher consumer costs. In addition, Phillips states that Cities' application should be denied since Cities has not negotiated a replacement contract covering the subject gas.

We find that a hearing is desirable to determine, on the record, whether the present or future public convenience or necessity will be served by permitting the abandonment proposed herein.

The Commission finds: Cities' application for abandonment filed in Docket No. CI77-119 should be set for hearing.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5, 7, 14, 15, and 16 thereof, and the Commission's Rules of Practice and Procedure, a public hearing under Section 7(b) of the Act shall be held in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, to determine whether the present or future public convenience or necessity permit the proposed abandonment.

(B) A Presiding Administrative Law Judge shall be designated by the Chief Administrative Law Judge for that purpose. Such Presiding Administrative Law Judge shall preside at the hearing in this proceeding, with authority to establish and change all procedural dates, and to rule on all motions (with the exception of motions to intervene, motions to consolidate and sever, and motions to dismiss, as provided in the Rules of Practice and Procedure).

(C) Cities and any party supporting Cities shall file their direct testimony and evidence on or before August 16, 1977. Phillips and American Liberty, and any party supporting Phillips and American Liberty, shall file their testimony and evidence on or before August 30, 1977. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, the Commission Staff, and all parties to this proceeding.

(D) The Presiding Administrative Law Judge shall preside at a hearing to be held on September 15, 1977, at 9:30 A.M., E.D.T. in a hearing room at the address noted in Ordering Paragraph (A).

(E) Phillips and American Liberty are permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission: *Provided, however,* That the participation of such interveners shall be limited to matters affecting asserted rights and interests as specifically set forth in said petitions for leave to intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22671 Filed 8-5-77;8:45 am]

[Docket No. CP77-299]

COLUMBIA GAS TRANSMISSION CORP.

Notice of Petition To Amend

AUGUST 1, 1977.

Take notice that on July 20, 1977, Columbia Gas Transmission Corporation (Petitioner), 1700 MacCorkle Avenue SE., Charleston, West Virginia 25314, filed in Docket No. CP77-299 a petition to amend the Commission's order of May 3, 1977 issued in the instant docket (57 FPC ------), pursuant to Section 7(c) of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) so as to permit the deleting of the second sentence from ordering paragraph (D)(2) and all of (D)(3) and permit the total volumes delivered to Stearns-Roger, Incorporated (Stearns-Roger) to be governed by the first sentence of ordering paragraph (D)(2), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner indicates that pursuant to the Commission's order of May 3, 1977, issued in the instant docket, it was granted authorization to transport up to 1,000 Mcf of natural gas per day for Stearns-Roger for use in the operation of Pilot Plant located near Homer City, Pennsylvania, which is being operated to conduct research on the experimental Bi-Gas process for producing pipeline quality gas from coal.

Stearns-Roger's only supplier of natural gas is Columbia Gas of Pennsylvania, Inc., (Columbia Pa.), it is indicated.

Petitioner states that construction of the Bi-Gas Pilot Plant was delayed and was not completed until May, 1976. Petitioner further states that in anticipation of its needs, Stearns-Roger gave Columbia Pa. an estimate of its natural gas requirements for the Pilot Plant in January of 1974, and that in April, 1975, Columbia Pa. allocated volumes averaging 405 Mcf per day to Stearns-Roger for Pilot Plant. It is stated that upon completion of the Pilot Plant, it was determined that substantially higher volumes than those previously allocated where needed for its operation, and that Stearns-Roger indicated that at least 667 Mcf per day on a noncurtailed basis was needed to operate properly the Pilot Plant. Applicant states that as a result of its needs, Stearns-Roger contracted to purchase not less than 7,000 Mcf nor more than 25,000 Mcf per month of natural gas from ONG Exploration, Inc., for a two-year period and Petitioner and Panhandle Eastern Pipe Line Company applied for authorization to transport up to 1,000 Mcf per day for Stearns-Roger. It is asserted that the difference between Stearns-Roger's contract demand from Columbia Pa. of an average of 405 Mcf per day and Stearns-Roger's estimated of the need for at least 667 Mcf per day could determine the success of the research and experimentation to be conducted in the production of pipeline quality gas from coal.

Petitioner states that the second sentence of ordering paragraph (D)(2) of the subject order contains the restriction that in no event should the total volumes delivered to Stearns-Roger exceed its contract demand with its suppliers, and that ordering paragraph (D)(3) of the subject order limits the volumes of gas transported hereunder to curtailment experienced by Stearns-Roger in the eligible Priority 2 or 3 categories. Consequently Petitioner requests that the Commission amend its order of May 3, 1977 and permit the total volumes delivered to Stearns-Roger to be governed by the first sentence of ordering paragraph (D)(2) which states as follows:

> The volumes of gas transported shall be utilized only for Priority 2 uses and Priority 3 uses which would be Priority 2 uses but for an interruptible contract as defined in Section 2.78 of the Commission's General Policy and Interpretations (18 CFR 2.78)

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22657 Filed 8-5-77;8:45 am]

[Docket No. RP76-159]

COLUMBIA GAS TRANSMISSION CORP.

Order Granting Petition for Continued Rate Base Treatment

JULY 29, 1977.

On September 30, 1976, Columbia Gas Transmission Corporation (Columbia) filed in Docket No. RP76-159 a petition requesting continued rate base treatment of a $60 million Alaskan advance payment made to BP Oil Corporation (BP Oil). Rate base treatment of the subject advance payment began, pursuant to Opinion No. 674 (50 FPC 1514), on November 14, 1971. Since BP Oil did not begin to repay the advance on or before November 14, 1976, the advance was excluded from rate base on that date in accordance with Opinion No. 674 which required that repayment begin within 5 years of initial rate base inclusion. Columbia's instant petition seeks rate base treatment to recommence on November 14, 1976, and to continue until the advance is fully recovered. For the reasons set out below, the Commission grants Columbia's request and allows continued rate base treatment. The rate base treatment authorized herein is subject to the Commission's final determination in Docket No. RP76-49 (the show cause proceeding instituted to investigate Alaskan advance payments made under agreements executed prior to December 28, 1973) and subject to all remaining conditions for continued rate base treatment as specified in Opinion No. 674 including the condition that all interest received on the advance be flowed through to Columbia's customers.

In Opinion No. 674, the Commission found Columbia's advance to BP Oil to be in the public interest and allowed Columbia to include the amount of the payment, $60 million, in rate base. The advance represents the first of three advance payments totaling $175 million made by Columbia to BP Oil in consideration of the right to call on BP Oil's Prudhoe Bay, Alaska, natural gas reserves. BP Oil, pursuant to the terms of the advance payment agreement, dated August 3, 1971, to repay the principal amount of the advances, plus interest, out of the revenues produced by the sale of oil from its Prudhoe Bay reserves. The interest on the amounts advanced is set at a rate equal to First National City Bank's best rate charged for 90 day loans to substantial and responsible commercial borrowers plus 0.5 percent. Columbia is currently accruing the interest due and is obligated to flow through all accrued interest to its jurisdictional customers upon payment thereof by BP Oil.

The rate base treatment of the initial BP Oil advance was allowed in Opinion No. 674 subject to three conditions: (a) Treatment would cease if repayment did not begin within five years from the date the amount of the payment was first included in rate base; (b) treatment would terminate and Columbia would be required to refund any revenues collected as a result of such treatment, if the advance payment did not result in gas production for the benefit of Columbia's customers; and (c) any portion of the advance not recovered within five years of the commencement of repayment, either through gas deliveries or other economic consideration, would be removed from rate base. The first condition together with BP Oil's failure to begin repayment within the specified period operated to terminate rate base treatment as of November 14, 1976. Columbia's present petition ensued.

In adopting the condition that repayment must commence within five years of initial rate base inclusion the Commission stated:

> In Order No. 465, in Docket No. R-411 (mimeo p. 8), we found that it was appropriate for the pipeline to remove an advance from Account 166 and rate base 5 years after its initial inclusion in Account 166 unless recoupment of the advance has commenced by gas deliveries or other economic consideration (unless otherwise directed by the Commission). We find that it would be appropriate to attach such a condition to this advance because it requires Columbia, should it desire continued rate treatment of the advance under these circumstances, to present the Commission with evidence to show: (1) Why recoupment of the advance has not commenced and (2) whether the project warrants continued rate base treatment of the advance with the attendant costs to Columbia's customers within the 48 States (50 FPC at 1517).

Accordingly, Columbia explains in its petition why the recoupment of the payment has been delayed and argues that substantial justification exists for continued rate base treatment.

Columbia states that delay in the construction of the Alyeska pipeline is primarily responsible for BP Oil's failure to begin repayment. Columbia states that it originally estimated that BP Oil would begin to repay the advance when operation of the pipeline began in early 1976. It is now anticipated that the Alyeska pipeline will commence operation in late July 1977. Columbia also notes that late initial payments will not necessarily delay the original schedule for recoupment of the total amount of the advance. Since BP Oil is to make payments equal to 50 percent of the revenues received on the sale of oil produced in Prudhoe Bay, and, since the price of this oil has risen substantially subsequent to the time of the original estimate, full recoupment still is expected in mid-1979.

Columbia states that continued rate base treatment is justified for three reasons: First, the payment to BP Oil will result in increased gas supplies which will benefit Columbia's customers. These new supplies will help to alleviate the severe gas shortage now experienced on Columbia's system. Second, the rights to BP Oil's Prudhoe Bay reserves, acquired as consideration for the advance payment, were obtained at a relatively low cost. These cost savings were realized because of a unique provision in the advance payment agreement between Columbia and BP Oil which requires BP Oil to pay interest on all monies advanced. Thus, Columbia estimates that in 1976 its customers paid $26.5 million in rates attributable to rate base treatment for the total amount of advance payments made to BP Oil ($175 million) but that this amount is offset by $16.5 million of interest accrued during 1976. The interest accrued eventually will be passed through to Columbia's customers. Third, Columbia asserts that termination of rate base treatment would have an adverse effect upon Columbia's ability to finance other new gas supply projects. It is alleged that Columbia Gas System, Inc., Columbia's parent company, will require $4 billion over the next 10 years for supply-related projects. Columbia argues that termination of

rate base treatment would require additional financing and add to an already serious financial burden.

Based on a review of the instant petition, the Commission finds that Columbia has justified continued rate base treatment of the BP Oil advance payment pursuant to the requirements set out in Opinion No. 674 (50 FPC at 1517). Continued rate base treatment shall therefore be authorized. The Commission's action however, is limited to the facts of the subject advance and should not be construed as determining any of the issues raised by the show cause order issued on December 31, 1975, in Docket No. RP76–49. The December 31, 1975, order required four pipelines, including Columbia, to show cause why rate base treatment should not be terminated for Alaskan advances made pursuant to contracts executed prior to December 28, 1973, the effective date of Order No. 499, and why appropriate refunds should not be ordered. Since the show cause order encompasses the subject advance payment to BP Oil and since the Commission has not taken final action in Docket No. RP76–49, the authorization granted by this order shall be subject to the Commission's final determination in Docket No. RP76–49. The carrying charges received by Columbia pursuant to this order shall be subject to disallowance and refund in the event required by final Commission order in Docket No. RP76–49.

Moreover, the Commission in its review of the instant petition, has had occasion to reexamine Opinion No. 674, the order authorizing initial rate base treatment of the $60 million advance, and has determined that that order requires clarification insofar as it pertains to the proper accounting treatment of the BP Oil advances. As explained above, the BP Oil advance payment agreement, dated August 3, 1971, controlling the instant advance and subsequent advance payments made by Columbia to BP Oil for a call on Alaskan reserves, requires that interest be paid by BP Oil on the outstanding principal of the advance. Opinion No. 674 could be interpreted to require Columbia to credit Account No. 166 with the interest accrued on the advance as well as principal repayments. However, account No. 166 is a rate base account and should only reflect the principal amount of the advance payments. Accordingly, the Commission shall clarify Opinion No. 674 to require Columbia to record all interest receivable by Columbia from BP Oil in Account No. 186 and to credit Account No. 242 with all interest applicable to periods during which the advances were included in Columbia's rate base. This latter Account, 242, represents the amount to be flowed through to Columbia's customers.[1] Further, the Commission requires, as a condition of the rate base treatment allowed herein, that the interest on the $175,000,000 total amount of the advances to BP Oil be flowed through to Columbia's customers as soon as possible after receipt of such interest payments by Columbia.

Columbia may, as a means of flowing through the interest to its customers, apply the interest received to Account No. 191, unrecovered purchased gas costs, or may utilize some other, equivalent method of flow through. Columbia shall be required to submit a proposed plan for the flow through of interest subject to Commission review and approval.

Public notice of Columbia's petition, issued on October 12, 1976, provided for protests or petitions to intervene to be filed on or before October 28, 1976. No petitions to intervene, notices of intervention or protests to the granting of the petition have been filed.

The Commission finds: It is necessary and proper in the public interest in carrying out the provisions of the Natural Gas Act that Columbia be allowed to continue rate base treatment of the subject $60 million advance to BP Oil subject to the conditions specified herein.

The Commission orders: (A) Columbia is authorized to receive continued rate base treatment for its $60 million advance payment made to BP Oil. Rate base treatment shall recommence on November 14, 1976, and shall continue until the advance is repayed or until the conditions specified in Paragraphs (B) and (C) below operate to terminate rate base treatment, whichever is earlier.

(B) Opinion No. 674 issued November 6, 1973 (50 FPC 1514) shall remain in full force and effect except insofar as it requires, as a condition for continued rate base treatment, repayment of the advance to begin five years from the start of rate base inclusion. Specifically, rate base treatment remains subject to the conditions specified in Opinion No. 674 that gas be made available to Columbia's customers and that recoupment be completed within five years after commencement of repayment.

(C) The carrying charges authorized by this order are subject to disallowance and refund in the event required by final order of the Commission in Docket No. RP76–49.

(D) Within 30 days from the issuance of this order Columbia shall submit a plan, to be approved by the Commission, to ensure that all interest payments received from BP Oil will be promptly flowed through for the benefit of Columbia's customers.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.[2]

LOIS D. CASHELL,
Acting Secretary.

[FR Doc 77-22672 Filed 8-5-77;8:45 am]

[1] The Commission's review of Columbia's 1976 annual report, Form 2, indicates that Columbia has been using this method of accounting.

[2] Commissioner Smith, dissenting, will have a separate statement to be issued later.

[Docket No. ER77–510]

COMMONWEALTH EDISON CO.

Filing First Amendment to Interconnection Agreement

AUGUST 2, 1977.

Take notice that Commonwealth Edison Company (Edison) on July 11, 1977, tendered for filing proposed First Amendment to the Interconnection Agreement dated June 21, 1967 between Iowa-Illinois Gas and Electric Company (Iowa) and Edison.

Edison states that the parties propose to modify the charges and make other revisions in Service Schedules A, B and D of the Interconnection Agreement.

Edison proposes an effective date of August 12, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22659 Filed 8-5-77;8:45 am]

[Docket No. ER77–367]

DUKE POWER CO.

Supplement to Electric Power Contract

AUGUST 1, 1977.

Take notice that Duke Power Company (Duke) tendered for filing on July 14, 1977, a supplement to the Company's Electric Power Contract with South Carolina Electric Gas Company which is proposed to become effective on June 20, 1977. Duke indicates that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FPC No. 262.

Duke indicates that its contract supplement was made at the request of the customer and with agreement obtained from the customer, and provides for an increase in capacity at Delivery Point No. 1 and Delivery Point No. Temp. No. 1. Duke further indicates that the supplement also includes an estimate of sales and revenue for the twelve months immediately preceding and for the twelve months immediately succeeding the effective date.

Duke requests waiver of the Commission's notice requirements to allow for an effective date of June 20, 1977.

Duke states that a copy of this filing was mailed to the South Carolina Electric and Gas Company and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22655 Filed 8-5-77;8:45 am]

[Docket No. ER77–488]

EL PASO ELECTRIC CO.

Order Granting Interventions, Denying Petition for Reconsideration, Denying Motion for Summary Disposition, Establishing Price-Squeeze Procedures, and Setting Prehearing Conference Date

AUGUST 1, 1977.

On July 1, 1977, El Paso Electric Company (El Paso) submitted for filing proposed increased rates and charges for jurisdictional sales to Rio Grande Electric Cooperative, Inc. (the Co-op), at the Dell City and Van Horn delivery points, and to Community Public Service Company (CPS).

On July 19, 1977, the Commission issued an order in this docket accepting for filing and suspending the effectiveness of the proposed rates and charges for four months, requiring the filing of revised rate schedules to exclude CWIP from its rate proposal, and calling for a public hearing.

Public Notice of El Paso's filing was issued on July 11, 1977, with all protests or petitions due on or before July 20, 1977. On July 19, 1977 CPS filed a petition to intervene in this proceeding. On July 20, 1977, the Co-op filed a Protest, Petition to Intervene, Petition for Reconsideration And Motion For Summary Disposition.

In its filing, the Co-op requests that the maximum five-month suspension period be granted in place of the four-month period called for in the July 19 order. In addition, the Co-op moves to have both CWIP and deferred fuel expenses summarily eliminated. It also protests the magnitude of El Paso's rate of return on common equity as well as El Paso's functionalization methods relating to Administrative and General Expenses (A&G) and to General Plant. The Co-op, additionally, raises a "price-squeeze" allegation and requests the opportunity to submit data requests on this issue pursuant to Commission Order No. 563. Finally, the Co-op requests that it be given notice and an opportunity to respond to El Paso's submission of revised rates, pursuant to the July 19 order, prior to their acceptance.

Since the Commission has already required El Paso to remove CWIP from its rate proposal in the July 19 order, we need not consider this allegation by the Co-op. The allegations involving deferred fuel expenses and the functionalization methods for A&G and General Plant are appropriate subjects for a public hearing which has already been established.

We will direct the Administrative Law Judge to convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the petitioner's request for data necessary to present its prima-facie showing on the price-squeeze issue. In addition, we shall require the Secretary to issue a public notice when El Paso submits its revised filing.

Review of the Co-op's allegations reveals no contention which would support an increase in suspension period from four months to five months.

The Commission finds: (1) Good cause exists to accept the Petitions to Intervene of Community Public Service Company and Rio Grande Electric Cooperative, Inc.

(2) Good cause exists to establish "price-squeeze" procedures to effectuate the Commission's policy announced in Order No. 563.

(3) Good cause exists to establish dates for Staff to serve "top sheets" on all parties and to set a date for a prehearing conference.

The Commission orders: (A) The petitions to intervene of Community Public Service Company and Rio Grande Electric Cooperatives, Inc. are hereby granted; *Provided, however,* That participation of such intervenors shall be limited to matters set forth in the petitions to intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The Petition of Rio Grande Electric Cooperative, Inc. to reconsider the length of suspension period is hereby denied.

(C) Staff shall prepare and serve "top sheets" on all parties for settlement purposes on or before November 15, 1977. (See Administrative Order No. 157).

(D) A presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (see Delegation of Authority, 18 CFR 3.5(d)), shall preside at a prehearing conference in this proceeding to be held on November 23, 1977, at 10 a.m. in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Law Judge is authorized to establish all procedural dates and to rule upon all motions (except petitions to intervene, motions to consolidate and sever and motions to dismiss) as provided in the Rules of Practice and Procedure.

(E) The Administrative Law Judge shall convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the Co-op's request for data required to present its case, including a prima facie showing, on the price-squeeze issue. El Paso shall also be required to respond to the discovery requests authorized by the Administrative Law Judge within 30 days, and the Co-op shall file its case-in-chief on the price-squeeze issue within 30 days after El Paso's response.

(F) The Secretary shall issue a public notice of El Paso's filing of revised rate schedules to permit any comments, protests, or petitions by the intervenors in this proceeding.

(G) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP77–18]

EL PASO NATURAL GAS CO.

Order Approving Pipeline Rate Settlement

AUGUST 1, 1977.

On May 27, 1977, the Presiding Administrative Law Judge certified to the Commission for consideration and disposition a proposed Stipulation and Agreement which, if approved, would resolve all issues in the captioned proceeding. For the reasons stated below, the Commission finds that the proposed settlement agreement is reasonable and should be approved and adopted.

This proceeding originated on November 30, 1976, when El Paso Natural Gas Company (El Paso) tendered for filing proposed tariff sheets reflecting a general rate increase of approximately $146 million based upon a cost of service for twelve months ended August 31, 1976. By order issued December 29, 1976, the Commission accepted the filing and suspended its use for five months until June 1, 1977, upon condition that El Paso file revised tariff sheets prior to June 1, 1977. In compliance with that order El Paso, on May 2, 1977, tendered substitute tariff sheets which were accepted to become effective on June 1, 1977, by letter order issued May 26, 1977.

Pursuant to the Commission's order of December 29, 1977 in this docket, "top sheets" were served by the Commission Staff on April 1, 1977. Formal and informal conferences were then held by the parties. At the final conference held on May 26, 1977, El Paso submitted to the Presiding Administrative Law Judge a proposed stipulation and agreement

and a motion requesting Commission approval thereof.

Public notice of certification of the proposed agreement was issued on May 31, 1977, providing for comments to be filed on or before June 17, 1977. Comments in support of the settlement agreement have been filed by Arizona Public Service Company, The People of the State of California and the Public Utilities Commission of the State of California, Southern Union Company, the Southern California Gas Company, San Diego Gas and Electric Company, and the Commission Staff. No adverse comments were received.

The proposed agreement provides for a $57,650,717 reduction in El Paso's originally proposed cost of service resulting in unit rate reductions of 2.83 cents per Mcf in the production area sales rates and 6.08 cents per Mcf in the rates for sales from its transmission system. The proposed settlement cost of service, set forth in Appendix A, reflects an overall rate of return of 9.17 percent including a return on common equity of 14.75 percent. The proposed settlement capitalization is set forth in Appendix B.

The agreement provides that settlement rates shall be effective as of June 1, 1977 and that refunds of excess amounts collected by El Paso shall be made with interest calculated at 9 percent per annum. Article V of the agreement provides for future, additional refunds in the event that the amounts included in the settlement cost of service for four cost items are greater than the cost actually incurred by El Paso. These four cost items involve: (1) Increased royalty and production tax expenses; (2) a severance tax enacted by the Jicarilla Apache Tribe; (3) special overriding royalty payments; and (4) additional royalty and production tax expense occasioned by Opinion No. 770–A.

These additional refunds shall be made within 60 days after the settlement rates, as adjusted for purchase gas adjustments and other surcharges placed into effect pursuant to El Paso's FPC Gas Tariff, are superseded by a change in rates effected pursuant to Section 4 or Section 5 of the Natural Gas Act. If the total amount of such refunds, inclusive of interest, is less than $10 million the amount of such refunds shall be credited to El Paso's unrecovered purchased gas cost account (Account 191). If the amount of such refunds equals or exceeds $10 million, El Paso shall make a cash refund of such amount to its jurisdictional customers.

Article VI of the proposed agreement provides for rate adjustments to track eth jurisdictional portion of increases or decreases in El Paso's net amount of advance payments if that net amount rises above or falls below $16,826,608.

Based upon a review of the record in this proceeding including the settlement agreement itself and the pleadings, evidence, and comments submitted in support thereof, the Commission finds that the proposed settlement agreement represents a reasonable resolution of the issues in this proceeding in the public interest, and that the agreement should be accordingly approved and adopted, as hereinafter ordered.

The Commission orders: (A) The Stipulation and Agreement certified on May 27, 1977, is incorporated herein by reference and is approved and adopted.

(B) Within 10 days after the date this order becomes final and nonappealable, El Paso shall file revised tariff sheets in accordance with the settlement agreement and this order.

(C) As soon as practicable but not later than 30 days after the date this order becomes final and nonappealable, El Paso shall refund all amounts collected in excess of the settlement rates, together with interest at the rate of 9 percent per annum. Within 60 days after the date this order becomes final and nonappealable El Paso shall submit a report of the refunds and interest to the Commission.

(D) Any additional refunds for which provision is made in Article V of the settlement agreement shall be made in the manner prescribed in the agreement within 60 days after the date on which the settlement rates (as adjusted for purchase gas adjustments and other surcharges placed into effect pursuant to El Paso's FPC Gas Tariff) are superseded by a change in rates effected pursuant to Section 4 or Section 5 of the Natural Gas Act. Within 10 days after such date El Paso shall submit a report of the refunds and interest to the Commission.

(E) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims of contentions which may be made by the Commission, the staff or any other party or person affected by this order in any proceeding now pending or hereinafter instituted by or against El Paso or any other person or party.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP72–6]

EL PASO NATURAL GAS CO.

Order Denying Motion for Stay, Granting Rehearing, Modifying Curtailment Plan, Establishing Further Hearings, Consolidating Hearings, and Requiring Action To Obtain Remand of Record

JULY 29, 1977.

On June 1, 1977, we ordered the curtailment plan formulated in Opinion Nos. 697 and 697–A and clarified in orders issued December 24, 1975, October 15, 1976, and June 1, 1977, to be implemented July 1, 1977.

On June 30, 1977, the United States Court of Appeals for the District of Columbia Circuit issued its opinion on petitions for review of Opinion Nos. 697 and 697–A in *City of Willcox and Arizona Electric Power Cooperative Inc. v. FPC*, ——— F. 2d ——— (No. 74–2123, et al.). The decision requires modification of our holdings in Opinion Nos. 697 and 697–A in five specified areas:

(1) Fuel devoted to ignition and flame stabilization must receive Priority 2 status (Part II);

(2) Electricity generating turbines must not be classified with boilers, in Priorities 4 and 5, but are entitled to a higher priority (Part III);

(3) Attachments of new users up to December 19, 1974, must be incorporated in measuring uses by priority classification during the base period (Part IV);

(4) Pre-existing shortages of natural gas in California during the base period must be considered in determining California's volumetric entitlement (Part IV); and

(5) Gas used from storage facilities must be taken into account (i) to the extent its source has been from El Paso, (ii) in proportion to the actual end use of such storage gas, (iii) and with safeguards against according priority to gas both as it is pumped into storage and as it is withdrawn therefrom (Part V).[1]

On June 29, 1977, a motion for stay of the order issued June 1, 1977, was filed by the City of Willcox and Arizona Electric Power Cooperaive, Inc., ("AEPCO"), and on July 1, 1977, a telegram motion for postponement of the effective date of the tariff sheets implementing the plan was filed by Arizona Public Service Company ("APS"). Tucson Gas and Electric Company ("TG&E") filed a motion on July 8, 1977, to vacate the June 1, 1977, order insofar as it would result in placement of electric generating turbine fuel in Priority 5. On July 15, 1977, APS filed a document joining in TG&E's motion and modifying its earlier motion by indicating that it now only seeks reclassification of gas turbine fuel requirements.[2]

Objections to any stay of the June 1, 1977, order were filed on July 5, 1977, by Pacific Gas and Electric Company and Southern California Gas Company. General Motors Corporation filed objections to a stay of implementation on July 14, 1977.

On July 1, 1977, AEPCO and APS also filed separate applications for rehearing of the June 1, 1977, order. AEPCO argues that rehearing must be granted and the effectiveness of the Opinion Nos. 697 and 697–A plan stayed because of the Court's determinations concerning the classification of fuel for gas turbines used to generate electricity and of storage injection volumes. APS suggests that the effect of the June 1, 1977, order on distributor load upgrading should be reconsidered.

THE EFFECTIVE PLAN

The motions and applications for rehearing do not raise matters compelling a postponement of implementation of the Opinion Nos. 697 and 697–A plans as an interim plan. The Court's decision, however, requires us to make modifications, some of which will be accomplished herein. Others will require the development of a more complete record before appropriate modifications can be directed.

The Court's decision does not prevent the Opinion Nos. 697 and 697–A plan from being implemented pursuant to the June 1, 1977, order. The Court has not vacated Opinion Nos. 697 and 697–A, and, in its discussion on the procedures for reviewing the environmental impact of the plan, the Court has recognized that this plan may be implemented as an interim plan. The Court specifically refrained from interfering with the effectiveness of the Opinion Nos. 697 and 697–A plan at this time:

> • • • [T]his plan is officially an interim one . . .
>
> • • • [W]e refrain from staying the applicability of the interim plan until the environmental statement has issued. . .[3]

The issuance of Order No. 697 (as modified by 697–A) should not be held up pending an environmental impact statement.[4]

The Court clearly intended to permit the Opinion Nos. 697 and 697–A plan to be effective with modifications. There is no indication that the defects noted by the Court are a bar to the plan's implementation as an interim plan, nor is there any indication of a time limit within which defects must be cured. We are herein making immediate changes in the plan and establishing proceedings and the other such steps in order to affect complete remedies of all the defects in the interim plan as quickly as possible. But, in the absence of a vacation of Opinion Nos. 697 and 697–A, and, in light of the overall approach of the Court, it is appropriate to conclude that the Court envisioned that the plan contained in these Opinions would be effective as an interim plan with its required modifications to follow post haste, or, in any event, before utilization as a permanent plan.[5]

Since we are prohibited by Section 19 (a) of the Natural Gas Act from modifying Opinion Nos 697 and 697–A as long as the record in this proceeding remains with the Court, we will direct the Solicitor to seek remand of the record for the purpose of implementing the modifications set forth below.

MODIFICATIONS

Implementation of some of the modifications required by the Court's decision cannot be accomplished without further hearings. As to the first required modification, we have already required flame stabilization and ignition fuel to be placed in Priority 2 until a Commission decision is issued in the ongoing hearings (Phase) in this docket concerning the appropriate classification of such use.

The second modification, reclassification of electricity generating turbine fuel from Priorities 4 and 5, we will implement by hereby directing that such requirements be maintained in Priority 3, as requested by AEPCO, until further order of the Commission. We will direct that further hearings be held to develop a record in this proceeding to determine whether such requirements should be reclassified from Priority 3.

The third modification, incorporation of the requirements of new residential and commercial users attached up to December 19, 1974, in the base period requirements, shall be accomplished by requiring El Paso to amend its base period requirements and the end-use profiles by incorporating such additional requirements. We are limiting our order to the incorporation of only new high priority requirements, rather than all requirements, since it is apparent from the Court's discussion that its decision regarding changing the base period requirements was in response to the arguments of TG&E and APS that they had added 3,000 residential and commercial users between October 31 and December 19, 1974.[6]

In accordance with the Court's directive,[7] there will be further hearings to determine whether APS and Tucson Gas and Electric ("TG&E") were dilatory in obtaining state permission to reject new customers after December 1974, and whether an additional base period adjustment should be permitted these customers for attachments occurring between December 19, 1974, and the date of state action.

The fourth modification, consideration of pre-existing shortages of natural gas in California during the base period, cannot be implemented without obtaining additional information concerning the cause and extent of the pre-existing shortages. We, therefore, will require this matter also to be explored in further hearings in this docket. These hearings should develop a record on the following questions:

(1) What was the level of natural gas service by California distributors served by El Paso during the two years prior to initial curtailments by El Paso and the level of service during the period subsequent to the commencement of curtailments;

(2) What new requirements by customers were attached (new customers or expanded service to existing customers) during the two years immediately preceding the commencement of El Paso's curtailments;

(3) To the extent that there were unserved requirements attached during the two year

[9] Id., p. 29

period preceding the commencement of El Paso curtailments, were such attachments the result of an attachment policy of the individual El Paso customers and/or state authorities, and were such attachments predicated upon the receipt of any new or increased gas supplies;

(4) What was the level of natural gas deliveries from all sources other than El Paso (separately identified by source) to California customers of El Paso during the two years prior to the commencement of curtailment by El Paso;

(5) Were there any reductions in deliveries of natural gas to California customers of El Paso from California intrastate natural gas production sources during the two years prior to El Paso's curtailment; if there were such reductions, what was the amount of such reductions and were such reductions the result of cut-backs to gas producer gas contract minimum delivery amounts by customers of El Paso or their suppliers or the result of declining gas reserves?[10]

The foregoing questions, however, do not establish the bounds of inquiry into pre-existing California shortages. The Administrative Law Judge presiding in the hearing on the preexisting California shortages may require and/or receive other evidence relevant to the inquiry.

The last modification, the treatment of customer storage injection volumes, is particularly troublesome since we have taken substantial pains in clarifying orders to establish a prioritization arrangement which we believed was most equitable. Our method is based on allocating storage injection volumes received from El Paso on the basis of the proportional end-use of all gas by the receiving customer during the winter base period. This method does not permit double accounting of storage volumes (counting it in the base volumes as in a priority both on injection and withdrawal).[11] The Court, however, has required that prioritization of storage volumes must be "in proportion to the actual end-use of such storage gas". (Emphasis added). The Court has also required that there must be "safeguards" against double accounting of the gas.

In order to satisfy this last Court-required modification, it is apparent that we will have to attempt that which we have previously believed well-nigh impossible: tracing storage gas from El Paso into its customers' storage then back out to an ultimate end-use. Further hearings to devise a methodology for allocating customer storage injection gas deliveries by El Paso which meet the Court's requirements, therefore are necessary.

In the proceeding in Docket No. RP76–38, we have required an inquiry to be conducted to determine the end-use of storage injection volumes improperly delivered by El Paso to its California customers during the effective period of the Opinion Nos. 634 and 634–A interim plan, December 15, 1972, until terminated by Commission order issued on June 21, 1977.[12] While the purpose of this inquiry differs from our object in the remanded storage portion of the proceedings in Docket No. RP72–6, a consolidation of the hearings nevertheless is appropriate. Since both inquiries involve tracing of the use of storage volumes delivered by El Paso and since the base period for the permanent plan as now expanded by the Court (October 31, 1971, to December 19, 1974) and the period in question in the proceedings in Docket No. RP76–38 overlap for the period December 15, 1972, to December 19, 1974, there exists a common question of fact: what end-use was made of the storage injection volumes delivered by El Paso during the period December 15, 1972, to December 19, 1974? The consolidated hearings, however, should be expanded beyond the confines of the common factual question to include an investigation of the use of storage injection volumes by El Paso's California customers back to the commencement of the Opinion Nos. 697 and 697–A plan base period and a determination of the best method of allocating storage injection volumes under the Opinion Nos. 697 and 697–A plan which also conforms to the Court's requirements.[13]

El Paso-delivered storage injection volumes play an important part in the service of natural gas to California markets. Since the previously effective Opinion Nos. 634 and 634–A plan contains no provision for storage injection volumes, we cannot temporarily revert to the storage feature in that plan while awaiting the results of the consolidated hearings on storage. We see no feasible alternative but to continue the treatment of storage volumes developed in the orders clarifying Opinion No. 697 and 697–A until a determination is made on the remanded storage question. Parties receiving storage injection volumes under the presently effective plan are warned that receipt of such volumes will be subject to possible future adjustment in storage injection volume authorized for delivery and to a payback obligation for amounts in excess of the volumes authorized under the storage injection allocation methodology to be developed.

APS's arguments in its application for rehearing concerning load upgrading are, in essence, a recasting of assertions contained in AEPCO's application for rehearing of the October 15, 1976, order and in El Paso's tariff filing made in compliance with the October 15, 1976, order which we found meritless in the June 1, 1977, order at p. 14–15. As such, APS is seeking a rehearing of a denial of rehearing which is not permitted by our Rules of Practice and Procedure.

The Commission finds: (1) Good cause has not been shown for staying the effective date of the tariff sheets accepted and placed in effect July 1, 1977, by our order issued June 1, 1977.

(2) The curtailment plan developed in Opinion Nos. 697 and 697–A and clarified in orders issued December 24, 1975, October 1976, and June 1, 1977, should be modified pursuant to the decision in *City of Wilcox and Arizona Power Cooperative, Inc.* v. *F.P.C., supra*, in the manner indicated above.

(3) The decision in *City of Wilcox and Arizona Power Cooperative, Inc.* v. *F.P.C., supra*, requires that further evidentiary hearings be held in this docket as set forth hereinafter.

The Commission orders: (A) The motion for stay filed by AEPCO and application for rehearing filed by APS are denied.

(B) The applications for rehearing filed by AEPCO, and the motion of TG&E are granted insofar as matters raised therein shall be the subject of further hearings ordered in Paragraphs (C) and (D) or are the subject of the modifications in the Opinion No. 697 and 697–A plan directed in Paragraph (E).

(C) As soon as may be practicable, hearings shall be convened before an Administrative Law Judge designated by the Chief Administrative Law Judge to determine the following matters:

(1) Whether requirements of gas turbine used to generate electric energy be reclassified from Priority 3;

(2) Whether APS and TG&E were dilatory in obtaining a moratorium on new attachments after the issuance of Opinion No. 697–A or whether the actions of APS and TG&E were excusable and reasonable justifying the inclusion in the base period volumes of requirements of customers attached during the period between December 19, 1974, and the imposition of a new attachment moratorium by state authorities;

(3) What was the source and extent of natural gas shortages in California which pre-existed curtailments on the El Paso System and to what extent should base period requirements (or other elements of the Opinion Nos. 697 and 697–A plan) be modified to take into consideration such pre-existing California gas shortages in order to assure a just and reasonable and not unduly preferential or discriminatory curtailment plan?

(D) Hearings shall also be held to investigate the end-use of storage injection volumes delivered by El Paso during the base period and to develop a method of allocating storage injection volumes received by customers from El Paso which will be consistent with the requirement of the Court that such gas be allocated on the basis of the actual end-use of the storage gas withdrawals originally supplied by El Paso and "with safeguards against according priority to gas both as it is pumped into storage and as it is withdrawn therefrom". Such hearings are hereby consolidated for hearing and decision with the proceedings in Docket No. RP76–38.

(E) Until further Commission order, the curtailment plan developed in Opinion Nos. 697 and 697–A and clarified in orders issued December 24, 1975, October 31, 1976, and June 1, 1977, shall remain in effect as prescribed therein; provided, however, that requirements of gas turbines used to generate electric energy shall be placed in Priority 3, ignition fuel and flame stabilization requirements shall remain in Priority 2, and requirements of new residential and commercial customers attached between October 31, 1974, and December 19, 1974, shall be included in base period requirements the foregoing modifications in the Opinion No. 697 and 697–A plan shall be effective as of the date of remand of the record by the Court. The Solicitor is hereby directed to seek remand of the record in this proceeding for the purpose of implementing these modifications.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Dockets Nos. CP74–314, CP76–327, and CI77–526]

EL PASO NATURAL GAS CO., ET AL.

Order on Rehearing, Ruling on Motions for Deferral of Proceedings, Granting Motion To Designate Additional Parties, Granting Late Interventions and Granting Motion To Delete Respondent

JULY 29, 1977.

In the matter of El Paso Natural Gas Co., Docket No. CP74–314; Northwest Pipeline Corp., Docket No. CP76–327; and Sun Oil Co., et al., Docket No. CI77–526.

On June 3, 1977, the Commission issued an "Order Instituting Show Cause Proceeding, Ordering Filing of Evidence and Ordering Hearing." Applications for rehearing were filed on July 1, 1977, by Amoco Production Co. and William G. Webb, et al.[1] Three other applications for rehearing or reconsideration were filed on July 5, 1977, by Phillips Petroleum Co., W. Watson LaForce, Jr., et al.[2] and "Designated Respondents."[3]

The "Designated Respondents" also moved this Commission on July 5, 1977, for deferral of these proceedings (1) pending a final decision by the courts on motions for reference to the Commission of the issue of whether the Oil and Gas Lease Sale Agreements are subject to the jurisdiction of the Commission now pending in the Court of Appeals for the Fifth Circuit, and (2) pending a decision on the rehearing of the June 3, 1977, order. Amoco Production Co. filed on July 8, 1977, a joinder in the motion for deferral of proceedings. El Paso and Northwest replied in opposition on July 13, 1977, and July 15, 1977, respectively.

We will deny the motion to defer these proceedings. This order rules on the applications for rehearing and there is no advantage to be gained by awaiting a referral of the issues to the Commission. While in the Commission's view the issues in the court litigation should be referred to the Commission, failure to do so will not be cause for terminating these proceedings. This proceeding is conducted under the Commission's own jurisdiction. On the other hand, if any issues are eventually referred by the Court of Appeals there is benefit in moving along with this proceeding so the Commission will be sooner able to determine its position on any questions referred.

The Designated Respondents also contend the remedy issue should not be heard immediately with the jurisdictional issue. They also state they will be unable to prepare evidence on the remedy issue by August 19, 1977, in any event. The remedy issue should be tried together with the jurisdictional issue to save time in the long run should jurisdiction be determined so that appropriate refunds, if required, may be ordered significantly sooner. Also, records involved are already old. Further delay in collecting and submitting them for evidence would increase the possibility that at a later time they would be unavailable or unsupportable for any number of reasons due to the passage of time.

El Paso on July 15, 1977, moved for an extension of time to file evidence directed to the remedy issue. It notes certain other parties joined in the motion. Northwest also moved on July 15, 1977, for extension of time to file evidence. It proposed the same dates as El Paso, but seeks an extension of time for the filing of all of complainants' evidence. In order to assure sufficient time to the parties to discover necessary data and to prepare this evidence we will grant the motions to extend the time for filing evidence. Any further requests for alterations to the procedural schedule set forth herein shall be directed to the Administrative Law Judge designated to preside in this matter.

A motion for designation of additional respondents was filed on June 13, 1977, by Northwest Pipeline Corp. Northwest, successor in interest to twelve Oil and Gas Lease Agreements (PLA's) as a result of El Paso's divestiture of its Northwest Division, states it is now subject to demand from all PLA owners and moves that they be designated additional respondents, herein, in addition to the four interest owners designated in Appendix B of the June 3, 1977, order.[4] We will grant Northwest's motion and designate as Additional Respondents those persons set forth in Appendix B of this order.

We have also received untimely notices of intervention filed June 10, 1977, by the People of the State of California and the Public Utilities Commission of the State of California and June 22, 1977, by the State of Louisiana. Inasmuch as their untimely filings will not prejudice any party nor serve to delay these proceedings we will permit their untimely notices of intervention.

Late petitions to intervene were filed on June 22, 1977, jointly by Public Service Co. of Colorado, Western Slope Gas Co., and Cheyenne Light, Fuel & Power Co.; on July 18, 1977, by Colorado Interstate Gas Co.; and on July 21, 1977, by Cascade Natural Gas Corp. They are direct or indirect customers of Northwest and indicate a substantial interest in these proceedings not adequately represented by any other party, and a willingness to accept the record as it now stands. We will therefore permit their intervention.

Union Oil Co. filed a motion on June 21, 1977, to delete Alvin C. Johnson, Trustee, as a Respondent under GLA's 76, 78, and 349 because his production payment is now paid off and Union Oil Co. is solely responsible for any refunds that may be ordered. We will grant the motion.

We now turn to the applications for rehearing or reconsideration. The applications for rehearing raise several issues. The primary objection is that the Commission is barred by res judicata, collateral estoppel, and equitable estop-

---

[10] If declining reserves are the cause, data as to reserves and production for the four years prior to commencement of curtailment by El Paso, by area, should be introduced in evidence.

[11] "Order Denying Rehearing and Accepting Tariff Sheets", Docket No. RP72–6, issued June 1, 1977, p. 6–9.

[12] "Declaratory Order on Complaint and Order Instituting Investigation", Docket No. RP76–38, issued June 21, 1977, p. 12–13.

[13] It should be noted that the assumption that storage withdrawals on a given day, contribute proportionately to every customer served that day suggested at p. 13 of the order issued June 21, 1977, in Docket No. RP76–38, may require reconsideration in light of the Court's discussion of the function of storage gas at slip op., p. 37.

[1] The application states it is submitted on behalf of all the producer applicants involved in the consolidated proceedings in William G. Webb, et al., Docket Nos. G–6887, et al., except Ralph E. Davis, Docket No. CI62–1175, and C. J. Brannan, Jr., Docket No. CI67–628. A list of those remaining producers are attached hereto as Appendix A, for convenience.

[2] The additional Respondents joining with the petition are, Henry P. Isham, Jr., Robert T. Isham, Josephine C. Jacobson, J. Robert Jones, Nancy Laforce Keyes, Frederic P. G. Lattner, Trustee, Suzanne LaForce Baber, James C. Bard, Douglas N. Bard, Ralph A. Bard, Jr., Roy E. Bard, Jr., G. B. Brainard, Jr., Continental Illinois National Bank & Trust Co. of Chicago (Tr. No. 23949 and Tr. No. 23935 Oil and Min. Div.), Eleanor Isham Dunne, Charles W. Farnham, Elizabeth B. Farrington, Minnie A. Fitting, Robert D. Fitting, Nancy H. Gerson, Jay C. Halls, and Ruth N. Halls, Trustees, Cortland T. Hill, Elsie F. Hill, Louis W. Hill, Jr., Albert L. Hopkins, Jr., George S. Isham, R. S. MacDonald, A. MacDonald, and Northern Trust Co., Trustees U/W of N. S. MacDonald, Deceased, Nora R. Ranney, Catherine H. Pumi, Edward L. Ryerson, Jr., Sabine Royalty Corp., Shaw, Isham & Co., John I. Shaw, et al, Trustee, Elizabeth B. Simpson Trust, William Simpson Revocable Trust, Sydney Stein, Jr., Northern Trust Co., Trustee, U/W of John Stuart, R. Douglas Stuart, William P. Sutter, Ralph U. Fitting III, Executor of Estate of R. U. Fitting, Jr., Deceased, J. Robert Jones, Executor of Estate of R. U. Fitting, Jr., Deceased, Kay B. Towle, Frederick P. Webster, F. P. Webster Revocable Trust, Mary S. Zick, and David Waller Dangler (present interest owners, GLA No. 66).

[3] The "Designated Respondents" are those respondents that were defendants in *El Paso Natural Gas Co.* v. *Sun Oil Co.*, 426 F. Supp. 963 (W.D. Tex. 1977), appeal pending, No. 77–1462 (5th Cir.). These include Tenneco Oil Co., Continental Oil Co., American Petrofina Co. of Texas, Crown Central Petroleum Corp., Delta Drilling Co., Mr. and Mrs. Morris Misel, W. Watson LaForce, Jr., Atlantic Richfield Co., Sun Oil Co., Mobil Oil Corp., and Union Oil Co. of California.

[4] On July 15, 1977, Northwest filed a motion seeking Commission expedition in determining the designation of additional respondents to assist in its data request of all PLA interest owners.

pel from initiating an investigation at this time. Further, it is contended the order improperly shifts the burden of proof to respondents; that the doctrine of res judicata bars the Commission from reopening issues decided in the *Webb* proceeding;[5] that the Commission has prejudged the jurisdictional issue; and that the order erroneously assumes facts unsupported by evidence.

The Commission finds the doctrine of res judicata does not preclude the Commission from instituting this proceeding at this time. The Commission has the primary responsibility under the Natural Gas Act to determine its jurisdiction under that Act in the course of administering the provisions of the Act.[6] Also, the Commission has specific authority under section 14 of the Act to undertake investigations as it deems necessary for the purposes set forth in that section. The cases cited by petitioners, *Lee v. F.T.C.*, 113 F. 2d 563 (8th Cir. 1940), pg. 7, n. 19, did not involve, as here, jurisdictional questions. The Commission has the authority to determine the reach of its own jurisdiction as a primary responsibility. Indeed, to the extent a court fails to defer to an agency on the grounds of primary jurisdiction it may be subject to reversal. *J. M. Huber Corp. v. Denman*, 367 F. 2d 104 (5th Cir. 1966); *Weymouth v. Colorado Interstate Gas Co.*, 367 F. 2d 84 (5th Cir. 1966). On the other hand, we know of no case in which an agency has been precluded from determining the breadth of its own jurisdiction in the face of a pending Court proceeding.[7] To the contrary, the Commission has been affirmed in such a situation.[8]

Moreover, the judicial proceedings are not final but are pending appeal. Not only is the proceeding not yet final, the questions raised therein may yet be referred to this Commission for consideration. A decision which is not final is not res judicata in effect. *ITT v. Electrical Workers*, 419 U.S. 428, 445–447 (1975). *NLRB v. Plasterers Local Union*, 404 U.S. 116, 122 (1971).

Nor is the settlement agreed to by parties in the court proceedings in the Colorado state court dispositive of this Commission's jurisdiction in the matter. While the settlement reached was allegedly satisfactory to all parties to the proceeding, and the complaint initiating the proceeding was withdrawn, (apparently without judicial ruling on the issue involved here), that procedure does not serve to satisfy the Commission's responsibilities under the Natural Gas Act.

The Commission also finds the doctrines of collateral estoppel and equitable estoppel do not bind the Commission to the Districts Court's finding of jurisdiction. The Commission was not a party to the court proceedings at the District Court. There is therefore no judicial estoppel. Nor is there any showing that any Respondent had relied to its detriment upon the Commission's actions. The District Court proceedings were continuing in any event. District Court had before it a motion to refer the issue to the Commission under the doctrine of primary jurisdiction. The parties to that proceeding were well aware of that motion and of El Paso's complaint before this Commission and the Commission's possible jurisdiction in this matter. Moreover, the Commission's order of April 8, 1976, did not state the Commission would not undertake proceedings in this matter, only that it would not be orderly for the Commission to commence a separate proceeding concurrently without benefit of the District Court's decision. At no time did this Commission state it would defer to the final judgment of the District Court in determining the complaint pending before the Commission. Temporary deferral worked to the convenience of the parties. They were thus not required to try similar issues at the same time. It also worked to the convenience of both the parties and the Commission by permitting utilization of much of the record before the Court in the Commission's proceedings. As Northwest points out, the evidentiary record of the judicial action will be filed with the Commission to avoid duplication of effort. While the District Court record is useful for the Commission, the record will not be enlarged on appeal as to evidentiary facts and it is therefore more appropriate for the Commission to move forward now rather than await the outcome of the appeal. Thus, the extensive expenditures in the Court litigation need not be duplicated by the Commission procedures.

Moreover, the public will not be harmed by Commission consideration of this matter. It appears the consuming public would benefit from the exercise of jurisdiction and the ordering of refunds. We do not in any prejudge this matter but recognize the diversity of interests in this proceeding and point out the royalty owners are not the only members of the public to be considered in this matter.

Respondents also suggest the Commission procedures make a mockery of the District Court decision. We do not agree. El Paso in that proceeding sought injunctive relief for alleged violations of the Natural Gas Act. The Commission proceeding goes further. While jurisdictionality is an initial issue raised, the relief, if granted, will not be injunctive relief but, pursuant to the appropriate provisions of the Natural Gas Act, certificates would be obtained, and rate schedules would be filed with the Commission. These are all responsibilities of the Commission under the Natural Gas Act and this proceeding is to determine whether such steps are required. The Distraict Court dismissed the suit for its own lack of jurisdiction because it could not find the necessary violation under the Natural Gas Act required under Section 22 of that Act before its jurisdiction vests. We do not believe our jurisdiction and authority to undertake investigations pursuant to our responsibilities under the Natural Gas Act should be limited by the forums in which third parties choose to seek injunctive relief for alleged violations of the Natural Gas Act. We think it more appropriate, and we have so notified the Court hearing the appeal of the District Court's decision that the more appropriate course is for the court to impose the doctrine of primary jurisdiction, grant the motions pending before it, and defer the pertinent issues to this Commission because the issues, under the regulatory scheme of the Natural Gas Act, have been placed within the special competence of the administrative body. See, *U.S. v. Western Pacific R. Co.*, 352 U.S. 59, 63–64 (1956).

We turn to the objection that the order improperly shifts the burden of proof from complainants to respondents. These proceedings arise upon complaint filed by El Paso seeking remedial Commisison action upon its allegations that the Respondents' actions are jurisdictional in nature. The Administrative Procedure Act provides that the proponent of a rule or order has the burden of proof. 5 U.S.C. § 556(d). El Paso should therefore bear the burden of proof in this proceeding. We will therefore modify ordering paragraph (D) of the June 3, 1977, order to delete the language placing the burden of proof on the Respondents. The existing procedural schedule for the filing of evidence is consistent with this revision on the burden of proof.

Respondents' bases for their contentions that the Commission has prejudged the jurisdictional issue and that certain factual and legal statements may be final are no set forth. To the extent the burden of proof language is removed, those concerns may be alleviated. We can state that the questions have not been prejudged and the order makes no final binding determinations except to the extent that the Commission would not, of course, undertake a lengthy and costly proceeding such as this had the pleadings not, in the first instance, raised and left unanswered significant questions about the jurisdiction of the Respondents herein. Moreover, any facts deemed erroneously assumed by the Respondents are not final and binding on the parties but may be refuted during the hearing on the record upon which the Commission's decision must be based.

Finally, we turn to the objections that the *Webb* proceeding[9] is improperly re-

[5] *William G. Webb*, Opinion No. 640, 49 FPC 17 (1973).

[6] *California v. F.P.C.*, 369 U.S. 482 (1962), cited by "Designated Respondents" is inapposite. There the Court had primary authority to determine antitrust violations and the harm of unscrambling which the court foresaw by concurrent Commission action is absent here.

[7] See also, K. Davis, Administrative Law Treatise, § 18.11 (1958), "* * * a judicial decision is not likely to be res judicata for purposes of a later administrative decision." Vol. 2, p. 623.

[8] *Ashland Oil & Refining Co v. F.P.C.* 421 F. 2d 17 (CA6, 1970).

[9] *William G. Webb*, 49 FPC 17 (1973).

opened. Respondents correctly point out the issue as to the jurisdiction of the *Webb* respondents was considered and rejected by the Commission in Opinion No. 642. Nevertheless, more significantly, another reason for this proceeding was stated in our order. As we stated:

> More particularly, (the Commission) did not view the overriding royalty interest payments in light of the changed circumstances of today such as the demands by the overriding royalty owners for increased payments to market value levels.

Although the Commission at that time rejected the contention that the Commission should regulate the sales in accordance with the *Rayne Field* case,[10] the Commission did not have before it the changed circumstances of today. The doctrine of res judicata does not apply where changed circumstances appear. As noted in footnote below there are any number of reasons that may well dictate a change in result upon review of the position of the *Webb* Respondents in light of the greater context of all the Respondents obtaining overriding royalties under today's circumstances alleged by El Paso. See *The Connecticut Light and Power Co. v. F.P.C.*, No. 76-4212 (2nd Cir., decided June 27, 1977).

The Commission finds:

(1) The assignments of error and grounds for rehearing set forth in the applications for rehearing of the Commission's order of June 3, 1977, present no facts or legal principles which would warrant any change in or modification of such order, except as provided below.

(2) The notices of intervention of the People of the State of California and the Public Utilities Commission of the State of California, jointly, the State of Louisiana and the petitions to intervene of Public Service Co. of Colorado, Western Slope Gas Co. and Cheyenne Light, Fuel & Power Co., Colorado Interstate Gas Co. and Cascade Natural Gas Corps. have demonstrated an interest in the capitioned dockets which are not represented by any other party, their participation will not delay the proceeding and their participation may be in the public interest; therefore good cause exists for permitting the filing of the late petitions to intervene and notices of intervention.

(3) **The June 13**, 1977, motion of Northwest Pipeline Corp. for designation of additional respondents should be granted.

(4) The motions of El Paso Natural Gas Co., filed July 15, 1977, and Northwest Pipeline Co., filed July 15, 1977, for modification of the procedural schedule should be granted.

(5) The motion of "Designated Respondents" for deferral of proceedings, filed July 5, 1977, and joined by Amoco Production Co. on July 8, 1977, should be denied.

(6) The Commission's ordering paragraph (D) of the June 3, 1977, order should be modified.

(7) The motion filed July 21, 1977, by Union Oil of California for deletion of Alvin C. Johnson, Trustee, as a party Respondent should be granted.

The Commission orders:

(A) The People of the State of California and the Public Utilities Commission of the State of California, jointly, and the State of Louisiana, and Public Service Co. of Colorado, Western Slope Gas Co., and Ceyenne Light, Fuel & Power Co., jointly, Colorado Interstate Gas Co. and Cascade Natural Gas Corp. are permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however*, That the participation of such intervenors shall be limited to such matters affecting asserted rights and interests as specifically set forth in their petitions to intervene; and *Provided, however*, That the admission of said intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The applications for rehearing and reconsideration filed herein are denied, except as provided below.

(C) Ordering Paragraph (D) of the Commission's order of June 3, 1977, in this proceeding, is modified to delete the reference to burden of proof and the burden of proof herein shall be upon the complainants, El Paso Natural Gas Co. and Northwest Pipeline Corp.

(D) Northwest Pipeline Corp.'s motion for designation of additional Respondents is granted and the additional Respondents designated are listed in Appendix B, attached hereto, to the extent not already designated as Respondents.

(E) The motions of El Paso Natural Gas Co. and Northwest Pipeline Corp. for deferral of the procedural schedule are granted as follows:

Complainants' evidence to be filed	Sept.	6, 1977
Respondents' and staff's evidence to be filed	Oct.	6, 1977
All parties' rebuttal evidence to be filed	Oct.	21, 1977
Prehrial conference	Nov.	1, 1977

(F) The motion of "Designated Respondents" for deferral of proceedings, filed July 5, 1977, and joined by Amoco Production Co., on July 8, 1977, is denied.

(G) Alvin C. Johnson, Trustee, is deleted as a party Respondent to these proceedings as his interest may appear with respect to GI As 78, 218, and 349.

(H) The Commission.

[Docket No. ER77-516]

FLORIDA POWER CORP.

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 14, 1977, Florida Power Corp. (Company) tendered for filing a proposed interchange service agreement with Florida Power & Light Co. (FP&L).[1] The filing is intended to supersede an existing Letter of Operating Agreements and provides for: (1) Emergency Interchange Service, (2) Scheduled Interchange Service, and (3) Economy Interchange Service. The amount of rate increase (to FP&L) cannot be determined at this time since it depends on the interchange operations themselves. The Company proposes an effective date of August 14, 1977.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges in the agreement have not been shown to be justified and may be unjust, unreasonable, unduly preferential or discriminatory, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges in the agreement tendered by the Company on July 14, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges in the agreement tendered by the Company on July 14, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Company.

(C) Pending such hearing and decision thereon, the increased rates and charges in the agreement tendered by the Company are hereby suspended and the use thereof deferred until August 15, 1977, when they shall become effective subject to refund.

[1] Rate Schedule Designation to be provided to the Company by future letter.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22679 Filed 8-5-77;8:45 am]

GULF OIL CORP.

[Docket No. CI77-635]

Order Granting Temporary Transportation Authorization and Requiring the Filing of an Application for a Permanent Certificate of Public Convenience and Necessity

JULY 29, 1977.

By letter dated March 18, 1977, the Commission Staff requested Gulf Oil Corp. (Gulf) to respond to certain inquiries concerning the facilities in which Gulf has an interest and which can be utilized to bring Federal Domain gas reserves to an onshore point. One of the questions submitted to Gulf was whether it has ever used any gas produced in the Federal Domain and brought onshore through these facilities for its own use or the use of a subsidiary. In its April 7, 1977, response, Gulf states, inter alia, that it gathers gas produced from both State and Federal Domain leases in its Venice Plant gathering system for processing in its Venice Gas Plant prior to the delivery of the residue gas to interstate pipeline purchasers at the onshore location of the plant. Gulf notes that gas is utilized from this system for shrinkage and for fuel in compressing, processing, and dehydration prior to delivery of the residue gas. Furthermore, Gulf states that gas is utilized from this system for fuel in the Gulf Venice Refinery which is located within the eVnice Plant Complex. Gulf claims, however, that the volumes of gas produced and gathered in this system from leases in the State Domain have always been in excess of the volumes of gas used in the refinery.

Gulf transports Federal Domain gas onshore to its Venice Gas Plant for processing.[1] Along the way Gulf also picks up in the same line some of its State Domain gas. The Federal Domain gas and the State Domain gas are thus commingled for the remainder of the transportation to the Venice Gas Plant. After processing, some of the gas processed at the plant is sold subject to this Commission's jurisdiction.[2] However, a portion of the processed gas is used by Gulf for non-jurisdictional purposes in its refinery operations at Venice.[3] The question

[1] A map showing the facilities in question is contained in Appendix A hereto.

[2] In addition to the gas under discussion here, Gulf has other facilities which bring onshore gas and State offshore gas to its plant.

[3] Gulf states that the amount of gas used as fuel in its refinery does not exceed the amount of gas produced and transported from the offshore State Domain.

presented is whether Gulf is required under the Natural Gas Act in the above factual situation to obtain certificate authorization for the transportation of those volumes of gas utilized by it in its refinery operations.[4]

Where a producer is dependent upon an interstate pipeline for the transportation of gas reserved for the producer's own use, the Commission has the opportunity to review the use of such gas when the pipeline files for the authorization to transport the gas. The Commission has no such opportunity for review when the producer's facilities are used for the transportation. Therefore, the Commission has determined that where a producer brings Federal Domain gas onshore for its own use, it is necessary to require the producers to file for and receive certificate authorization for the transportation of any such gas.[5]

In the instant proceeding Gulf has alleged that Federal Domain gas is not utilized in the Gulf Venice Refinery in that the amount of State Domain gas collected in its Venice system always exceeds the amount delivered to the refinery. However, it is clear from the map designated as Appendix A that some of the State Domain gas transported to the Venice plant is commingled with the stream of gas originating in the Federal Domain. It is thus necessary to examine the jurisdictional consequence of this commingling.

The lead case on commingling theory is *California, et al.* v. *Lo-Vaca Gathering Co., et al.*, 379 U.S. 366 (1965). The Supreme Court held that where a pipeline has a contract with a producer providing that all gas purchased will be used solely as fuel in the pipeline's facilities (whether located within or outside the state where the gas was produced), such gas is in interstate commerce within the meaning of Section 1(b) of the Act. The court noted that Federal jurisdiction follows the flow of energy and that an engineering and scientific test should be used rather than a legalistic or governmental test when determining whether natural gas is in interstate commerce. Finally, the court held that a sale of gas which crosses a state line at any stage of its movement from wellhead to ultimate consumption is in interstate commerce.[6] Also on point is the *Florida Parishes* case, *Louisiana Public Service Commission* v. *FPC*, 359 F.2d 525 (1966). In that case gas to be sold intrastate was intermixed during transportation with gas to be sold interstate, and both types of sales were made from the commingled stream. The court held that the mixing of intrastate gas with a substantial portion of interstate gas for pipeline transportation in one commingled stream gave the Commission jurisdiction at the outset over the entire transaction.[7]

The facts presented in the Gulf situation clearly fall within the ambit of the holdings of these landmark decisions. Following the scientific test announced in the *Lo-Vaca* decision, the State Domain gas is commingled with the Federal Domain gas at some point before it reaches the Venice Plant. This is all that is required for Federal jurisdiction to attack. Just as in the *Florida Parishes* case the gas in the Gulf situation is produced and sold (or used in the producer's refinery) within the same state but is commingled with a stream of gas, some of which is destined for transportation to other states. It follows that the State Domain gas in the Venice Plant system is in interstate commerce.

It should be noted that this position is consistent with the recently decided Opinion No. 777[8] in which certain intrastate sales of gas which had been commingled with interstate gas were held to be non-jurisdictional. The crucial fact which distinguishes that case is that all of the commingled gas there was sold within the state of origin of the intrastate gas. The Commission noted that it is necessary for the gas to move across a state line before it becomes subject to the Commission's jurisdiction. Since none of the commingled gas left the state in which the intrastate purchases were made, such transactions were not subject to the regulation of the Commission. In the Gulf situation, however, it is clear that the commingled stream of gas will cross a state line because most of the gas is sold to interstate pipelines at the tailgate of the Venice Plant. Therefore, the rule set forth in Opinion No. 777 is inapplicable to these facts.

As noted above, the Commission requires that certificate authorization be granted for the transportation through producer-owned facilities of Federal Domain gas to an onshore point. It follows that the same requirement should apply to the State Domain gas in Gulf's Venice system which is, by virtue of commingling, in interstate commerce. Therefore, we will require Gulf to file for certificate authorization to transport any gas to its Venice Plant which is utilized in the Gulf Venice Refinery where the transportation of such gas involves the commingling of Offshore Federal Domain and State Domain gas. However, in order to avoid any disruption in the refinery's operations, we will grant Gulf temporary authorization to transport such gas in its Venice system for use in the refinery provided that Gulf files for a permanent certificate pursuant to Section 7 of the Natural Gas Act within 60 days from the date of this order.

Finally, we note that one of the lines involved herein is jointly owned by Gulf, Mobil Oil Corp. (Mobil), Pennzoil Offshore Gas Operators, Inc. (POGO), and Pennzoil Louisiana & Texas Offshore Inc. (PLATO). POGO and PLATO have been advised that they must receive certificate authorization to transport any gas for their own use through such line *Pennzoil Offshore Gas Operators, Inc., supra*. Accordingly, Mobil would also need certificate authorization to perform the same act.

The Commission finds: It is necessary for Gulf to apply for and obtain a certificate of public convenience and necessity under Section 7 of the Natural Gas Act relating to the transportation in the Venice system of Federal and commingled State Domain reserves onshore for ultimate use in the Gulf Venice Refinery.

The Commission orders: (A) Gulf is required to apply for and obtain a certificate of public convenience and necessity under Section 7 of the Natural Gas Act relating to the transportation to the Venice plant of Offshore Federal Domain and commingled State Domain reserves for ultimate use in the Gulf Venice Refinery.

(B) Gulf is hereby granted temporary authorization to transport Federal and commingled State Domain reserves to the Venice plant for ultimate use in the Gulf Venice Refinery to the extent such use does not exceed the amount produced and transported from the State Domain, provided that the filing required in Ordering Paragraph (A) above is made within 60 days from the date of this order.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-514]

GULF STATES UTILITIES CO.

Order Accepting for Filing in Part, Rejecting For Filing in Part, and Suspending Proposed Increased Rates

JULY 29, 1977.

On July 7, 1977, Gulf States Utilities Company (Gulf States) tendered for filing proposed rate schedule supplements which set forth changes in minimum bill-

[4] We recognize that in that order issuing a certificate to Gulf to sell gas to Texas Eastern Transmission Corporation pursuant to their warranty contract the Commission authorized Gulf to construct and operate "any facilities subject to the jurisdiction of the Commission necessary therefore." Texas Eastern Transmission Corp., et al., 30 FPC 1559 (1953). Gulf's certificate issued on April 6, 1964 in Docket No. CI63-123 authorizing sales to Southern Natural Gas Co. contains a similar provision (31 FPC 872). However, here some of the commingled gas which is transported by Gulf is being used for non-jurisdictional purposes in Gulf's Venice Refinery.

[5] Pennzoil Offshore Gas Operators, Inc., et al., Docket No. CI76-495, et al., order issued January 27, 1977. See also, Sabine Pipe Line Co. and Texaco Inc., Docket Nos. CP77-304 and CI77-329, orders issued July 7, 1977, and July 14, 1977.

[6] See also *FPC* v. *Arkansas Petroleum Corp.*, 379 U.S. 687 (1965).

[7] See also *Louisiana Power & Light Co.* v. *FPC*, 483 F.2d 623 (1973), in which the court found that the Hinshaw Amendment (Section 1(c) of the Act) does not relieve the Commission of jurisdiction over local branches of integrated interstate systems.

[8] Colorado Interstate Gas Co., Opinion No. 777, Docket Nos. CP75-323 and CP75-300, issued September 30, 1976.

ing demand provisions for firm power service to its Municipal and Cooperative customers.[1] The filing would increase Gulf States' revenues by $326,701, based on the period October, 1976 through June 1977.[2] Gulf States requests waiver of the notice requirements to permit effective dates of September 2, 1976, for the Cooperatives and December 1, 1976, for the Municipals.

As part of its filing, Gulf States proposes to revise billing demand provisions for service to members of the Sam Rayburn Dam Electric Cooperative[3] whose individual contracts are still in effect,[4] although no service is being rendered presently under the contracts. In its order of August 31, 1976, in Docket No. ER76-816, the Commission accepted Gulf States' proposed rate schedule changes to the members of the Sam Rayburn Dam Electric Cooperative with the exceptions of the schedules affecting Jasper-Newton Electric Cooperative and Sam Houston Electric Cooperative, who were found to have fixed-rate contracts. Since these contracts are still in effect, we shall not accept Gulf States' filing as to these customers.

Gulf States has not presented a convincing argument in support of its request for waiver of the notice requirements. We shall, therefore, deny the waiver.

A preliminary review of Gulf States' filing indicates that the proposed rate schedule supplements which would increase rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds: (1) Good cause exists to accept Gulf States' rate schedule supplements, with the exception of supplements affecting Sam Houston Electric Cooperative and Jasper-Newton Electric Cooperative, for filing and to suspend the proposed increased rates and charges tendered by Gulf States on July 7, 1977, as hereinafter ordered.

(2) Good cause does not exist to grant waiver of the notice requirements to permit a retroactive effective date of September 2, 1976, for the Cooperative customers and December 1, 1976, for the Municipal customers.

The Commission orders: (A) The proposed rate schedule supplements contain increased rates and charges, tendered by Gulf States on July 7, 1977, with the exception of those affecting Sam Houston Electric Cooperative and Jasper-Newton Electric Cooperative, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by Gulf States.

(C) Pending such hearing and decision thereon, the increased rates and charges tendered by Gulf States are hereby suspended and the use thereof deferred until August 8, 1977, when they shall become effective subject to refund.

(D) Waiver of the notice requirements to permit retroactive effective dates is hereby denied.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ES77-46]

INTERSTATE POWER CO.

Notice of Application

AUGUST 1, 1977.

Take notice that on July 21, 1977, an application was filed with the Federal Power Commission pursuant to Section 204(a) of the Federal Power Act by Interstate Power Company (Applicant), seeking orders authorizing the issuance and sale of $13,000,000 principal amount of the Company's First Mortgage Bonds ____% Series Due 2002 and of additional Common Stock of the par value of $3.50 per share.

Applicant is incorporated under the laws of the State of Delaware, with its principal business office in Dubuque, Iowa, and is engaged principally in the electric utility business in northern and northeastern Iowa, in southern Minnesota and a few small communities in Illinois.

Applicant proposes to issue and sell pursuant to competitive bidding in accordance with the requirements of Section 34.1(b) of the Commission's Regulations $13,000,000 principal amount of its First Mortgage Bonds ____% Series Due 2002 and, in addition, Applicant proposes to issue a sufficient number of shares of additional Common Stock to produce proceeds to it of approximately $14,000,000. It is presently proposed that sealed, written bids for the purchase of the additional Common Stock and First Mortgage Bonds will be opened at 4:30 p.m., New York Time, on September 12, 1977 and at 11 a.m. New York Time, on September 13, 1977, respectively, and that the results of such competitive bidding will be furnished to this Commission.

According to the application, the net proceeds (approximately $13,000,000 from the sale of the New Bonds and approximately $14,000,000 to be received by the Applicant from the issuance and sale of the shares of additional Common Stock) will be used by the Applicant to discharge a portion of the short-term indebtedness incurred by the Applicant which were used to pay for a portion of its construction program and for other purposes.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 19, 1977, file with the Federal Power Commission, Washington, D.C., 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22658 Filed 8-5-77;8:45 am]

[Docket No. ER76-823]

IOWA SOUTHERN UTILITIES CO.

Notice of Certification of Settlement Agreement

AUGUST 1, 1977.

Take notice that Presiding Administrative Law Judge Samuel Z. Gordon on July 21, 1977, certified to the Commission an offer of settlement submitted by Iowa Southern Utilities Company (Iowa Southern) in this proceeding.

There are no intervening parties in this case and the Presiding Judge indicates that Iowa Southern has represented that it believes the Commission Staff will support the Settlement Agreement.

Any person desiring to be heard or to protest said Settlement Agreement should file comments with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before August 22, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this Agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22667 Filed 8-5-77;8:45 am]

[Docket No. CP77-516]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Application

AUGUST 2, 1977.

Take notice that on July 22, 1977 Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP77-515 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to deliver certain quantities of natural gas to Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) for the account of The Peoples Gas Light and Coke Company (Peoples), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant indicates that it would deliver to Michigan Wisconsin for Peoples' account 1,000,000 Mcf during the period March 1 through October 31 of each year (the Summer Period) through 1994. Applicant states that it would make such deliveries at existing points of interconnection of the facilities of Michigan Wisconsin and Applicant at a daily rate of up to 5,250 Mcf along with an additional volumes of gas for compressor fuel equal to 5 percent of the volume delivered.

It is asserted that Applicant's deliveries would enable Peoples to fulfill its delivery obligations under the Transportation and Storage Agreement dated November 29, 1974, as amended August 7, 1975, between Peoples and Michigan Wisconsin, which inter alia is the subject of Michigan Wisconsin's application filed in Docket No. CP75-182. The proposed service would have the effect of making available additional winter gas to Peoples to meet high priority firm needs, resulting in some abatement of air pollution, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22653 Filed 8-5-77;8:45 am]

[Docket No. ER77-512]

NEW BEDFORD GAS AND EDISON LIGHT CO.

Filing of Clarification of Transmission Rate Schedule

AUGUST 1, 1977

Take notice that on July 11, 1977, New Bedford Gas and Edison Light Company (New Bedford) filed, pursuant to Section 205 of the Federal Power Act and the implementing provisions of the Commission's Regulations thereunder, a letter of clarification concerning its currently effective FPC Rate Schedule No. 21.

New Bedford indicates that by the clarification tendered, New Bedford proposes to explicitly recognize the rights of Montaup Electric Company, as a party to New Bedford's FPC Rate Schedule No. 21, to utilize certain of New Bedford's 345 KV transmission facilities to effect transfers of power owned by Montaup Electric Company by right of entitlement and to effect certain other transfers as permitted by Section 13.2(a) through (e) of the New England Power Pool Agreement dated September 1, 1971, as amended.

New Bedford requests that the Commission's notice requirements be waived pursuant to Section 35.11 of its Regulations in order to allow said filing to become effective December 1, 1975.

According to New Bedford copies of the filing have been served by New Bedford upon Boston Edison Company, Montaup Electric Company, New England Power Company and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed

---

[1] The Company tendered its filing as an alternative to a petition for rehearing in another docket on April 1, 1977. Rehearing was denied and these rate schedules were acknowledged as being submitted for filing. On April 29, 1977, the Secretary notified the Company of deficiencies in its filing by letter. The deficiencies were cured in the July 7, 1977 filing.

[2] See Attachment A for Rate Schedule Designations.

[3] Town of Vinton, La., City of Jasper, Tex., City of Livingston, Tex., and Liberty, Tex., Sam Houston Electric Cooperative, and Jasper-Newton Electric Cooperative. Sam Rayburn Electric Cooperative purchased power from Gulf States under a separate fixed rate contract which is unaffected by the instant filing.

[4] Gulf States filed notices of cancellation for the individual contracts on June 13, 1977, in Docket No. ER77-375.

on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22666 Filed 8-5-77;8:45 am]

[Docket No. ER77-511]

NEW YORK POWER POOL

Filing of Revised New York Power Pool Agreement

AUGUST 1, 1977.

Take notice that on July 11, 1977, the New York Power Pool, composed of Central Hudson Gas & Electric Corporation, Consolidated Edison Company of New York, Inc., Long Island Lighting Company, New York State Electric & Gas Corporation, Niagara Mohawk Power Corporation, Orange and Rockland Utilities, Inc., Rochester Gas & Electric Corporation, and Power Authority of the State of New York, filed revised New York Power Pool Agreement dated April 4, 1977. The New York Power Pool indicates that this Agreement will replace an existing agreement among the above listed organizations. The filing proposes that the Agreement become effective as of April 4, 1977, and waiver of the Commission's notice requirements is therefore requested.

The New York Power Pool states that the Agreement provides for charges for capability deficiency, supplemental capability and energy, emergency energy, and assured economy capability and economy energy, and a transmission compensation account is also established. The New York Power Pool further states that charges for capability deficiency and supplemental capability are based upon negotiation among the parties and economic studies. According to the New York Power Pool, charges for assured economy capability and economy energy and emergency energy are generally based upon incremental costs, and reflect the implementation of computer-operated statewide economic dispatch under the Agreement.

Any person desiring to be heard or to make any protest with reference to the New York Power Pool Agreement should, on or before August 12, 1977, file with the Federal Power Commission, 825 North Capitol Street NE., Washington, D. C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22661 Filed 8-5-77;8:45 am]

[Docket No. ER77-505]

NORTHERN INDIANA PUBLIC SERVICE CO.

Proposed Tariff, Supplement, and Cancellation

AUGUST 1, 1977.

Take notice that Northern Indiana Public Service Company (NIPSCO), on July 11, 1977, tendered for filing Fifth Revised Sheet No. 3 to its FPC Electric Tariff—Second Revised Volume No. 1, which NIPSCO indicates has been revised to include additional delivery points for the Town of Argos, Indiana, and White County Rural Electric Membership Corporation, Ulerich, Indiana. NIPSCO also tendered for filing Exhibit B–2, a supplement to the Service Agreement between NIPSCO and the Town of Argos, which NIPSCO indicates covers the supply of electric energy for resale at a delivery point located in Green Township, Marshall County, Indiana. NIPSCO also tendered for filing Exhibit B–10, a supplement to the Service Agreement between NIPSCO and White County Rural Electric Membership Corporation, which NIPSCO indicates covers the supply of electric energy for resale at a delivery point located in Jefferson Township, Carroll County, Indiana. NIPSCO requests an effective date of August 12, for the aforementioned proposed tariff and supplements.

NIPSCO also tendered for filing a notice of proposed cancellation of service at the No. 2 North Delivery Point of the La Grange County Rural Electric Membership Corporation, La Grange County, Indiana. NIPSCO requests waiver of the Commission's notice requirements to allow for an effective date of June 15, 1977, for said proposed cancellation.

According to NIPSCO copies of this filing have been served upon all customers concerned and the Public Service Commission of Indiana.

Any person desiring to be heard or protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-508]

NIAGARA MOHAWK POWER CORP.

Proposed Tariff Filing

AUGUST 8, 1977.

Take notice that Niagara Mohawk Power Corporation (Niagara) on July 11, 1977, tendered for filing as a rate schedule, a transmission agreement between Niagara and the St. Lawrence Power Company (St. Lawrence) dated July 7, 1977.

Niagara indicates that the service to be rendered by Niagara provides for the transmission of power and energy between (a) Niagara's 230 kV transmission connection at the International Border between Niagara Falls, Ontario and Niagara Falls, New York and (b) the transmission connection at the International Border between Massena, New York and Cornwall, Ontario.

Niagara further indicates that transmission capacity to be made available by Niagara to St. Lawrence will that amount scheduled on an hourly basis by St. Lawrence each day for the subsequent 24-hour period beginning at midnight. Niagara proposes an effective date of August 12, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22654 Filed 8-5-77;8:45 am]

[Docket No. RP76-89]

NORTHERN NATURAL GAS CO.

Order Accepting Stipulation and Agreement

AUGUST 1, 1977.

On April 22, 1976, Northern Natural Gas Company (Northern) tendered for filing proposed changes in its FPC Gas Tariff in this docket. The proposed changes would increase revenues from jurisdictional sales by $71,723,077 annually based on sales volumes and costs for the twelve months ended December 31, 1975, as adjusted for nine months of known and reasonable changes. On May 26, 1976, the Commission accepted for filing and suspended the effectiveness of these revised tariff sheets for the five month period to end October 27, 1976. That order also provided for a hearing and established the Top Sheet procedure. On October 15, 1976, Northern filed a motion for approval of Stipulation and Agreement to settle all the issues in the instant docket. The proffered settlement would reduce Northern's increased from $71.7 million for jurisdictional customers to $56.8 million. The Stipulation and Agreement contained four contested provisions. The Public Utilities Commission of the State of South Dakota (PUC) contests Section V of the agreement which provides that,

> Northern agrees that if its cumulative actual third party costs incurred for transporting Gulf Coast gas by October 31, 1977, are less than $4,793,000, it will refund to its jurisdictional customers the jurisdictional portion of the difference by which $4,793,000 exceeds the actual costs incurred. * * *

The PUC also contests that portion of Section II of the Settlement Agreement which provides for an increase in the weighted average straight line depreciation for all of Northern's property, except Gulf Coast, from 4.25% to 4.53%. The PUC also contests the change to a unit-of-production method of depreciation and the two portions of the Settlement dealing with advance payments. No other parties object to any portions of the Settlement.

We turn first to the Gulf Coast transportation cost question raised by PUC. PUC objects to the fact that Northern will include $4,793,000 for transporting Gulf Coast Gas during the test period, subject to refunds, for costs not actually incurred by third parties. The effect of this provision, according to PUC,

> is to cause customers to pay in advance for expenses not actually incurred. The resolution lies not in collecting money from the customers first, then refunding for the effects of actual experience at some later date, albeit with interest . . . A preferable way to treat the Gulf Coast transportation contingency would have been to either [sic] (i) required the Company to establish a realistic date for commencement of service from Gulf Coast and to reflect only the cost associated with that date in its rates or (ii) permit the Company to collect higher rates when it has established that Gulf Coast gas is flowing.[1]

Northern responds to this challenge by noting that,

> PUCSD does not question the amount of these transportation costs. The agreement merely affords Northern the only practical vehicle which will enable it to recover these costs as they are incurred. If they are not incurred, the customer is protected by means of Northern's refund obligation. In either event the customer will pay no more than the actual costs of bringing Gulf Coast gas to Northern's market area.[2]

We agree with Northern that the Settlement's inclusion of these transportation costs is a practical vehicle for recovering such costs as they are incurred. As Northern states in its comments, it does not have any pipelines in the Gulf Coast area and will have to rely on third parties to transport gas from the various blocks to Northern's system. Gas has in fact begun to flow from one of the three subject blocks (West Cameron Block 543) it is estimated that gas would be flowing from all blocks by April 1 of this year.[3] Inasmuch as the customers are fully protected by the refund provision of Section 5 of the Stipulation and Agreement, we find that the method provided for the recovery of the Gulf Coast transportation costs is just and reasonable and in the public interest and should be approved.

The Stipulation and Agreement provides for an increase in the rate of depreciation for all of Northern's property with the exception of the Gulf Coast properties from 4.25 percent to 4.53 percent, and with regard to the Gulf Coast properties, the Stipulation and Agreement allow for their depreciation on the basis of a unit-of-production methodology. PUC notes that,

> The Company accepted the Staff's recommended composite depreciation rate of 4.53 percent. The basis for the increase in the depreciation rate for the South End Supply Area was apparently due to revised forecasts of the reserves available from the South End Area. The PUC understands that the revised figures are based on American Gas Association figures collected from an industry committee that have not been revised by Staff or subject to independent analysis. Moreover, these figures were the basis of Staff's presentation in another rate proceeding which has yet to be heard and have not been cross-examined.[4]

PUC argues that,

> Docket No. RP76–89
>
> Because the depreciation rates set in this proceeding are likely to become a floor for all future rate proceedings, PUC believes that it is incumbent upon the Company to provide a more thorough explanation of the increase in the depreciation rates before it becomes established. Until a change in depreciation rates is better supported PUC recommends that the current depreciation rates remain in effect.[5]

The PUC contends that

> If the FPC approves the rate set out in the Settlement Agreement, the PUC recommends that Staff's study be attached to this Settlement Agreement as support for the depreciation rate changes in the Agreement. In the event that later events provide [sic] that an adjustment to the Settlement depreciation rates is in order, there will be a basis upon which Northern's customers can request appropriate adjustments to the rates.[6]

With respect to the revised methodology set forth in the settlement agreement with respect to Gulf Coast facilities, PUC argues:

> Where a pipeline attempts to alter significantly its depreciation rate, it must meet adequately its burden of proof. (Opinion No. 769, Docket No. RP73–113, Tennessee Gas Pipeline Co., issued July 9, 1976). Here, the Settlement provides for Northern to establish a depreciation method other than the one it applies for its other facilities. Inasmuch as (i) there is no automatic adjustment in rates provided for the additional increments in reserves that will surely be forthcoming; (ii) the overall application of this method would appear to lead to an unnecessarily high rate; and (iii) there is a lack of evidence warranting the proposed 11.5¢ MCF depreciation rate, PUC believes the straight-line method is preferable at this time for the Gulf Coast properties.

Northern argues that the increase in depreciation rate is the very minimum to which it is entitled. The Company notes that the 4.53 percent rate is obtained by using Staff's segmented composite straight line depreciation rates for its onshore operating properties. The Company appears to argue that this 4.53 percent rate is a significant decrease from the 5.28 percent rate which results in the application of the unit-of-production methodology which it has proposed, and should therefore be approved.

With respect to the change to the unit-of-production depreciation methodology for offshore facilities, Northern attacks what it characterizes as PUC's misstatements of facts. The most significant of these is Northern's quotation from page 4 of the PUC comments that,

> In 1977, production is expected to increase to 12.2 Tcf, and depreciation expenses booked could exceed $24,000,000 at the 22.86¢ Mcf rate.

According to Northern, the true figure would be $2.46 million. Northern also argues that it could support a 23.87¢ per Mcf depreciation rate for the Gulf Coast area, and can certainly support the 11.5¢ per Mcf rate set forth in the settlement.

With regard to Northern's implicit argument that because it is "giving up" the significantly higher rate of depreciation which would accrue through the use of its straight unit-of-production methodology, we suggest that the Company see our recent Opinion No. 812, issued July 20, 1977, in Texas Gas Transmission Corporation, Docket No. RP74–25. In that opinion the Commission determined that a straight unit-of-production methodology put forward by Texas Gas was insufficient to meet the requirements set forth by the Court of Appeals in *Memphis Light, Gas and Water Division v. FPC*, 504 F. 2d 225 (D.C. Cir. 1974). In other words, we are not persuaded that by abandoning the straight unit-of-production methodology put forward in the Company's filings, the Company has in fact made any concessions. It is doubtful that such a methodology, standing alone, could be approved by this Commission in light of Memphis. We will, however, approve the settlement agreement with regard to the increased composite depreciation rate. From North-

[8] Comments of PUCSD at 4, quoted at Comments of Northern Natural Gas Company at 6.

ern's filings, it can be seen that the increase is supportable and justifiable. Even PUC, the only party contesting the depreciation increase, only argues that,

> Because the depreciation rates set in this proceeding are likely to become a floor for all future rate proceedings, PUC believes that it is incumbent upon the Company to provide a more thorough explanation of the increase in the depreciation rates before it becomes established. Until a change in depreciation rates is better supported, PUC recommends that the current depreciation rates remain in effect.[9]

On the basis of these arguments we are not inclined to upset the settlement.

We will also accept that portion of the settlement, challenged by PUC which applies a unit-of-production methodology to the Gulf Coast Properties of Northern. The Company filed for a 23.87 cents per Mcf depreciation rate for the Gulf Coast area. Following settlement negotiations, and providing for a 11.5% per Mcf depreciation rate for the Gulf Coast Area was certified. The testimony of Messrs. J. A. Jeters and C. W. Radda, and the accompanying exhibits, provides a prima facie case for the unit-of-production methodology for this area and for the 23.87 cent per Mcf depreciation charge. For these reasons we will accept the unit-of-production depreciation methodology for the Gulf Coast area (Offshore Louisiana and Texas) of Northern's system, and the settlement rate of 11.5 cents per Mcf applied to the volume of gas purchased by Northern from blocks for which Northern has an associated investment in operating properties. This acceptance of U.O.P. methodology is consistent with the determination in Texas Gas to allow unit-of-production methodology where the total units are reasonably known.

Two questions are raised with respect to advance payments. The first of these relates to some thirty-one advances made by Northern during the years 1970 and 1971. These advances are challenged by Staff and by PUC. In the settlement, however, it was agreed that the $488,000 related to these advance payments should continue to be reflected in the settlement rates subject to Northern's requesting Commission authorization to continue to reflect the outstanding balance of these advance payments in rate base during the recovery periods set forth in the respective contracts. Accordingly, Northern filed a petition for continued rate base treatment of advance payments on October 21, 1976. That filing was given a Docket No. RP77-3. Accordingly, it appears to us that the thirty-one advance payments challenged by Staff are not properly before us for determination in this proceeding. Those advances are specifically referred to in Docket No. RP77-3, which is also before the Commission. We will deal with those thirty-one advance payments in Docket No. RP77-3 where the issues are much more fully aired in the several comments that have been received in that docket.

[9] Comments of PUC at 2.

The final point of the settlement agreement objected to by PUC relates to an advance payment by Northern to Atlantic Richfield Company. This advance pursuant to an agreement dated November 7, 1975, provides for total repayment of the advances within five years, with 5% of the total advance to be repaid at the end of each of the first four years and the balance to be repaid at the end of the fifth year. As part of the settlement agreement, Northern agreed that the test period rate base balance in future rate proceedings for the advance payments made to Atlantic Richfield would be determined as if 10% repayment of such advances had occurred at the end of each of the first four years following the date of the initial deliveries of gas with repayment of the balance at the end of the fifth year. PUC argues that, "the settlement does not, however, provide for an automatic rate reduction at the end of each of the five years to reflect the reduction of rate base due to the repayments".[10]

In its response Northern argues that the repayment provision required by the settlement agreement,

> will be recognized during any rate proceeding in effect at the time each repayment occurs. At such time any offsetting increases in rate base also will be recognized. There are no provisions for automatic rate increases or decreases for increases or decreases in rate base.[11]

We agree with Northern that the provisions of Section VIII of the Stipulation and Agreement relating to the Atlantic Richfield advance should be approved and the conditions suggested by PUC should be rejected. This section of the Stipulation is prospective in application. In each rate proceeding in which the Atlantic Richfield advance is an issue, that advance will be but one of many elements of rate base to be considered. As the Arco advance account decreases, there may well be offsetting increases in other elements of rate base. It is not appropriate for us to require automatic reductions in rate base to account for the repayments on one advance payment.

The settlement also contains the following uncontested, significant provisions:

Section II provides for specific rates of depreciation for various segments of Northern's system;

Section III provides that the costs of two R&D projects (Canadian Arctic Gas and Northern Border Pipeline) are included in the rates subject to refund and rate reduction depending on the outcome of a similar issue involved in Texas Eastern Transmission Corporation, Docket No. RP75-73;

Section IV sets forth the cost impact of Opinion No. 770 on Northern's exploration division and it provides for refund if the national rates set therein are ultimately reduced, modified or reserved; and

Section VI states that the settlement cost of service includes increased transportation charges in the amount of $1,850,260 payable to Great Lakes. In the event Northern does not incur such projected cost increases by October 31, 1977, the company will refund the jurisdictional portion thereof with interest.

The Commission finds: The Stipulation and Agreement filed with the Commission on October 18, 1976, in the instant docket should be approved and the objections thereto denied.

The Commission orders: The Stipulation and Agreement filed with the Commission on October 18, 1976, in the instant docket is hereby approved and the objections of North Dakota Public Utilities Commission thereto denied.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-277]

PENNSYLVANIA POWER CO.

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 11, 1977, Pennsylvania Power Company (Company) tendered for filing proposed increased rates and charges for jurisdictional sales to five of its customers.[1] The filing would increase the Company's revenues by $1,353,614 or 63.61%, based on the 12-month period ending December 31, 1977.[2] The Company proposes an effective date of August 11, 1977.

A preliminary review of Company's filing indicates that the proposed increase in rates and charges has not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges tendered by the Company on July 11, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges tendered by the Company on July 11, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Company.

(C) Pending such hearing and decision thereon, the increased rates and charges tendered by the Company are hereby suspended and the use thereof deferred until September 11, 1977, when they shall become effective subject to refund.

[1] Boroughs of Ellwood City, Grove City, New Wilmington, Wampum, and Zelienople, Pennsylvania.

[2] Rate Schedule Designation to be provided to the Company by future letter.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-523]

PUGET SOUND POWER AND LIGHT CO.

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 22, 1977, Puget Sound Power and Light Company (Company) tendered for filing proposed increased rates and charges for jurisdictional sales to eleven of its customers.[1] The filing would increase the Company's revenues by $391,045, or 64%, based on the 12-month period ending October 1, 1978. The Company proposes an effective date of October 1, 1977.[2]

A preliminary review of Company's filing indicates that the proposed increase in rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds: Good cause exists to accept for filing and suspend the proposed increased rates and charges tendered by the Company on July 22, 1977, as hereinafter ordered.

The Commission orders: (A) The proposed increased rates and charges tendered by the Company on July 22, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Company.

(C) Pending such hearing and decision thereon, the increased rates and charges tendered by the Company on July 22, 1977, are hereby suspended and the use thereof deferred until March 1, 1978, when they shall become effective subject to refund.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[2] Rate Schedule Designation to be provided to the Company by future letter.

[Docket No. ER77-523]

PUGET SOUND POWER AND LIGHT CO.

Notice of Tariff Change

AUGUST 1, 1977.

Take notice that Puget Sound Power & Light Company of Bellevue, Washington (Puget Power), on July 22, 1977, tendered for filing a change in rates applicable to electric service rendered to eleven customers under its existing Wholesale For Resale Power Contracts. Puget Power states that the proposed changes would increase revenues from these customers by $397,041 based on the 12 month period ending December 31, 1976.

Puget Power states that the reason for the proposed change in rates is that its wholesale rate base and expenses have grown significantly, while revenues have failed to keep pace since the time of the last rate change.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI77-14]

S.S.C. GAS PRODUCING CO.

Settlement Proposal

AUGUST 1, 1977.

Take notice that on July 25, 1977 S.S.C. Gas Producing Company (S.S.C.) filed a settlement proposal in the captioned proceeding offering to accept a rate of 48 cents/Mcf for its wells that are the subject of this proceeding.

The proposed settlement seeks to resolve the issues surrounding the November 24, 1976, petition of S.S.C. for special relief. S.S.C. is presently receiving a rate of 37.8 cents/Mcf for sales of gas from 3 wells in Bee County, Texas, to Trunkline Gas Company (Trunkline). Under the terms of the proposed settlement, S.S.C. would continue sales of gas to Trunkline at a rate of 48 cents per Mcf.

Any person desiring to be heard or to protest said settlement proposal should file comments with the Federal Power Commission, 825 North Capitol Street NE., Washington D.C. 20426, on or before August 22, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this proposal are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22665 Filed 8-5-77;8:45 am]

[Docket No. E-6859]

SOUTHERN CALIFORNIA EDISON CO. AND PACIFIC GAS AND ELECTRIC CO

Order Approving Headwater Benefits Settlement

AUGUST 2, 1977

On October 26, 1976, Southern California Edison Company (Edison) requested approval of an agreement dated October 1, 1976, with Pacific Gas and Electric Company (Pacific) respecting headwater benefits in the San Joaquin River basin in California. The Commission may approve such settlements as provided in Section 13.1 of the Commission's Regulations, 18 CFR § 13.1 (1976), in lieu of a headwater benefits determination under Section 10(f) of the Federal Power Act, 16 U.S.C. § 803(f). Edison's seven upstream projects, Project Nos. 67, 120, 2017, 2085, 2086, 2174 and 2175, provide benefits to Pacific's Project No. 96, known as the Kerckhoff Project.

The agreement contains the following terms:

> a) Edison and Pacific agree that the annual payments by Pacific to Edison commencing with the year 1972 shall be $83,000, and (b) Edison and Pacific agree that the annual payment of $83,000 shall remain in effect for a minimum of five annual payments. For any periods thereafter, the annual payment amount may be reviewed and readjusted upon the written request of either party to the other in order to provide for revisions that may be appropriate by reason of changes in facilities, cost of interest, depreciation, or maintenance, or in pertinent operating conditions which might result in changes in benefit; provided that any future readjustment shall be applied only prospectively to payments after the date of the readjustment, and shall also remain in effect for a minimum of five annual payments.

Edison indicated that the increase in headwater benefits payments is a result of its increased interest rate based on imbedded cost of debt and preferred stock, and the California Public Utilities Commission's allowed return on equity.

According to the Annual Report, FPC Form 1, filed by Pacific, it has made provisions for headwater benefits payments averaging $83,000 per annum for the years 1972 through 1976 while continuing to make annual headwater benefits payments of $72,000. The proposed settlement would require Pacific to pay an additional $11,000 per annum for the past period beginning in 1972, making the total annual payments $83,000. We note that Pacific has indicated plans to expand its Kerckhoff Project. This expansion will probably affect the headwater benefits that Edison provides Pacific in the future, but construction of the facilities is not expected to begin until April 1980, and not to be completed until June 1983.

The Commission has previously made ten determinations of assessments for headwater benefits in the San Joaquin River basin. The first determination was made on January 23, 1939, for the years 1923 through 1936. The last determination, covering the years 1949 through 1953, was made on October 5, 1959 (22 FPC 646). These determinations were made in accordance with Opinion No. 36, Southern California Edison Co., Ltd. and San Joaquin Light and Power Corp. 1 FPC 567 (1939). Opinion No. 36 sets forth the portion of the annual charges for interest, maintenance, and depreciation pertaining to Edison's upstream improvements to be paid by the San Joaquin Light and Power Corp., predecessor to Pacific.

On January 1, 1965, Edison filed, pursuant to Section 13.1 of the Commission's Regulations, the first letter agreement between Edison and Pacific which set forth the amount of annual payments for headwater benefits. The agreement covered the period of 1954 through 1963, and specified future annual payments commencing with 1964 for a minimum of five years. The Commission approved these headwater benefits payments. Southern California Edison Co. and Pacific Gas and Electric Co., 33 FPC 664 (1965).

Public notice of the latest agreement was issued on June 8, 1977, and published in the Federal Register on June 21, 1977, with July 22, 1977, as the last date for filing comments. No comments were received by the Commission.

The Commission finds: The agreement of October 1, 1976, between Southern California Edison Company and Pacific Gas and Electric Company constitutes an effective and reasonable method of compensating Southern California Edison Company for benefits received by the Pacific Gas and Electric Company's Project No. 96 in the San Joaquin River basin in California.

The Commission orders: The agreement of October 1, 1976, is hereby approved with respect to settlement of headwater benefits under Section 13.1 of the Commission's Regulations under the Federal Power Act, 18 CFR § 13.1 (1976), in lieu of headwater benefits determinations under Section 10(f) of the Federal Power Act, 16 U.S.C. § 803(f), until further order of the Commission is required due to changes in conditions.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc 77-22664 Filed 8-5-77;8:45 am]

[Docket No. RP77-11]

SOUTHWEST GAS CORP.

Order Approving Pipeline Rate Settlement

AUGUST 2, 1977.

On June 14, 1977, Southwest Gas Corporation (Southwest) filed with the Commission a proposed settlement agreement in the above-captioned proceeding. The proposed agreement would settle all issues in this proceeding. For the reasons stated, the Commission shall approve the proposed agreement.

Southwest tendered for filing on November 8, 1976, a proposed rate increase of approximately $579,000 annually. The Commission, by order issued December 8, 1976, accepted the increase for filing and suspended its operation for five months until May 9, 1977. Staff served its top sheets on April 8, 1977, and a settlement conference among all parties was held on April 20, 1977. The proposed agreement is the result of that conference.

The settlement rates are based upon a settlement cost of service of $16,496,164 applicable to jurisdictional service, as shown in Appendix A. The settlement cost of service includes a rate of return of 10.11 percent with a 14 percent return on common equity, as shown in Appendix B. The agreement provides that Southwest's cost of service for volumes delivered to northern California is $1,545,699. Cost classification and allocation were computed in accordance with the United method. The parties agreed to use a rate design made up of a monthly fixed commodity charge plus a unit commodity charge for the G-1 rate schedule. The other articles in the agreement provide that the agreement shall be effective upon final Commission approval; that the agreement constitutes a negotiated settlement; that Southwest shall have the right to withdraw if any party seeks judicial review of an order approving the agreement; and that this docket shall be deemed terminated upon approval of the agreement.

Public notice of the filing of the proposed agreement was issued on July 8, 1977, with comments due on or before July 26, 1977. No adverse comments were received.

Based upon a review of the proposed agreement and the pleadings in this proceeding, the Commission finds that the agreement represents a reasonable resolution of the issues, and, therefore, should be approved.

The Commission orders: (A) The proposed agreement filed by Southwest on June 14, 1977, and incorporated herein by reference, is hereby approved.

(B) Southwest shall file within thirty (30) days of the issuance of this order Sheet No. 3-A (in accordance with Article II (C) of the agreement) reflecting the rate contained in the settlement agreement.

(C) Within forty-five (45) days of the issuance of this order, Southwest shall refund to its jurisdictional customers all amounts collected in excess of the settlement rates together with interest at the rate of 9 percent per annum. Within fifteen (15) days thereafter, Southwest shall file a report of refunds and interest with the Commission.

(D) Upon compliance with the terms of this order, this proceeding shall be terminated.

(E) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

TEXACO, INC. AND SABINE PIPE LINE CO.

Order Granting Temporary Stay, Providing for Comments and Granting Joint Motion Subject to Certain Conditions; Correction

JULY 19, 1977.

In FR Doc. 77-21096, published in the FEDERAL REGISTER on July 22, 1977 (42 FR 37592), issued by the Federal Power Commission on July 14, 1977, please change the date in the last sentence of the paragraph preceeding Ordering Paragraph A, first column, page 37593, to July 22, 1977, in conformance with Ordering Paragraph (G).

LOIS D. CASHELL,
Acting Secretary.

[FR Doc 77-22670 Filed 8-5-77;8:45 am]

[Docket No. RP75-73]

TEXAS EASTERN TRANSMISSION CORP.

Order Making Settlement Final and Ordering Refunds

AUGUST 1, 1977.

On June 6, 1977, the Commission issued an order modifying and accepting Texas Eastern Transmission Corporation's (Texas Eastern) rate settlement proposal in the above captioned proceeding.

In passing judgment on the settlement the Commission modified the terms of the proposed settlement in several respects. The Commission stated that

While we do not view the changes herein wrought as momentous, we nevertheless respect the right of each party to reconsider and reject the settlement as we have revised and conditional it. Accordingly, rather than order the revised settlement into effect immediately, we shall offer the parties 30 days within which to present their views hereon. In providing the parties with this opportunity to respond, we manifest no intention of entertaining further comment on the merits with respect to specific issues. Silence will be construed as acceptance of the settlement, as revised and conditioned. Following receipt of these responses, if any, we shall issue an appropriate order finalizing our action on the matter. (Order of June 6, 1977, mimeo page 20.)

On July 6, 1977, Texas Eastern notified the Commission that it accepts the settlement as modified and approved by the Commission and that it wishes to exercise its option under the June 6th order to request a hearing on certain advance payments issues. The advance payments hearing is being initiated by separate order. No other responses to the order of June 6th were received.

In light of the foregoing, the Commission finds that the order of June 6 should be made final and that Texas Eastern should be ordered to make refunds to its customers pursuant to the settlement.

The Commission orders: (A) The Commission's order issued in this proceeding on June 6, 1977, is hereby made final.

(B) Within 15 days from the date of this order, Texas Eastern shall file revised rates in accordance with the settlement agreement as modified and approved by the Commission on June 6, 1977.

(C) Within 30 days from the date of this order, Texas Eastern shall refund to its jurisdictional customers all amounts collected in excess of the settlement rates filed pursuant to paragraph (B) above together with interest at the rate of 9 percent. Within 10 days thereafter Texas Eastern shall submit a report of refunds and interest to the Commission.

(D) No refunds associated with the reserved advance payments issue shall be required pending hearing and decision thereon.

(E) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Opinion No. 801-A; Docket Nos. RP74-48 and RP75-3]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Opinion and Order Denying Rehearing in Most Respects of Opinion and Order Establishing Just and Reasonable Pipeline Rates

JULY 29, 1977.

Presently before the Commission is an application for rehearing of Opinion No. 801. We deny rehearing in all respects except as to the refund condition.

On May 31, 1977, the Commission issued in this proceeding Opinion No. 801, which resolved several reserved pipeline rate issues which had not previously been settled from two rate increases filed by Transcontinental Gas Pipe Line Corporation (Transco) in Docket Nos. RP74-48 and RP75-3. Specifically, the Commission rejected rate base and cost of service treatment for unsuccessful

synthetic natural gas (SNG) project expenditures, both as originally proposed by Transco and as subsequently modified in its unilateral offer of settlement. Moreover, the Commission excluded from rate base a portion of the advance payments made by Transco to several gas producers. Finally, the Commission adopted the United rate design method for the Transco system.

On June 30, 1977, Transco applied for rehearing of the first two of these rulings, that is, expenditures for unsuccessful SNG projects and advance payments, but not as to rate design. Transco also sought rehearing as regards refunds and oral argument.

Also on June 30, 1977, Tennessee Gas Pipeline (Tennessee) petitioned the Commission for leave to intervene out of time so as to apply for rehearing of Opinion No. 801, which it did at the same time. Its rehearing goes solely to the exclusion from Transco's rate base of certain advance payments made under Order No. 499, 50 FPC 2111 (1973).

Tennessee has not advanced sufficient reasons for the Commission to find good cause to permit intervention out of time. In the first place Tennessee's petition does not indicate that it has "an interest which may be directly affected," as is required by Section 1.8(b)(2) of our Rules of Practice and Procedure. Moreover, any interest which Tennessee conceivably has in this case is adequately represented by Transco, which has sought rehearing of the very issue which concerns Tennessee. Tennessee's only interest in this proceeding relates to possible precedential impact flowing therefrom. We have already held that a desire to shape precedent does not by itself afford a basis for intervention,[1] and this is especially true when late intervention is sought. While it is clear from both Opinion No. 801 and the instant order that our rate base exclusion of certain advance payments was founded upon a review of the specific facts in this case and not a per se application of a "30 day rule", as claimed by Tennessee, we shall nonetheless entertain Tennessee's arguments on rehearing and shall construe Tennessee's application for rehearing as an application for reconsideration amicus curiae.[2]

(1) Expenditures for Unsuccessful SNG Projects. We deny Transco's application for rehearing concerning its SNG project expenditures, rejecting all of its many legal arguments, which we shall consider seriatim.

Transco first argues that the Commission's denial of rate base and cost of service treatment for unsuccessful SNG project costs contravenes the "prudent investment" test, which applies to the Commission, Transco asserting that these SNG costs are "admittedly prudent."

No one can argue with the proposition that the Commission espouses the "prudent investment" concept of rate base valuation. However, even if these SNG project expenditures are assumed to be prudent, rate base inclusion or even Transco's settlement proposal of only cost of service amortization is not necessarily mandated. Part and parcel of the "prudent investment" theory is the "used and useful" requirement; that is, only prudent investment for utility property which is used and useful to provide service to the utility's customers should be compensated. To say the least, the "used and useful" criterion should not take Transco by surprise, and it would be disingenuous to argue that the SNG studies and coal options for abandoned projects involved herein are "used and useful." While the Commission has, after long and careful deliberation, used a more liberal interpretation of "used and useful" in specific situations,[3] such is not the present case.

Transco then advances the pro forma appellate challenges of no "reasoned decisionmaking" and arbitrary and capricious establishment of a new standard, although it does not explain how the Commission has acted so badly.

Perusal of pages 5–8 of Opinion 801 should demonstrate that we fully articulated the reasons for our decision. Moreover, as discussed above, the standard which Transco failed to satisfy, "used and useful," is not arbitrary and capricious.

Transco proceeds to argue that Opinion No. 801 is contrary to prior Commission policy permitting the recovery of unsuccessful projects designed for systemwide benefit, and that, since the Commission herein retroactively changed that policy, it has been denied due process.

Transco has not been denied due process by Opinion No. 801. In the first place the Commission's decisions[4] cited by Transco are clearly distinguished from the instant proceeding, as we found in Opinion No. 801. Moreover, assuming arguendo that the Commission had through adjudicatory decisions developed a policy of allowing recovery of unsuccessful project costs, application of a changed policy in a current adjudication is not necessarily proscribed by due process.[5]

Transco next argues that, if the Commission relied in its decison upon Opinion No. 624,[6] such reliance is erroneous.

Apart from the fact that Transco's complete lack of explanation for this assertion warrants no serious consideration by the Commission, we nonetheless point out that at page 6 of Opinion No. 801 we stated in no uncertain terms that reliance upon Opinion No. 624 "is not completely warranted."

Transco furthermore assails the Commission's reliance upon Opinion Nos. 728 and 728–A. It interprets those decisions as supporting recovery of these SNG project costs.

Again Transco has failed to provide more than bold assertions. In any event we acted properly in considering the precedent of Opinion No. 728.[7] In Opinion No. 801 we recognized that there are obvious differences between Opinion No. 728 and Transco's proposal, and yet we also realized that our rejection of a full cost of service tariff for an SNG project in Opinion No. 728 establishes Commission regulatory policy which is appropriately applied to the instant case. This policy is, of course, that SNG expenditures which do not qualify as R & D can be recovered, if at all, only through the price paid for actual SNG production sold in interstate commerce.

Transco adds that it was error to consider the fact that SNG is nonjurisdictional until commingled with natural gas in interstate commerce. In support it asserts that the record demonstrates that it had never intended to treat these projects as unregulated. Transco adds that the Commission should not have equated the risk of these SNG projects to that of independent producers.

Again Transco states no basis for rehearing. The fact that a pipeline does not actually intend to sell SNG in intrastate, instead of interstate, commerce does not alter the need for the Commission to apply the very strict standards stated in Opinion No. 801 to very attempt to recover the costs of SNG projects. Furthermore, our analogy to the shareholder risk attendant the production activities of independent producers is merely illustrative and not the dispositive finding in our overall decision.

Finally, Transco questions whether the Commission considered its unilateral offer of settlement on its merits.

Scrutiny of pages 7 and 8 of Opinion No. 801 reveal that in fact the Commission rejected this offer of settlement only after assessing it on its merits. Transco's willingness in this offer of settlement to abandon rate base treatment for all four unsuccessful SNG projects and even cost of service amortization for its nephtha gasification project does not benefit its customers so as to offset the previously established reasons for denying any recovery of such unsuccessful SNG project expenditures.

(2) Advance Payments. In Opinion No. 801 the Commission allowed rate base inclusion for the following advance payments: the entire $9,000,000 advance to Occidental Petroleum ($6,659,106 governed by Order No. 465, 48 FPC 1550 (1972), and $2,340,894 governed by Order No. 499); and $4,241,000 out of $6,006,250 of advances to Cities Service Oil, Skelly Oil and Getty Oil (all governed by Order No. 499). Transco now seeks rehearing of the exclusion from rate base of the $1,765,250 of Order No. 499 advances made to Cities Service, Skelly and Getty. We deny rehearing in all respects.

Alleging that these advances were reasonable and appropriate, Transco assigns error to their rate base exclusion in Opinion No. 801. In support thereof it asserts that there is uncontroverted evidence that Transco acted in good faith and obtained the best possible terms under the circumstances. Transco characterizes Opinion No. 801 as arbitrary and capricious for disallowing prudent investment and as unsupported by substantial evidence. It moreover claims violation of its due process rights by the Commission's retroactive application of the new timing standard, which it views as too vague and imprecise.

In denying Transco's application for rehearing we first reject its contention that the excluded advance payments were prudently incurred. Prudency is not determined solely by the presence or absence of a good faith bargain. In Order No. 499 we expressly stated that, to be included in rate base, advances had to be expended by the recipient "producer within a reasonable time from the date such amounts advanced are included in the pipeline's rate base." Evidence introduced by Staff indicated that the advance payments at issue were not expended within a "reasonable time" and Transco did not successfully rebut this evidence. This timing standard predates Transco's advance payments to Skelly, Getty and Cities Service; thus, there is no retroactive application. Nor is this standard too imprecise.

While Transco argues that it could not have obtained better terms from these producers in light of the competitive conditions at that time, this does not establish prudency of investment. In that the advance payment program extended the "used and useful" doctrine to its broadest possible meaning, with pipelines making interest free loans with the consumers' capital, participating pipelines had a public utility burden of providing adequate protection to those consumers. If the producers as a class ignored the reasonable timing standard set by the Commission, it was incumbent upon the pipelines to apprise the Commission of this fact, not to merely acquiesce to the hard bargains struck by the producers.

Tennessee likewise challenges our exclusion of the unexpended front-end advance payments made under Order No. 499. It first argues that Order No. 499 did not set any specific timing standard other than one of reasonableness. It points to the order on reconsideration of Order No. 499, 51 FPC 818, for the Commission's intention to treat the timing issue on a case by case basis.

We do not refute what Tennessee says, but we do reiterate that the record in this case supports the exclusion of advances made to but not expanded by the producers within 30 days of the end of the adjusted test period.

Tennessee next reads precedent cited in Opinion No. 801 as not supporting what it calls the "30-day line of credit test."

In the first place such Commission precedent[8] does evince the Commission's commitment to enforce a reasonable timing relationship between when the advance is made and when it is expended, including in Natural Gas Pipe Line a "line of credit" approach. Tennessee's reordering of Opinion No. 722 does not comport with that made in Opinion No. 769–A,[9] which we incorporate herein. Secondly, in Opinion No. 801 we cited these decisions, supra note 8, as prior Commission proclamations of its intention to draw a timing relationship, but not as espousal of any specific timing interval. As noted above, we left that to each case.

Tennessee next argues that the Commission has erred by adopting Staff's 30 day rule as an irrebuttable presumption, noting that the Commission has subsequently adopted this same 30 day rule in other cases. It also seeks to justify Transco's failure to rebut Staff's case, which it attacks as not supported by substantial evidence.

As we more fully explained in Opinion No. 769–A, supra note 9, we have not established an irrebuttable presumption. Transco does, however, have a heavy burden of proof, which it did not satisfy: Apart from the burden of proof being imposed upon Transco by Section 4(e) of the Natural Gas Act, it also was faced with the previously considered timing policy expressed in Order No. 499. In this context Staff's evidence made a well pleaded case for a 30 day rule in this case. To excuse Transco from adequately responding in rebuttal to this case would indeed improperly shift the burden of proof.

Tennessee adds that Staff's timing theory, adopted in Opinion No. 801, is legally erroneous for it considers the producers' need for funds, not the pipelines' need for new gas supplies.

Tennessee has again failed to advance a cogent challenge to Opinion No. 801. It is not enough for Transco to show that it needed more gas and that its advance payments succeeded in this regard. As we stated in Opinion No. 769–A, we would have been flexible in entertaining evidence as to reasonable financing practices from the perspective of either producer or pipeline. Transco refused to submit any evidence in this regard, and by therefore excluding certain front-end advance payments we did not run afoul of *United Gas Pipe Line Company* v. *FPC*, 551 F. 2d 461 (D.C. Cir., 1977); Transco had a full opportunity to be heard and was on notice that the reasonableness of its front-end advances had been challenged. This is legally distinguishable from the summary disposition of the interest reimbursement arrangement in United.

Tennessee concludes by raising the specter of retroactivity. We reject this argument on the grounds stated above in rejecting Transco's application for rehearing.

(3) Miscellaneous. Transco reasserts on rehearing its prior request for oral argument. In Opinion No. 801 we inadvertently failed to specifically reject Transco's request for oral argument but we now reject it. No purpose would be served by granting oral argument.

In addition Transco seeks rehearing of the effective period of the rates for which refunds are ordered, that being February 1, 1975, to October 1, 1975. Transco argues that the proper refund period should be February 1, 1975, to July 1, 1975, because as of July 1, 1975, it had in effect advance payment trackers.

We do grant rehearing in this regard. While we had originally rejected these advance payment trackers by our order of January 30, 1976, in these same dockets, we subsequently granted rehearing of that order on March 26, 1976, and permitted those trackers to become effective as of July 1, 1975, subject to further adjudication in Dockets Nos. RP74–48 and RP75–3 (AP76–1). Accordingly, refunds related to advance payments should be made for the period from February 1, 1975, to July 1, 1975.

The Commission further orders: The assignments of error and grounds for rehearing set forth in Transco's application for rehearing of Opinion No. 801 and Tennessee's application for reconsideration amicus curiae) present no facts or legal principles that would warrant any change in or modification of the Commission's Opinion No. 801, except concerning the refund period.

The Commission orders: (A) The application for rehearing filed by Transco and the application for reconsideration amici curiae are hereby denied, except to the extent that ordering paragraphs (B) and (C) of Opinion 801 are amended to include a refund period from February 1, 1975, to July 1, 1975, relative to advance payment exclusion.

(B) Good cause has not been shown to grant Transco's request for oral argument.

(C) Transco's July 8, 1977, request for an extension of time within which to comply with ordering paragraph (B) of Opinion 801 is denied to the extent that it requests 60 days from the issuance of the instant order; however, Transco shall comply with ordering paragraph (B) within, 15 days of the date of issuance of this order.

By the Commission.[10]

LOIS D CASHELL,
Acting Secretary.

[Docket No. ER77-509]

UNION ELECTRIC CO.

Filing of Wholesale Electric Agreement

AUGUST 2, 1977.

Take notice that on July 11, 1977, Union Electric Company (Union) tendered for filing a new Wholesale Electric Service Agreement dated June 27, 1977 between the City of Rolla, Missouri and Union. Union states that said Agreement primarily provides for increased contract capacity.

Union proposes an effective date of August 12, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are available for public inspection at the Federal Power Commission.

KENNETH F. PLUMB,
Secretary.

[Opinion No. 815; Docket Nos. RP74-20, RP74-83]

UNITED GAS PIPE LINE CO.

Opinion and Order on Reserved Issues and Otherwise Approving Settlement Agreement

JULY 29, 1977.

APPEARANCES

Stephen Wakefield, Robert Webb, David Thornberry, D. M. Chrestman, and I. Jay Golub for United Gas Pipe Line Company.
Harry L. Albrecht for Natural Gas Pipeline Company of America.
Howard E. Wahrenbrock for Mississippi Valley Gas Company, Mobile Gas Service Corporation, and Clarke-Mobile Counties Gas District.
John M. Kuykendall, Jr., for Mississippi Valley Gas Company.
John F. Harrington, Christopher T. Boland, and Robert O. Koch, Steve H. Finch for Texas Gas Transmission Corporation.
Robert W. Scherry, Jr., for Mid Louisiana Gas Company.
Patrick McElligot for Willmut Gas & Oil Company.
William T. Miller for United Municipal Distributors Group.
J. David Mann, Jr., for Laclede Gas Company.
Platt W. Davis, III, and Jack D. Head and J. Evans Attwell for Texas Eastern Transmission Corporation.
Linda E. Buck, Jas. R. Patton, David B. Robinson and Harry E. Barsh for the State of Louisiana Department of Conservation.
Edward S. Kirby, James R. Lacey, William R. Duff and Carl W. Ulrich for Public Service Electric and Gas Company.
Michael J. Manning, Jefferson D. Giller, for Entex, Inc.
Ronald G. Kuehn, Jr., Phillip C. Wrangle for Southern Natural Gas Company.
George Webber and Norman A. Flaningan, Charles R. Brown and Henry Sullivan for Consolidated Gas Supply Corporation.
Patricia A. Curran for Federal Power Commission.

Smith, Commissioner:

This case involves the reasonableness of a proposed Stipulation and Agreement negotiated between United Gas Pipe Line Company (United), various of its jurisdictional customers[1] and the Commission staff. The procedure adopted below resulted in the proffer of the proposed settlement and the development of an evidentiary record at hearing on several reserved issues covered in the proposed Stipulation and Agreement. The record and Stipulation comes before us upon certification by the Presiding Administrative Law Judge without recommendation.

PROCEDURAL HISTORY

On September 21, 1973, United filed a proposed increase in its FPC gas tariff in Docket No. RP74-20 which would increase jurisdictional revenues by approximately $34.9 million. On November 6, 1973, the Commission accepted these increased rates for filing, suspending their effectiveness until April 6, 1974. On April 15, 1974, United filed an additional rate increase in Docket No. RP74-83 which would result in a further increase in jurisdictional revenues of approximately $92.9 million. By order of May 16, 1974, these latter rates were accepted by the Commission, subject to refund, to become effective on November 1, 1974. These two separate proposals were consolidated for purposes of hearing and decision.

In Docket No. RP75-30 United filed for a further rate increase which became effective, subject to refund, on May 20, 1975. Thus, the instant proceeding on the lawfulness of the proposed rates is concerned solely with the "locked-in" period between April 6, 1974, and May 19, 1975.

[1] By order issued November 6, 1973, in Docket No. RP74-20 intervention was granted the following parties: Memphis Light, Gas and Water Division; Public Service Electric & Gas Co.; Laclede Gas Co.; Arkansas Louisiana Gas Co.; United Gas, Inc. (now Entex, Inc.); New Orleans Public Service Inc.; Southern Natural Gas Co.; Florida Gas Transmission Co.; Pub. Service Com'n of the State of New York; Mississippi Valley Gas Co. and Mobile Gas Service Corp.; the State of Louisiana; Mississippi River Transmission Corp.; Natural Gas Pipeline Co. of America; Willmut Gas & Oil Co.; Philadelphia Gas Works; Consolidated Gas Supply Corp.; United Municipal Distributors Group (MDG); Texas Gas Transmission Corp.; Algonquin Gas Transmission Co.; and Texas Eastern Transmission Corp.

On December 12, 1973, intervention was granted Philadelphia Electric Co., Mid Louisiana Gas Co., Louisiana Gas Service Co. and Columbia Gas Transmission Corp. Moreover, on July 31, 1974, the Alabama Public Service Commission was granted intervention with Mississippi Public Service Com'n granted intervention on March 6, 1975.

Settlement negotiations ensued between United, Commission Staff and various of United's customers affected by the proposed increased rates. These negotiations resulted in a proposed Stipulation and Agreement which was apparently circulated by United on August 1, 1975, but is unsigned by any party. By agreement of the parties to this stipulation, a procedural schedule was established for the submission of testimony and evidence regarding this settlement proposal and for a hearing to be held on certain reserved issues on December 2, 1975.

On December 2, 1975, witnesses appearing on behalf of United and Commission staff were presented for cross-examination before Presiding Administrative Law Judge Graham W. McGowan. Subsequent to this hearing, on December 24, 1975, Presiding Judge McGowan certified the unsigned proposed Stipulation and Agreement (Exhibit A) and the evidentiary record developed by the parties to the Commission. This certification was noticed by the Commission's Secretary on January 13, 1976. 41 FR 3141. Comments pursuant to this notice were filed by Entex, Inc., Natural Gas Pipe Line Co. of America, Texas Gas Transmission Corp., Mississippi River Transmission Corp., Texas Eastern Transmission Corp., the United Municipal Distributors' Group (MDG), Commission staff and United. Reply comments were filed by United and the State of Louisiana. No parties objected to the settlement although adverse positions with respect to the reserved issues were taken by certain parties as detailed below.

Subsequent to certification on June 15, 1976, the United Municipal Distributors' Group (MDG) petitioned the Commission with a request that any refunds found appropriate in this case "be assessed at a 9 percent interest rate from October 10, 1974, forward rather than at the 7 percent interest provided for in the Stipulation and Agreement herein * * *" *Petition*, pg. 1. On the authority of *American Public Gas Ass'n* v. *FPC*, ---- F. 2d ----, (D.C. Cir. 1976), CADC No. 75-1104, (May 19, 1976), MDG argues that, as a matter of law, the settlement must be revised to reflect the alleged lawful interest rate. This petition was noticed in the FEDERAL REGISTER (41 FR 27876) on July 7, 1976. On July 9, 1976, United filed an answer in opposition to the relief requested by MDG's Petition, stating that the parties negotiating this settlement did not make the stipulated interest rate of 7 percent contingent in any fashion on the outcome of the APGA appeal whereas when an item was contingent upon the outcome of another proceeding the parties expressly so provided, and that any stipulated interest rate (7 percent) is a "significant factor" in any rate proceeding. Answer, pg. 3 MDG's request is addressed on its merits in Part III of this Opinion, infra.

Moreover, on July 28, 1976, Laclede Gas Company (Laclede) filed supplemental comments to the instant settlement agreement and requested that the record be reopened to give further consideration to the Agreement's stipulated rate of return in light of other developments. On August 9, 1976, Brooklyn Union Gas Company joined in Laclede's motion. United responded to Laclede's motion on August 12, 1976, opposing the reopening and stating that movants had failed to demonstrate good cause therefor under applicable Commission regulations. See, 18 C.F.R. § 1.33. Laclede's motion was denied by operation of law on August 27, 1976. See, 18 C.F.R. § 1.12(e).

THE PROPOSED STIPULATION AND AGREEMENT

Cost of Service. The parties to the proposed Stipulation and Agreement have agreed that United's jurisdictional cost of service for the locked-in period should be based on the twelve months actual operating experience ended April 30, 1975. The jurisdictional cost of service was agreed to be $422,160,271, based upon jurisdictional sales volumes of 741,234,988 Mcf at 14.73 psia. During this period, it was further stipulated, United collected from its jurisdictional customers' revenues in the amount of $428,018,396. See, Exhibit A, Appendices A and A-1.

Refunds. The parties have agreed that the refund amount is 0.79032c Mcf of jurisdictional sales volumes during the locked-in periods and that during the period the jurisdictional sales volumes is 822,545,012 at 14.73 psia, leaving a refund amount of $6,500,738. The parties have agreed to a 7 percent annual interest rate to accrue monthly until refunds are paid.

RESERVED ISSUES

I. *Purchased Gas Cost.* The stipulated jurisdictional cost of service reflects $72,906,838 of purchased gas costs attributable to 134,578,270 Mcf of currently noncertificated purchases (at an average price of 54.17c per Mcf) which United alleges are not jurisdictional producer sales under the Natural Gas Act. Commission staff regards this item of expense excessive by $8,752,329, representing the difference between the price by United for this supply and the price determined "just and reasonable" under the Commission's applicable national rate. Under the proposed Stipulation and Agreement, however, United has assumed no obligation to refund any portion of these purchased gas costs "unless some or all of the producers making such non-certificated sales to United States shall be required by order of the Federal Power Commission, in any proceeding involving such producers, to refund some portion of the amounts received during the refund [locked-in] period for such gas sales to United." Exhibit A, Art. II, pg. 8-9. The parties have agreed that in the event of a refund to United by these producers United itself would refund 81.5 percent (the allowable jurisdictional portion thereof) of such refunds from producers by crediting its Deferred Purchased Gas Cost Account.

II. *Advance Payments.* The proposed Stipulation indicates a cost of service item representing the effect of rate base treatment of advance payments in the aggregate amount of $79,238,960. These various advances are classified into three severable groups under the stipulation. See, Exhibit A Appendix E.

(A) The parties have agreed to no refund liability for those advances which are listed in Part A of Appendix E. All parties apparently concur that these payments were "reasonable and appropriate" under outstanding Commission orders. See, FPC Order No. 465, 48 FPC 1550, 1555, (1972); FPC Order No. 499, 50 F.P.C. 2111, 2115 (1973), reh. denied, 51 F.P.C. 818 (1974).

(B) In Part B of Appendix E of the proposed Stipulation advances in the amount of $65,150,718 are covered. Commission staff suggests that only $41,770,071 of this expense is "reasonable and appropriate," and, therefore, that United's cost of service be reduced by $23,380,647. According to the proposed Stipulation United has agreed to remove each advance listed in Part B to the extent it is finally determined that its recipient "will fail to make expenditures at least equal to the amount advanced by United" in conformance with the terms and purposes for which the particular advance was made, and to refund such excluded amounts to the jurisdictional customers for the instant locked-in period. It is apparent from a reading of the proposed stipulation that the parties consider failure to expend the full amount advanced by United for the purposes leading to the advancement is the single event which would trigger United's refund obligation with respect to these advances. Staff challenges the reasonableness of this provision on the merits under applicable law.

(C) With respect to United's 50 percent interest in an advance payment to TransOcean Oil, Inc., which it received in an exchange with Southern Natural Gas Co. for an assignment of a 50 percent interest to Southern in advance payment agreements with ECEE, Inc. and Pinto, Inc., the parties have agreed that rate base treatment of these amounts—listed in Part C of Appendix E to the Stipulation—shall be governed by the final decision, no longer subject to judicial review, of the issue in Docket Nos. RP72-91, et al. The parties to this proceeding do not contest the reasonableness of this stipulation.

III. *Interest Payments to Producers* Under the proposed Stipulation and Agreement the parties have agreed on $48,893,220 of other operation and maintenance expenses. Exhibit A, Appendix A. Commission staff challenges this amount as excessive by $1,644,956, this amount representing the cost of interest reimbursement payments by United on loans to producers to finance exploration and production ventures.

IV. *Income Tax.* The parties have stipulated $18,892,596 as the federal income tax expense in United's total cost of service. Exhibit A, Appendix A. MDG challenges this stipulated figure as excessive by an indeterminate amount by virtue of United's alleged tax savings during the test period resulting from the use of consolidated federal income tax filings.

NON-CONTESTED ISSUES

The total cost of service agreed upon by the parties reflects $30,714,948 of purchased gas costs (84,257,859 Mcf at an average price of 36.45¢) from producers holding small producer exemptions. See, Order No. 428, 45 F.P.C. 454 (1971), as amended. The parties have agreed that United shall collect the full amount of these costs, subject to possible refund in the event that the pipeline is required to refund any part of these costs incurred during the test period. See, Opinion No. 742, 54 F.P.C. —— (August 28, 1975) aff'd, Opinion No. 742-A, 55 F.P.C. —— (July 27, 1976), where small producer refunds were only required prospectively from July 27, 1976.

The total cost of service also reflects $8,535,315 of purchased gas (13,928,064 Mcf at an average price of 61.28¢) classified as emergency purchases by United. See, Order No. 491, 50 F.P.C. 742 (1973) rev'd, Consumer Federation of America 515 F.2d 347 (D.C. Cir. 1975). The parties have agreed that the full cost of these emergency purchases shall be collected by United, subject to possible refund if the company is ordered to refund any portion of these costs for the refund period by final Commission order in Docket No. RP72-133.

DISCUSSION

I.

Commission staff and MGD challenged United's purchased gas costs as excessive. They contend the producers from whom United purchased this gas are actually jurisdictional and that United has unlawfully included in its cost of service the full, actual cost of its purchased gas rather than excluding the cost of gas purchased from non-certificated producers above the applicable area or national rate. The Commission staff argues "that the payments in excess of the national rate which United paid to the (allegedly non-jurisdictional) producers * * * should not be recoverable from the jurisdictional ratepayer." Staff comments p. 10. MDG generally echoes staff argument on this issue.

There is no question that United actually paid the full amount for its purchased gas which is included in its cost of service and which is now challenged as excessive.

Commission staff and MDG argue that as a matter of law, any pipeline sale for resale out of a commingled supply requires that the pipeline's purchase price of any element of that commingled supply be limited to the federally regulated rate in the interest of full and complete protection of the jurisdictional consumer. United responds that the Act explicitly limits the Commission's authority to regulate the price of natural gas which

is not sold "in interstate commerce," 15 U.S.C. § 717(b), and that sales "in" interstate commerce require that the purchased gas, even if commingled with gas imported from another state, must subsequently cross a state line. In the instant case the parties seem to agree that United's purchases within Louisiana will not, subsequent to purchase and commingling with interstate gas, pass into another state. If we were to accept the instant evidentiary record as an adequate factual predicate upon which to decide the jurisdiction of the Commission over the various sales indirectly challenged in this proceeding, these stipulated facts would bring this case within the ambit of Colorado Interstate Gas Co., Opinion No. 777, 56 F.P.C. ---- (September 30, 1976). In that case the Commission decided, on similar facts, that producer sales were not jurisdictional even though the gas purchased was commingled with interstate jurisdictional supplies and ultimately sold to jurisdictional customers at federally-regulated rates. However, the instant proceeding is not the appropriate case in which to decide this jurisdictional question.

It is quite apparent that a decision on this issue requires a threshold finding of Commission jurisdiction over these non-certificated sales. This subsidiary finding is of great consequence to the respective producers as well as the purchasing pipeline, United. However, no producer selling to United at a price above the applicable national or area rate ceiling has entered an appearance in this proceeding, and the Commission is wary of entering a final decision as to the jurisdictionality of these sales without first having the benefit of these producers' views. In cases such as this, the Commission is fully authorized to determine the appropriate case in which a particular issue will be addressed. Fort Pierce Util. Authority v. FPC, 526 F. 2d 993, 999 (5th Cir. 1976). The Commission has an ongoing proceeding initiated pursuant to a staff motion in a separate docket requesting that the Commission institute a show cause proceeding to determine the jurisdictional issue upon which its objection is predicated in this proceeding.[3] In the exercise of our discretion, therefore, the Commission finds that it is appropriate to address the issue of the jurisdictional character of these presently non-certificated sales to United in Docket No. CP76-238.

An additional reason in support of the deferral of decision on this jurisdictional question is the fact that the rates at issue in this proceeding have, in large measure, been derived through settlement among the interested parties. The Stipulation and Agreement of the parties. (Exhibit A, pp. 8-9) provides that

> The parties to this Stipulation and Agreement agree that those costs incurred by United to purchase the gas from producers under sales which have not been certificated are to be included in their entirety in United's cost of service for the Refund Period. United shall have no obligation to refund any portion of such purchased gas costs to any of its customers unless some or all of the producers making such non-certificated sales to United shall be required by order of the Federal Power Commission, in any proceeding involving such producers, to refund some portion of the amounts received during the refund period for such gas sales to United. In the event that such refunds are required and are ultimately made to United by the producers, United agrees that it shall refund the jurisdictional portion of such amounts which it actually receives to its jurisdictional customers.

This contingent refund obligation assumed by United will fully protect its jurisdictional ratepayers in the event that the Commission ultimately determines in Docket No. CP76-238 that the non-certificated producer sales are, and have been, jurisdictional and bound by the applicable national or area rate ceiling. Since the only ground upon which Commission staff and MDG object to the inclusion of this expenditure for purchased gas by United is the difference in cost levels which would result from finding that these producers were bound by the federally regulated rate ceiling, it is clearly in the public interest to approve the instant settlement rates, as they are subject to a contingent refund obligation upon United in respect to excessive purchased gas costs.

Recently, in *United Gas Pipe Line Co.* v. *FPC*, 551 F.2d 460 (D.C. Cir. 1977), the Circuit Court of Appeals for the District of Columbia reversed this Commission's summary exclusion of certain interest reimbursements by United to producers which were alleged by the pipeline to be a permissible alternative to the advance payments authorized by Commission regulations. In so ruling, the court construed the various Commission orders[4] establishing the experimental advance payments program.

> [W]e have found nothing in the Commission's orders setting up the advance payment program to indicate that the producers who were given such payments had to demonstrate an actual *need* for them. It is apparent that the Commission instituted the advance payment program merely as a means to enhance significantly the supply of natural gas in the interstate system during a period of critical nationwide gas shortages. It declared that the program was expected to intensify the development of new sources of natural gas supplies and thus alleviate the supply shortage, but it never expressly mandated that a producer show that but for the advance payments it would not be able to obtain the necessary exploration and development capital. We think it unreasonable for the Commission now to adopt such a standard for United's interest reimbursement arrangements when they apparently constitute an alternative means for attaining the same goal as the Commission's own advance payment program. (United supra, at pg. 464, footnotes omitted).

Implicitly, the court found it unreasonable without a previously expressed mandate to impose a standard of need for advance payments by producers for both standard advance payments and for "an[y] alternative means for attaining the same goal." In the instant case, both advance payments and interest reimbursements made by United are in issue. While a hearing was had on both of these issues such that the question of summary disposition is not involved in these proceedings, our decision on each of these issues is rendered with deference to the court's partial construction of our advanced payment orders.

(A) *Advance Payments.* The Commission's advance payments experiment was an attempt to stimulate exploration and development by the producers of natural gas by permitting interest-free loans from jurisdictional pipelines. The advance payment regulations created the impetus for interstate pipelines to advance capital to producers by permitting the pipelines to include the carrying charges of these loans in their respective rate bases. In a series of Commission orders which first established, and then refined, the advanced payment program, the Commission undertook to define the legal standard which would govern whether any particular advance payment to a producer would qualify for rate base treatment. The controversy in this as well as other recent cases dealing with advance payments relates to when the particular advances are to be properly included in the company's rate base, rather than whether such items of expense are ever to be reflected in rate base.

Commission staff has consistently taken the position that all advance payments must be related in both time and amount to the respective producer-recipient's need for such capital. Upon this theory, Commission staff has developed a thirty-day rule, holding in effect that any advance payment which is not expended by the producer-recipient within thirty days of the date the rates become effective (end of a locked-in period) in a particular rate case is front-ended and improperly reflected in the rate base of the pipeline for recovery from its consumers through the particular rates in

[3] See, "Order to Produce Data," United Gas Pipeline Company & Certain Producer Respondents, Docket No. CP76-238, issued January 25, 1977.

[4] See, FPC Order No. 410, 44 F.P.C. 1142 (October 2, 1970); FPC Order No. 441, 46 F.P.C. 1178 (November 10, 1971); FPC Order No. 465, 48 F.P.C. 1550 (December 20, 1973); and FPC Order No. 499, 50 F.P.C. 2111 (December 28, 1973). In the instant case each of the advance payments involved were made pursuant to FPC Order No. 465, supra, with the exception of two which are governed by FPC Order No. 499, supra.

[4] On April 5, 1977, United filed with the Commission a motion requesting that the Commission consider the United decision, supra, in its disposition of the issues at bar in the instant dockets. This motion was responded to by Laclede on April 18, 1977. Laclede does not oppose the procedure suggested in United's motion but notes that an issue with similar multi-docket ramifications is presented by the return to be allowed on United's preferred stock. While United's motion was technically deemed denied under Commission Regulations, the Commission will, of course, take cognizance of any relevant pronouncements of law in considering the issues involved in this case.

issue. The Commission has refused to adopt the Commission staff's thirty-day rule as the measure of the reasonableness and appropriateness of any particular advance, opting instead to decide the issue on a case-by-case basis which will appreciate the particular factual context within which each advance payment was made. In the instant case, Commission staff predicated its position upon the thirty-day rule of thumb in recommending that certain of United's advance payments be disallowed rate base treatment for purposes of determining the just and reasonable rates to be determined in this proceeding.

It is clear from the instant evidentiary record that $23,380,650 of the $79,238,960 of advanced payments made by United had not been expended by the various producer-recipients either during the locked-in period involved in this case or within thirty days subsequent to the end of this period. According to Commission staff's rule of thumb, therefore, the $23,380,650 of unexpended advances are, by definition, front-end and should be disallowed from United's rate base. In Tennessee Gas Pipeline Co., Opinion No. 769, 55 F.P.C. ---- (July 9, 1976), mimeo., pg. 31, the Commission held that front-end advance payments were presumptively extravagant under Order No. 499, 50 F.P.C. 2111 (1973), although the definition of front-end was left by the Commission to a case-by-case determination. Various front-end definitions have been advanced in cases on this point before the Commission, among which is the Commission staff's thirty day rule of thumb. As the Commission recently reiterated:

> To begin with, a determination of reasonableness and appropriateness requires consideration of the common business practices of producers; however, we would have also considered evidence by the pipeline as to how it could reasonably finance its installment payments to the producers for specific expenditures. In other words a pipeline might be able to show that thirty days is too short. (*Tennessee Gas Pipeline Co.*, Opinion No. 769-A, ---- F.P.C. ---- (May 31, 1977 mimeo., pg. 9).

Clearly, the threshold issue is one of fact, to be determined with reference to the evidence introduced into the record.

In the instant case, Commission staff has come forward with various reasons that expenditure of advanced payments within thirty days of the end of the locked-in period must demarcate front-end advances (which are includable in the company's rate base) from others which have been made but are not appropriately recoverable from consumers through the rates herein considered. Staff's evidentiary presentation boils down to the concern that advances which have not been expended by the producer-recipient in furtherance of exploration and development were imprudently advanced in terms of timing and the carrying charges on this imprudent expenditure cannot properly be passed on to the consumer through these just and reasonable rates. United's presentation, of course, defends the prudence of the timing of its advanced payments expenditures.

A finding that the advances are front-end, does not end the inquiry, for the Commission has held only that front-end advanced payments are "presumptively extravagant," a finding which may be rebutted by a showing that the front-end advance is, nevertheless, reasonable and appropriate because a positive benefit is conferred on the consumer. See, e.g., *Tennessee, supra*, at mimeo. pg. 32; *Transcontinental Gas Pipe Line Corp.*, Opinion No. 801, ---- F.P.C. ---- (May 31, 1977), mimeo. pg. 22. The advance payment agreement must be viewed as a whole in order to determine whether the overall cost of the expenditure to the consumer will be less than it would be otherwise, regardless of the front-end nature of the payment. The incentive for exploration and development by producers will cost the consumer, but if the total cost of a particular advance is, or could be, less if front-end, the incentive to the pipeline to bargain for more favorable terms from producers would have been destroyed if front-end or lump sum advances were strictly precluded. Accordingly, the question of whether a particular advance is "reasonable and appropriate" is properly resolved by determining on the whole of the evidence whether the incentive underlying the particular advanced payment was achieved at the lowest possible cost to the consumers.

In the instant case, United has made no showing whatsoever to rebut the presumption that the front-end advances are extravagant. In the absence of such showing, the Commission finds that those sums advanced and not expended by the respective recipient-producers within thirty days of the end of the locked-in period in this case represent an extravagant expenditure by United and accordingly are not "reasonable and appropriate" for rate base treatment in this case.

(B) *Interest reimbursements.* While the Commission has consistently construed the purpose of the advance payments program to be the creation of an alternative supply of capital available to producers to spur immediate exploration and development activity, the court in *United* supra, found that the incentive for production and development by producers would be created as well by pipeline reimbursement of the carrying charges assessed the producer for capital procured from any source, including the normal capital markets. It is true that interest-free capital does provide an incentive to producers to step up exploration and development activities. United's alternative program of paying the interest charges on its producers' other capital commitments provides, in effect, interest-free loans to producers not substantively distinguishable from ordinary advance payments, other than the source of the capital.

The *United* court remanded to the Commission the question whether United's various interest reimbursement agreements "effected the same result as the advance payment program and did so at a lower cost to the consumer and at less risk to the pipeline." *United*, supra, at pg. 465. If the purpose of the advance payments program is perceived as the court viewed it—i.e., stimulation of current exploration and development for new reserves of gas, rather than the creation of an alternative source of capital for producers stymied in their efforts at capital formation—then it is clear that United's alternative program did "effect the same result as the advance payment program."

The question that remains is whether, judged under the standards applied to standard advance payments, these interest reimbursements qualify for cost of service (O&M expense) treatment as "reasonable and appropriate."

The question is whether interest reimbursement upon capital otherwise procured should be included in O&M expense unless the capital upon which the interest is advanced by United was actually expended in the activities intended to be inspired by the advance payment program. If the underlying capital was not so expended, the interest on that capital would be deemed unreasonable and inappropriate for recoupment in this rate case. The record in this case indicates that United advanced monies for the purpose of interest reimbursement, but it does not indicate that the underlying capital for which the interest is covered was, in fact, expended by the respective recipient-producer either within thirty days of the end of the locked-in period involved in this case or expended entirely for the purposes which the advanced payment program intended. Consequently, we cannot on this record make a finding that these expenditures should be included in United's cost of service.

Accordingly, we are required to remand this limited issue to the Presiding Administrative Law Judge for further proceedings to elicit evidence with respect to the timing and amount of producer expenditures of those funds upon which United assumed the obligation to pay interest. Pending decision on this issue, the terms of the Stipulation and Agreement with respect to United's refund liability on the increment associated with its interest reimbursements is found to fully protect United's consumer's interests. Consequently, we approve the Stipulation and Agreement, and reserve this question for further proceedings and determination on the merits of this issue.

III. MISCELLANEOUS ISSUES

Having disposed of the three primary issues reserved for hearing and decision by the stipulation among the parties, we turn now to several subsidiary issues raised during the hearings by individual parties. We note at the outset, however, that these issues are resolved by substantial agreement of the vast majority of parties to be affected and the Commission staff.

(A) *Federal income tax allowance.* The Stipulation and Agreement provides

for a Federal income tax component of $18,892,596 by agreement of substantially all affected parties. At hearing it was established that this component of the stipulated cost of service was arrived at through an application of the statutory 48 percent tax rate. Tr. 28. MDG argues that the use of the 48 percent statutory rate should be disallowed in favor of the alleged effective tax rate for the test period in this case. MDG relies upon *FPC* v. *United Gas Pipe Line Co.*, 386 U.S. 237 (1967), as assertedly requiring the use of only the actual taxes paid by a jurisdictional utility in determining just and reasonable rates.

This Commission's review of a proffered settlement provides a different context from that in which adverse parties present a disputed factual issue for decision. MDG's argument is predicated solely upon the fact that the settlement cost of service Federal income tax component was derived through the use of the statutory rate. This was not substantial evidence that the settlement cost of service is inflated or excessive in any respect. While United certainly bears the burden of substantiating the reasonableness of its rate increase, we cannot find on this record any evidence that the agreed-upon use of the statutory rate is not just and reasonable. Furthermore, customers of United, each with an interest similar to MDG's in this proceeding, have compromised any objection which they may have had with respect to this issue in the interest of overall settlement. The significant fact in this case is that the Federal income tax figure agreed to by the parties herein in settlement was one element leading to settlement. Because settlements of litigation are favored and upon the principles expressed in *Pennsylvania Gas & Water Co.* v. *FPC*, 463 F. 2d 1242 (D.C. Cir. 1972), we conclude that the record evidence in this case supports the instance settlement in respect to the tax component.

(B) *Interest rate on refunds.* On June 15, 1976, MDG filed a petition with the Commission which requested that United be assessed interest on any refund liability arising in this case at the rate of 9 percent from October 10, 1974, rather than at the rate of 7 percent as stipulated by the parties in their settlement of his case. MDG suggests that this modification of the proffered Stipulation and Agreement is required by *American Public Gas Association* v. *FPC*, ____ F. 2d ____ (D.C. Cir. 1976), wherein the Commission's decision to apply the increased 9 percent interest rate only to refunds on rate filing made after October 10, 1974, was reversed. On July 9, 1976, United answered MDG's petition in opposition to any change in the stipulated interest rate for refunds in this case.

The parties to this settlement have explicitly stipulated an interest rate to be applied to refunds in his proceeding. Nothing in the *APGA* decision limits the discretion of parties in settlement negotiations to agree to a lesser, or even greater, interest rate on refunds than 9 percent for the period after October 10, 1974. Similarly, the *APGA* decision does not bar the Commission from accepting such agreements where appropriate.

We have previously stated that with respect to pending settlement agreements filed prior to December 6, 1976, where there is an indication of actual bargaining for a particular refund interest rate during the course of negotiations, the Commission will apply the settled upon interest rate. *Rate of Interest on Amount Subject to Refund*, RM74-18, Order Denying Rehearing and Further Clarifying Order No. 513-A, issued December 6, 1976, mimeo, p. 5. See also, *Natural Gas Pipeline Co. of America*, Opinion No. 762-A, Docket No. RP-74-96, issued December 6, 1976. However, where the Commission has no evidence to indicate the interest rate was bargained for as an integral and key part of the settlement, it has applied the 9 percent rate, *Northern Natural Gas Co.*, Docket Nos. RP74-75, et al., July 27, 1976.

United points out that the interest rate on refunds is an important element of any rate proceeding. But MDG is not directly controverted in its statement that the 7 percent rate "was not a negotiated figure but rather was included simply because that was what Order 513 seemed to require." MDG, pg. 3. Thus, the pleadings fail to demonstrate the interest rate was an integral or key part of the settlement. MDG's requested modification of the settlement is therefore accepted as consistent with the Commission's Rules in Section 154.67, 18 CFR 154.67.

The Commission finds:

(1) United Gas Pipe Line Co. is a "natural gas company" subject to the provisions of the Natural Gas Act, and the sales of natural gas subject to this order are sales of natural gas in interstate commerce for resale subject to the jurisdiction of the Commission.

(2) The proposed Stipulation and Agreement is just and reasonable, as modified by the provisions of this Opinion and Order.

(3) The collection of that portion of the instant increased rates attributable to United's noncertificated purchases is reasonable, subject to a contingent refund liability should it be determined that these purchases were made at a cost to United in excess of the applicable "just and reasonable", federally regulated price.

(4) The collection of that portion of the instant increased rates attributable to the $23,380,650 of United's advance payments herein determined to be a front-end and extravagant expediture has not been shown to be just and reasonable under the Act and United should be required to file revised tariff sheets in this regard as necessary to conform to this order.

(5) The collection of that portion of the instant increased rates attributable to the $1,644,956 of other operation and maintenance expense reflecting United's reimbursement of interest on loans procured by producers (as alternatives to standard advance payment agreements) is reasonable as conditioned in the Stipulation and Agreement upon refund liability in the event that, upon remand such reimbursements are found not "reasonable and appropriate".

(6) In all other respects the Stipulation and Agreement is found to be an adequate and just compromise of the matters at issue in this case and acceptance and approval of such Stipulation and Agreement is deemed to be in the public's interest and in conformance with the standards of the Natural Gas Act.

The Commission orders:

(A) The increased rates filed by United as reflected in the Stipulation and Agreement between the parties are disallowed to the extent that they do not conform to this opinion and order.

(B) Because the parties have stipulated refund procedures, United shall be required to undertake those refund obligations triggered in respect to finding Paragraph (4), supra, within sixty days of the issuance of this Opinion and Order.

(C) Within 60 days of the issuance of this Opinion and Order, United shall file revised tariff sheets for the Refund Period—April 6, 1974, through May 19, 1975—as required by finding paragraph (4), supra, which substitute sheets shall be subject to Commission review and approval.

(D) Within 30 days of the Commission's approval of Applicant's substitute tariff sheets in accordance with Paragraph (C) above, Applicant shall refund to its customers all amounts, if any, collected in excess of those which would have been payable under the rates and charges approved in accordance with Paragraph (C) above, together with interest at a rate of nine percent per annum from the date of payment to Applicant to the date of refund.

(E) Within 15 days after refunds have been made United shall file with the Commission a compliance report showing monthly billing determinants and revenues under prior, present and adjudicated rates; monthly adjudicated rate increase, monthly rate refund, and the monthly interest computation, together with a summary of such information for the total refund period. A copy of such report shall also be furnished to each state commission within whose jurisdiction the wholesale customer distributes and sells natural gas at retail.

(F) Nothing herein shall be construed as removal of United's refund liability with respect to finding paragraphs (2) and (5), supra, which is contingent upon final Commission decisions in other proceedings.

(G) Upon any final Commission decision in the two proceedings referred to in (D) supra, triggering the stipulated refund obligations agreed upon among the parties to this case, the obligations shall be satisfied within 60 days of any such final Commission decision together with an obligation upon United to file substitute tariff sheets necessary to reflect the pertinent changes required by any such adverse resolution within the same 60 days.

By the Commission.[*]

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-203]

WISCONSIN ELECTRIC POWER CO.

Order Accepting for Filing and Suspending Proposed Increased Rates

AUGUST 1, 1977.

On July 18, 1977, Wisconsin Electric Power Co. (Company) completed its tender for filing[1] of a proposed Power Supply Agreement with Wisconsin Michigan Power Co.[2] The filing would increase the Company's return on equity, although it would reduce pooling charges by an estimated $186,382, based on the 12-month period ending December 31, 1977. The Company proposes waiver of the notice requirements to permit an effective date of January 1, 1977.

A preliminary review of the Company's filing indicates that the proposed increase in rates and charges have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful.

The Commission finds:

Good cause exists to accept for filing and suspend the proposed increased rates and charge in the Power Supply Agreement tendered by the Company on July 18, 1977, as hereinafter ordered.

The Commission orders:

(A) The proposed increased rates and charges in the Power Supply Agreement tendered by the Company on July 18, 1977, are hereby accepted for filing.

(B) Pursuant to the authority contained in and subject to the provisions of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act, a public hearing will be held at a time and place to be specified in a subsequent Commission order concerning the lawfulness of the proposed increased rates and charges tendered by the Company.

(C) Pending such hearing and decision thereon, the increased rates and charges in the Power Supply Agreement tendered by the Company are hereby suspended and the use thereof deferred until January 2, 1977, when they shall become effective subject to refund.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22677 Filed 8-5-77;8:45 am]

[*] Commissioner Holloman, dissenting, filed a separate statement which is filed as part of the original document.

[1] The Company tendered its filing initially on April 27, 1977, but was notified of a filing deficiency by Commission letter.

[2] Rate Schedule Designation to be provided to the Company by future letter.

FEDERAL RESERVE SYSTEM

B.O.C. CORP.

Acquisition of Bank

B.O.C. Corp., Sheridan, Wyo., has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire all of the voting shares (less directors' qualifying shares) of the Wyoming Security Bank, Sheridan, Wyo. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-22765 Filed 8-5-77;8:45 am]

FIRST MIDWEST BANCORP., INC.

Order Approving Acquisition of Bank

First Midwest Bancorp., Inc., St. Joseph, Mo. ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire 80 percent or more of the voting shares of the Farmers Bank of Gower, Gower, Mo. ("Bank"), through the acquisition of 100 percent of the voting shares of L.W.J.S. Corp., Gower, Mo., a one-bank holding company with respect to Bank. L.W.J.S. Corp., which is engaged in no activities other than the ownership of shares of Bank, is to be dissolved upon consummation of the proposed transaction. Accordingly, the acquisition of L.W.J.S. Corp. is treated herein as an acquisition of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the 16th largest banking organization in Missouri, controls five banks with aggregate deposits of approximately $168.6 million,[1] representing approximately 0.89 percent of total deposits in commercial banks in Missouri. Applicant's acquisition of Bank, the 527th largest bank in the State, would increase its share of total deposits in the State by 0.02 percent and would not alter its ranking among other banking organizations in the State. Consummation of Applicant's proposal would not result in a significant increase in the concentration of banking resources in Missouri.

Bank holds deposits of approximately $5.2 million, representing 10.5 percent of the total deposits in commercial banks in the Clinton County banking market, and thereby ranks as the smallest of five banks located in the market.[2] None of Applicant's banking subsidiaries is located in this market, although four of its subsidiary banks are located in the St. Joseph banking market, which is adjacent to the relevant market.[3] These banks are located from 17.7 to 29.3 miles from Bank. It does not appear that any of these four banks derives significant amounts of deposits or loans from the service area of Bank; nor does it appear that any significant competition currently exists between any of Applicant's subsidiary banks, on the one hand, and Bank, on the other hand.

Missouri's restrictive branch banking laws prohibit branching by Applicant's

[1] All banking data are as of December 31, 1976.

[2] The Clinton County banking market, the relevant geographic market for the purposes of analyzing the competitive effects of the subject proposal, is approximated by all of Clinton County, Mo.

[3] The St. Joseph banking market is approximated by Buchanan County, less Rush and Bloomington townships, Andrew County and western De Kalb County, all in Missouri, and northern Doniphan County in Kansas.

banking subsidiaries into the Clinton County market. Moreover, the market's ratios of deposits per banking office and population per banking office are substantially below the State averages, and the total population of Clinton County is relatively small, suggesting that the Clinton County market is not attractive for de novo entry. On the basis of the facts of record, the Board concludes that consummation of the subject proposal would not have any significant adverse effects on existing or potential competition in any relevant area, and that competitive considerations are consistent with approval of the application.

The financial and managerial resources of Applicant, its subsidiaries, and Bank are regarded as generally satisfactory and the future prospects for each appear favorable. Applicant proposes to retire the acquisition debt associated with this proposal over a 15-year period. It appears that Applicant has the resources to amortize such debt while maintaining adequate capital levels at each of its subsidiary banks. Indeed, Applicant appears capable of amortizing this acquisition debt in less than 15 years while preserving sufficient capital levels. Accordingly, considerations relating to banking factors are consistent with approval. Considerations relating to the convenience and needs of the community to be served lend some weight toward approval of the application, since Applicant proposes, among other things, to increase the number of hours Bank will be open for business each week, offer higher rates of interest on time accounts than are currently available from Bank, and offer an additional type of certificate of deposit.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors, effective August 1, 1977

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Serial No. A 8684]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Forest Service, U.S. Department of Agriculture filed application Serial No. A 8684 on September 30, 1974, for a withdrawal in relation to the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

CORONADO NATIONAL FOREST

Goudy Canyon Research Natural Area

Beginning at a point from which the Webb Peak Triangulation Station bears N. 89°32'03" E., 4,360.94'; thence N. 44°45'W., 1,076.09'; thence N. 06°47' W., 627.04'; thence N. 32°58' W., 325.59'; thence S. 89°-30' W., 279.39'; thence S. 19°38' W., 771.86'; thence S. 49°27' W., 846.67'; thence S. 76°-40' W., 2,143.79'; thence S. 20°59' W., 4,860.15'; thence S. 02°06' E., 896.89'; thence S. 48°46' E., 1,199.12'; thence N. 80°22' E., 2,506.74'; thence N. 14°20' E., 3,915.43'; thence N. 37°41' E., 2,685.98' to the point of beginning.

This tract, when surveyed, will probably be located within sections 25, 35, and 36, Township 8 S., Range 23 E., and section 30, Township 8 S., Range 24 E.

The area as described contains approximately 560 acres in Graham County.

The applicant desires that the lands be designated as a Research Natural Area to preserve virgin stands of Douglas fir and Mexican white pine for scientific investigation. These trees are some of the largest specimens to be found in the Southwest.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on October 21, 1974, Volume No. 39, Page No. 37403, Document No. 74-24398.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws but not the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center Phoenix, Arizona 85073.

Dated: July 28, 1977.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

[FR Doc 77-22694 Filed 8-5-77;8:45 am]

[A-9613]

ARIZONA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 28, 1977

The Department of the Army, Corps of Engineers, filed withdrawal application Serial No. A-9613 on June 29, 1976.

The applicant proposes to withdraw the following described lands from all forms of appropriation under the public land laws and from location and entry under the general mining laws, including the mineral leasing laws:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 4 N., R. 3 E.,
Sec. 3, lots 3 and 4, $SW\frac{1}{4}NW\frac{1}{4}$, $N\frac{1}{2}SW\frac{1}{4}$, and $SE\frac{1}{4}SW\frac{1}{4}$;
Sec. 4, lots 1, 2, 5, 6, 7, 8, 9, and 10, $S\frac{1}{2}SE\frac{1}{4}$ and $E\frac{1}{2}SW\frac{1}{4}$.

The areas described aggregate 534.19 acres in Maricopa County.

The surface of the following described lands has been transferred out of Federal ownership with minerals reserved to the United States; it is proposed to withdraw the mineral estate from location and entry under the mining laws, including the mineral leasing laws:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 4 N., R. 3 E.,
Sec. 3, $N\frac{1}{2}SE\frac{1}{4}NE\frac{1}{4}$
T. 5 N., R. 3 E.,
Sec. 27, $S\frac{1}{2}S\frac{1}{2}NW\frac{1}{4}$;
Sec. 33, lots 1, 2, 3, and 4, $NE\frac{1}{4}$, $W\frac{1}{2}SE\frac{1}{4}$, $SE\frac{1}{4}SE\frac{1}{4}NW\frac{1}{4}$, and $NE\frac{1}{4}SW\frac{1}{4}$;
Sec. 34, lot 1, $N\frac{1}{2}$, $NE\frac{1}{4}SW\frac{1}{4}$, and $S\frac{1}{2}SW\frac{1}{4}$.

The areas described aggregate 884.97 acres in Maricopa County.

The applicant desires that the lands be reserved for the construction, operation, and maintenance of a Congressionally authorized flood control project and recreational development for the Cave Buttes Dam.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on August 17, 1976, Volume No. 41, Page No. 34798-34799, Document No. 76-23906.

[4] Voting for this action: Chairman Burns and Governors Wallich, Coldwell, Partee, and Lilly. Absent and not voting: Governors Gardner and Jackson.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Section 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws and the mineral leasing laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by the action of the Secretary of the Interior.

All communications (except for public hearing requests in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

MARIO L. LOPEZ,
Chief, Branch of Lands and Minerals Operations.

National Park Service

APOSTLE ISLANDS NATIONAL LAKESHORE, WISCONSIN

Availability of Environmental Assessment Development Concept Plan, Mainland Developments

The National Park Service has prepared an environmental assessment to consider the effects of alternative proposals concerning the mainland developments at Apostle Islands National Lakeshore, Wisconsin.

The assessment states the planning problem, describes components of the local and regional environment which may affect, or be affected by, the various proposals, and discusses alternative solutions.

Copies of the environmental assessment are available at Apostle Islands National Lakeshore, 1972 Centennial Drive, Rural Route, Bayfield, Wisconsin 54814; and the Midwest Regional Office, 1709 Jackson Street, Omaha, Nebraska 68102. Anyone wishing to comment on this document should submit remarks in writing to the Park Superintendent or the Regional Director at the above addresses on or before September 7, 1977.

Dated: July 22, 1977.

MERRILL D. BEAL,
Regional Director, Midwest Region.

BUCKSTAFF BATH HOUSE CO., ET AL.

Intention to Extend Concession Contract

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on or before September 7, 1977, the Department of the Interior, through the Director, National Park Service, proposes to extend the concession contracts with the following concessioners, authorizing them to continue to operate bathhouses in Hot Springs National Park, and to obtain hot mineral waters therefrom for drinking, bathing, and such other purposes as may be authorized for a period of three (3) years from January 1, 1978, through December 31, 1980.

Buckstaff Bath House Company
Health Services, Inc.
Lamar Bath House Company
Ozark Bath House Company
Superior Bath House Company, Inc

An assessment of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the human environment, and that it is not a major Federal action under the National Environmental Policy Act and the guidelines of the Council on Environmental Quality. The environmental assessment may be reviewed in the Southwest Regional Office, Post Office Box 728, Santa Fe, New Mexico 87501.

The foregoing concessioners have performed their obligations to the satisfaction of the National Park Service, under existing contracts which expire by limitation of time on December 31, 1977, and therefore, pursuant to the Act of October 9, 1965, as cited above, are entitled to be given preference in the renewal of the contracts and in the negotiation of new contracts. However, the Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 7, 1977.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

Dated: July 20, 1977.

JOE BROWN,
Acting Associate Director,
National Park Service.

[FR Doc 77-22651 Filed 8-5-77;8:45 am]

EVERGLADES PARK CATERING, INC.

Intention to Extend Concession Contract

Pursuant to the provisions of Section

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that thirty (30) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to extend the concession contract with Everglades Park Catering, Inc., authorizing it to continue to provide concession facilities and services for the public at Everglades National Park for a period of five (5) months from January 1, 1978, through May 31, 1978.

An assessment of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the environment, and that it is not a major Federal action having a significant impact on the environment under the National Environmental Policy Act of 1969. The environmental assessment may be reviewed in the Southeast Regional Office, 1895 Phoenix Boulevard, Atlanta, Georgia 30349.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1977. An administrative decision to extend this contract for five months was made to provide the Service with sufficient time to prepare a prospectus to secure a concessioner and also to prevent the current contract expiration from occurring during the visitor season. The Secretary is also required

to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 7, 1977.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

Dated: July 29, 1977.

IRA J. HUTCHINSON,
Director, National Park Service.

[FR Doc 77-22635 Filed 8-5-77;8:45 am]

HOWARD T. ROSE CO., INC.

Intention to Negotiate Concession Contract

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that thirty (30) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Parks Service, proposes to negotiate a concession contract with Howard T. Rose Company, Inc., authorizing it to continue to provide concession facilities and services for the public at Sailors Haven Site, Fire Island National Seashore, New York for a period of five (5) years from January 1, 1977, through December 31, 1981.

An assessment of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the environment, and that it is not a major Federal action having a significant impact on the environment under the National Environmental Policy Act of 1969. The environmental assessment may be reviewed in the Regional Office, North Atlantic Region, 150 Causeway Street, Boston, Massachusetts 02114.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1976 and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants Howard T. Rose Company, Inc., as the present satisfactory concessioner, the right to meet the terms of responsive offers for the proposed new contract and a preference in the award of the contract, if the offer of Howard T. Rose Company, Inc., is substantially equal to others received. The Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 7, 1977.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

Dated: July 20, 1977.

WILLIAM J. WHALEN,
Director, National Park Service.

[FR Doc 77-22648 Filed 8-5-77;8:45 am]

LE CONTE LODGE, INC.

Intention to Extend Concession Contract

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on or before September 7, 1977, the Department of the Interior, through the Director of the National Park Service, proposes to extend the concession contract with LeConte Lodge, Inc., authorizing it to continue to provide concession facilities and services for the public at Great Smoky Mountains National Park for a period of one (1) year from January 1, 1978, through December 31, 1978.

A review of the factors involved in extending the LeConte Lodge contract in terms of environmental changes has been made and it has been determined that the proposed extension will not cause any significant environmental impact and preparation of an environmental statement is not required. Any changes in operation which take place during the extended period will tend to reduce environmental impacts. The extension period will also be used to gather additional environmental impact data in preparation for a recommendation to either continue or discontinue the LeConte Lodge operation.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1977, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. However, the Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 7, 1977.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract

Dated: July 22, 1977.

WILLIAM J. WHALEN,
Director, National Park Service.

UNITED STATES v. NORTHWEST COLLISION CONSULTANTS

Proposed Consent Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. section 16(b)-(h), that a proposed consent judgment and a competitive impact statement have been filed with the United States District Court for the Western District of Washington at Seattle in Civil No. C75-837V. The complaint in this case alleges that an association of auto body repair shops, Northwest Collision Consultants, and its members have conspired to fix the cost of auto body repair jobs, to eliminate discounts on new parts used in repairing damaged automobiles, and to fix the hourly rates that auto body repair shops charge.

The proposed judgment will enjoin the defendant and its members from having any agreement or understanding or from attempting to influence any other auto body repair shop regarding the cost of auto body repair jobs, the prices or discounts at which parts are sold the hourly rates charged, or the profit margins utilized. The judgment also prohibits understandings whereby an auto body repair shop would refuse or would not attempt to obtain a repair job. In addition, the defendant is directed to collect and hold until further order of the Court any written materials which it distributed in the past that refered to any price, discount, profit margin or cost of doing business in the automobile repair industry.

Public comment is invited on or before October 3, 1977. Such comments and responses thereto will be published in the Federal Register and filed with the Court. Comments should be directed to Anthony E. Desmond, Chief, San Francisco office, Antitrust Division, Department of Justice, San Francisco, California 94102.

Dated: July 29, 1977.

JOHN H. SHENEFIELD,
Acting Assistant Attorney General, Antitrust Division.

Anthony E. Desmond, James E. Figenshaw, Christopher S. Crook, Antitrust Division, Department of Justice, 450 Golden Gate Avenue, Box 36046, Room 16432, San Francisco, California 94102; Telephone 415-556-6300; Attorneys for the United States.

UNITED STATES DISTRICT COURT, WESTERN DISTRICT OF WASHINGTON AT SEATTLE

United States of America, plaintiff, v. *Northwest Collision Consultants*, defendant.

Civil No. C75-837V.
Filed: July 29, 1977.

STIPULATION

It is stipulated by and between the undersigned parties, plaintiff United States of America, and defendant, Northwest Collision Consultants, by their respective attorneys, that:

1. The parties consent that a final judgment in the form hereto attached may be filed and entered by the Court upon the motion of either party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16) and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent which it may do at any time before the entry of the proposed final judgment by serving notice thereof on defendant and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to plaintiff and defendant in this or any other proceeding.

Dated: July 29, 1977.

For the plaintiff: John H. Shenefield, Acting, Assistant Attorney General; William E. Swope, Charles F. B. McAleer, Anthony E. Desmond, James E. Figenshaw, Christopher S. Crook, Robert J. Ludwig, Attorneys, Department of Justice.

For the Defendant: Kane, Vandeberg & Hartinger, Washington Plaza Building, One Washington Plaza, Suite 2100, Tacoma, Washington 98402. G. Perrin Walker, Attorney for Defendant.

UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON AT SEATTLE

United States of America, Plaintiff, v. *Northwest Collision Consultants*, Defendant.

Civil No. C75-837V
Filed: July 29, 1977

FINAL JUDGMENT

Plaintiff, United States of America, having filed its complaint herein on December 3, 1975, and defendant, Northwest Collision Consultants, having appeared by its counsel, and both parties by their respective attorneys having consented to the making and entry of this Final Judgment without admission by any party in respect to any issue;

Now, therefore, before any testimony has been taken herein, without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed as follows:

I

This Court has jurisdiction over the subject matter of this action and of the parties hereto. The complaint states claims upon which relief may be granted against the defendant under Section I of the Act of Congress of July 2, 1890, as amended (15 U.S.C. § 1), commonly known as the Sherman Act.

II

As used in this Final Judgment:

(A) "Defendant" means defendant Northwest Collision Consultants;

(B) "Person" means any individual, partnership, corporation, association, firm or any other business or legal entity;

(C) "Parts" means any portion of an automobile except the engine and its components;

(D) "Body repair job" means the application of new or used parts and labor to the damaged bodies of automobiles for the purpose of repairing them;

(E) "Hourly rate" means the time charge applied to the length of time that each body repair job requires; and

(F) "Body repair shop" means any person engaged in the performance and sale of a body repair job.

III

The provisions of this Final Judgment shall apply to the defendant and to each of its officers, directors, agents, employees, members, chapters, successors and assigns, and to all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

IV

Defendant is enjoined and restrained from directly or indirectly:

(A) Entering into, adhering to, maintaining, or furthering any contract, agreement, understanding, plan, or program, to fix, establish, or maintain (1) prices charged by body repair shops in the performance and sale of body repair jobs, (2) prices, discounts, markups, or other terms or conditions at which new or used parts are sold by body repair shops, (3) hourly rates charged by body repair shops, or (4) profit margins utilized by body repair shops;

(B) Advocating, suggesting, urging, inducing, compelling, or in any other manner influencing or attempting to influence any person to use or adhere to (1) any price to be charged by a body repair shop in the performance and sale of a body repair job, (2) any price, discount, markup, or other term or condition at which new or used parts are to be sold by a body repair shop, (3) any hourly rate to be charged by a body repair shop, or (4) any profit margin to be utilized by a body repair shop;

(C) Policing, urging, coercing, influencing, or attempting to influence in any manner any body repair shop or any other person, or devising or putting into effect any procedure (including but not limited to picketing) the effect of which is to fix, maintain, or stabilize (1) prices to be charged by a body repair shop in the performance and sale of a body repair job, (2) any price, discount, markup, or other term or condition at which new or used parts are to be sold by a body repair shop, (3) any hourly rate to be charged by a body repair shop, or (4) any profit margin to be utilized by a body repair shop; and

(D) Entering into, adhering to, maintaining or furthering, any contract, agreement, understanding, plan or program with any other person not to accept or attempt to obtain any body repair job.

V

Defendant is ordered and directed:

(A) Within 60 days after entry of this Final Judgment to serve a copy of this Final Judgment together with a letter identical in text to that attached to this Final Judgment as Appendix A, upon each of those persons who are or have been officers or members of defendant at any time since January 1, 1974;

(B) To serve a copy of this Final Judgment together with a letter identical in text to that attached to this Final Judgment as Appendix A, upon all of its future members at such time as they become members;

(C) To collect from its members and hold until further order of the Court any printed or written materials distributed be defendant, including but not limited to the document entitled "Projected Operating Costs," and without regard to whether said materials are filled out or blank, which refer in any manner to (1) Any price charged or to be charged by a body repair shop in the performance and sale of a body repair job, (2) any price, discount, markup, or other term or condition at which new or used parts are sold or are to be sold by a body repair shop, (3) any hourly rate charged or to be charged by a body repair shop, (4) any profit margin utilized or to be utilized by a body repair shop, or (5) any cost of doing business as a body repair shop; and

(D) To file with this Court and serve upon the plaintiff within sixty (60) days after the date of entry of this Final Judgment an affidavit as to the fact and manner of compliance with subsections A and C of this Section V.

VI

(A) For the purpose of determining or securing compliance with this Final Judgment, and for no other purpose, any duly authorized representative of the Department of Justice shall, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to defendant made to its principal office, be permitted, subject to any legally recognized privilege:

(1) Access during the office hours of defendant to all books, ledgers, accounts, correspondence, memoranda, and other records and documents, in the possession or under the control of defendant, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of defendant and without restraint of interference from it, to interview officers, directors, agents, partners, members, or employees of defendant, who may have counsel present, regarding any such matters.

(B) Defendant, upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, shall submit such reports in writing with respect to any of the matters contained in this Final Judgment as may from time to time be requested.

No information obtained by the means provided in this Section VI shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

VII

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance therewith, and for the punishment of violations thereof.

VIII

Entry of this Final Judgment is in the public interest.

Dated: _____

United States District Judge.

APPENDIX A

Re: Final Judgment in *United States* v. *Northwest Collision Consultants*, Civil No. C75-837V

DEAR SIR: Enclosed herewith is a copy of a Final Judgment entered _____, 1977 in *United States* v. *Northwest Collision Consultants*, Civil No. C75-837V. The terms of the Final Judgment require that a copy of said Judgment as well as this letter be served upon you. You should read the terms of the Final Judgment carefully and note that you as a member of the association are bound by its provisions. The purpose of this letter is to enable you to better understand those provisions.

The essence and intent of the Final Judgment is that you should make your own pricing and profit decisions without consulting with any other body repair shop or organization of body repair shops. These decisions include not only the total cost or bottom line figure of body repair jobs, but also the cost of parts (including whether or not some discount is given), hourly rates, and profit margins. It is, for example, illegal and a violation of the terms of the Final Judgment to attempt to influence another person to utilize a particular margin in his body repair business. In this connection, you are directed to immediately return to this office all copies in your possession of any "Projected Operating Costs" sheets, whether or not these sheets have been filled out, and any other materials you have relating to the cost of doing business which have been distributed by this office.

UNITED STATES DISTRICT COURT, WESTERN DISTRICT OF WASHINGTON AT SEATTLE

United States of America, Plaintiff, v. *Northwest Collision Consultants*, Defendant.

Civil No. C75-837V.

Filed: July 29, 1977.

COMPETITIVE IMPACT STATEMENT

Pursuant to section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. §§ 16 (b)-(h), Pub. L. 93-528 (December 21, 1974)), the United States of America hereby files this Competitive Impact Statement relating to the proposed consent judgment submitted for entry in this civil antitrust proceeding.

I. NATURE AND PURPOSE OF THE PROCEEDING

On December 3, 1975, the United States filed a civil complaint under section 4 of the Sherman Act (15 U.S.C. § 4), alleging that defendant Northwest Collision Consultants, violated section 1 of the Sherman Act (15 U.S.C. § 1). The complaint alleges a combination and conspiracy in unreasonable restraint of interstate commerce, the substantial terms of which were that the defendant and various co-conspirators agreed (1) to raise, fix, and maintain hourly rates charged by body repair shops; (2) to eliminate discounts on new parts utilized in the performance of body repair jobs; and (3) to raise, fix, and maintain prices charged by body repair shops for the performance of body repair jobs.

II. PRACTICES AND EVENTS GIVING RISE TO THE ALLEGED VIOLATION OF THE ANTITRUST LAWS

In the automobile repair industry, the cost of a body repair job consists of two ingredients: (1) a charge for the parts utilized in the repair of the damaged automobile and (2) a time charge or hourly rate applied to the length of time that each body repair job requires. The time charge or hourly rate includes not only wages paid to the employees of body repair shops, but also includes taxes, insurance, office and other administrative expenses, and a profit margin. The new parts utilized in body repair jobs are all manufactured outside the State of Washington and generally sold to new car dealers who in turn sell the parts to body repair shops.

The defendant Northwest Collision Consults (NCC) is a Washington corporation composed of body repair shops located in the Greater Seattle-Tacoma Area and other communities in Western Washington. The Government contends that beginning in December of 1973 and continuing through December of 1974, the defendant and its members combined and conspired to raise the total cost of body repair jobs by raising and maintaining the hourly rates charged by body repair jobs and also by agreeing to eliminate any discounts on the new parts that are necessary for the repair of the damaged automobile. The effects of this combination and conspiracy, the Government contends, were that competition among members of the defendant was restricted, prices of body repair jobs were maintained at noncompetitive levels, and the owner of damaged automobiles were prevented from receiving competitive bids or competitive prices for body repair jobs.

III. EXPLANATION OF THE PROPOSED CONSENT JUDGMENT

The proposed consent judgment is similar to an earlier consent judgment published in 41 FR 28550 on July 12, 1976. The Government later withdrew its consent to said earlier judgment following an apparent misunderstanding with defendant's counsel over the interpretation of said judgment. This misunderstanding has now been resolved.

The proposed consent judgment is binding upon all of defendant's members and expressly requires the defendant to serve all of its present members and all of its future members with copies of the judgment. Defendant NCC is prohibited by the consent judgment from having any agreement or understanding concerning any of the following: (1) The total price or cost of a body repair job, (2) any price, discount, or markup at which parts are sold, (3) any hourly rate charged by a body repair shop, or (4) any profit margin utilized by a body repair shop. In addition, the consent judgment contains express prohibitions against attempting to influence any other body repair shop in the prices, discounts, hourly rates, and profit margins which that shop employs. The consent judgment also prohibits any understanding that a body repair shop would not accept or attempt to obtain any body repair job. Finally, the defendant is required to collect from its members and hold until further order of the Court any written materials which it distributed in the past that referred to any price for a body repair job, any discount on parts, any hourly rate, any profit margin, or any cost of doing business as a body repair shop.

To assist defendant's members in understanding and abiding by all the provisions of the consent judgment, the defendant is required to accompany its service of the judg-

ment with a letter, the text of which is appended to the judgment, which explains those provisions.

IV. REMEDIES AVAILABLE TO POTENTIAL PRIVATE PLAINTIFFS

Any potential private plaintiffs who might have been damaged by the alleged violation will retain the same right to sue for monetary damages and any other legal and equitable remedies that they would have had were the proposed consent judgment not entered. However, pursuant to section 5(a) of the Clayton Act (15 U.S.C. § 15(a)), as amended, this judgment may not be used as prima facie evidence in private litigation.

V. PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED CONSENT JUDGMENT

The proposed consent judgment is subject to a stipulation by and between the United States and the defendant, which provides that the United States may withdraw its consent to the proposed judgment at any time until the Court has found that entry of the proposed judgment is in the public interest. By its terms, the proposed consent judgment provides for the Court's retention of jurisdiction of this action in order, among other reasons, to permit either of the parties thereto to apply to the Court for such orders as may be necessary or appropriate for the modification of the final judgment.

As provided by section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16(b)), any persons wishing to comment upon the proposed judgment may, for a sixty-day period prior to the effective date of the proposed judgment, submit written comments to the United States Department of Justice, Attention Anthony E. Desmond, Chief, Antitrust Division, 450 Golden Gate Avenue, Box 36046, San Francisco, Calif. 94102. The Department of Justice will file with the Court and publish in the FEDERAL REGISTER such comments and its response to them. In evaluating any and all such comments, the Department will determine whether there is any reason for withdrawal of its consent to the proposed judgment.

VI. ALTERNATIVES TO THE PROPOSED CONSENT JUDGMENT CONSIDERED BY THE UNITED STATES

An alternative to the proposed Consent Judgment considered by the Department of Justice was a full trial on the merits. It was determined that such a trial involving substantial expense to the United States as well as the commitment of manpower, was not warranted since the equitable remedies set forth in the proposed Consent Judgment will be effective to restore competition in the automobile body repair business in the western areas of the State of Washington. Moreover, the remedies set forth in the proposed Consent Judgment provide for all the relief requested in the Complaint

VII. DETERMINATIVE DOCUMENTS

Since there are no materials or documents which were determinative in formulating a proposal for a consent judgment, none are being filed by the plaintiff pursuant to section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16(b)).

Dated: July 29, 1977.

DEPARTMENT OF LABOR

Office of the Secretary

PRIVACY ACT OF 1974

Notice of Systems of Records

Pursuant to 5 U.S.C. 552a(e)(11), section 3 of the Privacy Act of 1974, the Department of Labor hereby publishes notice of systems of records DOL/ETA–18 and DOL/ETA–19, to be established by the Employment and Training Administration; and DOL/LMSA–17 established by the Division of Enforcement, Pension and Welfare Benefits Programs. DOL/ETA–18 will be maintained by ABT Associates, Inc., Cambridge, Mass., under a research study contract to collect data from state agencies and individuals for the purpose of a statistical report under section 906 of the Social Security Act, 42 U.S.C. 1106. DOL/ETA–19 will be maintained by Stanford Research Institute, Menlo Park, Calif., under a similar contract to collect data from state agency records and individuals. The purpose of the study is to determine the extent of and the reasons for delayed filing or never filing for unemployment benefits and to determine the impact of the disqualification provisions of state unemployment insurance laws. ABT Associates, Inc., and Stanford Research Institute are contractors within the meaning of 5 U.S.C. 552a(m) of sec. 3 of the Privacy Act. These systems are exempted under 5 U.S.C. 552a(k)(4) of the Act as records to be used solely for statistical purposes.

DOL/LMSA–17 is an investigatory record, formerly a part of DOL/LMSA–16. These records have been segregated and are now established as a separate system. This system is exempted under 5 U.S.C. 552a (j)(2) and (k)(2) of the Act.

Signed at Washington, D.C., this 28th day of July 1977.

RAY MARSHALL,
Secretary of Labor.

DOL/ETA–18

System name:

Analysis of Delayed and Never Filers for Unemployment Insurance

System location:

ABT Associates, Inc., Cambridge, Mass.

Categories of individuals covered by the system:

Individuals in employment covered by the unemployment insurance system, unemployment insurance claimants.

Categories of records in the system:

Name, wage information, unemployment insurance claim information, questionnaire responses supplied by the individual, and SSN supplied by the individual.

Authority for maintenance of the system:

Sec. 906 of the Social Security Act, 42 U.S.C. 1106.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

A research study to estimate the extent of and the reasons for delayed or never-filed for unemployment benefits. Records to be compiled are solely for statistical purposes to be used by the contractor in the conduct of this study.

Storage:

Questionnaires and tapes. When questionnaire responses have been transferred to tape, questionnaires will be destroyed.

Retrievability:

By name until merger of data sources has been completed.

Safeguards:

Only ABT Associates research staff will have access to the data files.

Retention and disposal:

Questionnaires will be destroyed after responses have been transferred to tape. When all necessary cross references and file mergers of state agency administrative information and questionnaire data have been completed, personal identifiers will be destroyed. Data tapes provided to the Federal Government will have no personal identifiers.

System manager and address:

Dr. David Stevens, Project Director ABT Associates, Inc., Cambridge, Mass.

Notification procedure:

Contact Systems Manager.

Record access procedure:

Contact Systems Manager.

Contesting record procedures:

Contact Systems Manager.

Record source categories:

State employment security agency quarterly wage files and unemployment insurance claim files, information voluntarily submitted by questionnaire respondents. Source of mailing addresses for non-filers to be determined.

Systems exempted from certain provisions of the Act:

Statistical records. In accordance with subsection (k)(4) of sec. 3 of the Act, information maintained in the system of records consisting of questionnaires and tapes is exempt from the requirements of subsections (c)(3); (d); (e)(1); (e)(4)(G), (H), and (I); and (f). The sole purpose in collecting the information contained in the system is for the preparation of a statistical report in accordance with section 906 of the Social Security Act. The information will not be used in whole or in part in making any determination about an identifiable individual. Identifiable information will be destroyed after all necessary cross-references have been accomplished and the resulting data will be transmitted by the contractor to the Federal agency without personal identifiers.

DOL/ETA–19

System name:

Impact of Disqualification Provisions of State Unemployment Insurance Laws.

System location:

Stanford Research Institute, Menlo Park, Calif.

Categories of individuals covered by the system:

Disqualified unemployment insurance claimants and unemployment insurance beneficiaries.

Categories of records in the system:

Personal and labor force characteristics of unemployment insurance claimants.

Authority for maintenance of the system:

Social Security Act, section 906, 42 U.S.C. 1106.

Routine uses of records maintained in the system, including categories of users and the purpose of such uses:

Records to be compiled are solely for statistical purposes to be used by the contractor in the conduct of his research.

Storage:

All questionnaires and computer tapes will be stored in locked files with access limited to personnel involved in the study.

Retrievability:

Indexed by contractor's control number.

Safeguards:

All materials will be kept in locked file cabinets. Rooms will also be locked.

Retention and disposal:

After the data are entered on computer, the questionnaires and the master file of names and addresses will be destroyed. The final analytical tapes will become the property of the Federal agency and will not contain personal identifiers.

Systems manager and address:

Dr. Henry Felder, Project Director, Center for the Study of Welfare Policy, Stanford Research Institute, Menlo Park, Calif. 94025.

Notification procedure:

Contact Systems Manager.

Record access procedure:

Contact Systems Manager.

Contesting record procedures:

Contact Systems Manager.

Record source categories:

State agency records containing unemployment insurance information; and information voluntarily submitted by unemployment insurance claimants.

Systems exempted from certain provisions of the Act:

Statistical Records. In accordance with subsection (k)(4) of section 3 of the Privacy Act, information maintained in the system of records consisting of questionnaires and tapes is exempt from the requirements of subsections (c)(3); (d); (e)(1); (e)(4)(G), (H), and (I); and (f). The sole purpose in collecting the information contained in the system is for the preparation of a statistical report under section 906 of the Social Security Act. The information will not be used in whole or in part in making any determination about an identifiable individual. Identifiable information will be destroyed after all necessary cross-references have been accomplished and the resulting data will be transmitted by the contractor to the Federal agency without personal identifiers.

DOL/LMSA–17

System name:

Investigatory Files—PWBP, Division of Enforcement.

System location:

Department of Labor, Washington, D.C. 20210. Files also may be maintained at field locations.

Categories of individuals covered by the system:

Records are maintained on defendants, respondents, witnesses and other individuals involved in investigations and enforcement actions instituted by the Department of Labor under the Employee Retirement Income Security Act of 1974.

Categories of records in the system:

The system contains information gathered by PWBP in connection with investigations by it into possible violations of the Welfare and Pension Plans Disclosure Act and the Employee Retirement Income Security Act of 1974. Such information may be derived from materials filed with the Department of Labor, the Department of the Treasury and the U.S. Board of Parole, court records, articles from publications, published financial data, employee benefit plan information, corporate information, bank information, securities brokerage firm information, telephone data, statements of witnesses, information received from Federal, State, local, and foreign regulatory and law enforcement organizations, and other sources. This record also contains the work product of government personnel and consultants involved in the investigations.

Authority for maintenance of the system:

29 U.S.C. 1132, 1134, 1135, and 1136.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

These records and the information contained in these records may be used for the following:

1. By Department of Labor, Department of Justice, Treasury Department, Commerce Department and other Federal government personnel and consultants investigating possible violations of the Employee Retirement Income Security Act of 1974.

2. In any proceeding where the Employee Retirement Income Security Act of 1974 is in issue or in which the Secretary of Labor, any past or present Federal employee or consultant directly or indirectly involved in investigations or other enforcement activities under the Employee Retirement Income Security Act of 1974, is a party or otherwise involved in an official capacity.

3. When considered appropriate and pursuant to 29 U.S.C. 1134(a), records in this system concerning any matter which is the subject of an investigation by the Department of Labor under the Employee Retirement Income Security Act of 1974 may be made available to any person actually affected by the matter under investigation, and to any department or agency of the United States.

4. Where there is an indication of a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local, or foreign, or, if such agency is participating in the particular investigation, the relevant records may continue to be used by the agency to investigate possible violations of laws administered by it and to bring appropriate proceedings.

5. A record from this system of records may be disclosed to a Federal, State, local, or foreign governmental authority, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

6. At the discretion of the staff, records from this system may be given or shown to anyone during the course of an investigation if the staff has reason to believe that the person to whom it is disclosed may have further information about the matter discussed therein, and those matters appear relevant to the subject of the investigation.

Policies and practices for storing, retrieving, retaining, and disposing of records in the system:

Storage:

Records may be maintained in hard copy, microfilm and machine readable form.

Retrievability:

Records are indexed by name.

Safeguards:

Access to and use of these records are limited to those persons whose official duties require such access.

Retention and disposal:

Records are maintained indefinitely.

System manager(s) and address:

Assistant Director, Division of Enforcement, PWBP, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216.

Exemption:

(a) *Criminal law enforcement.* The principal function of the Enforcement Division, Pension and Welfare Benefit Programs, pertains to the enforcement of the provisions of the Employee Retirement Income Security Act of 1974. It conducts investigations to prevent and detect violations of the Employee Retirement Income Security Act of 1974. These investigations sometime develop evidence of criminal violations. They may then be continued by PWBP under a grant of jurisdiction from the Department of Justice. When so continued investigations in appropriate cases will result in criminal prosecutions. Its activities, including joint investigations with the Department of Justice, are carried out under the provisions of the Title 18, U.S. Code, Secs. 664, 1027 and 1954, the Welfare and Pension Plans Disclosure Act and Title I of the Employee Retirement Income Security Act of 1974. In accordance with subsection (j) (2) of the Privacy Act, 5 U.S.C. 552a, an investigative material contained in the index and investigatory files of the Enforcement Division is exempt from all parts of the Act except subsections (b), (c) (1) and (2), (e) (4) (A) through (F), (e) (6), (7), (9) (10), and (11), and (i). The disclosure of information compiled in investigations which may result in criminal prosecution, including the names of persons or agencies to whom the information has been transmitted, would substantially compromise the effectiveness of investigations by the PWBP and the Enforcement Division. Knowledge of such investigations could enable subjects to take such action as is necessary to prevent detection of their criminal activities, conceal evidence, or to escape prosecution. Disclosure of this information could lead to the intimidation of, or harm to, informants, witnesses, and their respective families, and could jeopardize the safety and well-being of investigative personnel and their families. The imposition of certain restrictions on the manner in which investigative information is collected, verified, or retained would significantly reduce the effectiveness of the subject investigatory activities, and in addition, may often preclude the apprehension and successful prosecution of persons engaged in criminal activities related to pension and welfare benefit plans.

(b) *Other law enforcement.* In accordance with subsection (k) (2) of the Privacy Act, any investigatory material maintained in the index and investigatory files of the Enforcement Division, Pension and Welfare Benefit Programs which is deemed not to be exempt under subsection (j) (2) of the Act is exempt from subsections (c) (3), (d), (e) (1), (e) (4) (G), (H), and (I), and (f) of 5 U.S.C. 552a. The disclosure of information contained in such investigative files including the names of persons or agencies to whom the information has been transmitted, would substantially compromise the effectiveness of the subject investigative activity. Knowledge of such investigations would enable subjects to take such action as is necessary to prevent detection of illegal activities, conceal evidence, or otherwise escape enforcement action. Disclosure of this information could lead to the intimidation of, or harm to, informants, witnesses, and their respective families, and in addition, could jeopardize the safety and well-being of investigative personnel and their families. The imposition of certain restrictions on the manner in which investigative information is collected, verified, or retained would also impede significantly the effectiveness of the investigatory activities of the Enforcement Division.

NATIONAL SCIENCE FOUNDATION

INTERNATIONAL DECADE OF OCEAN EXPLORATION PROPOSAL REVIEW PANEL

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

NAME: Proposal Review Panel for the Office for the International Decade of Ocean Exploration, Ad Hoc Subpanel for the SES Project.

DATE AND TIME: August 23-26, 1977, 9 a.m. to 5 p.m.

PLACE: Pepper Tree Motor Hotel, 3850 State Street, Santa Barbara, Calif. 93105.

TYPE OF MEETING: Closed.

CONTACT PERSON:

Mr. Feenan D. Jennings, Head, Office for the International Decade of Ocean Exploration, Room 605, National Science Foundation, Washington, D.C. 20550, telephone 202-632-7356.

PURPOSE OF PANEL: To provide the IDOE Proposal Review Panel members with additional expertise in the review and evaluation of proposals relating to oceanographic research related to Seagrass Ecosystem Studies (SES).

AGENDA: Detailed review and evaluation of proposals for support of the SES Project.

REASON FOR CLOSING: The proposals being reviewed included information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 522(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

AUGUST 1, 1977.

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Revised Notice of Meeting

The meeting notice for the meeting to be held on August 11-13, 1977 in Room 1046, 1717 H Street NW., Washington, D.C., is revised as detailed below. This revision involves the addition of an item and a related schedule change to discuss the implementation of recommendations in ACRS reports to the Nuclear Regulatory Commission.

SATURDAY, AUGUST 13, 1977

8:30 a.m. to 4 p.m.: Executive Session (Open/Closed).—The Committee will complete preparation of its reports to the NRC on matters discussed during this meeting. Portions of this session will be closed as required to protect matters involved in NRC adjudicatory proceedings. A portion of this meeting will include discussion with representatives of the Nuclear Regulatory Commission Staff to discuss implementation of recommendations in ACRS reports to the Nuclear Regulatory Commission. The request for this portion of the meeting, which will be open to the public, was received on July 27, 1977 by the ACRS Office after the agenda for the 208th meeting had been formulated and transmitted to the FEDERAL REGISTER for publication. Prompt resolution is needed to insure expeditious implementation of ACRS recommendations related to public health and safety. This session is scheduled from 10 a.m. to 11 a.m.

Dated: August 4, 1977

JOHN C. HOYLE,
Advisory Committee Management Officer

[FR Doc 77-22802 Filed 8-5-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, SITING EVALUATION SUBCOMMITTEE

Meeting Postponed

The August 9, 1977 meeting of the ACRS Siting Evaluation Subcommittee has been postponed indefinitely.

Notice of this meeting was published in the FEDERAL REGISTER, page 37880, on July 25, 1977.

Dated: August 1, 1977.

JOHN C. HOYLE,
Advisory Committee, Management Officer.

[FR Doc 77-22524 Filed 8-5-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, SUBCOMMITTEE ON THE VERMONT YANKEE NUCLEAR POWER PLANT

Meeting Postponed

The August 16, 1977 meeting of the ACRS Subcommittee re the Vermont Yankee Nuclear Power Plant has been postponed indefinitely. Notice of this meeting was published in the FEDERAL REGISTER, page 38945, on August 1, 1977.

Dated: August 4, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[Docket Nos. 50-325, 50-324]

CAROLINA POWER & LIGHT CO.

Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 7 and 29 to Facility Operating Licenses Nos. DPR-71 and DPR-62, issued to Carolina Power & Light Co., which revised technical specifications for operation of the Brunswick Seam Electric Plant, Unit Nos. 1 and 2 (the facilities) located in Brunswick County, N.C. The amendments are effective as of the date of their issuance.

The amendments revise numerous provisions in the Environmental technical specifications relating to limitations and monitoring requirements for non-radiological liquid effluents.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for the revised technical specifications and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact attributable to the action greater than that which has already been predicted and described in the Commission's final environmental statement for the facilities dated January 1974.

For further details with respect to this action, see (1) the application for amendments dated January 11, 1977, (2) Amendment No. 7 to License No. DPR-71, (3) Amendment No. 29 to License No. DPR-62, and (4) Commission's related environmental impact appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Southport Brunswick County Library, 109 W. Moore Street, Southport, N.C. 28461. A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 25th day of July 1977.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc.77-22707 Filed 8-5-77;8:45 am]

[Docket Nos. STN 50-491, STN 50-492, and STN 50-493]

DUKE POWER CO. (CHEROKEE NUCLEAR STATION, UNIT NOS. 1, 2, AND 3)

Issuance of Revision to Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Duke Power Company to conduct certain site activities in connection with the Cherokee Nuclear Station, Unit Nos. 1, 2, and 3, prior to a decision regarding the issuance of construction permits. Notice of the Limited Work Authorization was published in the FEDERAL REGISTER on June 10, 1976 (41 FR 23489).

Since that time, the Atomic Safety and Licensing Board has determined that additional activities may be authorized. The additional activities that are authorized are within the scope of those authorized by 10 CFR 50.10(e)(3) and include final foundation preparation and inspection and fill placement, compaction, and testing for the Nuclear Service Water (NSW) Pond Dam; all work required to construct the NSW Pond Spillway and discharge channel; work required to install the NSW pipe in the yard; work required to construct the NSW intake structure.

Any activities undertaken pursuant to this additional authorization are entirely at the risk of the Duke Power Company and the grant of the authorization has no bearing on the issuance of construction permits with respect to the requirements of the Atomic Energy Act of 1954, as amended, and rules, regulations, or orders promulgated pursuant thereto.

A Supplemental Partial Initial Decision on matters relating to the National Environmental Policy Act and site suitability was issued by the Atomic Safety and Licensing Board in the above captioned proceeding on July 26, 1977. A copy of (1) the Supplemental Partial Initial Decision; (2) the Partial Initial Decision dated May 21, 1976; (3) the applicant's Preliminary Safety Analysis Report and amendments thereto; (4) the applicant's Environmental Report, and amendments thereto; (5) the staff's Final Environmental Statement dated October 1975; (6) the Commission's letters of authorization, dated May 28, 1976 as amended January 19, 1977, and February 23, 1977; and (7) the Commission's further letter of authorization dated July 28, 1977, are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. and the Cherokee County Library, 300 East Rutledge Avenue, Gaffney, South Carolina.

Dated at Bethesda, Maryland, this 28th day of July 1977.

For the Nuclear Regulatory Commission.

R. W. FROELICH,
Acting Chief, Environmental Projects Branch 2, Division of Site Safety and Environmental Analysis.

[FR Doc.77-22528 Filed 8-5-77;8:45 am]

[Docket No. 50-247]

INDIAN POINT NUCLEAR GENERATING STATION UNIT NO. 2

Availability of Initial Decision of the Atomic Safety and Licensing Board and Issuance of Amendment to Facility Operating License No. DPR-26

Pursuant to the National Environmental Policy Act of 1969 and the U.S. Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that initial decision, dated June 17, 1977, has been issued by the Atomic Safety and Licensing Board in the above captioned proceeding authorizing issuance of a license amendment to the Consolidated Edison Co. of New York, Inc., for operation of Indian Point Nuclear Generating Station Unit No. 2, located in Westchester County, N.Y.

The initial decision is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C., and in the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, N. Y. 10548. The initial decision is also being made available at the New York State Division of the Budget, State Capitol, Albany, N.Y. 12224, and the Tri-State Regional Planning Commission, One World Trade Center, 56 South Street, New York, N.Y. 10048.

Any decision or action taken by the Atomic Safety and Licensing Board in connection with the initial decision may be reviewed by the Atomic Safety and Licensing Appeal Board.

Pursuant to the above mentioned initial decision, the Nuclear Regulatory Commission (the Commission) has issued Amendment No. 32 to Facility

Operating License DPR-26 to Consolidated Edison Co. of New York, Inc., for operation of a pressurized water nuclear reactor known as the Indian Point Nuclear Generating Station Unit No. 2. The license is amended by a change which states that the final termination date of once-through cooling is May 1, 1982.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. The application for the license amendment complies with the standards and requirements of the Act and the Commission's rules and regulations.

The license amendment is effective as of its date of issuance.

Copies of the (1) Initial Decision dated June 17, 1977, and (2) Amendment No. 32 to Facility Operating License DPR-26 are available for public inspection at the above designated locations in Washington, D.C., and New York. Single copies of both items may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Bethesda, Md., this 29th day of July 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.77-22708 Filed 8-5-77;8:45 am]

INTERNATIONAL ATOMIC ENERGY AGENCY DRAFT SAFETY GUIDE

Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is developing a limited number of internationally acceptable codes of practice and safety guides for nuclear power plants. These codes and guides will be developed in the following five areas: Government organization, siting, design, operation, and quality assurance. The purpose of these codes and guides is to provide IAEA guidance to countries beginning nuclear power programs.

The IAEA codes of practice and safety guides are developed in the following way. The IAEA receives and collates relevant existing information used by Member Countries. Using this collation as a starting point, an IAEA Working Group of a few experts then develops a preliminary draft. This preliminary draft is reviewed and modified by the IAEA Technical Review Committee to the extent necessary to develop a draft acceptable to them. This draft code of practice or safety guide is then sent to the IAEA Senior Advisory Group which reviews and modifies the draft as necessary to reach agreement on the draft and then forwards it to the IAEA Secretariat to obtain comments from the Member States. The Senior Advisory Group then considers the Member State comments, again modifies the draft as necessary to reach agreement and forwards it to the IAEA Director General with a recommendation that it be accepted.

As part of this program, Safety Guide, SG-D7, "Safety Related Electrical Power Systems," has been developed. An IAEA Working Group, consisting of Mr. J. Kollmannsberger, Germany; Mr. G. Kvist, Sweden; and Mr. C. J. Wylie (Duke Power Co.), United States of America, developed this draft from an IAEA collation during a meeting on May 5, 1977, and we are soliciting public comment on it. Comments on this draft received by November 1, 1977, will be useful to the U.S. representatives to the Technical Review Committee and Senior Advisory Group in evaluating its adequacy prior to the next IAEA discussion.

Single copies of this draft may be obtained by a written request to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

(5 U.S.C. 522(a).)

Dated at Rockville, Md. this 22d day of July 1977.

For the Nuclear Regulatory Commission

ROBERT B. MINOGUE,
Director, Office of Standards Development.

[Docket No. 50-331]

IOWA ELECTRIC LIGHT & POWER CO., CENTRAL IOWA POWER COOPERATIVE, AND CORN BELT POWER COOPERATIVE

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 38 to Facility Operating License No. DPR-49 issued to Iowa Electric Light & Power Co., Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revised technical specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

The amendment consists of changes to the technical specifications which will reduce DAEC's operating limit minimum critical power ratio (MCPR), allowing an increase of up to 5 percent power. The power increase resulting from this license amendment is separate from the power increase sought by the licensees in their submittal of June 24, 1977, as a result of a modified ECCS analysis. This latter licensing action was noticed in the FEDERAL REGISTER on July 28, 1977 (42 FR 38442). The proposed changes will not result in any change in the present safety limit MCPR of 1.06 which has been previously reviewed and approved.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated June 17, 1977, as supplemented by letters dated July 6, 1977, and July 11, 1977, (2) Amendment No. to License No. DPR-49, and (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Cedar Rapids Public Library, 426 Third Avenue SE., Cedar Rapids, Iowa 52401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this ...

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[Docket No. 50-220]

NIAGARA MOHAWK POWER CORP.

Proposed Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-63 issued to Niagara Mohawk Power Corp. (the licensee), located in Oswego County, N.Y.

In accordance with the licensee's application for amendment dated December 7, 1976, the amendment would revise the provisions in the Technical Specifications relating to the spent fuel pool. As amended, the Technical Specifications would permit the licensee to replace the storage racks in the present spent fuel storage pool, increasing its capacity from 1,140 fuel assemblies to 1,984 fuel assemblies.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By September 7, 1977, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of section 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioners contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and section 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Arvin E. Upton, Esquire, LeBoeuf, Lamb, Leiby & MacRae, 1757 N Street NW., Washington, D.C. 20036, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated December 7, 1976, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Oswego City Library, 120 E. Second Street, Oswego, N.Y.

Dated at Bethesda, Md., this 2d day of August 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc 77-22718 Filed 8-5-77;8:45 am]

[Docket No. 50-245]

NORTHEAST NUCLEAR ENERGY CO., THE HARTFORD ELECTRIC LIGHT CO., WESTERN MASSACHUSETTS ELECTRIC CO., AND CONNECTICUT LIGHT AND POWER CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 41 to Provisional Operating License No. DPR-21, issued to Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company, which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 1 (the facility), located in Waterford, Connecticut. The amendment is effective as of its date of issuance.

The amendment revised the Technical Specifications for the facility to update the Limiting Conditions for Operation and Surveillance Requirements for hydraulic snubbers and to authorize a change in the method of verifying operability of the reactor vessel safety/relief valves.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated October 22, 1976 (as supplemented by letter dated June 15, 1977) and March 4, 1976, (2) Amendment No. 41 to License No. DPR-21, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washingtn, D.C. 20555, attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 1st day of August 1977.

[Docket No. 50-133]

PACIFIC GAS AND ELECTRIC CO.

Establishment of Atomic Safety and Licensing Board To Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and Sections 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the following proceeding:

PACIFIC GAS AND ELECTRIC COMPANY

(HUMBOLDT BAY POWER PLANT, UNIT NO. 3), FACILITY OPERATING LICENSE NO. DPR-7

This action is in reference to a notice published by the Commission on June 23, 1977, in the FEDERAL REGISTER (42 FR 31847) entitled "Proposed Issuance of Amendment to Facility Operating License".

The members of the Board and their addresses are as follows:

Frederic J. Coufal, Esq., Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Mr. Gustave A. Linenberger, Member, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dr. David R. Schink, Department of Oceanography, Texas A & M University, College Station, Texas 77840

Dated at Bethesda, Maryland, this 29th day of July 1977.

ATOMIC SAFETY AND LICENSING BOARD PANEL,
JAMES R. YORE,
Chairman.

[FR Doc 77-22526 Filed 8-5-77;8:45 am]

[Docket No. 50-133]

PACIFIC GAS AND ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued

Amendment No. 15 to Facility Operating License No. DPR-7, issued to Pacific Gas and Electric Company (the licensee), which revised Technical Specifications for operation of the Humboldt Bay Power Plant, Unit No. 3 (the facility) located near Eureka, California. The amendment is effective as of its date of issuance.

This amendment incorporates into the Humboldt Bay Power Plant, Unit No. 3 Technical Specifications revised reactor vessel pressure-temperature limits for hydrostatic testing, heatup and cooldown, and critical operation. This amendment does not authorize restart of the facility which is presently not in operation.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 19, 1977, (2) Amendment No. 15 to License No. DPR-7, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Humboldt County Library, 636 F. Street, Eureka, California. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 25th day of July 1977.

[Docket Nos. 50-387 and 50-388]

PENNSYLVANIA POWER AND LIGHT CO., ALLEGHENY ELECTRIC COOPERATIVE, INC.

Receipt of Additional Antitrust Information; Time for Submission of Views on Antitrust Matters

Pennsylvania Power and Light Company, pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, filed on April 12, 1977, information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. This information adds Allegheny Electric Cooperative, Inc. as an owner of the Susquehanna Steam Electric Station, Units 1 and 2.

The information was filed by Pennsylvania Power and Light Company in connection with their application for construction permits and operating licenses for two boiling water nuclear reactors. The Pennsylvania Power and Light Company was issued two construction permits on November 2, 1973 for their Susquehanna Steam Electric Station, Units 1 and 2. Construction is underway on a site located in Salem Township, Luzerne County, Pennsylvania.

The original antitrust portion of the application was submitted on March 23, 1971 and Notice of Receipt of Application for Construction Permits and Facility Licenses; Time for Submission of Views on Antitrust Matters was published in the FEDERAL REGISTER on May 7, 1971 (36 FR 8529). The Notice of Hearing was published in the FEDERAL REGISTER on September 23, 1972 (37 FR 20090).

A copy of all the above stated documents are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Osterhout Free Library, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Information in connection with the antitrust review of this application can be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C., Attention: Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

Any person who wishes to have his views on the antitrust matters with respect to the Allegheny Electric Cooperative, Inc. presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission on or before August 23, 1977.

Dated at Bethesda, Maryland, this 16th day of June, 1977.

For The Nuclear Regulatory Commission.

ANTHONY BOURNIA,
Acting Chief, Light Water Reactors Branch No. 3, Division of Project Management.

[FR Doc.77-20443 Filed 8-5-77;8:45 am]

[Docket Nos. 50-387A and 50-388A]

PENNSYLVANIA POWER AND LIGHT CO. AND ALLEGHENY ELECTRIC COOPERATIVE INC.

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust matters

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following additional advice from the Attorney General of the United States, dated July 28, 1977:

You have requested additional antitrust advice pursuant to Section 105 of the Atomic Energy Act, as amended, in regard to the above-cited nuclear generating station.

The initial application relating to Susquehanna Station, Units 1 and 2, was reviewed in 1972. The Department advised your predecessor commission that so long as Pennsylvania Power and Light (PP&L) acted to amend certain provisions in its wholesale power contracts, an antitrust hearing would not be necessary. Those contracts have since been satisfactorily amended.

PP&L has now agreed to sell, and Allegheny Electric Cooperative, Inc. has agreed to purchase a 10 percent undivided ownership interest (105MW) in each of the Susquenhanna Units. You have asked the Department to render antitrust advice concerning Allegheny's acquisition of an ownership interest in Susquehanna Station.

Allegheny Electric Cooperative, Inc. is an association consisting of rural electric cooperatives in Pennsylvania. Allegheny supplies the demand and energy requirements of its member cooperatives only. Its 1975 annual peak demand was 368.44 MW. Allegheny does not own any existing generation or transmission. (As part of its agreement with PP&L, Allegheny will purchase approximately 47 miles of transmission line from that company. The line will be owned and paid for by Allegheny, but constructed and operated by PP&L.) In 1976, its power was supplied by the following sources:

Power Authority of the State of New York (134.45 MW).
Pennsylvania Electric Company (163.48 MW.
Metropolitan Edison Company (21.43 MW.
West Pennsylvania Power Company (31.22 MW).
Jersey Central Power & Light Company (17 MW).

On the basis of our review of the information submitted by Allegheny, as well as other relevant information, we conclude that an antitrust hearing will be necessary with respect to Allegheny's acquisition of an ownership interest in Susquehanna Station.

Any person whose interest may be affected by this proceeding may, pursuant to section 2.714 of the Commission's "Rules of Practice," 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by September 7, 1977, either (1) by delivery to the NRC Docketing and Service Section at 1717 H Street NW, Washington, D.C., or (2) by mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Section.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,
Chief, Antitrust & Indemnity Group, Nuclear Reactor Regulation.

[FR Doc 77-22804 Filed 8-5-77;8:45 am]

[Docket No. PRM-50-22]

PUBLIC INTEREST RESEARCH GROUP, ET AL

Filing of Petition for Rulemaking

Notice is hereby given that William B. Schultz, Esquire, and John Abbotts, Esquire, have filed with the Nuclear Regulatory Commission a petition for rulemaking dated July 5, 1977, on behalf of the Public Interest Research Group (PIRG), Community Action Research Group (CARG), Critical Mass Energy Project, Environmental Action, Inc., and New York Public Interest Research Group (NY PIRG).

The petitioners request the Commission to initiate rulemaking to promulgate regulations for nuclear power plant decommissioning which would require plant operators to post bonds, to be held in escrow, prior to each plant's operation, to insure that funds will be available for proper and adequate isolation of radioactive material upon each plant's decommissioning. The petitioners state that the regulations should also require that nuclear power plants already in operation establish plans and immediately post bonds, to be held in escrow, to insure proper decommissioning.

The petitioners state that a formula should be established for setting an adequate bond to cover the costs of guarding and/or disposing of decommissioned power reactors, both for reactors which have been licensed and for those which will be licensed in the future, and that the Commission should establish general procedures to be followed in isolating radioactive components from decommissioned reactors.

The petitioners state that at the end of its useful life, a nuclear power reactor and associated structures are contaminated with radioactive isotopes that take thousands of years to decay and which will require several millions of dollars to isolate. It is the view of petitioners that the proposed regulations would insure that the power companies which operate reactors, and not future generations, bear the cost of decommissioning. The petitioners contend also that since decommissioning will not occur until after the 40-year operating license has expired, and may require substantial capital expenses for hundreds of years thereafter, companies which are now financially stable may not have the capacity to pay decommissioning and guardianship costs when necessary.

A copy of the petition for rule making is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. A copy of the petition may be obtained by writing to the Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

All persons who desire to submit written comments or suggestions concerning the petition for rule making should send their comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Docketing and Service Branch by October 7, 1977.

Dated at Washington, D.C., this 3d day of August 1977.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[Docket Nos. 50-443, 50-444; Construction Permit Nos. CPPR-135, CPPR-136]

PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE, ET AL. (SEABROOK STATION, UNITS 1 AND 2)

Order Reinstating Certain Construction Activities

Pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, (the Act), and Title 10, Chapter 1, Code of Federal Regulations, Parts 2 and 50, and pursuant to the Memorandum and Order of the Atomic Safety Licensing and Appeal Board (ALAB-423) dated July 26, 1977, it is hereby ordered that Construction Permit No. CPPR-135 and Construction Permit No. CPPR-136 issued on July 7, 1976 to Public Service Company of New Hampshire, et. al., for Seabrook Station, Units 1 and 2, and suspended effective 6 p.m. (e.d.t.) on April 8, 1977, be reinstated in full as of 12:01 a.m., August 1, 1977.

Date of Issuance: July 29, 1977.

For The Nuclear Regulatory Commission.

HAROLD R. DENTON,
Acting Director, Office of Nuclear Reactor Regulation.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.115, Revision 1, "Protection Against Low-Trajectory Turbine Missiles," describes methods acceptable to the NRC staff for protecting essential systems against potential low-trajectory missiles in the event of a gross turbine failure. The regulatory guide addresses protection by means of turbine orientation and placement or by barriers. It is recognized that there are other methods of demonstrating adequate protection from potential turbine missile damage. Such alternatives, if proposed by applicants, will be reviewed by the staff and approved if found acceptable. This guide was revised as the result of public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed, or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, Washington, D.C. 20555, attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Md., this 1st day of August 1977.

For the Nuclear Regulatory Commission.

SAFEGUARDS CONTINGENCY PLANS AND UPGRADED SAFEGUARDS FOR STRATEGIC SPECIAL NUCLEAR MATERIAL

Public Meetings

Notice is hereby given that the staff of the Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards, Contingency Planning Branch, will meet with those fuel-cycle licensees and their transportation agents who will be required by the proposed rule published for comment on May 19, 1977 (42 FR 25744) to submit safeguards contingency plans. The meeting will be held August 23 and 24, 1977, from 9 a.m. to 5 p.m., at the facilities of the Defense Industrial Security Institute, which are located at the Defense General Supply Center near Chester, Virginia.

On July 5, 1977, a proposed rule to require upgraded physical protection for highly enriched uranium and plutonium in NRC licensed activities was published for comment (42 FR 34310). This proposed rulemaking is part of an orderly strengthening of safeguards announced by the Commission in its memorandum and order issued January 21, 1977 (42 FR 5150). Appropriate members of NRC staff will meet with fuel-cycle licensees and their transportation agents concerning the proposed rule to upgrade safe-

guards on August 25, 1977, from 9 a.m. to 3 p.m. This meeting will also be held at the facilities of the Defense Industrial Security Institute near Chester, Virginia.

Although the primary purpose of the meetings is to give additional information to affected licensees and transportation agents as to implementation of the proposed rules, attendance is open to the interested public but limited to the space available. Persons desiring to attend either of the meetings should inform T. F. Carter, Jr., Chief, Contingency Planning Branch, Division of Safeguards, phone: 301-427-4191, before August 15, 1977, so that appropriate arrangements can be made for their attendance. Members of the public may be permitted to make oral statements in connection with the subject of either meeting, time and circumstances permitting. Statements would be limited to one per public attendee at either meeting, not to exceed 15 minutes in delivery. No participation by a member of the public need be permitted other than the making of a statement by that person. NRC staff need not respond at the meetings to any statement made by a member of the public other than to acknowledge the statement.

Dated at Silver Spring, Md., this 29th day of July, 1977.

For the Nuclear Regulatory Commission.

CLIFFORD V. SMITH, Jr.,
Director, Office of Nuclear Material Safety and Safeguards.

[Docket No. 50-346]

TOLEDO EDISON CO., AND CLEVELAND ELECTRIC ILLUMINATING CO.

Davis-Besse Nuclear Power Station, Unit No. 1; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 5 to Facility Operating License No. NPF-3, issued to the Toledo Edison Company and the Cleveland Electric illuminating Company, for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa County, Ohio. The amendment is effective as of its date of issuance.

The amendment removes a condition which stipulated the amount of time allowed from date of issuance of the operating license for completing the installation of the gaseous radwaste treatment system oxygen monitors.

The amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) Amendment No. 5 to License No. NPF-3, and (2) the Commission's related Safety Evaluation supporting Amendment No. 5 to License No. NPF-3. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452. A copy of items 1 and 2 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Md., this 21 day of July 1977.

For the Nuclear Regulatory Commission.

JOHN F. STOLZ,
Chief, Light Water Reactors Branch No. 1, Division of Project Management.

[Dockets Nos. 50-280, 50-281]

VIRGINIA ELECTRIC AND POWER CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 32 and 31 to Facility Operating Licenses Nos. DPR-32 and DPR-37, issued to Virginia Electric & Power Company (the licensee), which revised Technical Specifications for operation of the Surry Power Stations, Units Nos. 1 and 2 (the facilities) located in Surry County, Virginia. The amendments are effective as of the date of issuance.

These amendments permit a brief outage period for the Boron Injection Tank recirculation flow path, while the reactors are operating, during which time the flow path may be serviced or repaired.

The application for the amendments comlies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated March 23, 1977, (2) Amendments Nos. 32 and 31 to Licenses Nos. DPR-32 and DPR-37, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Swem Library, College of William and Mary, Williamsburg, Virginia. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 26th day of July 1977.

For the Nuclear Regulatory Commission.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on August 2, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

NEW FORMS

ENVIRONMENTAL PROTECTION AGENCY

Laboratory Performance Evaluation, annually, water analysis labs providing data for EPA, Ellett, C. A., 395-5867.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

A Survey of Occupational Employment in Nuclear energy, Activities, 1977, ERDA-601, other (see SF-83), establishments with nuclear activities, Strasser, A., 395-5867.

VETERANS ADMINISTRATION

Request for Identifying Information Re Veterans Loan Records, FL 26-626, on occasion, correspondents, Lowry, R. L., 395-3772.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration:
- Chlorates and Perchlorates, DIB-9003, single time, producers of chlorates and perchlorates, C. Louis Kincannon, 395-3211.
- Crystal Growth, DIB-9005, single time, crystal growers, C. Louis Kincannon, 395-3211.
- Polypropylene Resins, DIB-9006, single time, producers of polypropylene resins, C. Louis Kincannon, 395-3211.
- Personnel Problems at On-Site Locations in Communist Countries; Personnel Problems in Representation Offices in Communist Countries, DIB-6035P, DIB-6036P, single time, U.S. companies who have sent Personnel to on-site locations. Lowry, R. L., 395-3772.

REVISIONS

DEPARTMENT OF COMMERCE

Economic Development Administration:
- Petition by a Firm for Certification of Eligibility to Apply for Adjustment, Assistance, ED-435, on occasion, import-impacted firms, Lowry, R. L., 395-3772.
- Local Public Works Application, ED-101LPW, on occasion, local and state governments; Indian Tribes, Lowry, R. L., 395-3772.
- Local Public Works Application Supplement, ED-101LPW-S, on occasion, local and state governments; Indian Tribes, Lowry, R. L., 395-3772.

EXTENSIONS

U.S. CIVIL SERVICE COMMISSION

Change Form—Recognitions and agreements, CSC 913-B, on occasion, government agencies, Marsha Traynham, 395-4529.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service, Claim for Reimbursement (Child Care Program), FNS-82, monthly, Institution administered by FNS, Human Resources Division, 395-3532.

Statistical Reporting Service:
- Potato Stocks Quality Survey, annually, potato growers, Marsha Traynham, 395-4529.
- Monthly Cold Storage Survey, monthly, refrigerated warehouses, Marsha Traynham, 395-4529.

Food and Nutrition Service, Regulations for the National School Lunch Program, on occasion, State agencies and school food authorities, Human Resources Division, 395-3532.

Statistical Reporting Service, Survey of Vegetables for Processing, other (see SF-83), vegetable processors, Marsha Traynham, 395-4529.

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis, Follow-Up Schedule of Expenditures Abroad for Property Plant, and Equipment, BE 133 B, annually, Corporations having foreign affiliates, Marsha Traynham, 395-4529.

Economic Development Administration, Application for Technical Assistance Report Through Government Staff or by Private Contract, ED-302, on occasion, EDA qualified applicants, Lowry, R. L., 395-3772.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing Production and Mortgage Credit:
- Application for Project Mortgage Insurance, FHA-2013, on occasion, all multifamily sponsors, Housing, Veterans, and Mortgagees Application for Property Appraisal and Commitment, etc., FHA-2800, on occasion, FHA approved lending Institutions, Human Resources Division, 395-3532.

PRIVACY ACT OF 1974

Reports on New Systems

The purpose of this notice is to list reports on new systems filed with the Office of Management and Budget to give members of the public the opportunity to make inquiries about them and to comment on them.

The Privacy Act of 1974 requires that agencies give advance notice to the Congress and the Office of Management and Budget of their intent to establish or modify systems of records subject to the Act (5 U.S.C. 552a(o)). During the period July 11, 1977 through July 22, 1977 the Office of Management and Budget received the following reports on new (or revised) systems of records.

DEPARTMENT OF AGRICULTURE

System names:
(1) Office of Operations Personnel File.
(2) Parking applications.
(3) Secretary's Controlled Correspondence.

Report Date. June 30, 1977.

Point-of-Contact:
Mr. Douglas S. Wood, U.S. Department of Agriculture, Room 2321-S, Washington, D.C. 20250.

Summary. The three systems are administrative records to be used in the office of operations.

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

System Name. Transfer of U.S. Students in Foreign Medical Schools to U.S. Schools.

Report Date. July 8, 1977.

Point-of-Contact:
Phillip C. Spiller, Privacy Act Coordinator, Health Resources Administration, Room 9A07, Parklawn Bldg., 5600 Fishers Lane, Rockville, Maryland 20857.

Summary. This system is intended to implement the Health Professions Educational Assistance Act of 1977 by assisting U.S. citizens in foreign medical schools who wish to transfer to U.S. schools.

DEPARTMENT OF DEFENSE

System Name. Boston Equal Employment Opportunity (EEO) Skills Bank.
Report Date. July 11, 1977.
Point-of-Contact:
Mr. William Cavaney, Executive Secretary, Defense Privacy Board, Room 5H-023, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20314.
Summary. The proposed system will establish a skills bank to provide guidance and assistance toward applying for jobs offering upward mobility opportunities.

NATIONAL SCIENCE FOUNDATION

System Name. Visiting Women Scientists Roster.
Report Date. July 12, 1977.
Point-of-Contact:
Mr. Herman G. Fleming, NSF Privacy Act Officer, National Science Foundation, Washington, D.C. 20550.
Summary. Purpose of the system is to maintain a list of women scientists to visit high schools and encourage young women to consider careers in science and technology.

DEPARTMENT OF THE INTERIOR

System Names:
(1) National Water Data Exchange Water Data Sources Directory.
(2) National Water Data Exchange User Accounting System.

Report Date. July 13, 1977.

Point-of-Contact:

Mr. Warren Dahlstrom, U.S. Department of the Interior, Washington, D.C. 20240.

Summary. The two systems will assist users of water data in the location, identification, and acquisition of needed data, and refer requester of data to the most expedient organization or individuals.

UNITED STATES INTERNATIONAL TRADE COMMISSION

System Name. Proposed Amendments to Financial Disclosure Regulations for Commission Employees.

Report Date. July 20, 1977.

Point-of-Contact:

Rhond Roth, General Counsel's office, U.S. International Trade Commission, Washington, D.C. 20436.

Summary. The proposal will increase and change the number and kind of individuals in the system of records who must submit statements of employment and financial interest.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

System Names:

(1) The 1978 Survey of Disabled and Nondisabled (Statistics).

(2) Curricula Vitae of Consultants to the National Center for Health Statistics.

Report Date. July 18, 1977.

Point-of-Contact:

Mr. John D. Young, Assistant Secretary for Management and Budget, Department of Health, Education, and Welfare, Washington, D.C. 20201.

Summary. The first system will evaluate the public's knowledge of government disability programs; the second will list potential consultants to assist National Center for Health Statistics.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

[FR Doc.77-22696 Filed 8-5-77;8:45 am]

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

ADVISORY GROUP ON WHITE HOUSE INFORMATION SYSTEMS

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology Policy announces the following meeting:

NAME: Advisory Group on White House Information Systems.

DATE: August 24 and 25, 1977.

TIME: 9 a.m. to 5:30 p.m.

PLACE: Room 308, Executive Office Building, 17th and Pennsylvania Avenue NW., Washington, D.C.

TYPE OF MEETING: Open, subject to space limitations. Those wishing to attend must call the contact person below at least 48 hours in advance of the meeting.

CONTACT PERSON:

Dr. Joel A. Snow, Advisory Group Executive Secretary, Office of Science and Technology Policy, Executive Office of the President, Washington, D.C. 20500; Telephone 202-395-3153.

PURPOSE OF ADVISORY GROUP: The Office of Science and Technology Policy, in accordance with the statutory mandate to advise the President and to analyze and interpret significant developments and trends in science and technology, will be identifying the information systems needs and the impact of technological advances in information and data handling as these might support the decision processes of the White House and the Executive Office of the President. The work of the Advisory Group will be based upon inputs from the relevant departments and earlier work carried out by other organizations in the Executive Branch including the Reorganization Team.

AGENDA: 9 a.m. to 5:30 p.m.—This first (organizational) panel meeting will include presentations on history and background of EOP information needs by EOP staff members; and panel discussions of these presentations, possible issues and alternatives, definition of study agenda and priorities, and future meeting agenda.

The Committee Management Secretariat, OMB, has waived the requirement of 15 days publication of notice of determination in the FEDERAL REGISTER prior to the groups' establishment.

WILLIAM J. MONTGOMERY,
Executive Officer.

SMALL BUSINESS ADMINISTRATION

[License No. 01/01-0280]

A B SMALL BUSINESS INVESTMENT COMPANY, INC.

Filing of Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that AB Small Business Investment Company, Inc. (AB), Schoolhouse Road, Cheshire, Connecticut 06410, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application pursuant to § 107.1004 of the Regulations governing small business investment companies (SBIC) (13 CFR 107.1004)), for approval of a conflict of interest transaction.

AB desires to provide financing in the amount of $100,000 to Mr. Joseph Stasiak for the purpose of enabling that individual to purchase 100 percent of the stock of Cooper's Supermarket (Cooper's), Vista, New York, from Bozzuto's, Inc. (Bozzuto's), in order to operate Cooper's as his own business enterprise. Cooper's is an asset which was acquired by Bozzuto's several years ago in payment of its debts to Bozzuto's. Since this acquisition, the supermarket has been operated by Bozzuto's under the management of Mr. Stasiak.

In accordance with the definition of the term "Associate of a Licensee," set forth ulnder § 107.3 of the Small Business Administration's (SBA) Regulations, Bozzuto's is an Associate of AB through its ownership of 100 percent of AB's outstanding common shares. Mr. Stasiak is also an Associate of AB due to his position as the manager of Cooper's for Bozzuto's.

Pursuant to the provisions of §§ 107.1004 and 107.1301 of SBA Regulations, these affiliations require A B to obtain an exemption from §§ 107.1004(b)(5) and 107.1001(g), respectively, in order to provide the necessary financing to Mr. Stasiak.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this notice, submit written comments to SBA on the proposed financing. Any such comments should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published by A B in a newspaper of general circulation in Vista, New York.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: July 29, 1977.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

[SBLC No. 0006]

ALLIED LENDING CORP.

Issuance of Small Business Lending Corporation Participation Agreement

On October 18, 1976, a notice was published in the FEDERAL REGISTER (41 FR 45923) stating that an application had been filed by Allied Lending Corp., Washington, D.C. 20006, with the Small Business Administration (SBA), pursuant to section 120.4(b) of the Regulations governing loan policy and participation (13 CFR 120.4 1977) or a participation agreement as a "Subsection (b) Lender" or small business lending company (SBLC).

Interested parties were given until close of business November 2, 1976, to submit their comments to SBA. Allied also published a similar notice in a newspaper of general circulation. No comments were received.

Notice is hereby given that, pursuant to section 120.4(b) of the regulations, after giving consideration to the application and all other pertinent information SBA had issued, June 14, 1977, Small Business Lending Company Participation Agreement No. 0006 to Allied Lending Corp. to operate as an SBLC in SBA Regions III and IV.

(Catalog of Federal Domestic Assistance Programs No. 59.012, Small Business Loans.)

Dated: July 29, 1977.

A. VERNON WEAVER,
Administrator.

[License No. 03-03 0127]

AMERICAN VENTURE CAPITAL COMPANY

Issuance of Small Business Investment Company License

On March 18, 1977, a Notice was published in the FEDERAL REGISTER (42 FR 15161) stating that an application had been filed by American Venture Capital Company, Suite 200, Axe Wood West, Skippack Pike and Butler Pike, Ambler, Pennsylvania 19002, with the Small Business Administration (SBA), pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1977)) for a license as a small business investment company (SBIC).

Interested parties were given until the close of business March 28, 1977, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to Section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issue License No. 03-03-0127 to American Venture Capital Company to operate as an SBIC.

(Catalog of Federal Domestic Assistance Program No. 59.011, the Small Business Investment Companies.)

Dated: August 2, 1977.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

NEW YORK

Declaration of Disaster Loan Area

Park Avenue between 111th and 116th Streets in East Harlem, New York County, New York City, N.Y., constitutes a disaster area because of damage resulting from a fire which occurred on July 4, 1977. Eligible persons, firms, and organizations may file applications for loans for physical damage until the close of business on September 26, 1977, and for economic injury until the close of business on April 28, 1978, at:

Small Business Administration, District Office, 26 Federal Plaza, Room 3100, New York, N.Y. 10007.

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: July 29, 1977.

A. VERNON WEAVER,
Administrator.

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

EXEMPTION APPLICATIONS

AGENCY: Materials Transportation Bureau, DOT.

ACTION: List of Applications for Exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Operations of the Materials Transportation Bureau has received the applications described herein.

DATES: Comments by September 6, 1977. Addressed to: Section of Dockets, Office of Hazardous Materials Operations, Department of Transportation, Washington, D.C. 20590. Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION:

Complete copies of the applications are available for inspection and copying at the Public Docket Room, Office of Hazardous Materials Operations, Department of Transportation, Room 6500, Trans Point Building, 2100 Second Street, SW., Washington, D.C.

Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1. Motor vehicle, 2. Rail freight, 3. Cargo vessel, 4. Cargo-only aircraft, 5. Passenger-carrying aircraft.

New exemptions

Application No.	Applicant	Regulation(s) affected	Nature of application
7804-N	Igloo Corp., Houston, Tex.	49 CFR 178.35a	To manufacture, mark and sell inside polyethylene containers, similar to DOT Specification 2SL, for shipment of certain hazardous materials. (Modes 1, 2, and 3.)
7805-N	Dow Chemical U.S.A., Freeport, Tex.	49 CFR 173.119	To authorize shipment of a flammable liquid in non-DOT portable tanks. (Modes 1 and 3.)
7807-N	U.S. Environmental Protection Agency, Washington, D.C.	49 CFR 173.119	To authorize shipment of gasoline in non-DOT belly tanks and fuel containers. (Mode 1.)
7808-N	Whitmire Research Laboratories Inc., St. Louis, Mo.	49 CFR 173.34(d)(1), Note 1	To authorize shipment of certain nonflammable compressed gases in DOT 39 aluminum cylinders without safety relief devices. (Modes 1, 2, and 4.)
7809-N	U.S. Rubber Reclaiming Co., Vicksburg, Miss.	49 CFR 173.201	To authorize shipment of ground rubber in non-DOT specification polyethylene bags. (Modes 1 and 2.)
7811-N	Burdick & Jackson, Laboratories Inc., Muskegon, Mich.	49 CFR 178.210	To authorize handholes in DOT 12A fiberboard boxes authorized for flammable and corrosive liquids. (Modes 1, 2, 3, and 4.)
7812-N	Capel Klang, South San Francisco, Calif.	49 CFR 172.202(b)	To authorize use of shipping papers with a further description juxtaposed between the shipping name and hazard class. (Mode 1.)
7813-N	Lithium Corporation of America, Gastonia, N.C.	49 CFR 173.245b(a)(5)	To authorize shipment of lithium hydro-oxide monohydrate in 65 gal capacity DOT 21C fiber drums net weight not over 550 lb. (Modes 1, 2, and 3.)
7814-N	U.S. Department of Defense, Washington, D.C.	49 CFR 176.83(a), 176.76(a)(1)	To authorize transportation by cargo vessel, privately owned motor vehicles equipped with a charged cylinder tire inflator not overpacked. (Mode 3.)
7815-N	Miller Transporters Inc., Jackson, Miss.	49 CFR 173.119(m)	To authorize transportation of acrylonitrile in MC 305 and MC 306 tank motor vehicles. (Mode 1.)
7817-N	Agfa-Gevaert Inc., Teterboro, N.J.	49 CFR 172.202	To authorize use of shipping papers which do not show the hazard classification for certain n.o.s. descriptors. (Modes 1, 2, 3, 4 and 5.)
7818-N	Asiatic Petroleum Corp., New York, N.Y.	49 CFR 173.264(b)(4)	To authorize shipment of anhydrous hydrofluoric acid in non-DOT portable tanks (Modes 1, 2 and 3.)
7819-N	Hugonnet, S.A., Paris, France	49 CFR 173.119(a), b), 173.245, 173.247, 173.272, 173.294, 173.346, 173.347, 173.348, 173.349, 173.361, 173.362(a)	To authorize shipment of flammable, corrosive, and Class B poisonous liquids in non-DOT portable tanks. (Modes 1, 2 and 3.)
7820-N	....do....	49 CFR 173.32(a)(2), 173.119, 173.125, 172.128(a), 173.131(a)(1), 173.132(a)(1), 173.245(a), 173.346	To authorize shipment of certain flammable, corrosive, and poison B liquids in non-DOT specification portable tanks. (Modes 1, 2 and 3.)
7821-N	Linden Chlorine Products, Inc., Cranford, N.J.	49 CFR 173.314	To authorize shipment of anhydrous hydrogen chloride in DOT 105A600W tank cars. (Mode 2.)

This notice of receipt of applications for new exemptions published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 CFR U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, D.C., on August 1, 1977.

J. R. GROTHE,
Chief, Exemptions Branch, Office of Hazardous Materials Operations

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Treasury Dept. Order No. 150-87]

COMMISSIONER OF INTERNAL REVENUE

Authority to Undertake Certain Tax Audits and Checks and to Furnish Tax Return Information Related Thereto to the Assistant Secretary (Administration) and Others

In accordance with the authority vested in me as Secretary of the Treasury, including 26 U.S.C. 7602, 26 U.S.C. 6103(c) and (g)(2), Reorganization Plan No. 26 of 1950, Executive Order No. 11222, 31 CFR Part 0, and for the purpose of promoting public confidence in the Department of the Treasury and its administration of the Federal tax system, it is hereby ordered that:

1. Introduction.—The Commissioner of Internal Revenue shall conduct tax audits, tax checks and income tax filing record checks as provided for by this Order.

2. Definitions.—As used in this Order, the term:

(a) "Income tax filing record check" means a search by IRS of its records to verify that a tax return has been filed with it for the immediately preceding year.

(b) "Tax Audit" means a review by IRS to determine the correct Federal income tax liability of an individual for the immediately preceding two years.

(c) "Tax Check" means a search by IRS of its records to determine:

(1) Whether the individual has filed returns with respect to Federal income taxes for the immediately preceding three years;

(2) Whether there has been a failure to pay any tax within 10 days after notice and demand, or whether there has been assessed a penalty under the Internal Revenue Code of 1954, as amended, for negligence in the current year or immediately preceding three years;

(3) Whether there is a record of an investigation for possible criminal offenses under the internal revenue laws, and the results of any such investigation; and

(4) Whether there is a record of a civil penalty assessed, or proposed for assessment, under the Internal Revenue Code of 1954, as amended, for fraud.

3. Tax Audits.—(a) Prior to the nomination by the President of a person to a position in the Department or an international financial institution, the Commissioner, upon request therefor as provided in section 6(b) of this Order, shall cause a tax audit to be performed.

(b) Prior to the appointment by the Secretary (or as soon thereafter as practicable) of a person to a position:

(1) Of a confidential or policy determining character (Schedule C or Noncareer Executive Assignment) with the Department at Grades GS-14 through 18, inclusive, or Executive Schedule Levels V and IV, or similar position on other pay systems compensated at comparable rates, or

(2) With an international financial institution,

the Commissioner, upon request therefor as provided in section 6(b) of this Order, shall cause a tax audit to be performed.

(c) Promptly after the effective date of this Order, the Commissioner, upon request therefor as provided in section 6(b) of this Order, shall cause a tax audit to be performed with respect to each person who, prior to this Order being issued, has entered on duty in a position described in subsection (a) or (b) of this section.

4. Tax Checks.—(a) On an annual basis, and as close to the anniversary date of the appointment to the position as is practicable, the Commissioner, upon request therefor as provided in section 6(b) of this Order, shall cause a tax check with respect to the immediately preceding year to be performed with respect to each person who then continues to serve in a position described in section 3 of this Order.

(b) Prior to effectuation of a personnel action assigning a person to any category of positions as specified below, the Commissioner, upon request therefor as provided in section 6(b) of this Order, shall cause a tax check to be performed with respect to each person selected:

(1) By the President or the Secretary or his designees to a position described in section 3 of this Order;

(2) For initial entry into any position at any grade from GS-14 through 18, inclusive, or Executive Schedule Levels V and IV, or similar positions in other pay systems compensated at comparable rates; and

(3) For initial appointment as an expert; consultant, or advisory committee member.

5. Income Tax Filing Record Checks.—Prior to a person entering on duty in a position by appointment or promotion from within the Department and on an annual basis, as close to the anniversary date of the appointment to a position as is practicable, the Commissioner, upon request therefor as provided in section 6(b) of this Order, shall cause an income tax filing record check to be performed with respect to each person who then continues to serve in a position described in section 4(b)(2) or (3) of this Order.

6. Procedure.—(a) The Assistant Secretary (Administration), or his designee, shall request each person subject to a tax audit or tax check (or both) under this Order to execute an appropriate form providing the information necessary to identify the person and locate his or her tax records and authorizing the disclosure of tax return information as provided in this Order. The original of the executed form shall remain on file with the Assistant Secretary (Administration), or his designee. A copy of the executed form shall accompany each request to the Commissioner for a tax audit or tax check. If the person declines to execute the form, the tax audit or tax check (or both) shall nevertheless be performed as specified in this Order based on such information as is available from other sources.

(b) The Commissioner shall cause a tax audit or check (or both), as appropriate under this Order, to be made upon receipt of a request therefor from the Assistant Secretary (Administration), or his designee.

(c) Upon completion of such tax audit or check (or both), the results shall be forwarded (if an appropriate disclosure authorization has been executed), for information purposes, to the Assistant Secretary (Administration), or his designees; or as requested; or to IRS officers. This shall be done in a manner consistent with sections 7 and 8 of this Order.

(d) In the case of income tax filing record checks, a list of the names and social security numbers of those persons for whom such checks are to be made shall be furnished to the Commissioner, or his designee, on a staggered basis throughout the year by the Assistant Secretary (Administration), or his designee. Upon receiving these lists, the Commissioner shall cause, as soon as is practicable, a tax filing record check to be made on each person listed.

(e) Upon completion of such income tax filing record checks, the results shall be forwarded to IRS officers for appropriate tax administration enforcement action, if warranted, in accordance with section 8 of this Order.

7. Disclosure—To the extent permitted by the executed disclosure authorization, the Commissioner, or his designee, shall furnish the results of a tax audit or tax check in summary form to the Assistant Secretary (Administration), or his designee. The underlying documentation including audit reports, tax returns and return information shall also be furnished to the Assistant Secretary (Administration), or his designee, when specifically requested in writing by the Assistant Secretary (Administration). Any or all of the same information shall similarly be furnished directly to:

(1) The President,

(2) Representatives of the Executive Office of the President,

(3) The Secretary, or

(4) The Deputy Secretary,

when the Commissioner is requested to do so, in writing, by the Assistant Secretary (Administration). The Assistant Secretary (Administration) may also provide this information, on his own initiative, to any of the above persons or other Treasury officers who have a need to know such information, such as those exercising personnel administration functions in the various Bureaus or Offices of the Department.

8. Non-Disclosure.—In any instance in which a tax audit or tax check has been performed by the Internal Revenue Service, and no individually signed disclosure authorization has been provided, and in the case of income tax filing record checks, the results of such tax audit or tax check or income tax filing record checks shall not be disclosed under this Order to anyone not employed by the Internal Revenue Service, but such results shall be furnished to appropriate officials of the Internal Revenue Service for such tax administration enforcement action as is warranted.

9. Circumstances Warranting Immediate Disclosure.—The Commissioner shall on his own initiative furnish to the Assistant Secretary (Administration), immediately following the event, the information that a civil penalty for fraud has been assessed, or is proposed for assessment, or an investigation for a possible criminal offense under the internal revenue laws has been commenced or completed with respect to any Treasury officer, employee, consultant, advisory committee member, or other person serving in the Department or an international financial institution and described in section 3 or 4 of this Order, who has provided a written disclosure authorization under section 6(a) of this Order. Such information shall not be furnished under this Order with respect to a person who has not provided an individually signed disclosure authorization.

10. Confidentiality.—It is the policy of the Department of the Treasury to make every effort to protect the privacy of all taxpayers, including its own officers and employees. Accordingly, disclosures under this Order shall be kept to the minimum necessary to promote public confidence in the Department and the administration of the Federal tax system.

11. Effect on Other Regulations and Programs.—(a) Notwithstanding any other provisions of this Order:

(1) The Internal Revenue Service shall conduct and review tax audits, checks and income tax filing record checks in accordance with this Order with regard to its employees and those in the Office of Chief Counsel, IRS, at Grades GS-15 and below; but the results of such audits, checks, and income tax filing record checks shall not be forwarded to the Assistant Secretary (Administration), except as provided for by section 9 of this Order. Each employee of the Internal Revenue Service or Office of Chief Counsel, who would otherwise be subject to a tax audit or tax check (or both) under the provisions of this Order, shall be asked to execute an appropriate disclosure authorization so that tax return information may be provided to persons authorized to receive it under section 7 of this Order.

(2) Information forwarded to the Assistant Secretary (Administration), with respect to Internal Revenue Service officers and those in the Office of Chief Counsel, at Grades GS-16 and above, will, after the review process, be returned to the Commissioner or Chief Counsel, as appropriate, for safekeeping.

(3) All disclosure authorizations executed by employees or officers of the Internal Revenue Service or Office of Chief Counsel will remain on file with the Commissioner, or his designee, or the Chief Counsel, or his designee, as appropriate.

(b) In addition, nothing in this Order precludes the Internal Revenue Service, or other Services, Bureaus or Offices of the Department which administer Federal tax or revenue laws, from adopting, with respect to their officers and employees, more stringent provisions than are provided for in sections 3, 4 and 5 of this Order, as may be allowed by law.

(c) The requirements of this Order are in addition to any other audit procedures administered by the Internal Revenue Service and applicable to all taxpayers generally. Nothing in this Order is intended to affect, in any way, the process by which the Internal Revenue Service selects returns for audit under the usual procedures applicable to all taxpayers.

(d) Nothing in this Order affects the authority of those Treasury officers, in individual Bureaus or Offices of the Department, who exercise personnel administration functions.

12. Supersession.—This Order supersedes those provisions of Administrative Circular No. 189 (Revised) which are inconsistent herewith.

13. Effective Date.—This Order is effective July 29, 1977.

W. MICHAEL BLUMENTHAL,
Secretary of the Treasury.

Office of the Secretary

[Supplement to Dept. Circular Public Debt Series—No. 17-77]

TREASURY NOTES OF SERIES H-1980

Announcement of Interest Rate

AUGUST 3, 1977.

The Secretary of the Treasury announced on August 2, 1977, that the interest rate on the notes described in Department Circular—Public Debt Series No. 17-77, dated July 28, 1977, will be 6¾ percent per annum. Accordingly, the notes are hereby redesignated 6¾ percent Treasury Notes of Series H-1980. Interest on the notes will be payable at the rate of 6¾ percent per annum.

DAVID MOSSO,
Fiscal Assistant Secretary.

FOURTH SECTION APPLICATION FOR RELIEF

AUGUST 3, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43408—*Joint Water-Rail Container Rates—American President Lines, Ltd.* Filed by American President Lines, Ltd., (No. 26), for itself and interested rail carriers. Rates on general commodities, from Middle East ports west of Karachi and northeast of Aden (excluding Aden and Karachi), to rail stations on the U.S. Atlantic and Gulf Seaboard.

Grounds for relief—Water competition.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

[Ex Parte No. MC-101]

INITIAL PROCESSING OF MOTOR CARRIER FINANCE PROCEEDINGS

AGENCY: Interstate Commerce Commission.

ACTION: Supplemental Notice and Policy Statement.

SUMMARY: Supplemental Notice that the Commission will, beginning September 26, 1977, closely scrutinize all tendered applications in motor carrier finance proceedings prior to their being docketed and that it will reject applications found to be incomplete.

DATES: Comments must be received on or before August 26, 1977. The new practices will be instituted, unles modified by subsequent order, on or after September 26, 1977.

ADDRESS: Comments should refer to docket Ex Parte No. MC-101. An original and 11 copies should be submitted to the Section of Finance, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

G. M. Bober, Section of Finance, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423. 202-275-7564.

SUPPLEMENTARY INFORMATION: Notice of this proceeding was originally published in the FEDERAL REGISTER on June 27, 1977 at page 32609. The comment date and compliance date were extended on July 22, 1977, by the entire Commission after consideration of the petition tendered by Wilmer Hill, Chairman of the Committee on Practice and Procedure, Motor Carrier Lawyers Association.

H. G. HOMME, JR.
Acting Secretary.

[AB 12 (Sub-No. 56)]

SOUTHERN PACIFIC TRANSPORTATION CO., ABANDONMENT BETWEEN BRENHAM AND GIDDINGS IN WASHINGTON, FAYETTE AND LEE COUNTIES, TEXAS

Notice

JULY 29, 1977.

The Interstate Commerce Commission hereby gives notice that its Section of Energy and Environment has concluded that the proposed abandonment by the Southern Pacific Transportation Company of its line of railroad between Giddings and Brenham, a distance of 34.92 miles, in Washington, Fayette, and Lee Counties, Texas, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed action are considered insignificant because there are alternative railheads in close proximity to the subject line, and there is an adequate highway network to accommodate a diversion from rail to motor carrier. Consequently, no serious adverse impact to rural and community development will result. In addition, no significant increases in air pollution, fuel consumption, or ambient noise levels will occur.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-275-7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before September 12, 1977.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

H. G. HOMME, JR.,
Acting Secretary.

1

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10:30 a.m., August 3, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Dockets 31127 and 31162, domestic general fare increase proposed by all carriers. (Not. No. 7318, BE).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary (202–673–5068).

SUPPLEMENTARY INFORMATION: This case involves a general fare increase, applicable to all carriers nation-wide, scheduled to take effect beginning on August 15, 1977. In the public interest, the Board should decide this case as quickly as possible so that no matter what the outcome might be there will be adequate advance notice to avoid confusion to the carriers, travel agents, and members of the traveling public. Accordingly the following Members have voted that agency business requires that the Board meet on less than seven days' notice:

Chairman Alfred E. Kahn.
Member G. Joseph Minetti.
Member Lee R. West.

Vice Chairman Richard J. O'Melia was not present and did not vote.

5

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Board of Directors of the Federal Deposit Insurance Corporation met in open session at 4:05 p.m. on August 3, 1977, by telephone conference call, to consider the following matters:

Adoption of a resolution temporarily suspending the prepayment penalty for early withdrawal of time deposits by depositors who have suffered a demonstrable economic loss to property directly related to the flooding occurring on July 19–20, 1977, throughout seven Pennsylvania counties.

Adoption of a resolution regarding the restructuring of a loan from the Corporation to European-American Bank & Trust Co., New York, N.Y., in connection with the bank's purchase of assets and assumption of liabilities of Franklin National Bank, New York, N.Y. (in liquidation).

In calling the meeting, the Board of Directors determined that Corporation business required consideration of the matter on less than seven days' notice to the public and that no earlier notice of the meeting was possible.

Dated: August 3, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[S–1062–77 Filed 8–4–77;11:10 am]

6

AUGUST 3, 1977.

FEDERAL POWER COMMISSION.

TIME AND DATE: August 10, 1977, 10 a.m.

PLACE: 825 North Capitol Street.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

NOTE.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary (202–275–4166).

The following notice of meeting is published pursuant to section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94–409), 5 U.S.C. 8552B.

This is a list of the matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda. However, all public documents may be examined in the Office of Public Information, Room 1000.

GAS AGENDA, 7653RD MEETING, AUGUST 10, 1977, REGULAR MEETING, PART I—10 A.M.

ADVISORY OPINION REQUESTS

FEDERAL ELECTION COMMISSION

[Notice 1977-42, AOR's 1977-34, 1977-35, and 1977-36]

ADVISORY OPINION REQUESTS

Pursuant to 2 U.S.C. 437f(c) and the procedures reflected in Part 112 of the Commission's regulations, published on August 25, 1976 (41 FR 35954), Advisory Opinion Requests 1977-34 through 1977-36 have been made public at the Commission. Copies of these requests were made available on August 2, 1977. These copies of the advisory opinion requests were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street NW., Washington, D.C. 20463.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of General Counsel, Advisory Opinion Section at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

A descriptive listing of the requests recently made public as well as the identification of the requesting party follows hereafter:

AOR 1977-34: Is the political committee of a corporation required to allow its administrative and executive personnel who make political contributions by payroll deduction to earmark those contributions as a matter of right, instead of privilege, if the committee also accepts contributions by check from administrative and executive personnel and allows earmarking of those contributions? Requested by Carolyn F. Shain, Secretary of the Nationwide Political Participation Committee, Columbus, Ohio.

AOR 1977-35: May a Federal officeholder accept an honorarium from an organization before which the officeholder makes an appearance, subsequently return the honorarium to the paying organization, and thereby avoid having the original payment considered as an honorarium "accepted" for purposes of the limits on honoraria in 2 U.S.C. 441i? Requested by Senator Bob Dole, U.S. Senate, Washington, D.C.

AOR 1977-36: Do the Federal preemption provisions of 2 U.S.C. 453 and 108.7 of the Commission's regulations permit a registered political committee supporting Federal candidates to disregard a State statute providing that copies of statements and reports (required pursuant to the Federal Election Campaign Act of 1971, as amended) be filed in a different manner and with additional State offices than as specified in 2 U.S.C. 439? Requested by R. G. Leith, Secretary-Treasurer of the Western Air Line Political Action Committee, Los Angeles, California.

Date: August 2, 1977.

THOMAS E. HARRIS,
Chairman for the Federal Election Commission.

[FR Doc. 77-22705 Filed 8-5-77;8:45 am]

[Notice 1977-43, AOR 1977-37]

ADVISORY OPINION REQUEST

Pursuant to 2 U.S.C. § 437f(c) and the procedures reflected in Part 112 of the Commission's regulations, published on August 25, 1976 (41 FR 35954), Advisory Opinion Request 1977-37 has been made public at the Commission. Copies of AOR 1977-37 were made available on August 4, 1977. These copies of the advisory opinion request were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street NW., Washington, D.C. 20463.

Interested persons may submit written comments on this advisory opinion request on or before September 7, 1977. These comments should be directed to the Office of the General Counsel, Advisory Opinion Section, at the Commission. Persons who desire additional time in which to respond to this advisory opinion request should request in writing an extension of the comment period. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

The Commission today publishes in its entirety an advisory opinion request of the National Education Association. The subject matter of the request concerns the legality under the Federal Election Campaign Act of 1971, as amended, and regulations prescribed by the Federal Election Commission under that Act, of a proposal by the NEA Political Action Committee to raise political contributions from NEA members. The advisory opinion request, designated as AOR 1977-37, is reprinted below in the form submitted to the Commission by counsel for NEA-PAC:

JULY 25, 1977.

Re Request for an Advisory Opinion on Behalf of the National Education Association's Political Action Committee.

FEDERAL ELECTION COMMISSION,
Office of General Counsel, Advisory Opinion Section, 1325 K Street NW., Washington, D.C.

Gentlemen: This letter constitutes a request for an advisory opinion from the Federal Election Commission concerning the permissibility under Section 441b(b)(3)(A) of the Federal Election Campaign Act (hereinafter the "Act"), and Section 114.5 of the Commission's Rules and Regulations (hereinafter the "Rules"), of two systems which the National Education Association (hereinafter the "NEA") proposes to use in order to collect from its members voluntary contributions to the NEA's Political Action Committee (hereinafter the "NEA-PAC"). I make this request pursuant to Section 112.1 of the Rules as the authorized agent for the NEA-PAC.

STRUCTURE AND OPERATION OF THE NEA

The NEA is a nationwide employee organization with a current membership of approximately 1.7 million. Over 98% of the NEA's members are public school teachers, supervisors, and administrators, who come within the Active membership category. Although other membership categories are available for retired teachers, educational secretaries, paraprofe sionals, etc., Active members are the only ones relevant for present purposes. Accordingly, the term "member" will be used hereinafter to mean Active members.

The NEA has an annual membership structure. An individual who joins agrees to pay dues for an entire membership year, which runs from September 1 through the following August 31. Although the NEA re-enrolls the majority of its members each year, there are certain states in which membership is "continuous." This means that a person's membership automatically is renewed from membership year to membership year, absent withdrawal.

Membership in the NEA is voluntary and in no case is it required as a condition either for obtaining or maintaining employment. In certain jurisdictions where an NEA affiliate is recognized as the exclusive collective bargaining representative, however, a nonmember of the NEA may be required by statute or contract to pay a fee to the NEA to offset his or her fair share of the costs of such representation.

The NEA has as state affiliates an association in every state, the District of Columbia and Puerto Rico, and representing educators employed in the Overseas Dependent Schools operated by the United States Department of Defense. It also has some 10,500 local affiliates, each of which is comprised essentially of employees within a particular school district. Although the NEA's State and local affiliates are required to meet certain minimum standards in order to retain their NEA affiliation, they are separately organized, self-governing entities.

The annual membership dues of the NEA presently are $30, and will increase to $35 as of the 1978-79 membership year. These dues are collected by the NEA's local affiliates and transmitted to the state affiliates, which in turn forward them to the NEA.

REVERSE CHECKOFF

The majority of NEA members prefer to pay their dues by means of payroll deduction and the local affiliates attempt to secure an appropriate checkoff system through agreement with local boards of education. NEA members are asked, in addition, to make a voluntary contribution of $1 each year to the NEA-PAC and, again, most members prefer to have this contribution handled through payroll deduction. Many boards of education are mechanically unable, or at least unwilling, to deduct different amounts for different employees (i.e., $31 for NEA members who wish to contribute $1 to the NEA-PAC; $30 for NEA members who do not wish to make such a contribution). In order to deal with this problem, the NEA has in the past set the amount of the deduction in these school districts at $31 for all NEA members and those who did not wish to make a contribution to the NEA-PAC could request a rebate. The $1 generally was paid to them within a few weeks after the receipt of the request, and in all cases well before an equivalent amount had in fact been deducted. This system is referred to hereinafter as a "reverse checkoff."

The Commission has taken the position that the reverse checkoff is unlawful. Specifically, it contends that the contribution constitutes "a condition of membership" in violation of section 441b(b)(3)(A) of the Act. (See, e.g., transcript of Commission testimony before the Committee on House Administration, March 16, 1977, pp. 69-70, 73, 77;[1] * * *) The NEA proposes to make certain modifications in its collection system which we believe are sufficient to cure the alleged statutory defect. These modifications are described below.

PROPOSED COLLECTION SYSTEMS

SYSTEM 1

In its March 16, 1977 testimony before the Committee on House Administration, the Commission (represented by Vice-Chairman Harris, Commissioner Springer, General Counsel Oldaker, and Assistant General Counsel Swillinger) indicated that the reverse checkoff could be utilized if it was one of several means by which an individual might become an NEA member. The right of an individual to pay directly his or her membership dues in cash winthout a NEA-PAC contribution was conceded to be an acceptable alternative (T. at 72-73, 85-86, 94). Using this testimony as a point of departure, the NEA has developed and submits to the Commission for its approval, the following system for collecting from its members political contributions to the NEA-PAC:

1. *New NEA Members and NEA Members Who Are Re-enrolled Annually.* Except as otherwise provided in Paragraph 4 below, an individual who otherwise is eligible for NEA membership may use any one of the following methods to become an NEA member:

(a) The individual may at the time of NEA enrollment pay the full amount of his or her NEA annual dues in cash or by check. An individual who chooses this method may be asked at the time of enrollment to make a voluntary contribution to the NEA-PAC, and will be informed that such a contribution is not required as a condition of NEA membership. Unless an individual affirmatively agrees to make a NEA-PAC contribution, it will not be included in the amount which he or she must pay to become an NEA member. Any subsequent solicitation during the membership year will be made in the same manner. This method is referred to hereinafter as the "annual cash payment option."

(b) The individual may pay his or her NEA annual dues in several installments (the precise number of which may vary from state to state but will in no case be less than three) in cash or by check. An individual who chooses this method may be asked at the time of his or her enrollment to make a voluntary contribution to the NEA-PAC and will be informed that such a contribution is not required as a condition of NEA membership. Unless an individual affirmatively agrees to make a NEA-PAC contribution, it will not be included in the amount which he or she must pay to become an NEA member. Any subsequent solicitation during the membership year will be made in the same manner. This method is referred to hereinafter as the "installment cash payment option."

(c) The individual may at the time of NEA enrollment agree to pay his or her NEA annual dues by means of payroll deduction. In order to avoid checkoffs of different amounts for individuals employed in the same school district, the total amount checked off will include, in addition to dues, an amount identified as a voluntary contribution to the NEA-PAC. The individual will be informed of his or her right not to make such a contribution, and that, upon written request, an amount equal to the NEA-PAC contribution promptly will be paid to him or her. This system is referred to hereinafter as the "reverse checkoff."

Prior to being enrolled as an NEA member, an individual will be informed that the foregoing methods are available to him or her, and afforded an opportunity to choose the method that he or she prefers.

2. *NEA Members Who Have "Continuous" Membership.* Except as otherwise provided in Paragraph 4 below, any current NEA member who has "continuous" membership (i.e., whose membership continues from membership year to membership year, absent withdrawal) will be informed prior to each membership year that he or she may use any of the methods set forth in Paragraph 1 above to pay his or her NEA annual dues.

3. *Individuals Required to Pay a Service Fee to the NEA.* Except as otherwise provided in Paragraph 4 below, a non-member of the NEA who is required by statute or contract to pay a fee to the NEA to offset the costs of collective bargaining representation (hereinafter a "service fee"), may use any of the methods set forth in Paragraph 1 above to pay his or her service fee.

4. *Individuals Required to Use a Checkoff.* If an individual is required by statute or contract to pay membership dues or a service fee to the NEA by means of payroll deduction, thereby precluding use of the annual or installment cash payment option, a contribution to the NEA-PAC will not be included in the checkoff unless the individual affirmatively indicates that such a contribution may be included.

5. *Choice of Method.* The NEA-PAC will not accept any contributions obtained through a reverse checkoff unless the individual has been informed of the methods set forth in Paragraph 1 above and afforded an opportunity to choose the method that he or she prefers.

The foregoing is precisely the type of collection system which the Commission sanctioned in its March 16 testimony before the Congressional Committee, but the Commission did include one caveat. It stated that the alternative means by which an individual might become an NEA member could not be so burdensome as to the illusory (T. at 85-86, 94). Although we find it difficult to believe that three payments per year of some $12 each could be deemed burdensome, particularly when the average annual teacher's salary is in excess of $13,000, we would be willing, if necessary, to increase the number of installments and reduce even further the amount an individual would have to pay at any one time under the installment cash payment option.

In this letter we have made frequent reference to the position taken by the Commission before the Congressional Committee, and our reasons for doing so should be understood.

The reverse checkoff was the focal point of the March 16 hearing and the statements made by the Commission regarding the circumstances under which it could be used were a major factor in the Committee's decision not to recommend to the full House of Representatives disapproval of the Commission's proposed rules and regulations. In short, the hearing constitutes a form of "legislative history" which must properly be read as indicating a congressional intent to construe the Act as permitting the type of collection system proposed above.

A second, and more important reason is that the position taken by the Commission at the Committee hearing is legally sound. Since under the collection system proposed above an individual could avoid even the minimal burden of requesting a rebate simply by paying his or her NEA dues in cash or by check, a NEA-PAC contribution could in no sense be a "condition of membership." The deduction of the $1 (which in any event is offset by the rebate) is at most a condition of utilizing payroll deduction to pay NEA dues, and payroll deduction simply is an administrative convenience that the NEA is under no obligation to provide.

Operation 31-10 90-8 folio 1403 machine 52

Nor does the proposed system run afoul of the Act's prohibition against involuntary contributions. In its March 15 testimony before the Congressional Committee the Commission essentially conceded that the reverse checkoff, even without the cash payment options, was not subject to attack on voluntariness grounds (T. at 69-70, 97, 99). The availability of the options would, if anything reduce rather than increase vulnerability in this regard.

SYSTEM 2

Unlike most other employee organizations, the NEA has an annual membership structure. An individual who joins the NEA agrees to pay dues for a full membership year, which runs from September 1 through the following August 31. Under the reverse checkoff as previously operated, the total amount checked off included, in addition to the NEA annual dues, an additional $1 which was identified as a voluntary contribution to the NEA-PAC. If an individual chose not to make such a contribution, the full $1 was paid to him or her promptly and in most cases within a few months after the start of the membership year (although at the time of payment only about $20-30 actually had been checked off).

In contending that the reverse checkoff violates the "condition of membership" prohibition in the Act, the Commission has cited the fact that the individual does not receive the $1 until after at least some part of the NEA-PAC deduction has been made. In order to deal with this objection, and still meet the requirement of many boards of education that the same amount be deducted for all members employed in the school district, the NEA requests Commission approval of the following collection system:

The total amount deducted would continue to include $1 in addition to NEA annual dues. And, again as before, the individual would be informed of his or her right not to make such a contribution to the NEA-PAC and that, upon request, an amount equal to the NEA-PAC contribution would be paid to him or her. However, unlike the prior system, an individual who did not wish to make a NEA-PAC contribution would be paid the entire $1 in cash or by check at the time of enrollment, or where there is "continuous" membership, before the beginning of the membership year.

Since the individual would receive the entire $1 prior to the commencement of his or her membership for the year in question, there would in effect be a pre-membership reimbursement system, and the subsequent deduction could in no sense constitute a condition of membership. Moreover, these dollars would never even become involved in the NEA-PAC financing mechanism. The NEA, rather than the NEA-PAC, would pay the $1 to the prospective member and the amount deducted would be forwarded directly to the NEA as reimbursement. In essence, the NEA would be advancing $1 to the individual prior to his or her becoming a member and the individual would be paying the NEA back on a monthly basis throughout the membership year.

[1] The letter "T" followed by numbers refers to pages in the transcript of the March 16 hearing.

CONCLUSION

The NEA submits that political contributions obtained through either of the two collection systems described above would not violate the "condition of membership" prohibition or any other provision of the Act, and respectfully requests an advisory opinion from the Commission to this effect.

Sincerely,

ROBERT H. CHANIN,
Deputy Executive Director and General Counsel.

Dated: August 3, 1977.

THOMAS E. HARRIS,
Chairman for the Federal Election Commission.

DEPARTMENT OF STATE

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United States

DEPARTMENT OF STATE

[Public Notice 560]

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits to Fish Off the Coasts of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Applications for fishing during 1977 have been received from the Government of the Union of the Soviet Socialist Republics, and are published herewith.

Dated: July 28, 1977.

LARRY L. SNEAD,
Acting Director, Office of Fisheries Affairs.

COMPLIANCE WITH THE NATIONAL ENVIRNOMENTAL POLICY ACT, 1969; USE OF CHANNEL MODIFICATION AS A MEANS OF WATER MANAGEMENT; AND GUIDE FOR ENVIRONMENTAL ASSESSMENT

General Guidelines and Procedures

Title 7—Agriculture

CHAPTER VI—SOIL CONSERVATION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER F—SUPPORT ACTIVITIES

PART 650—COMPLIANCE WITH NEPA

General Guidelines

AGENCY: U.S. Department of Agriculture, Soil Conservation Service (SCS).

ACTION: Final rule.

SUMMARY: This revised rule prescribes the general guidelines for SCS's compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)). These revised rules are intended to streamline the NEPA process making the environmental impact statement a more integral part of the decisionmaking process. Sections 650.10 and 650.11 are not being used at present.

EFFECTIVE DATE: August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

R. M. Davis, Administrator, Soil Conservation Service, U.S. Department of Agriculture, P.O. Box 2890, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On February 8, 1977, the Soil Conservation Service published in the FEDERAL REGISTER (42 FR 7959) proposed revisions of its rules for the preparation of environmental impact statements (EIS). During the 30-day commenting period ten (10) letters of comment were received from four (4) Federal Agencies; four (4) state agencies, one (1) conservation law foundation; and one (1) national newspaper association. All written comments were given consideration in developing the final guidelines. The full text of all comments received is on file and available for public inspection in:

Room 6105, South Agriculture Building, Environmental Services Division, Soil Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20013

The principal points raised by those submitting written comments and the response of the SCS to each, are as follows:

Comment: It was pointed out that the proposed regulations should be significantly changed to more accurately reflect the goals of NEPA.

Respone: Numerous subsections of 7 CFR Part 650 have been changed. See the response to the other specific comments for a discussion of the changes made. Title 7 CFR Part 650 was prepared using the Council on Environmental Quality (CEQ) Guildelines, 40 CFR Part 1500 as a guide, and adapted to meet the specific requirements of the SCS Federal actions.

Comment: Since SCS provides technical assistance as well as financial assistance, the rationale for limiting the applicability of the regulations should be discussed.

Response: NEPA applies to all of SCS's assistance whether it be financial, technical, or both. However, Part 650, Subpart A, applies only to SCS's implementation of section 102(2)(C) of NEPA for those project-type actions which may lead to a decision of whether or not to prepare an EIS. SCS compliance with NEPA in its nonproject-type Federal assistance programs is or will be addressed in rules published for each program.

Comment: A question was raised concerning conservation districts and local sponsors being local government units.

Response: Conservation districts are created by State statute as subdivisions of State government. Organizations must have authority granted by State statute to install, operate and maintain measures prior to being accepted as sponsors.

Comment: In order to capture the spirit of NEPA, §§ 650.3(d) and 650.8(b)(3) should be reworded to more fully define the environment. Socioeconomic aspects and civil rights impacts were suggested for inclusion.

Response: We agree. Subsections 650.3(d) and 650.8(b)(3) have been modified as suggested.

Comment: A requirement should be added that a minimum of 90-days should elapse after filing a draft EIS with CEQ before administrative action can be taken.

Response: No change has been made relating to the 90-day waiting period. The preparation and review processes used in SCS exceed 90 days after a draft EIS has been made available to the public. The more significant 30-day waiting period after a final EIS has been made available to the public is addressed in § 650.9(d).

Comment: Specific references to laws and statutes other than NEPA should be included. The suggestions included the Endangered Species Act, the Wild and Scenic Rivers Act, the Coastal Zone Management Act, the National Historic Preservation Act, Executive Order 11593, and the Archeological and Historic Preservation Act.

Response: Subsection 650.1 as now worded covers environmentally related activities of other Federal agencies. The SCS implicitly follows laws, executive orders, court orders, and the rules and regulations of other Federal agencies which impact on SCS-assisted actions. Reference to each specific authorization is not repeated in 7 CFR Part 650 to avoid duplication.

Comment: Subsection 650.3(c) should be modified to include measures installed on public lands.

Response: Subsection 650.3(c) has been modified as suggested.

Comment: Subsection 650.4(b) should include the climate and cultural resources. Furthermore, "future uses" should be expanded.

Response: Subsection 650.4(b) has been reworded to reflect "alternative futures." Specific references to climate and cultural resources have not been incorporated. This section is intended to reflect the significant existence or resources present. To identify only a few resources would imply that other equally important resources are not significant.

Comment: Subsection 650.4(c) should be modified to reflect alternative plans ranging from "no development" through "total development."

Response: SCS uses an interdisciplinary environmental assessment and planning proceduce which emphasizes a broad interest in the planning process. Water resource projects are formulated using the Water Resources Council's Principles and Standards as a planning tool (38 FR 24778). Because of the vast differences in resources in different regions of the country, it is not practical to constrain interdisciplinary planners in the alternatives to study. The elements identified in § 650.4 (a) through (d) are planning principles accepted by planners in general. Therefore, no change has been made in this section.

Comment: Subsections 650.4(d) and 650.5 (a) and (b) should be modified so agencies representing various interests can have access not only to the final plan for evaluation, but also to the alternative plans and the scoring mechanism by which the alternatives were ranked to evaluate potential tradeoffs.

Response: SCS uses an interdisciplinary approach in planning and assessing environmental impacts of proposed Federal actions. Other agencies, groups, and individuals with expertise or special interest are invited to participate in the environmental assessment and planning process. Information collected and analyzed is public information. Agencies, groups, and individuals are welcome to review information and urged to participate in the planning process consistent with 7 CFR Part 661.

Comment: Subsection 650.6(c) should be modified to have public notices published in a newspaper for three consecutive weeks prior to a public meeting. Furthermore, § 650.9(a)(3) should be made consistent with § 650.6(c).

Response: Public notices are to be published in a newspaper serving the area where the action is proposed prior to a public meeting or hearing. Where statutes require a longer or different notification procedure, the statutes will be followed. SCS will notify people of impending public action. Subsection 650.9(a)(3) concerns the availability of a draft EIS and a single public announcement is sufficient.

Comment: Section 650.7 places the responsibility upon the responsible Federal official (RFO) for determining whether or not a proposed Federal action is a major action significantly affecting the human environment within the meaning of section 102(2)(C) of NEPA. Specific criteria should be added to clearly define when an EIS is or is not needed.

Response: The intent of § 650.7 is the preparation of an environmental assessment by an interdisciplinary team for each proposed Federal action. Based upon the actual case-by-case assessment, a decision is made by the RFO on the need for an EIS. The decision is based on environmental impacts, accumulated impacts, water quality, effects on cultural resources, social and civil rights impacts,

and other effects likely to result from a proposed federally assisted action. However, § 650.7(a) has been modified to state that major Federal actions involving realignment or increasing channel capacities, and those watershed projects requiring congressional action, after the effective date of these rules, will automatically require the preparation of an EIS. A uniform national criteria covering environmental amenities cannot realistically be made. Individual actions need to be assessed on a case-by-case basis and a determination made concerning impacts upon existing resources. The RFO will counsel with other Federal, State, and local agencies, as well as groups and individuals, prior to making a decision concerning the need for an EIS.

Comment: Subsections 650.7(a) (1) through (5) should be reworded to include concern for lands capable of agricultural production, and for cultural resources as factors to consider in determining the need for an EIS.

Response: We agree. Subsections 650.7 (a) (1) through (5) have been modified as suggested.

Comment: The negative declaration has been eliminated as a NEPA procedure. In its place is a notice of intent which will not be circulated. This should be changed.

Response: We agree. Subsection 650.7 (c) has been modified to require the notice of intent to be prepared, published in the FEDERAL REGISTER, and circulated to interested agencies and individuals when a decision has been made to prepare an EIS. Two new §§ 650.3 (f) and (g) titled Environmental Impact Appraisal and Notice of Intent have been added to define these terms.

Comment: All environmental considerations of a Federal action should be evaluated simultaneously in a single document. It would then be easier to determine the accumulated impacts caused by the proposed Federal action.

Response: We agree with the concept that environmental considerations should be evaluated simultaneously for interrelated proposed actions. Title 7 CFR Part 650 contains attempts to implement this concept.

Comment: Subsection 650.8(b)(6) should be revised to address the need to analyze and describe the cumulative effects of all proposed actions in the area, whether relative to the proposed SCS action or not.

Response: The SCS regulations are intended to include those proposed actions which are similar in nature and those projects whose impacts when accumulated with the impacts resulting from SCS actions would contribute to the effects on the impacted area.

Comment: Subsections 650.8 (a) and (b) appear to be prepared consistent with CEQ's memorandum to heads of agencies dated February 10, 1976, which confirms the concept to reduce the volume of an EIS so that it can be more easily used in the decisionmaking process. The memorandum also contained several recommendations for reducing the volume of the EIS without sacrificing the quality of information presented. We suggest that these recommendations be included in the regulations in order to maintain the quality of the EIS.

Response: We agree. Subsections 650.8 (a) and (b) have been reworded to be more consistent with CEQ's memorandum. The entire revision of Part 650 is designed to streamline the EIS. The ultimate product of the revised guidelines will be a document which contributes significantly to the decisionmaking process.

Comment: Value judgments have been written into the compliance with NEPA guidelines in lieu of making scientific studies and conclusions.

Response: The entire NEPA process involves making an interdisciplinary environmental assessment. Recommendations and conclusions resulting from the environmental assessment form the basis for deciding on the need for an EIS and provide the decision maker with documented facts on environmental impacts discussed in an EIS.

Comment: Subsection 650.9(a) does not require that copies of the EIS be furnished to the Environmental Protection Agency (EPA) for review and comment in accordance with section 309 of the Clean Air Act and section 1500.9(b) of the CEQ Guidelines.

Response: Subsection 650.9(a)(1)(i) states that "Federal agencies who have jurisdiction by law * * *." This includes EPA.

Comment: "Prime" should be deleted from subsection 650.20(c)(7) so that all agricultural land is included.

Response: Agricultural production lost in Federal actions may be a conscious tradeoff made by those responsible for the action. However, prime farmland is a fixed resource which is diminishing at an accelerated rate and should be protected to the fullest extent practicable.

Having considered the comments received, and other relevant information, the Administrator concludes that the proposed rules, with changes, should be adopted as set forth below. Accordingly, Title 7 Chapter VI, Subchapter F, Part 650, Subpart A, and § 650.20 of Subpart B are hereby amended, and will be effective on August 8, 1977.

Dated: August 2, 1977.

AUTHORITY: 42 U.S.C. 4332(2)(C); Executive Order 11514, 16 U.S.C. 1001–1008; 7 U.S.C. 1010–1011; 16 U.S.C. 590 a–f, q; 7 CFR 2.62.

Subpart A—Preparation of Environmental Impact Statements for Project-Type Actions—Guidelines

§ 650.1 Purpose.

This part prescribes SCS guidelines for the preparation, coordination, and review of environmental impact statements (EIS's) as required by section 102(2)(C) of NEPA of 1969. These guidelines are consistent with Executive Order 11514, dated March 5, 1970, as amended and the CEQ Guidelines for Preparation of Environmental Impact Statements, 40 CFR Part 1500. The assessment of environmental quality in SCS-assisted programs is carried out in harmony with the activities and procedures of those to whom assistance is provided. The SCS Administrator maintains liaison with CEQ. SCS policies and procedures relating to NEPA are coordinated with CEQ. SCS-assisted projects are also coordinated with Federal, State, and local agencies and other concerned individuals and groups to ensure the proper consideration of environmental values.

§ 650.2 Applicability.

(a) This part applies to those land and water resource projects or federally assisted actions for which State and local units of government receive Federal financial assistance from SCS. (7 CFR Parts 620–623 and 640–643). These regulations are effective on the date of publication of the final regulations.

(b) These regulations shall not apply to projects or independent portions of projects for which an environmental assessment has been made and an EIS or negative declaration filed with CEQ in accordance with the previous SCS rules, 7 CFR Part 650 (41 FR 24975) dated June 22, 1976. For those projects the June 22, 1976, guidelines will be utilized until completion.

§ 650.3 Definition of terms.

(a) *Environmental assessment.* The environmental assessment is an inseparable part of the planning process. The environmental assessment provides a range of concise and pertinent environmental data as well as social and economic information to indicate the need for an EIS, resources available, and alternatives for decisionmaking on the use and development of resources.

(b) *Federally assisted actions.* An action which is formulated and carried out by local units of government with financial assistance provided by the SCS. Measures located on nonfederal land are under the jurisdiction and control of the local units of government. Measures located on Federal land are under the jurisdiction and control of the

Federal land managing agency. (See 7 CFR 620.21.)

(c) *Responsible Federal officials.* The SCS Administrator is the responsible Federal official (RFO) for compliance with NEPA regarding proposed legislation, programs, legislative reports, regulations, and program EIS's. SCS State Conservationists (STC's) are the RFO's for complying with the provisions of NEPA in other SCS-assisted actions. When an SCS-assisted major Federal action involves more than one State, the Administrator will designate one STC as the RFO for that action.

(d) *Interdisciplinary planning.* SCS uses an interdisciplinary environmental assessment and planning process in which individuals and groups having different technical expertise jointly assess existing future environmental quality. The interdisciplinary group considers complexity of problems, structure, and function of natural resources, and the economic, social, and other effects of alternative actions. Effective interdisciplinary planning is closely related to public involvement in the planning process.

(e) *Statement of findings.* A statement of findings is a concise written rationale by the RFO regarding implementation of the proposed action. It will briefly describe significant concerns that were encountered in the decisionmaking process. The statement of findings will be prepared on proposed actions requiring an EIS after the 30-day administrative action period has expired following the notice of availability of the final EIS as published in the FEDERAL REGISTER by CEQ. The statement of findings will be signed and dated by the STC.

(f) *Environmental impact appraisal.* For proposed project actions for which it has been determined that an EIS will not be prepared, an environmental impact appraisal (EIA) will be prepared to document the rationale for not preparing an EIS. The EIA will respond to the five questions in § 650.7(a) (1) through (5). It will be dated and signed by the STC.

(g) *Notice of intent.* A notice of intent is a brief statement inviting public reaction to the decision by the RFO whether or not to prepare an EIS for a major Federal action. The notice of intent will be published in the FEDERAL REGISTER, circulated to interested agencies, groups, individuals, and published in a newspaper(s) serving the area of the proposed action.

(h) *Administrative action.* For purposes of these guidelines, the signing of a statement of findings constitutes administrative action on those actions where an EIS is prepared.

§ 650.4 Environmental assessment in the planning process.

Environmental assessment and initial planning efforts for land and water resource projects are interrelated and commence simultaneously. Procedures for making environmental assessments are contained in SCS's, "Guide for Environmental Assessment," issued in March 1977. This combined effort will utilize an interdisciplinary approach. Factors to be considered in the assessment are dependent on the planning objectives. The environmental assessment continues through the planning process. The interrelated environmental assessment and planning elements are as follows:

(a) Identify the planning objectives and study needs of the sponsoring local organizations. Emphasize that environmental quality objectives are coequal with national economic development objectives.

(b) Inventory and evaluate the resource base giving due consideration to alternative futures. Environmental factors are to be studied consistent with the planning objectives.

(c) Formulate alternative plans and display impacts taking into consideration Floodplain Management (Executive Order 11988) and Protection of Wetlands (Executive Order 11990). Alternatives affecting flood plains or wetlands will be considered only where there is no practicable other way of solving the problem and the proposal includes all practical measures to minimize harm to these resources.

(d) Analyze and compare alternative plans. Alternative plans will reflect environmental considerations as appropriate.

§ 650.5 Obtaining information during environmental assessment.

(a) *Use of available data.* SCS will make use of available reports, plans, and publications which relate to the environmental issues involved.

(b) *Study by SCS.* The SCS will perform surveys and investigations using an interdisciplinary team. Information related to flood plain management and protection of wetlands will be incorporated into the environmental assessment.

(c) *Study by others.* SCS will determine if additional studies are necessary and will enter into contracts or other arrangements with qualified organizations or individuals to produce needed environmental data.

§ 650.6 Public involvement during environmental assessment.

(a) *General considerations for developing public involvement*—(1) *Identification of interested public.* Public involvement begins with the initial steps of the interrelated environmental assessment and planning process. The interested public consisting of, but not limited to individuals, groups, organizations, and governmental agencies, are to be encouraged to participate in and contribute to the interrelated planning process and environmental assessment activities.

(2) *Early public review.* Public involvement will include an early discussion of flood plain management and protection of wetlands, where appropriate. Where involved, these resources will be inventoried and presented at public meetings and in public notices.

(3) *Documentation.* A reviewable record of public involvement in the environmental assessment and planning process will be maintained by the RFO.

(b) *Public meetings.* The RFO, after consultation with the sponsors, will determine when public meetings or hearings are to be held. Environmental information will be presented and discussed along with other appropriate information. To the extent practical, pertinent information should be made available prior to the meetings.

(c) *Public notices.* Notice of each public meeting or hearing discussed in paragraph (b) of this section will be published in a newspaper(s) serving the area where the action is proposed. Where official action by the local units of government involved in the proposed is governed by State statute, the public notice and mailing requirements of the statute will be followed.

§ 650.7 Criteria for determining whether an EIS is to be prepared.

(a) *Actions which require an EIS.* (1) Major Federal actions which involve channel realignment or work to increase channel capacities.

(2) Watershed projects requiring congressional action after the effective date of these rules.

(3) All other actions which are determined to be major Federal actions significantly affecting the quality of the human environment.

(b) *Criteria for determining if an action is a major Federal action significantly affecting the quality of the human environment.* The RFO will determine the need for an EIS on an individual case basis. An EIS will be prepared if the proposed action is a major Federal action significantly affecting the quality of the human environment. An environmental assessment, using a systematic interdisciplinary analysis and evaluation of data and information responding to the five provisions of Section 102(2)(C) of NEPA, will assist the RFO in deciding if the action will require the preparation of an EIS.

The analysis and evaluation of environmental concerns will generate questions such as the following:

(1) *Environmental impact.* Will the proposed action significantly affect the quality of the human environment? e.g., significantly alter or destroy valuable wetlands, prime and unique farmland, cultural resources, threatened and endangered species, water quality, fish and wildlife habitats, wilderness and scenic areas, or perennial stream ecosystems?

(2) *Adverse environmental impacts which cannot be avoided.* What are the important environmental amenities that would be lost if the proposed action were implemented?

(3) *Alternatives.* Are there alternative methods that would achieve the planning objectives with essentially a similar commitment of resources while avoiding major adverse environmental impacts? e.g., flood plain management and protection of wetlands.

(4) *Short-term uses versus long-term productivity.* Will the proposed actions, when added to other similar actions, foreclose the enhancement of significant

long-term productivity as a tradeoff for short-term uses?

(5) *Commitment of resources.* Will the proposed action irreversibly and irretrievably commit the use of important resources? e.g., prime and unique farmland.

(c) *When to prepare an EIS.* If it is determined that the proposed action is a major Federal action that will generate significant adverse effects on the quality of the human environment, the RFO will prepare an EIS. As soon as the decision to prepare an EIS is made, the RFO will circulate a Notice of Intent. (See § 650.3(g).)

(d) *When an EIS is not prepared.* An EIS will not be prepared if the RFO determines, on the basis of the environmental assessment, that the proposed action is not a major Federal action, or is a major Federal action which will not significantly adversely affect the quality of the human environment. The RFO will distribute a notice of intent and an environmental impact appraisal to interested agencies and individuals. A notice of intent announcing the decision not to prepare an EIS, and the availability of the environmental impact appraisal, will be published in the FEDERAL REGISTER and in a newspaper(s) serving the area of the proposed action. Single copy requests for the environmental impact appraisal will be filled without charge. A charge may be made for multiple copy requests. Implementation of the proposed action will not be initiated until 30 days after the notice of intent has been published in the FEDERAL REGISTER.

(e) *Lead agency.* In certain instances, several Federal agencies may have program responsibilities relative to a major Federal action with significant impacts upon the quality of the human environment. If it is mutually decided that SCS is the lead agency, the RFO will coordinate the input of all concerned agencies in the development of the EIS. If it is mutually decided that another agency is the lead agency, SCS will cooperate in the development of an EIS. In actions involving several departments or agencies within USDA, the role of SCS will be determined in consultation with the USDA Office of the Coordinator of Environmental Quality Activities.

(f) *List of EIS's.* A current list of land and water resource projects on which EIS's are to be prepared is to be maintained by the STC.

(g) *EIS's for more than one project action.* The SCS, in certain instances will prepare an EIS covering several similar actions which are interrelated in purpose and scope. If the actions involve more than one state, the Administrator of SCS will designate one STC as the RFO.

§ 650.8 EIS format and content.

(a) *General.* The EIS should be written in concise and nontechnical language in order for it to be used as a tool in the decisionmaking process. The EIS is a public disclosure of the major environmental issues surrounding a proposed action as set forth in Section 102(2)(C) of NEPA to ensure that environmental factors are considered in decisions pertaining to the proposed action. The EIS should explain how the scope of the statement and its level of detail have been delineated in accordance with environmental issues and problems involved in the proposed action. Data and analyses in the EIS should be commensurate with the importance of the impact on the quality of the human environment as determined by the environmental analysis. Less important material should be summarized, consolidated, or simply referenced.

(b) *Sections to be included in the EIS.* The following sections will be included in the EIS. The RFO may include additional sections, maps, drawings, photographs, and other data.

(1) *Title page.*

(2) *Summary of proposed action, impacts, and alternatives.*

(3) *Environmental impact of the proposed action.* This section should contain a brief description of the environmental impacts both within and outside the planning area that may result if the proposed action is implemented. In general, the EIS will describe the impacts of the proposed action on cultural, physical, and natural resources; terrestrial and aquatic ecosystems; prime and unique farmland; and demographic and social effects, including civil rights impacts on minority groups and low-income persons.

(4) *Any adverse environmental effects which cannot be avoided should the proposal be implemented.* This section should analyze and describe those adverse impacts of the proposed action which are unavoidable.

(5) *Alternatives to the proposed action.* This section should contain an analysis and description of alternatives studied during the interrelated environmental assessment and the planning process. Environmental impacts of each alternative shall be described and appropriately displayed.

(6) *The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity.* This section should analyze and describe the cumulative effects of the proposed action when added to other similar actions, in an area or region. The long-term consequences on the environment should be described. This section should disclose the consequences of short-term uses of man's environment which subsequently may produce long-term impacts.

(7) *Any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented.* This section should identify the extent to which the proposed action will curtail or change man's use and enjoyment of resources within the planning area.
